Game Basics

Welcome to Springdale!

Sure, it's a great town with plenty of nice people. But something strange is going on. Odd supernatural beings called Yo-kai have flooded the streets, alleys, schools, and even the sewer system! Some are playful, others friendly, but some arrive with ill intent. All are unleashing craziness and shenanigans. Only you can get to the bottom of it!

The mysterious Yo-kai Watch! Use its Lens to see the crazy creatures running rampant in Springdale!

What are Yo-kai?

Yo-kai are strange spirit-like beings that normal people cannot see. They love pranks and causing trouble. They have mysterious powers that bring luck, both good and bad, to the humans around them. If somebody's acting weird, it just might be a Yo-kai trick!

The Eight Yo-kai Tribes

Yo-kai are divided into eight tribes, each with its own unique set of traits.

BRAVE

These cool, courageous creatures excel at fighting, especially physical combat.

MYSTERIOUS

With weird shapes and sizes, they are hard to predict and are strong in Yo-kai Techniques.

TOUGH

Rugged in body and spirit, they pair sturdy defense with powerful guarding abilities.

CHARMING

While very cute and even cuddly in appearance, they nevertheless tend to be speedy and sharp in combat.

HEARTFUL

These kind, full-hearted Yo-kai are infused with generous healing abilities.

SHADY

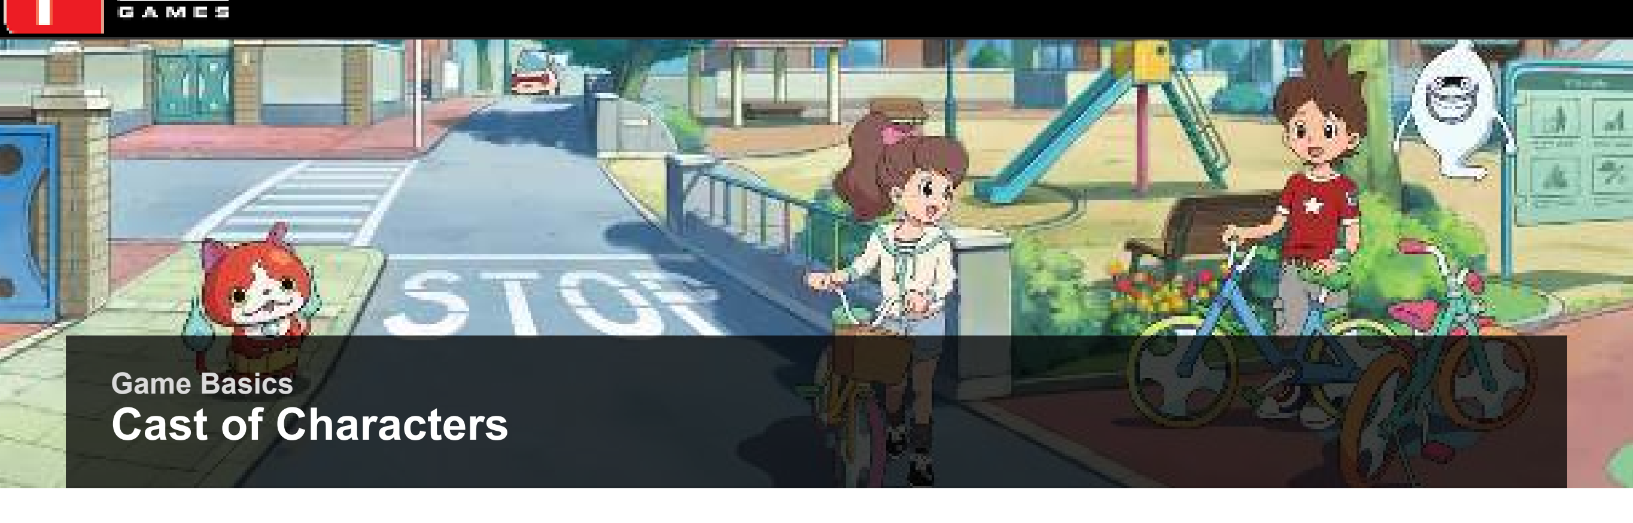
These dark-hearted Yo-kai often bring out the worst behavior in nearby humans.

EERIE

An odd, creepy-looking tribe, they are masters of inflicting status ailments.

SLIPPERY

These independent, free-thinking spirits have slimy, snakelike features. It's hard to grab these guys!



Cast of Characters

The Main Characters

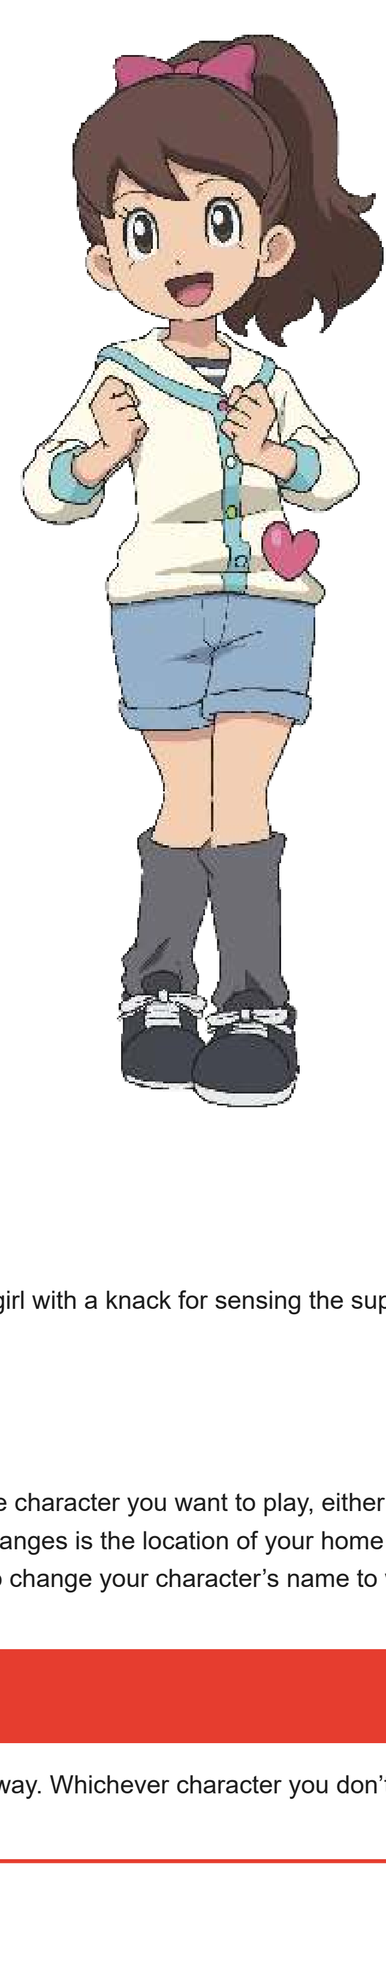
Full Name: Nathan Adams

A typical fifth-grader. Nate obtains the Yo-kai Watch from the Crank-a-kai machine he finds on Mt. Wildwood while hunting for insects.

Katie



Full Name: Katie Forester

Nate's classmate, a fifth-grade girl with a knack for sensing the supernatural. Katie obtains her Yo-kai Watch on Mt. Wildwood, as well.

It's Your Choice!

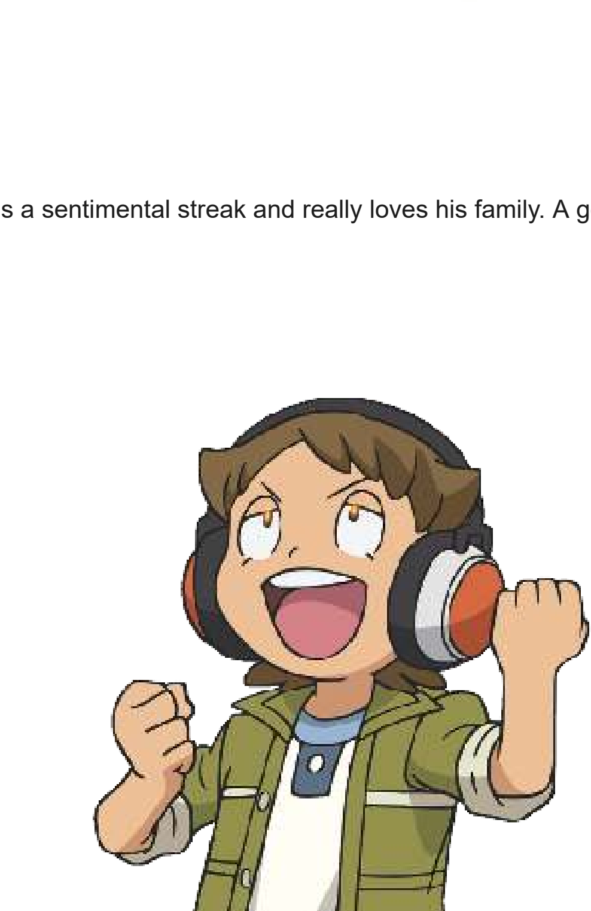
At the start of the game, pick the character you want to play, either Nate or Katie. The story's the same regardless of your selection. The only thing that changes is the location of your home and some of the dialog during events, so feel free to choose either one. You can also change your character's name to whatever you like.

Nate or Katie?

The game's the same either way. Whichever character you don't choose appears in-game as your classmate.

The Classmates

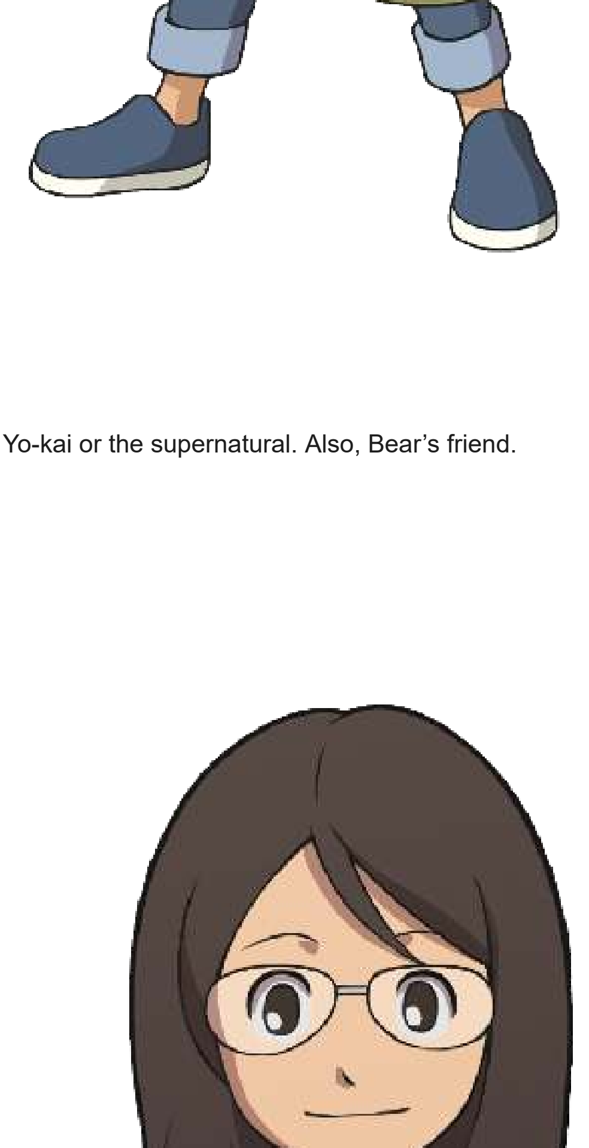
Bear



Full Name: Barnaby Bernstein

Somewhat of a bully, though he has a sentimental streak and really loves his family. A good guy deep down, maybe?

Eddie



Full Name: Edward Archer

A skeptic who doesn't believe in Yo-kai or the supernatural. Also, Bear's friend.

The Adults

Game Basics

Game Flow and Basic Controls

Here's a rundown of the basic game systems, controls, and how to start playing. Master this stuff, and you'll be well on your way to conquering Yo-kai Watch.

The main story consists of 11 chapters total. In general, you work your way through each one by engaging in the three main activities below. Additionally, you can pick up many sub-quests called Requests and Favors from folks around town. In most cases, you don't need to finish these sub-quests to finish the game, although there are a few exceptions.

The story unfolds across Springdale, your hero's hometown.

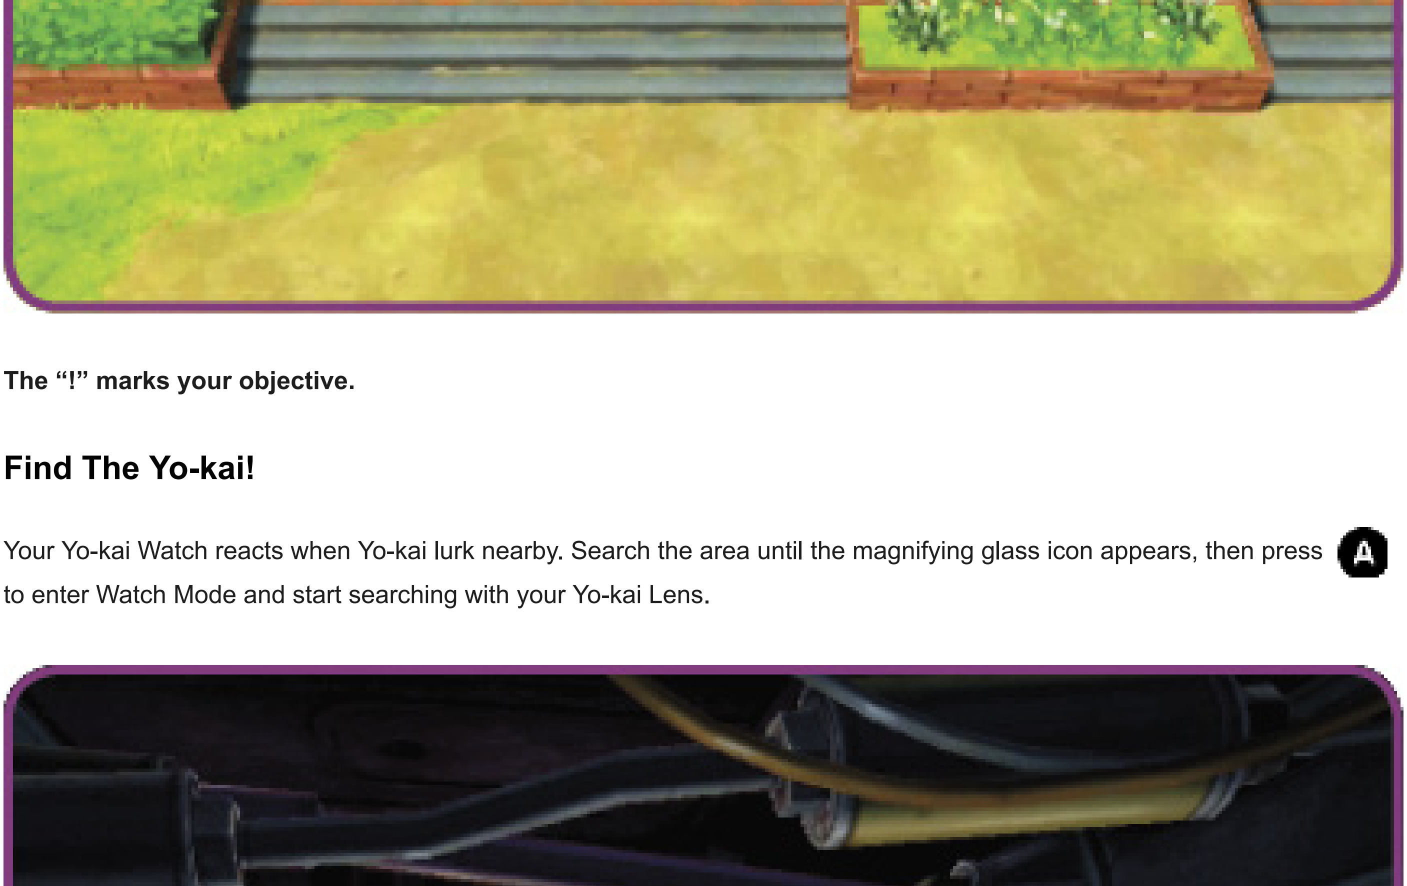
Guy

Not that anyone's crazy enough to check it out, though.

Your town is packed with residents full of observations, funny stories, problems, and requests.

Track Your Objectives!

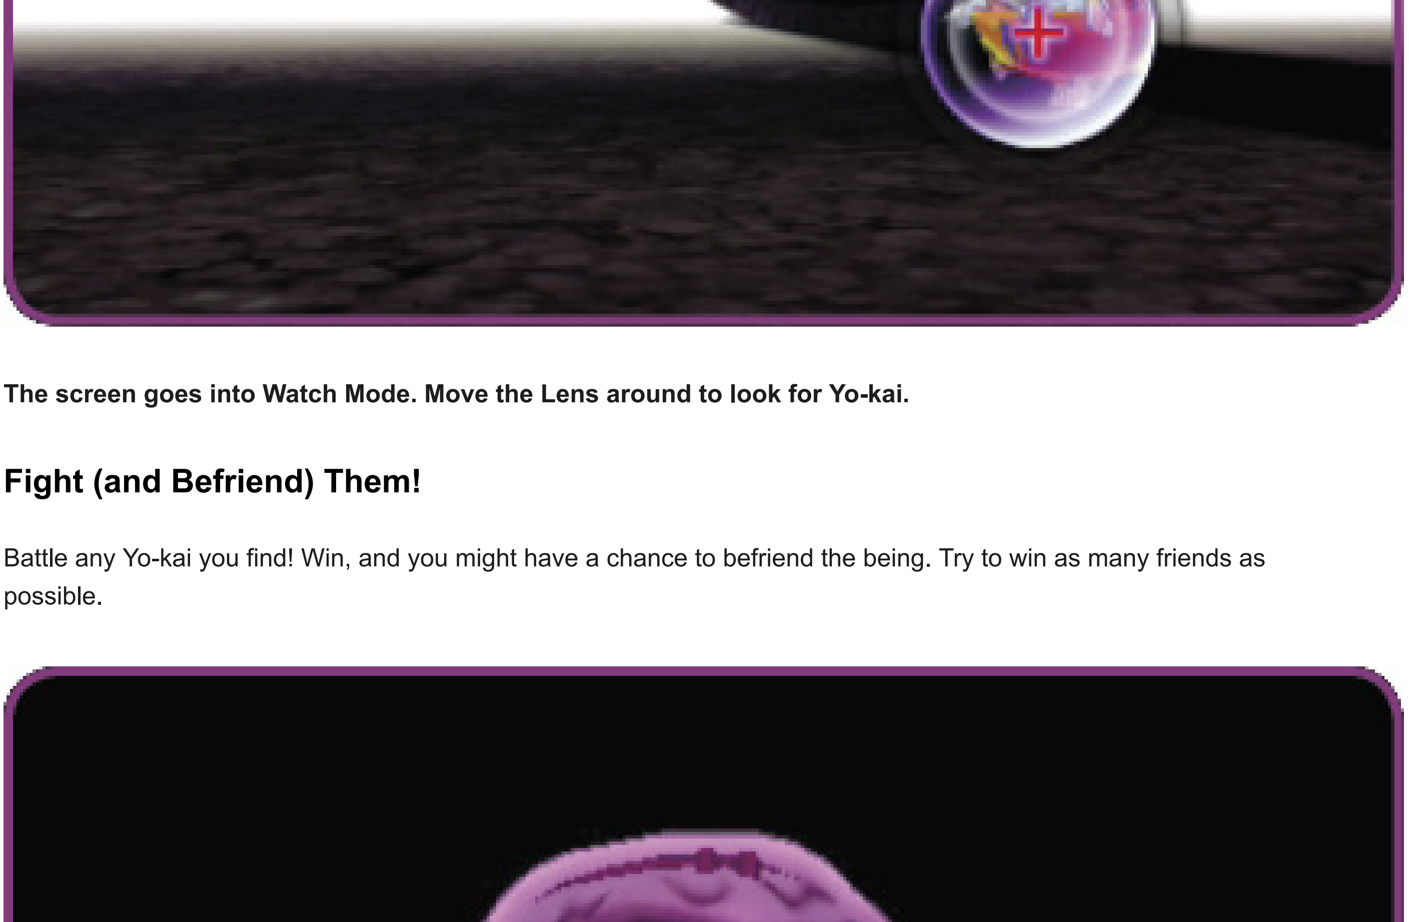
Move around town, tracking the target destination shown onscreen. When you arrive, talk to the person or examine the object or building there. What'll happen next?



The "!" marks your objective.

Find The Yo-kai!

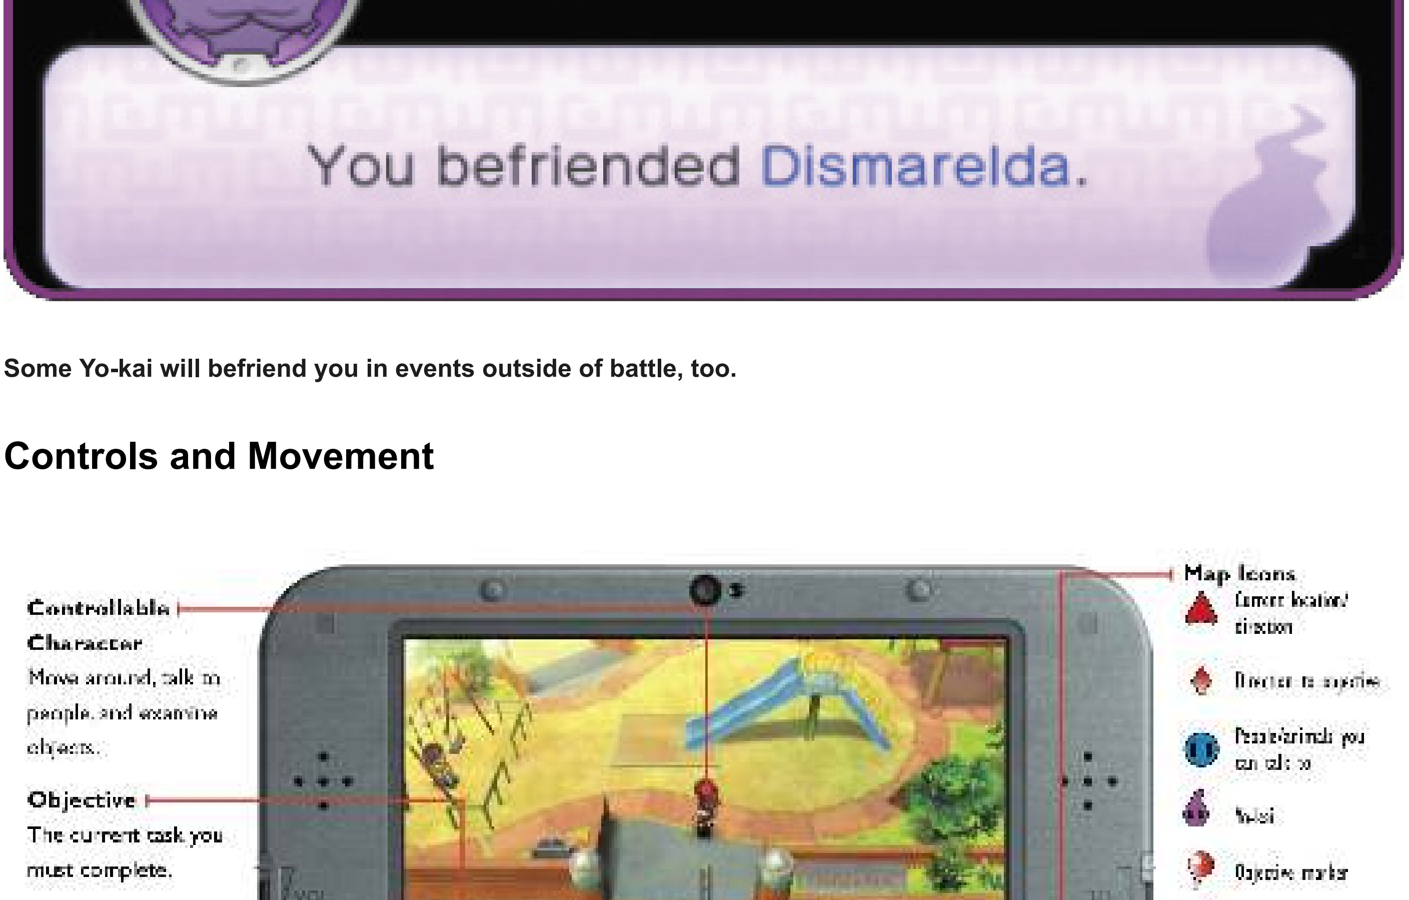
Your Yo-kai Watch reacts when Yo-kai lurk nearby. Search the area until the magnifying glass icon appears, then press Ⓐ to enter Watch Mode and start searching with your Yo-kai Lens.



The screen goes into Watch Mode. Move the Lens around to look for Yo-kai.

Fight (and Befriend) Them!

Battle any Yo-kai you find! Win, and you might have a chance to befriend the being. Try to win as many friends as possible.



You befriended Dismarelda.

Some Yo-kai will befriend you in events outside of battle, too.

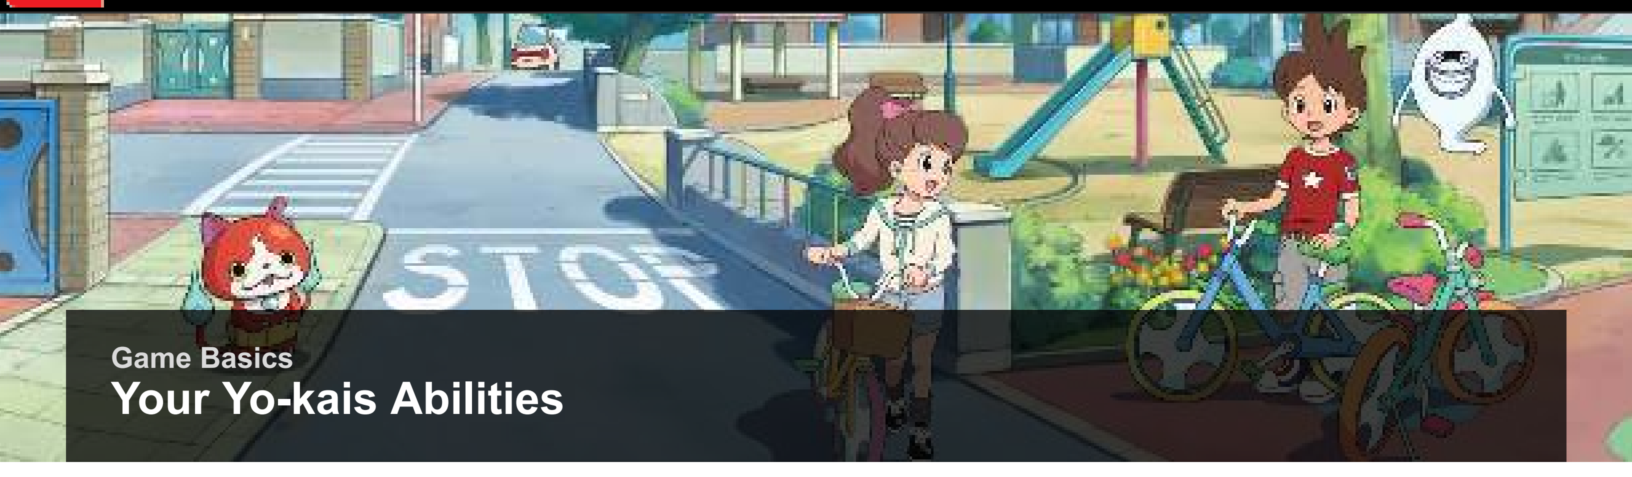
The gauge goes down as you dash around, then goes back up when you rest. Once the gauge turns red, you'll walk slower until it fills all the way back up.



Game Basics

Your Yo-kais Abilities

You can find and befriend a grand total of 218 Yo-kai. Every one of them has its own unique skills. Control them deftly enough, and you'll have a much easier time getting through the game. Let's start by taking a look at what kind of skills every Yo-kai has.

Stats

STR (Strength): Affects the damage that physical attacks deal.

DEF (Defense): Better defense reduces the damage you take from foes.

SPR (Spirit): The higher this is, the more effective the Yo-kai's Technique move will be.

SPD (Speed): Affects the turn order and the number of turns the Yo-kai gets in battle. Faster Yo-kai can get in more moves!

ATTD (Attitude)

Each Yo-kai features a personality with two distinct attitudes. These can greatly affect the actions it takes in battle and can reveal the Yo-kai's fighting style. (Tip: Giving a book to a Yo-kai can change its ATTD display.)

Skill

This special ability is automatically active during battle. Skills can vary widely, from offensive and defensive actions to moves that support or heal the rest of your party.

Battle Actions!

In battle, every Yo-kai has one action available in each of four different types of combat moves: Attack, Technique, Soultimate Move, and Inspirit. These actions don't change as the Yo-kai levels up, but the more you use them, the more powerful they become.

Attack

This is a physical attack targeted at an enemy Yo-kai. There are many kinds of attacks, from those that pack a major punch in one hit but don't hit often to those that deal just a bit of damage per strike but hit multiple times.

Technique

There are two types of Techniques: attacks infused with an elemental power like fire and lightning that damage foes, and recovery skills that heal your party's HP. These are never drained, and Yo-kai can use them as much as they like in battle.

Soultimate Move

Paws of Fury

When the Soul Meter is filled up in battle, your Yo-kai can charge up and launch a special Soultimate Move. Most of these actions damage your foes, but some boost your allies' stats or refill their HP.

Inspirit

A Yo-kai's Inspirit skill can spiritually "infect" an enemy Yo-kai and drain its stats. Inspiriting can also bestow good effects on Yo-kai allies—for example, by steadily refilling their HP gauges.

Elemental Effects

If you land an attack infused with a certain element on a foe weak against that element, you deal more damage than you would otherwise. Take advantage of this! There are six elements in all.

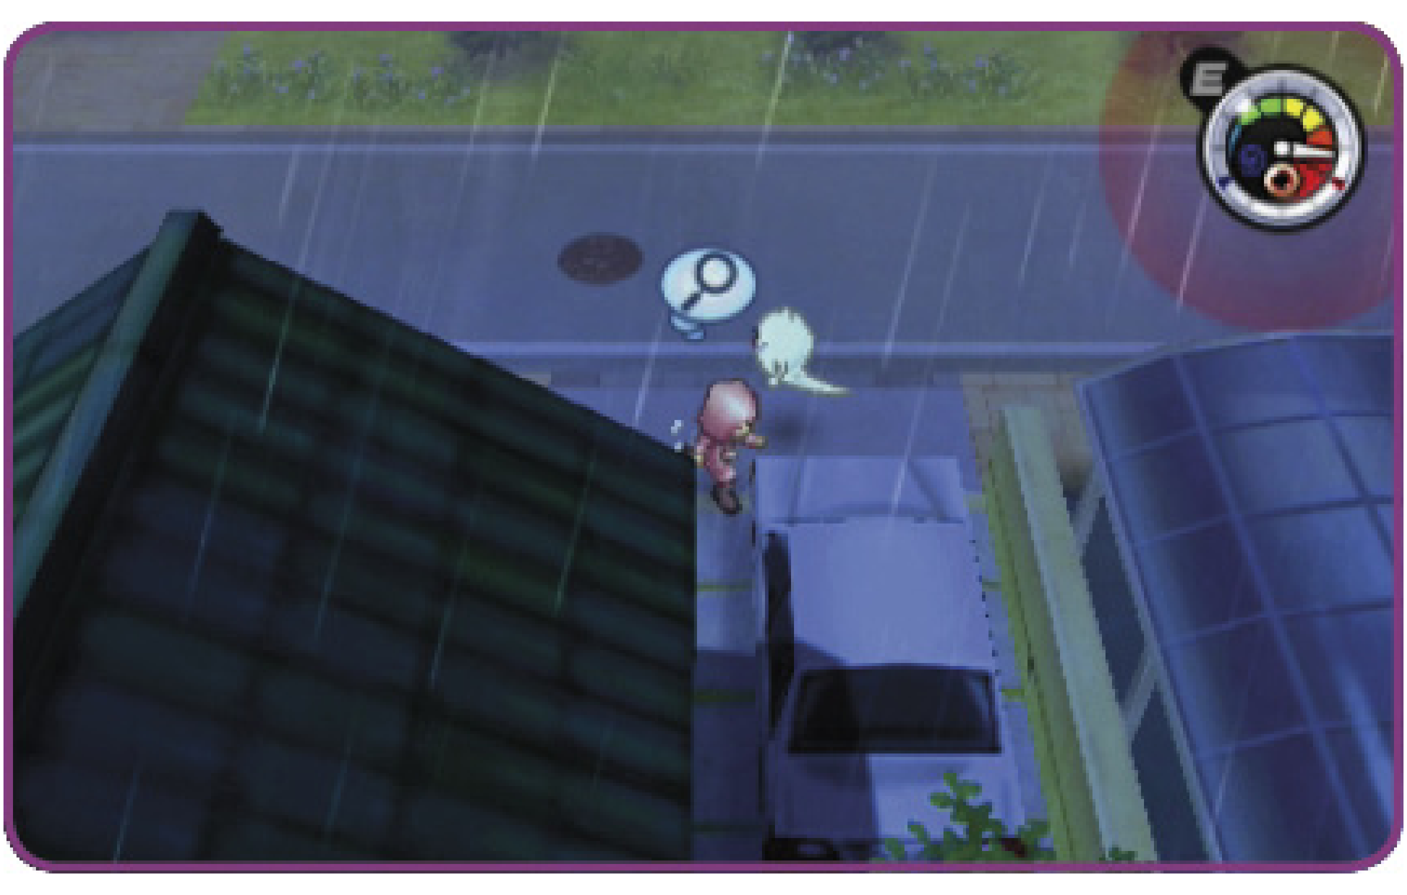
Game Basics

How Do You Find Yo-kai?

Yo-kai lurk in almost every nook and cranny around Springdale and its surrounding areas. Hit the town, and try to find as many as you can. Generally speaking, there are three ways to root them out. Once you do, it usually triggers a battle—but that's your chance to make the Yo-kai your friend!

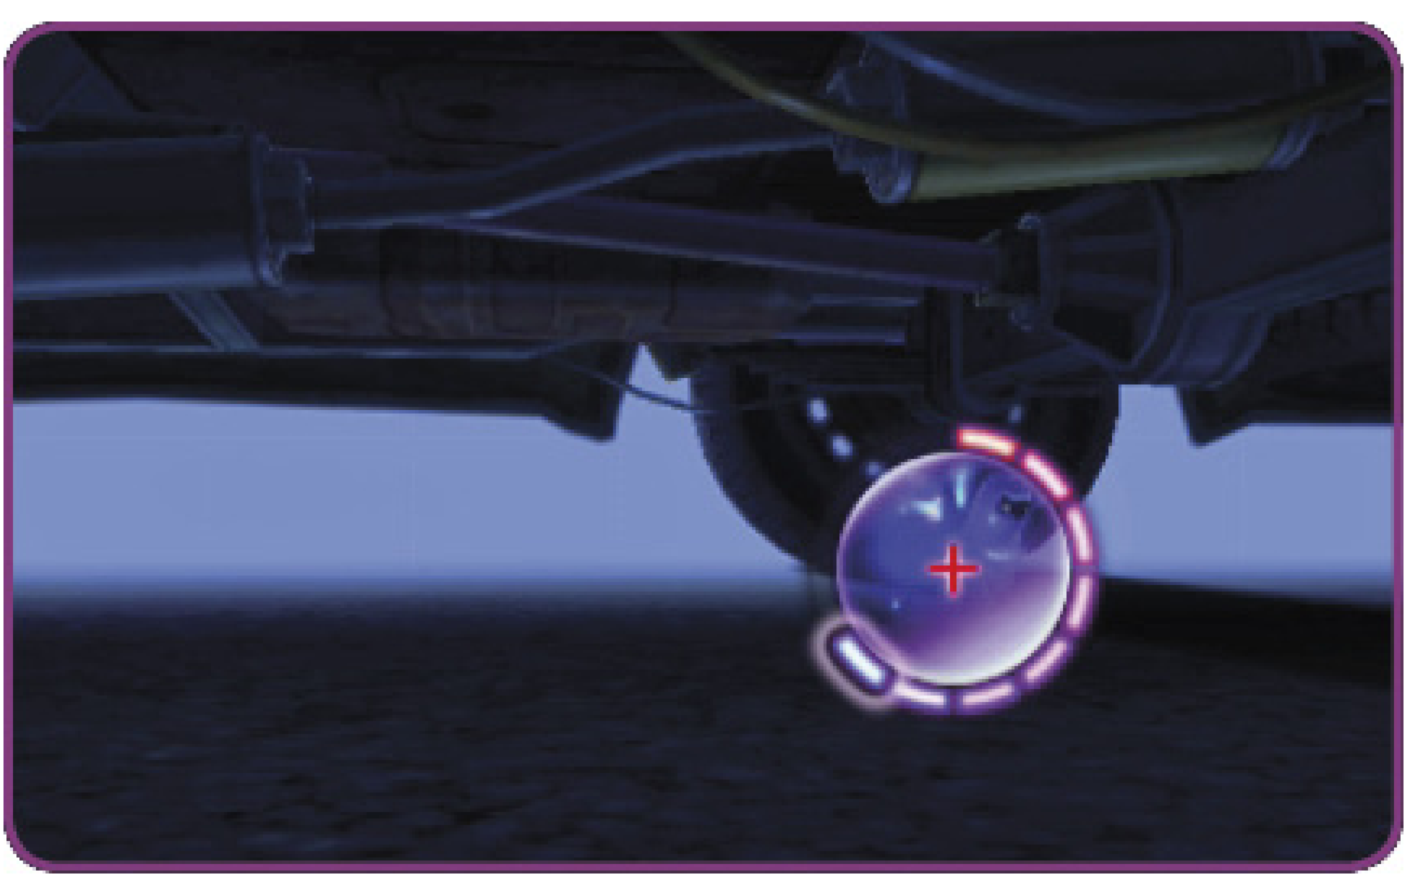
Use Watch Mode

If you're near a place with hidden Yo-kai like tall grass, an electric pole, or even a vending machine, your Yo-kai radar will go off. You may see the magnifying glass icon pop up onscreen. Press A and the view switches to Watch Mode, letting you search for Yo-kai with the Yo-kai Lens. Watch for the purple shimmer!

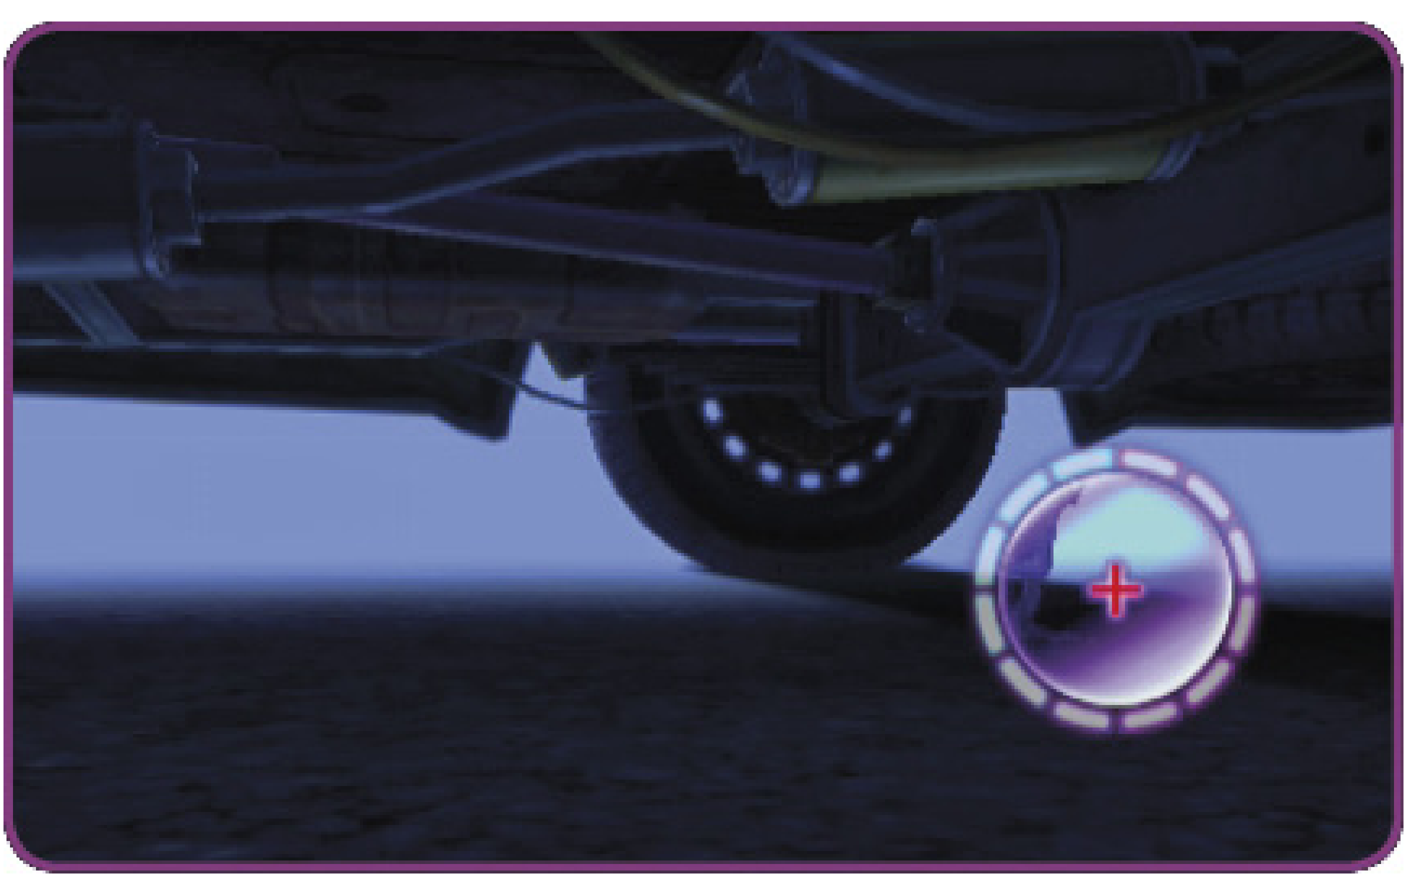


Look for Yo-kai in places where your Yo-kai Watch picks up a strong signal.

When your Lens reveals a Yo-kai in Watch Mode, you don't immediately go into battle. First, you must keep your Yo-kai Lens over the target until the gauge around the Lens fills up. Some Yo-kai try to flee when spotted! Stronger Yo-kai are better at evading your Lens, making it harder to get a grip on them.



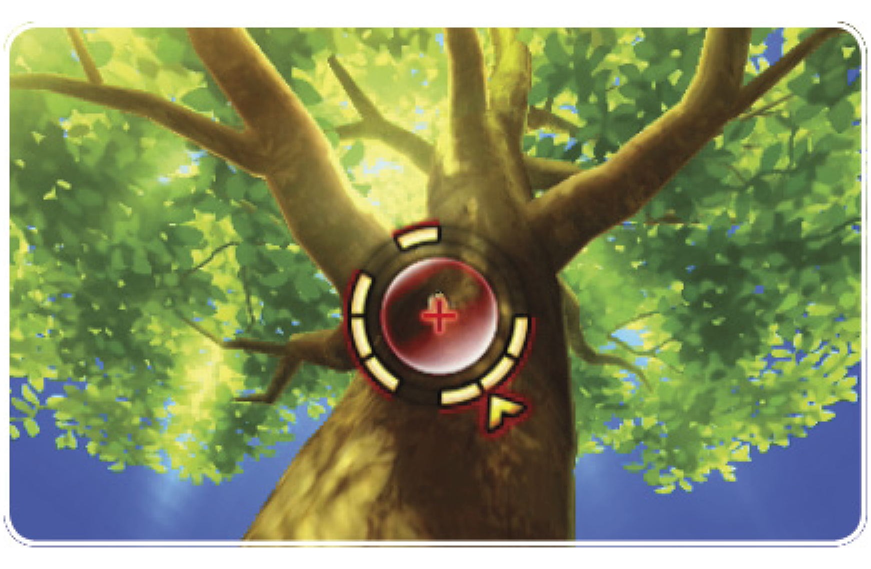
Yo-kai can be found in shimmering areas. Point the Lens toward that area.



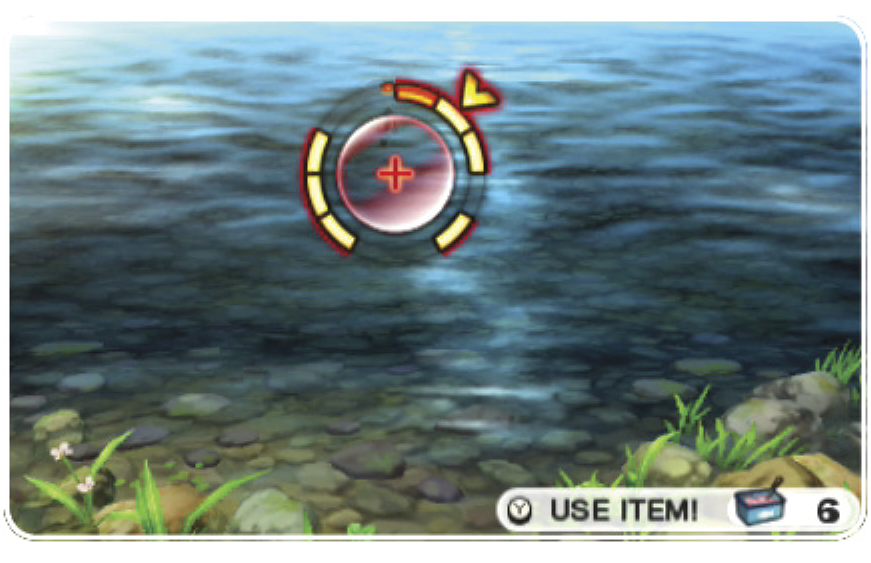
The gauge fills up when you have the Yo-kai centered in the Lens.

Catching Bugs and Fish

When the magnifying glass icon pops up near trees or grass, you can switch to Watch Mode and then use your Yo-kai Lens to find and collect insects. Once you acquire a fishing pole during the story, you can catch fish from bodies of water in the same manner. To catch either one, stop the spinning roulette arrow on a mark. A red mark awards a rare version of the bug or fish. You might also find dropped items, so scan the area well!



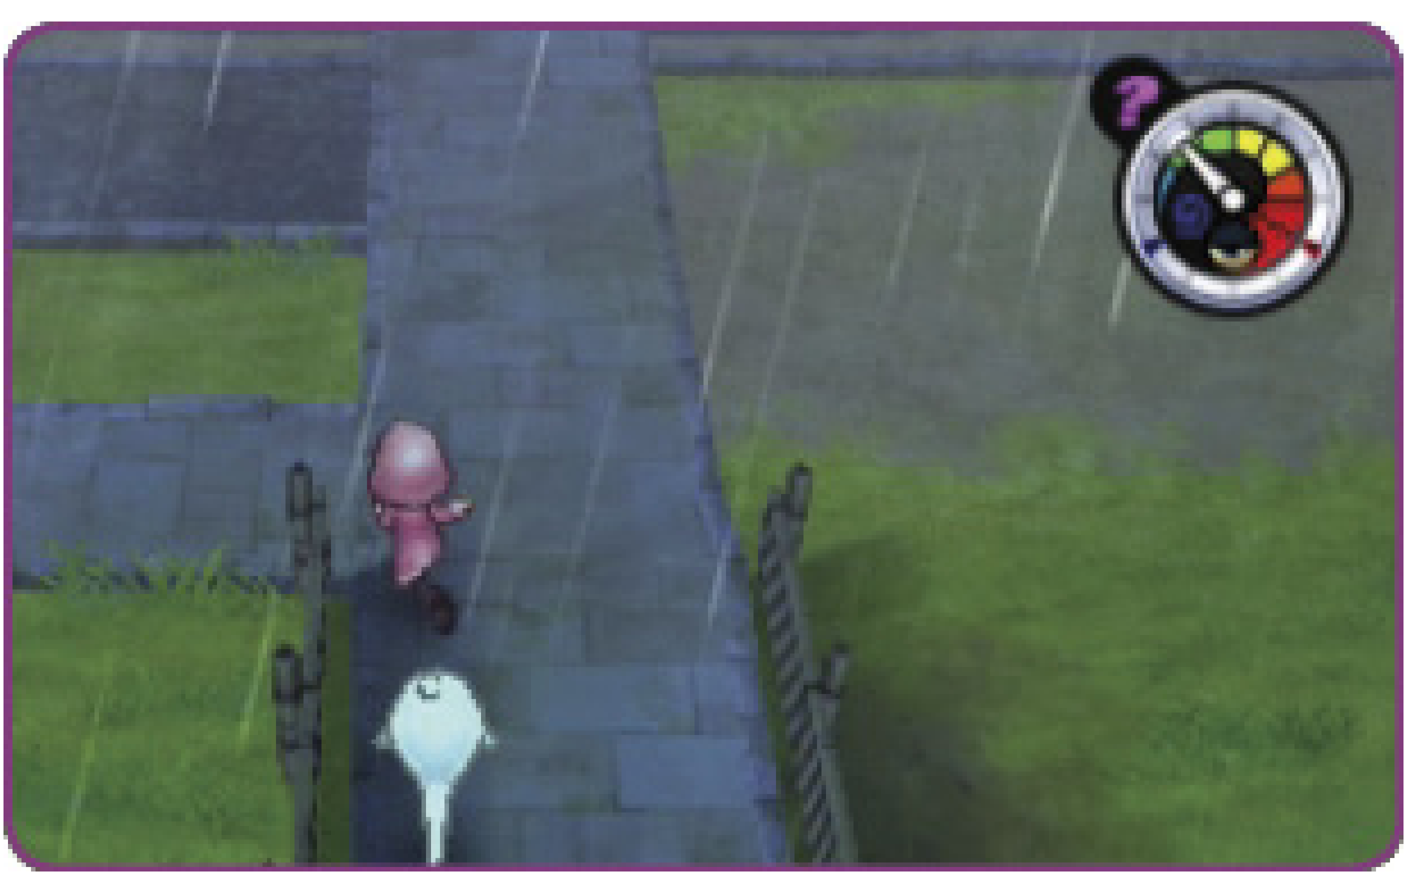
Look for Cicadas or Rhino Beetles in trees, as well as Locusts down in the grass.



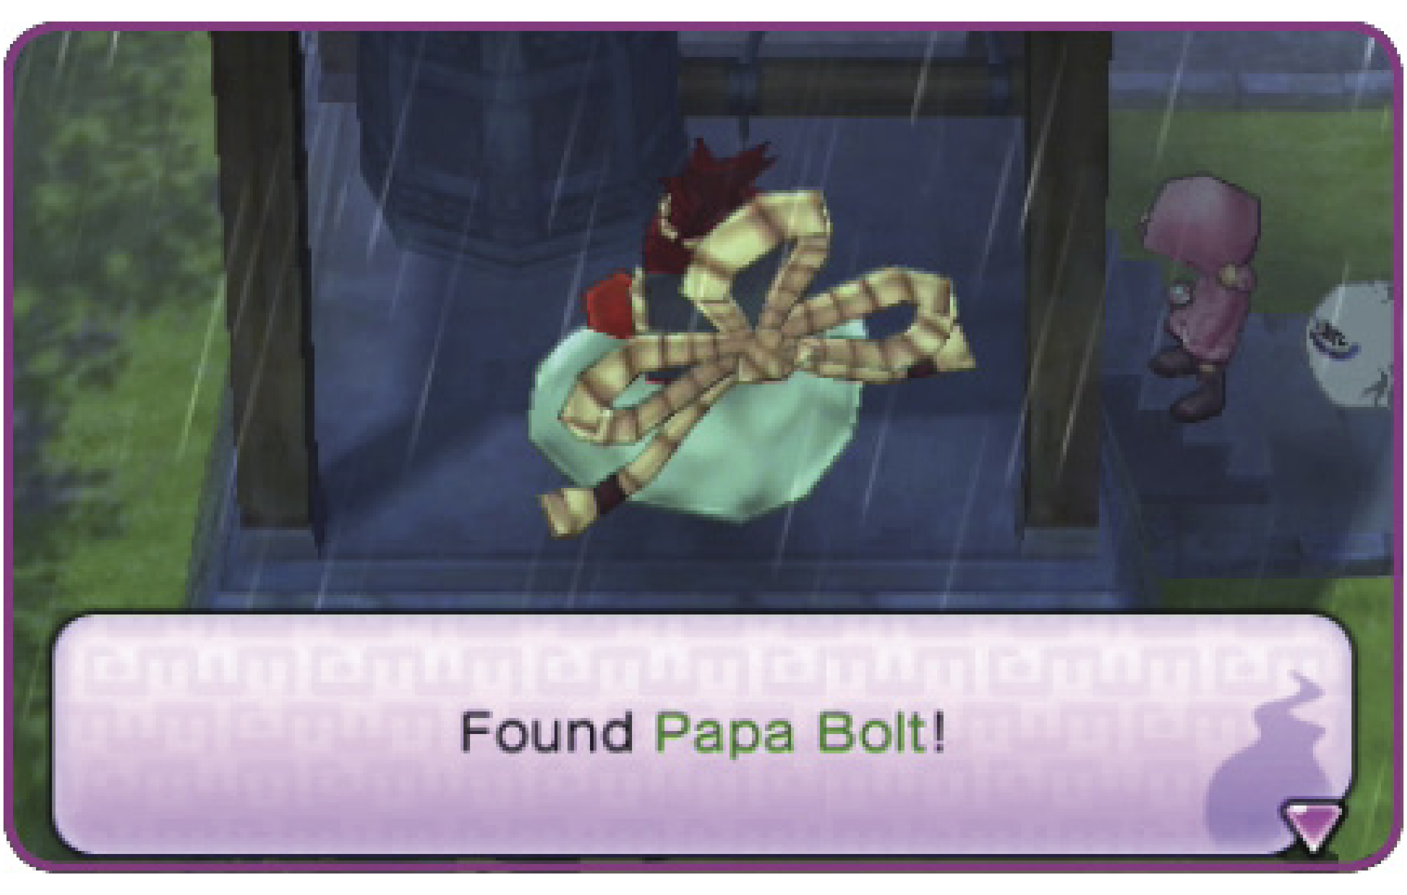
Once you get a fishing pole, you can fish at streams or in the ocean. Move the Lens over the fish you want to hook.

Yo-kai Radar

You'll also find Yo-kai in spots where your Yo-kai Radar picks up a strong signal and shows a "?" mark. This means that a Yo-kai's right there in the open, not hidden up a tree or under a car. But you still have to find it in Watch Mode. Press Y to bring up your Lens and comb the local area. Once you spot the culprit and fill up the Lens gauge, the Yo-kai is officially found.



You'll find Yo-kai in the area where the needle goes into the red zone.



Yo-kai won't run from you in this case, so take your time and search.

Talk to a Radar-Located Yo-kai and…

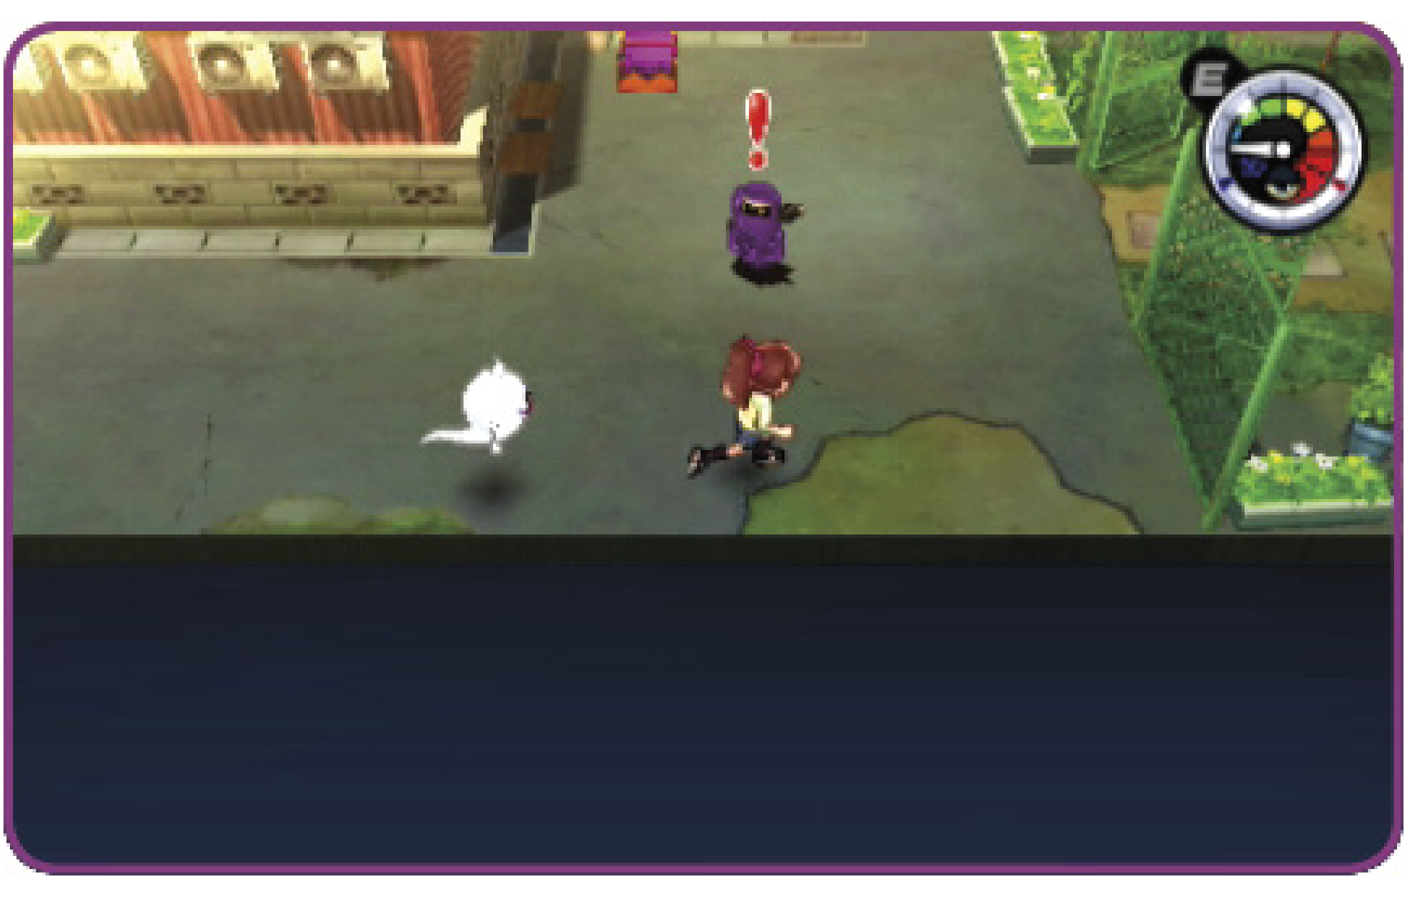
…you may go into battle, or simply obtain an item. Whatever happens, the location is added to your data as a "Yo-kai Spot.'"

Yo-kai Hangouts!

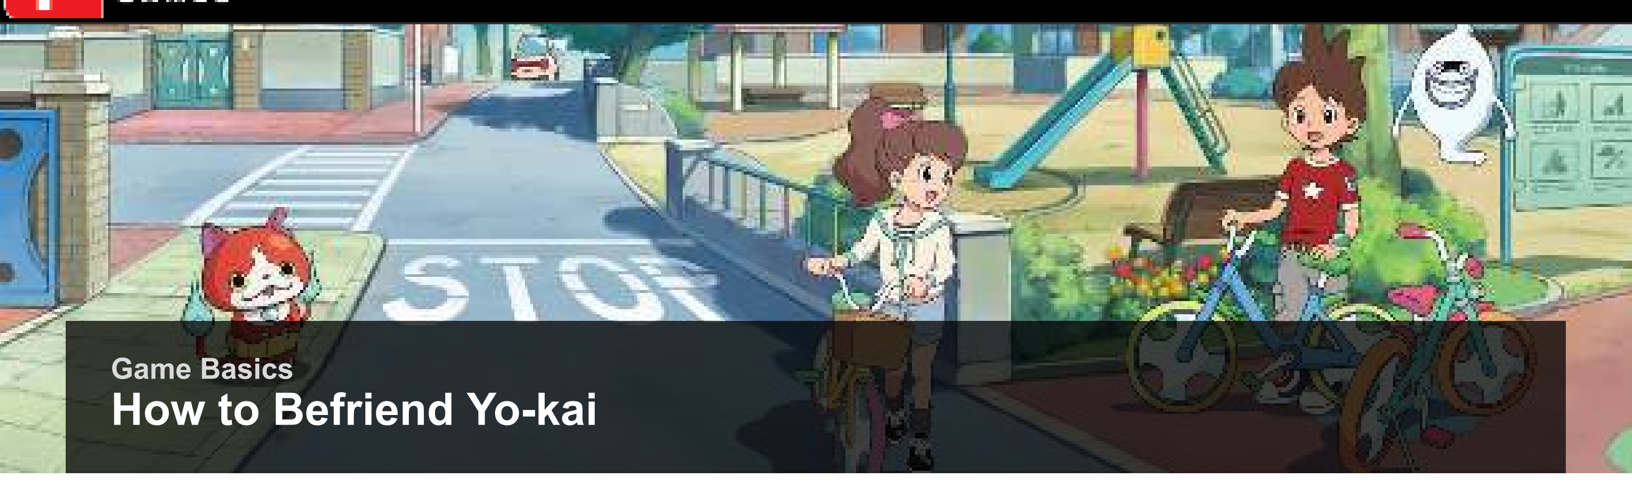
Some back alleys and buildings are hangout spots for aggressive Yo-kai. You'll find them wandering around the place, fully visible to you. (Look for them marked as red icons on your map.) Exploring such places can be helpful if you want some quick EXP-boosting combat to level up your party—no need to mess around with Radar or the Yo-kai Lens.

Back Alley Fight!

If you win the battle, you'll have a chance to befriend the Yo-kai, just like when you find them in Watch Mode.



Yo-kai won't run from you in this sketchy area. Once a wandering hostile spots you, they'll zoom right up to fight!



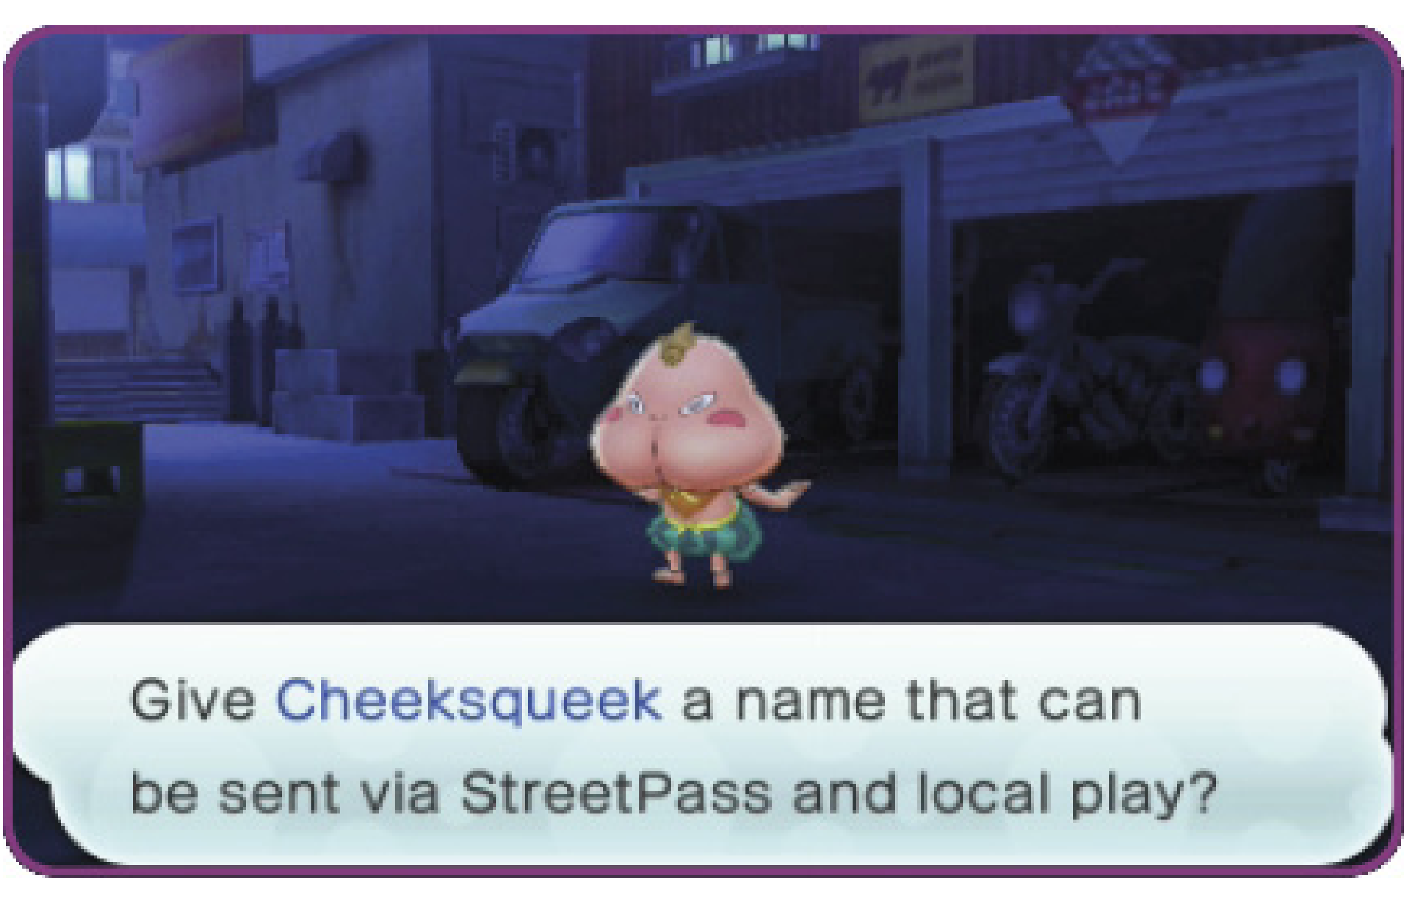
Game Basics

How to Befriend Yo-kai

Battles and Events

Generally speaking, there are two ways to make friends with Yo-kai. You'll automatically befriend some of them as part of the main story. At other times, you'll use Watch Mode to find Yo-kai—or simply run into them in back alleys and other dark places—and then defeat them in battle to befriend them. You may also befriend Yo-kai in certain sub-quests or Yo-kai Spots, but that doesn't happen as often.

It's a matter of luck whether a Yo-kai will befriend you after battle. You'll boost your chances if you give the Yo-kai its favorite food.



Give Cheeksqueek a name that can be sent via StreetPass and local play?

You can give your own personal nicknames to the Yo-kai that befriend you.

Medals: The Yo-kai Wheel and the Medallium

When a Yo-kai befriends you, it gives you a special Medal as a symbol of friendship. Use these Medals to summon the Yo-kai into battle. You can carry up to six Medals at once, which are placed in the six slots of your Yo-kai Wheel. This becomes your active party—the Yo-kai that fight your battles.

Duplicate Yo-kai

Acquire up to six duplicates of the same Yo-kai if you like. Indeed, some Yo-kai become more powerful if you possess multiples of the same type. However, the more duplicates of a Yo-kai you befriend, the less likely that you befriend that type of Yo-kai again. Acquiring six of the same Yo-kai might require some serious patience!

Raise Your Watch Rank!

Your Yo-kai Watch has a rank system, starting at E and rising to D, C, B, A, and then S as you work through the in-game story events. The higher your Watch Rank, the easier it is to find high-rank Yo-kai.

Choose Six Yo-kai to Accompany You

Yo-kai Medals are added to your collection in the order that you befriend your Yo-kai pals. The first six Medals go into your Yo-kai Wheel, and those new friends become your active party. Once you accumulate more than six Medals, the extras are automatically stored in your Yo-kai Medallium as reserve Medals. Be sure to check the stats and abilities of any new Yo-kai that you befriend. Then, switch Medals between the Medallium and your six active slots to create the strongest team available.

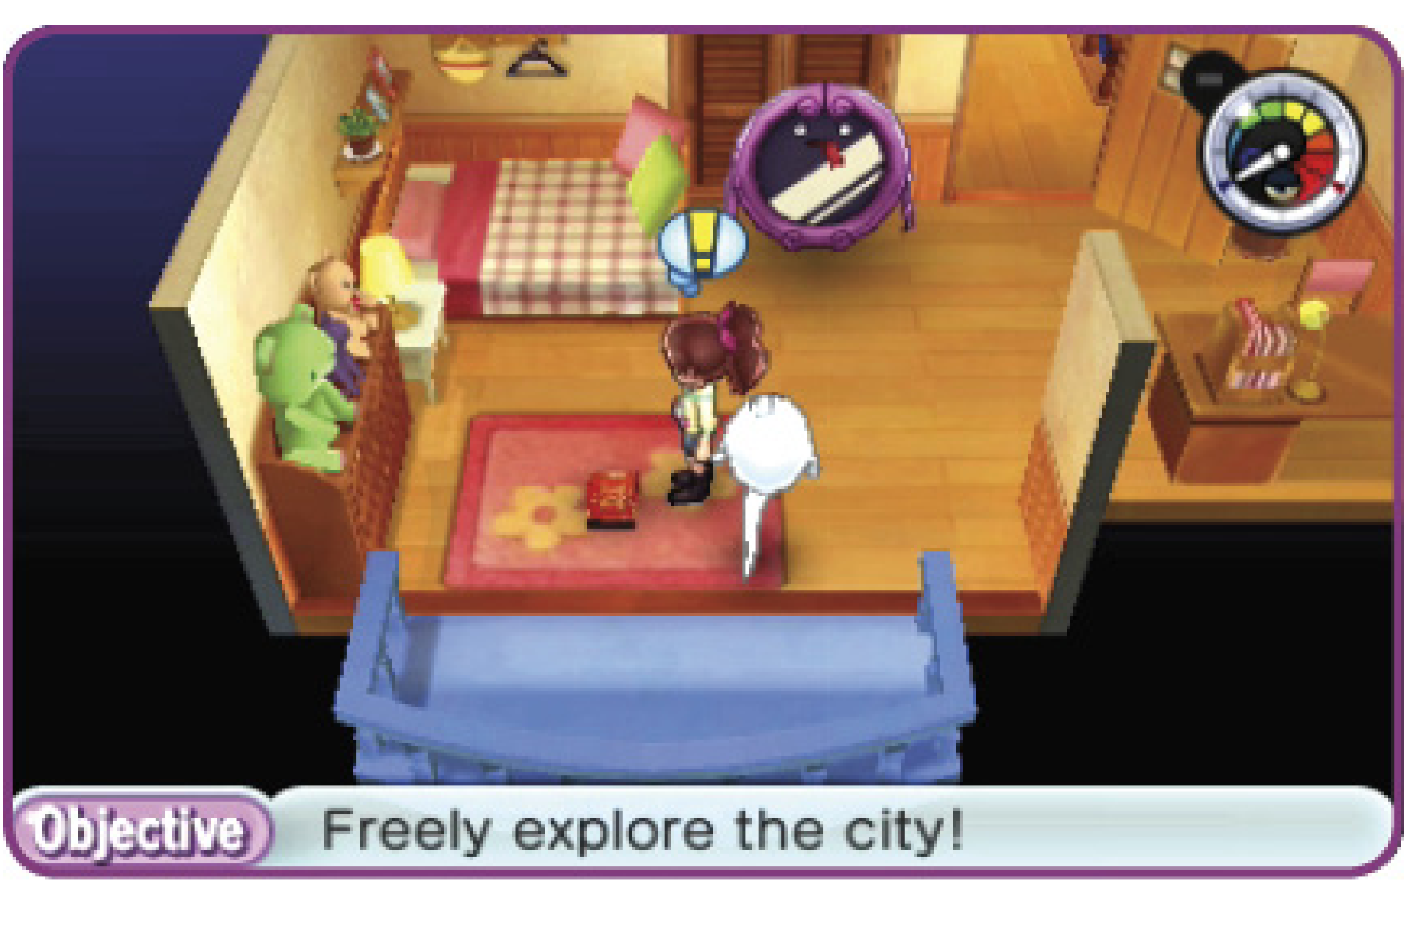
How to Swap Medals: Your Room and Eyepo

Unfortunately, you can't just move Medals in and out of your Yo-kai Wheel's active team whenever you like. To do that, you have two options:

Use the Yo-kai Medallium on the floor of your main character's bedroom.

Use the glowing Eyepo creatures that you can find in convenience stores, post offices, banks, and a few other places.



Objective Freely explore the city!

This ball of flame with an eye is an Eyepo. Use this odd creature to swap Medals between your Medallium reserve and your Yo-kai Wheel's active party. The Eyepo also fully replenishes the HP and Soul Meters of all your Yo-kai friends.

How Yo-kai Order Affects Battle

The six Yo-kai in your Yo-kai Wheel are displayed in a circle. The three on top form the front line that fights in battles. The bottom three form the rear line, which starts battle in standby mode. You can reposition your Yo-kai within the Wheel anytime you like outside of battle. Once the battle starts, you can rotate the Wheel, but you can't change the order. Think carefully about where to place your active Yo-kai on the Wheel for maximum effectiveness.

The Formation Effect: Tribal Cousins Fight Better Together!

If you place two Yo-kai from the same tribe next to each other in your Yo-kai Wheel's front line, the alignment can trigger a stat-boosting Formation Effect. Line up three tribemates across the top for an even more powerful effect!

Evolving and Fusing Yo-kai

The most typical way to power up your Yo-kai friends is to put them in battle and raise their levels. But that's not the only way to improve your Yo-kai. You can also boost their powers by evolving or fusing them. Both processes change how a Yo-kai looks, producing a more formidable presence than ever!

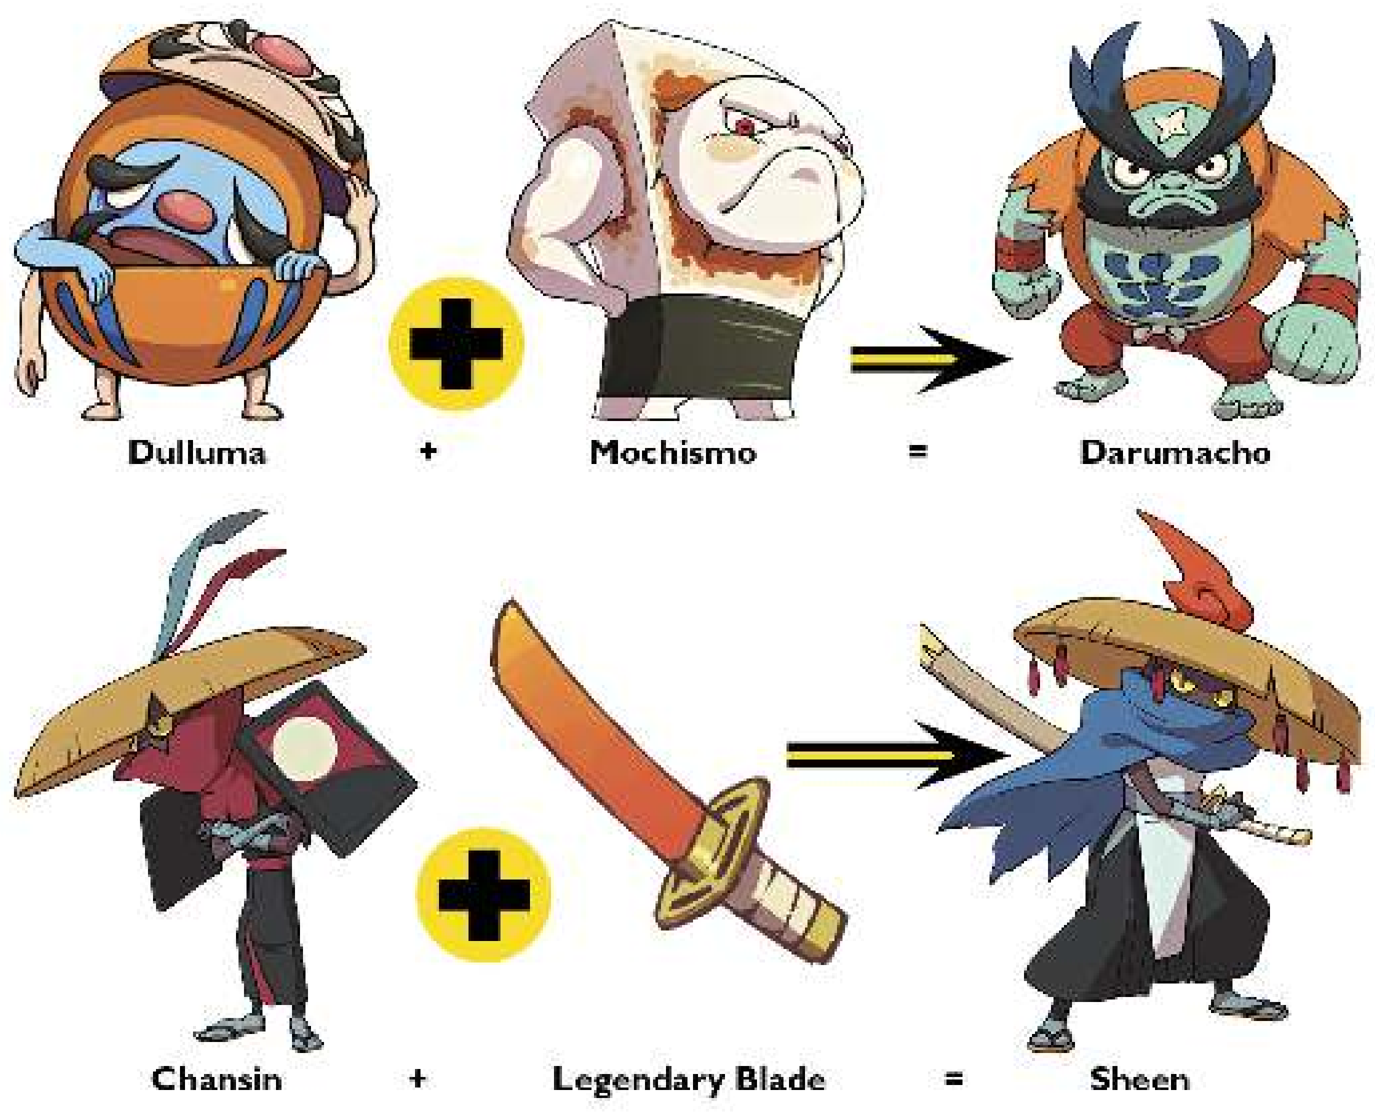
If a Yo-kai can evolve, it automatically makes the transformation once it hits a certain level. The exact level number required for evolution depends on the type of Yo-kai it is. Some Yo-kai evolve early on, while others need to be leveled up fairly high before they do.

How Yo-kai Fusion Works



Once you reach Chapter 5 of the game story, you'll be able to combine Yo-kai and items in a process called "fusion." You can fuse Yo-kai with each other or with certain items to create a brand-new, powered-up being. This new Yo-kai immediately becomes your friend. (For more details on the fusion process, check out the "Evolution and Fusion" section.)

Time and Weather

Yo-kai Watch runs on a day/night time cycle that's a bit different from real life. The in-game clock ticks away only when you're outside. It stops when you're inside a building or using the menu system. The weather can also change from day to day.

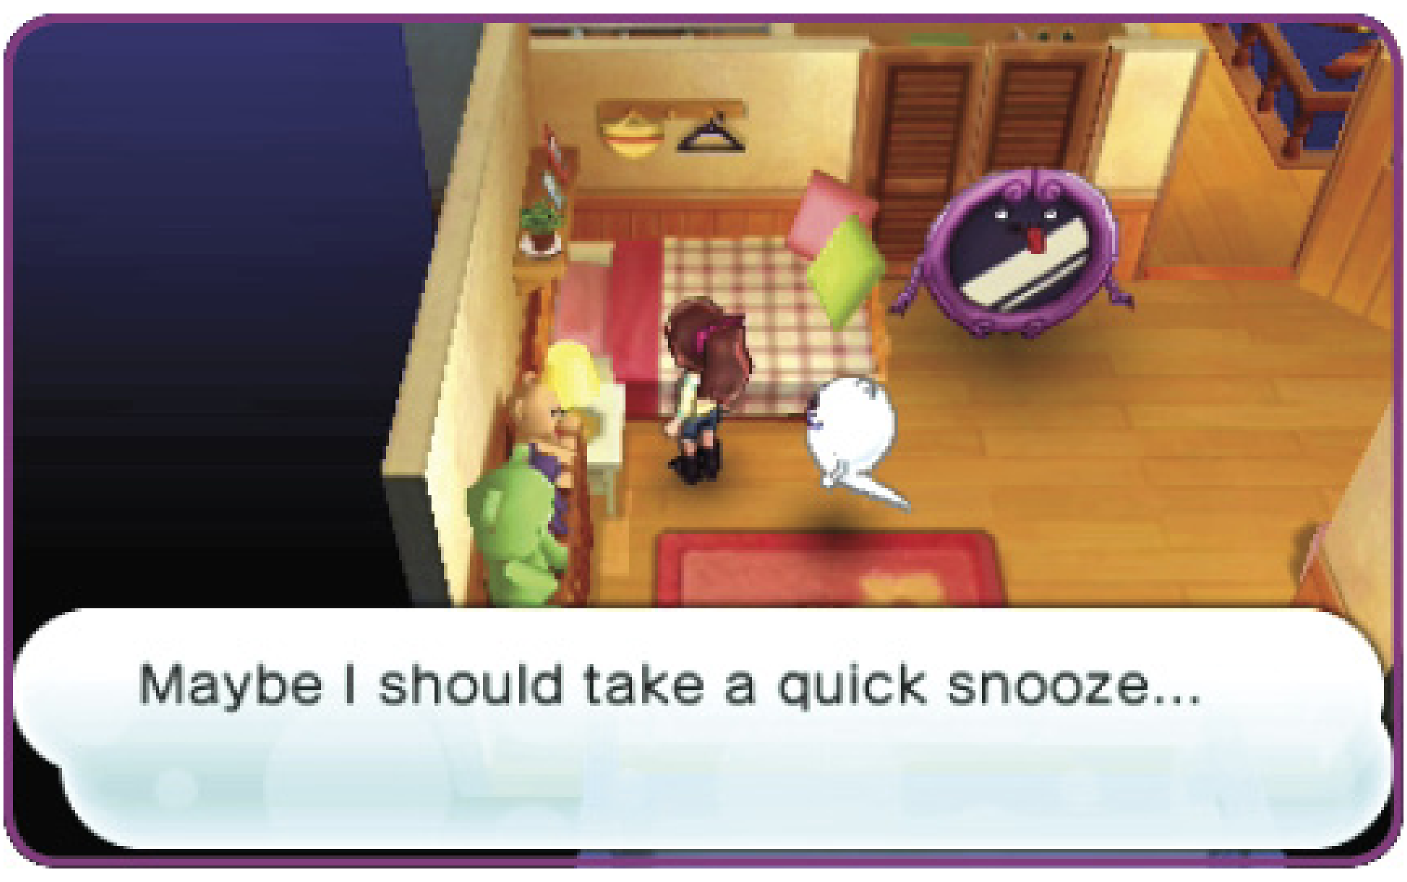
How Events Are Affected

Time and weather can have a big impact on your Yo-kai search. For example, some Yo-kai show up only at night or only when it's sunny. Similarly, some sub-quests can only be triggered at night or during specific weather conditions. You'll also encounter buildings that are closed during certain hours, keeping you from entering.

Uptown Springdale

Objective Protect the Seals!

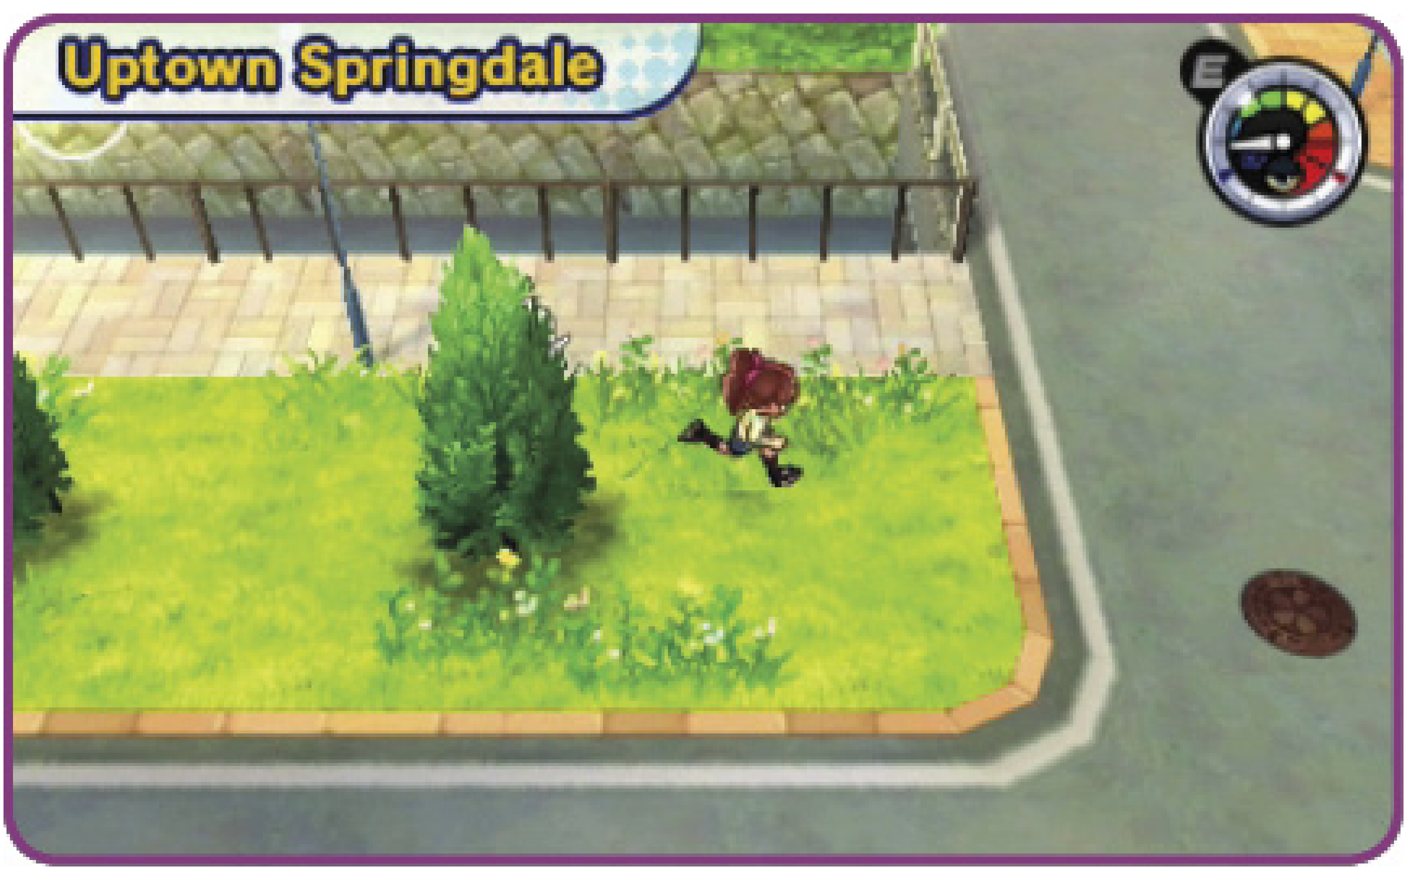
Sleep to Advance Time



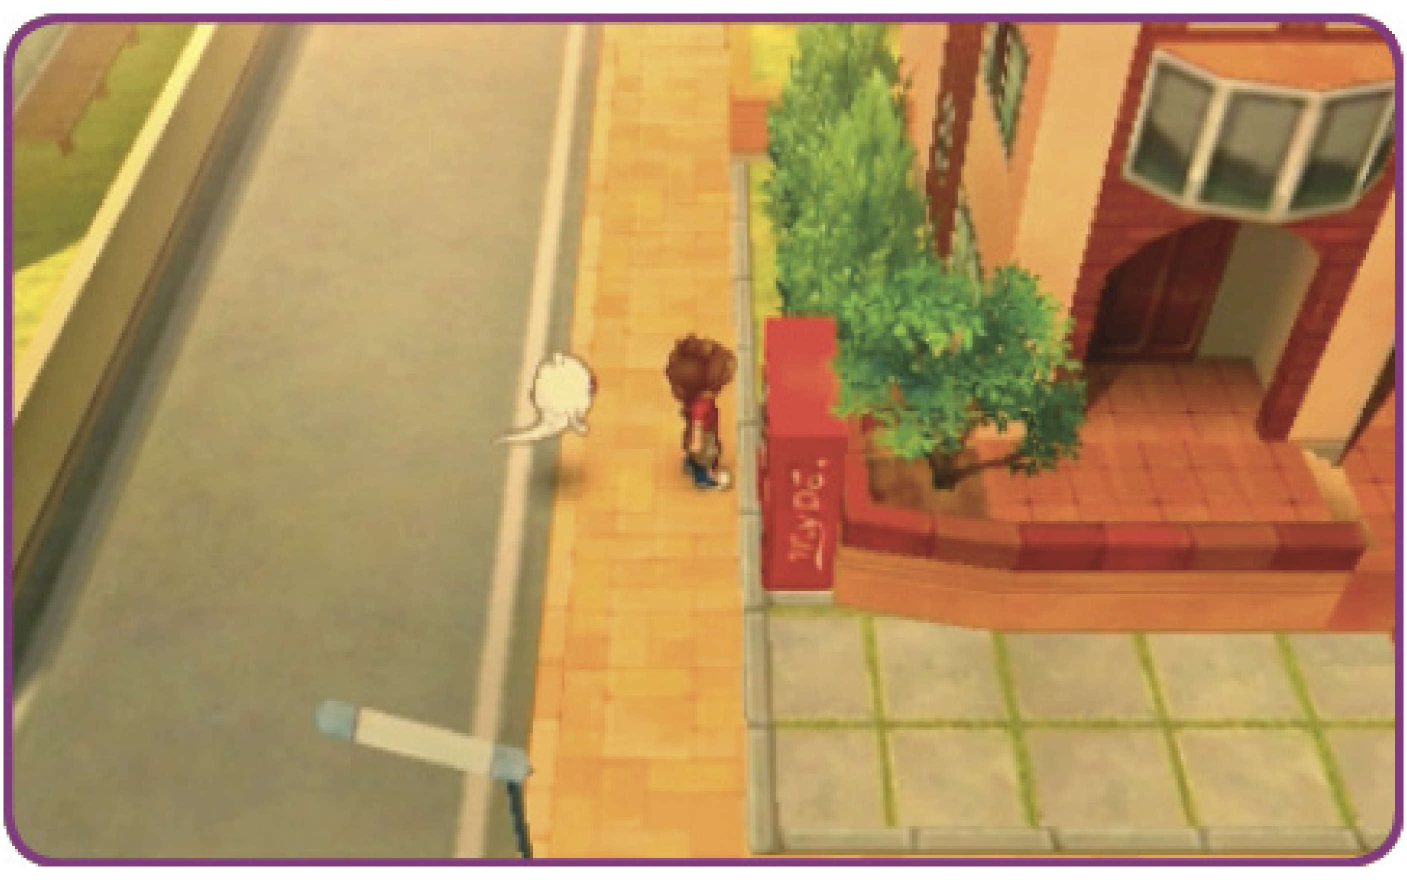
Maybe I should take a quick snooze...

If you want to hurry the in-game clock along, go back home and rest in your bed. This lets you shift the time cycle from day to night, or vice versa. The weather may change, too. Note that the day-to-night transition skips over the evening hours, going directly from bright to dark.

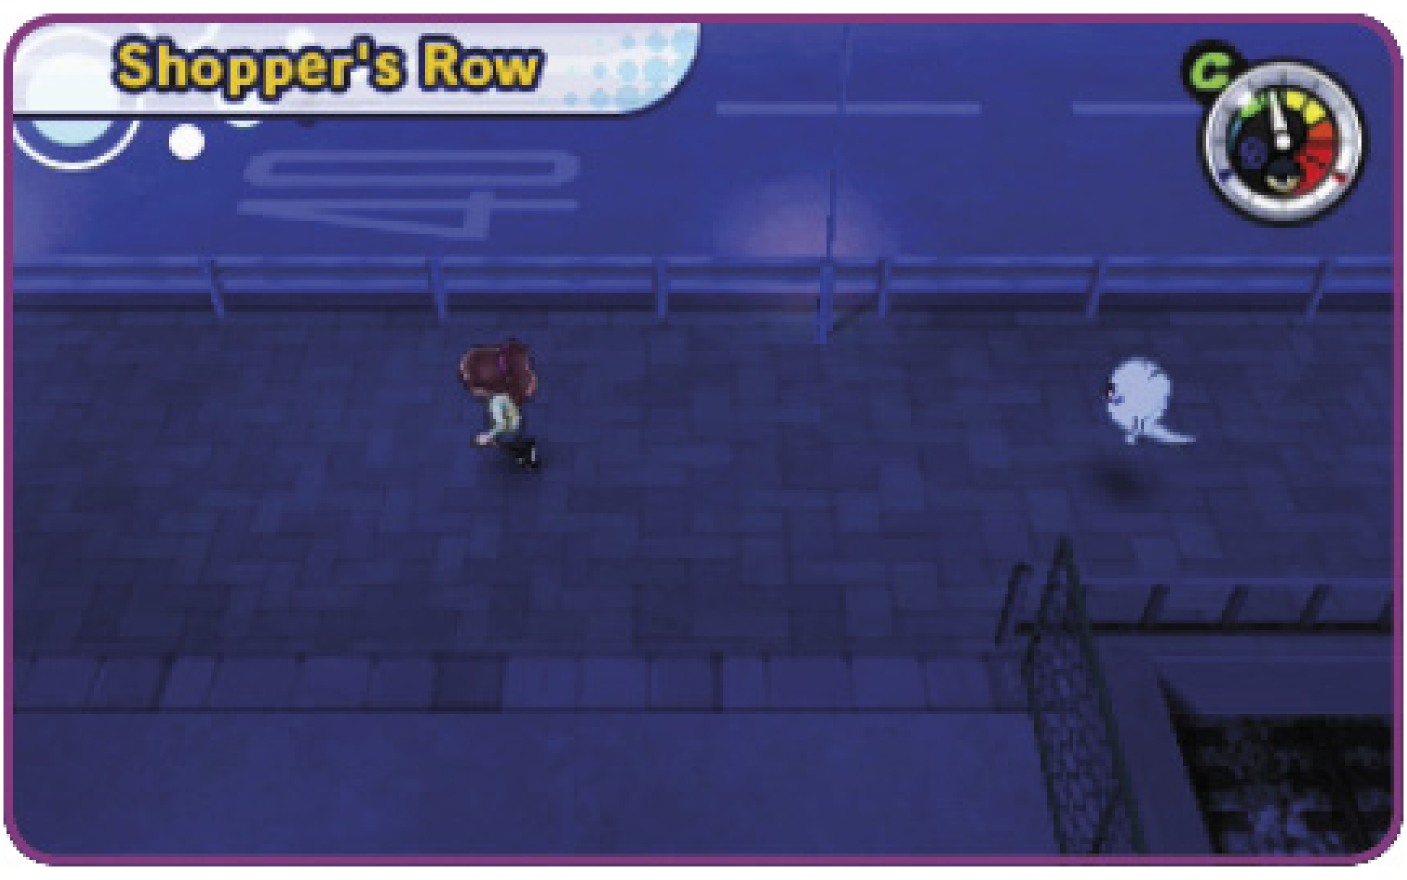
Town Scenes Change with Time!



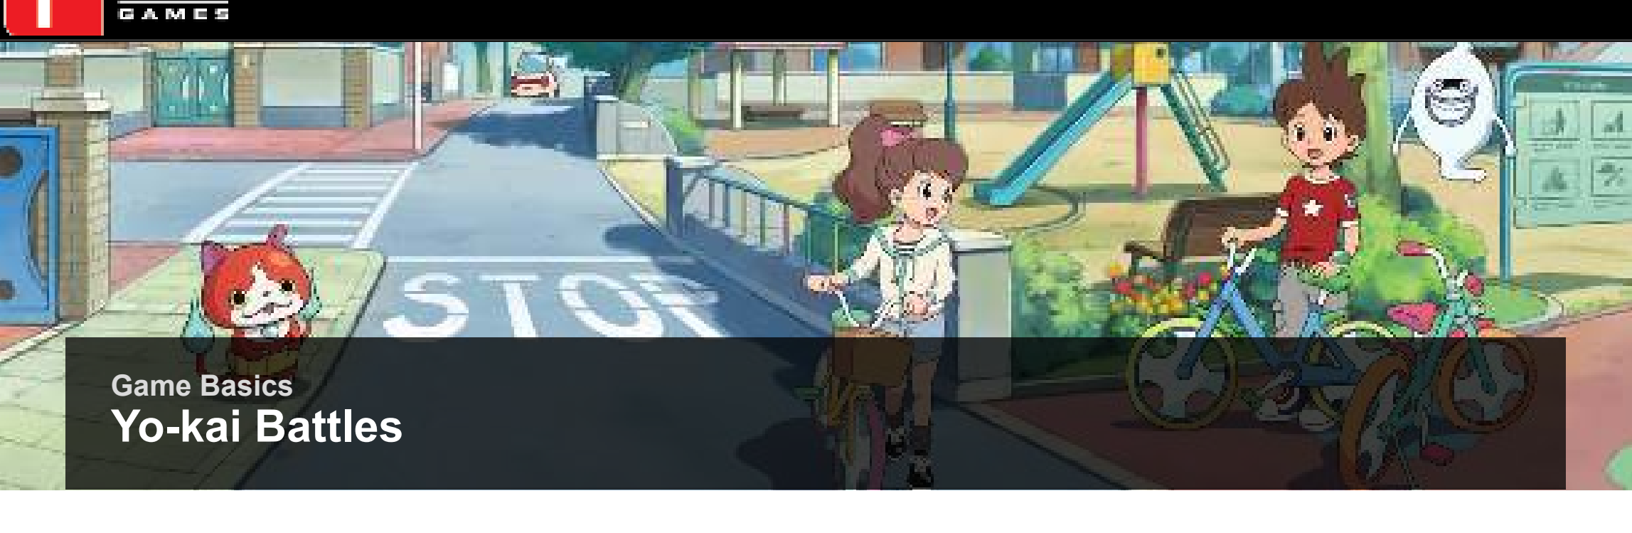
DAYTIME: The brightest part of the time cycle. You'll see lots of people out and about, and most stores will be open.



EVENING: The sun begins to set over town. Evening events are generally the same as daytime ones, but night comes quickly afterward.



NIGHT: The scene grows dark, with fewer people on the streets. Most shops (except convenience stores) are also closed.

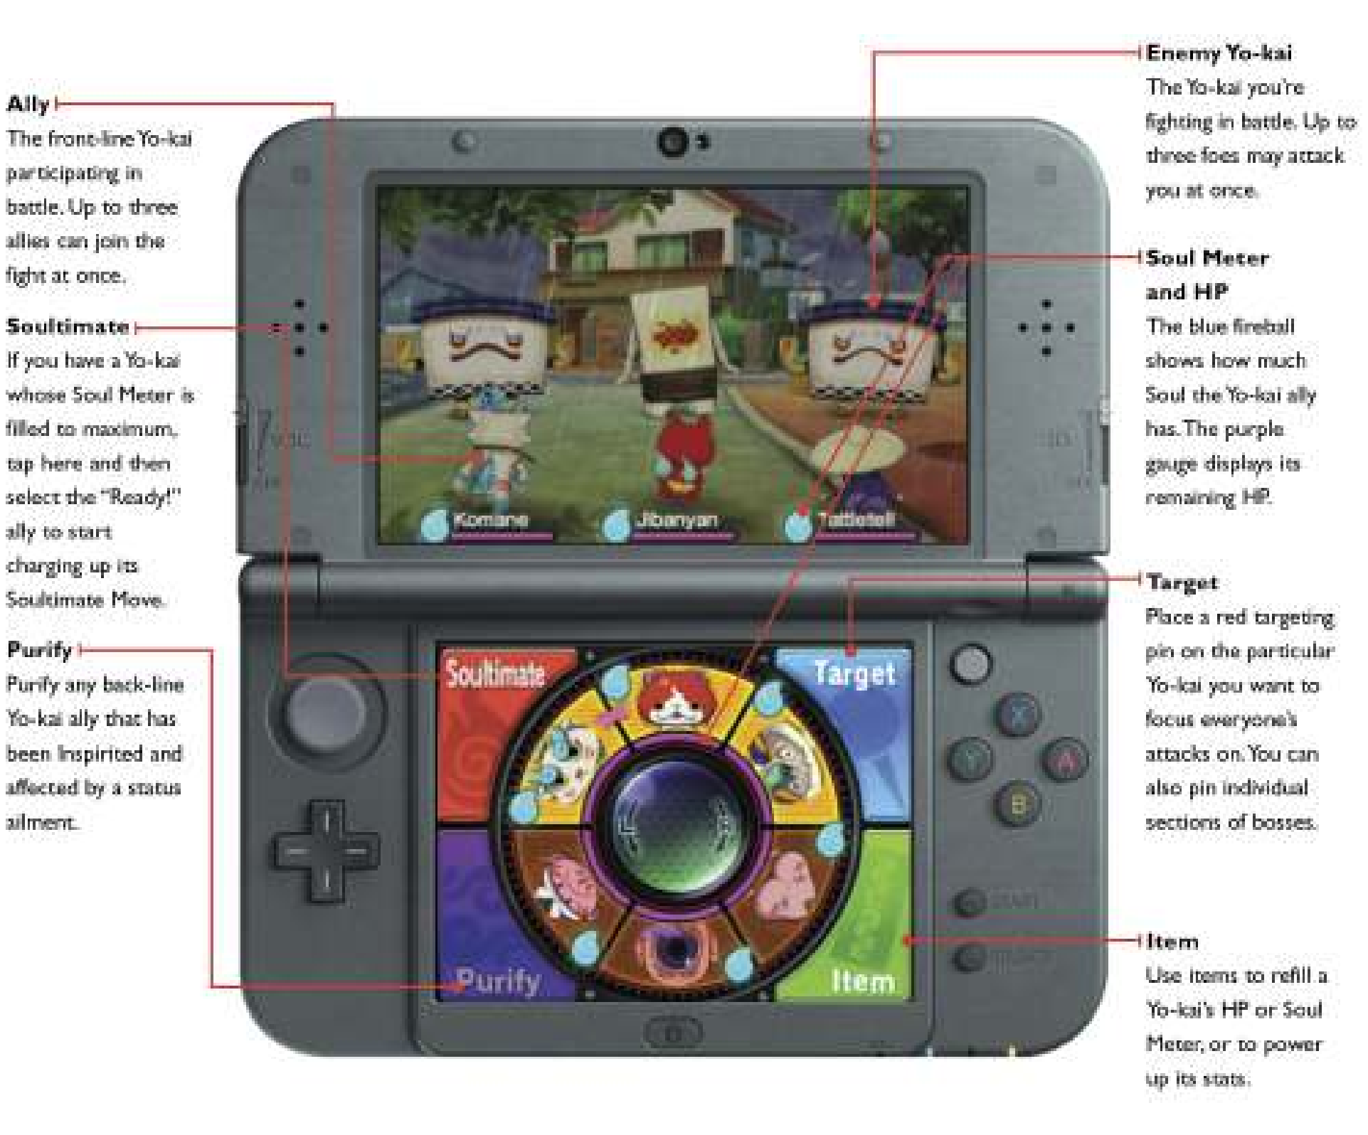


Game Basics

Yo-kai Battles

When you tap “FIGHT!” in the center of your Yo-kai Wheel to trigger a battle, your three current front-line Yo-kai appear on the top screen, facing your foe(s). The fight immediately begins against the enemy Yo-kai. Spin the Yo-kai Wheel on the bottom screen at any time (even before the fight) to switch Yo-kai between the front and rear lines. Battles proceed in real time, although they pause whenever you’re spinning the Yo-kai Wheel.

Viewing the Battle Screen



Ally The front-line Yo-kai participating in battle. Up to three allies can join the fight at once.

Soultimate If you have a Yo-kai whose Soul Meter is filled to maximum, tap here and then select the “Ready!” ally to start charging up its Soultimate Move.

Purify Purify any back-line Yo-kai ally that has been Inspirited and affected by a status ailment.

Enemy Yo-kai The Yo-kai you’re fighting in battle. Up to three foes may attack you at once.

Soul Meter and HP The blue fireball shows how much Soul the Yo-kai ally has. The purple gauge displays its remaining HP.

Target Place a red targeting pin on the particular Yo-kai you want to focus everyone’s attacks on. You can also pin individual sections of bosses.

Item Use items to refill a Yo-kai’s HP or Soul Meter, or to power up its stats.

Yo-kai Wheel

Spin the Wheel left or right to move your Yo-kai around into different positions on the front and back lines, rotating them in and out of battle. Spin the circle hard enough, and you can even switch two or three Yo-kai in or out at once. Note: You can rotate your party at any time, except when a Soultimate Move is being launched.

How Your Yo-kai Fight

During battle, each of your Yo-kai picks one of the four actions below, operating on its own volition. It makes these decisions based on how the battle is going, so it won’t make inappropriate moves like trying to refill its HP when it’s already maxed out.

Attack

Attack the enemy Yo-kai with fists or other physical weapons. There’s a chance you’ll land a critical hit, dealing more damage to your foe than usual.

Technique

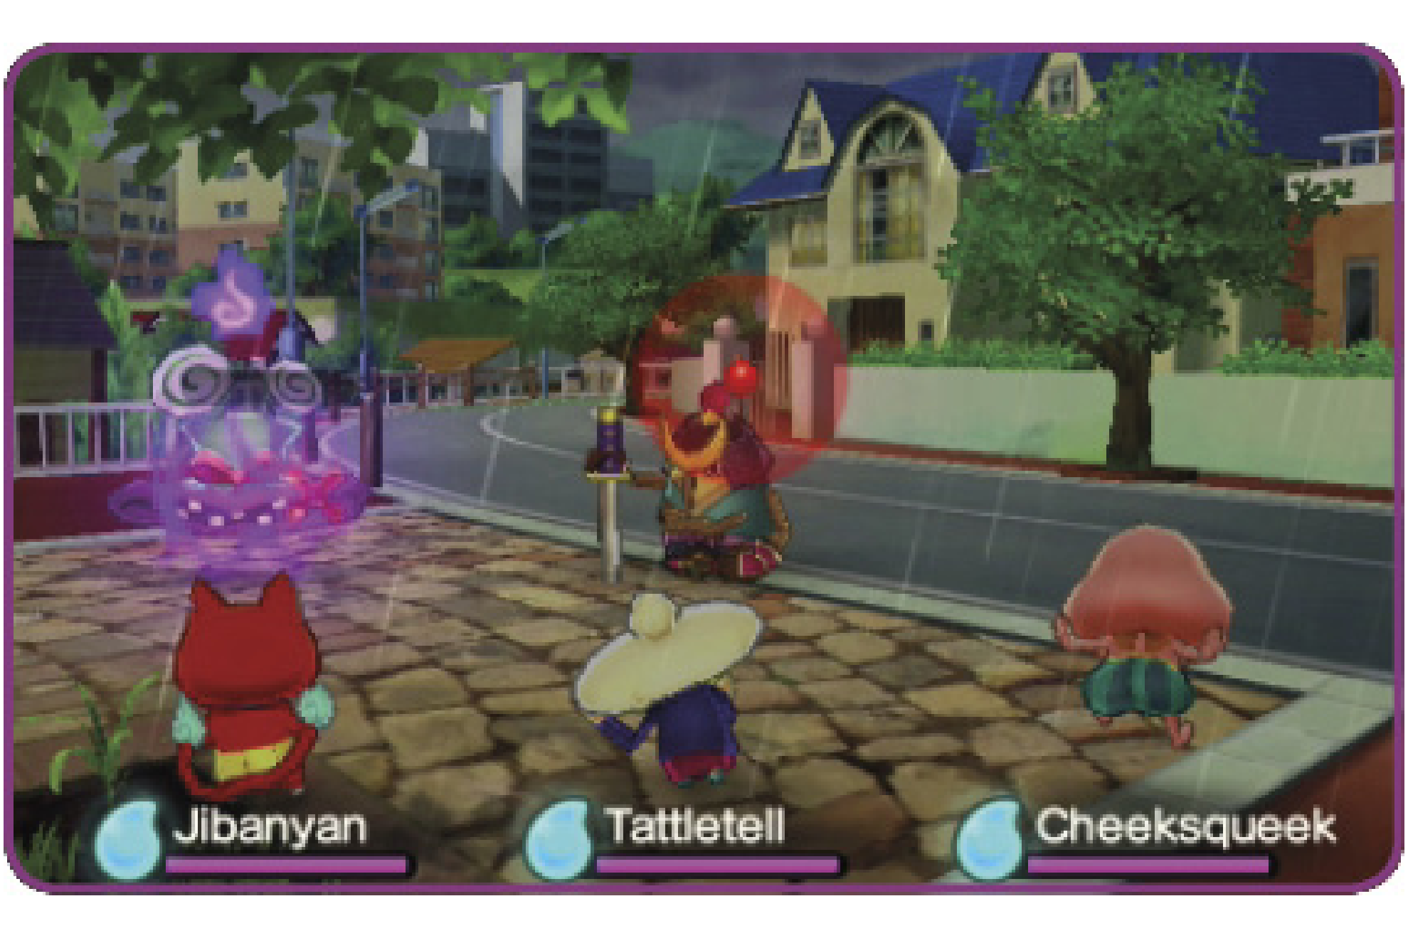
Two general types of Yo-kai Techniques are available: attack and recovery. Each offensive Technique is infused with an element; striking with an element that your foe is weak against deals more damage.

Inspirit

Infect or take over the enemy to lower its stats or give it a status ailment. You can also Inspirit an ally to boost its stats.

Guard

Defend against attack. Guarding halves any damage taken from attacks or Techniques that hit you. It also reduces the chance of being Inspirited.



If an enemy Yo-kai’s been weakened, pin it to target it with everything you’ve got.

Between Actions

Yo-kai don’t do anything in battle until their next turn comes up. If they’re attacked in the meantime, that’ll fill the enemy’s Soul Meter a bit.

Books Change Attitudes! Attitudes Change Actions!

Each Yo-kai has a pair of attitudes that affects the way it fights. You can change these attitudes using books from your Items list. If you keep a Yo-kai on your team for long periods of time, its attitude types also change, drifting away from laziness in battle toward taking a more serious approach.

What You Control in Battle

You can’t directly control a Yo-kai’s action, but you can perform the following four actions in battle: Soultimate, Target, Item, and Purify.

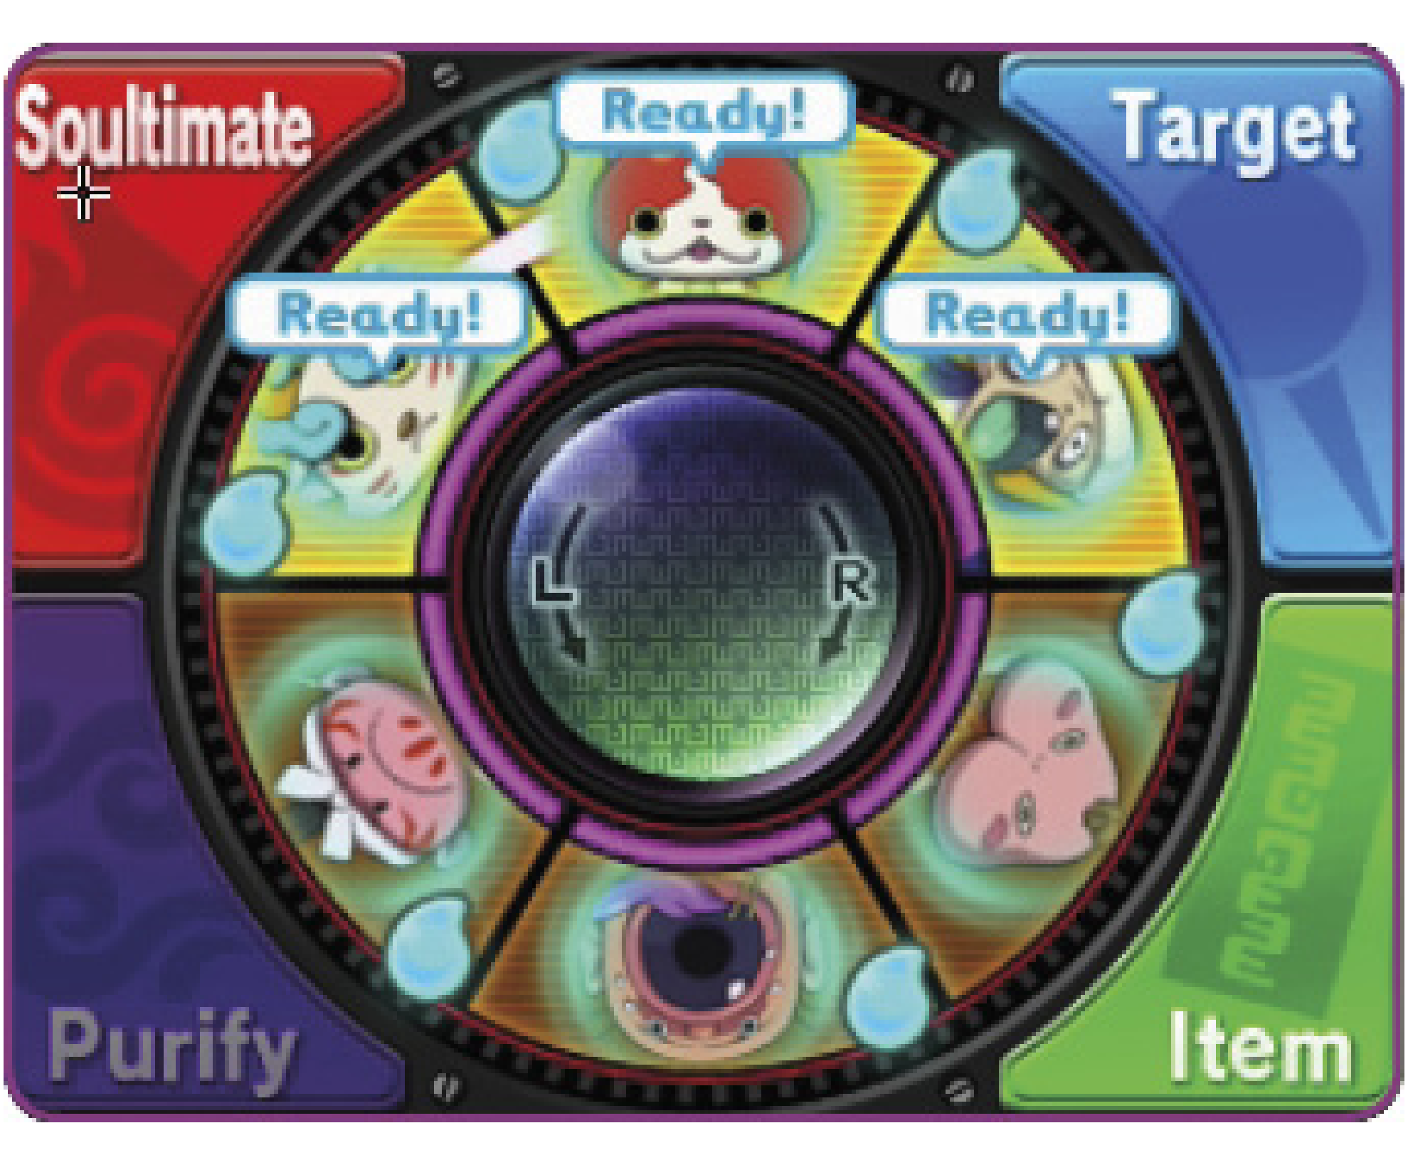
Soultimate

Each Yo-kai has a Soultimate Move. Select the front-line Yo-kai you want to use the move, and then charge up your power on the bottom screen to launch the Soultimate. Most Soultimates are powerful attacks that punish your foes, but some do things like refill your allies’ HP or boost their stats.

Spirit Burst

Soul Meter

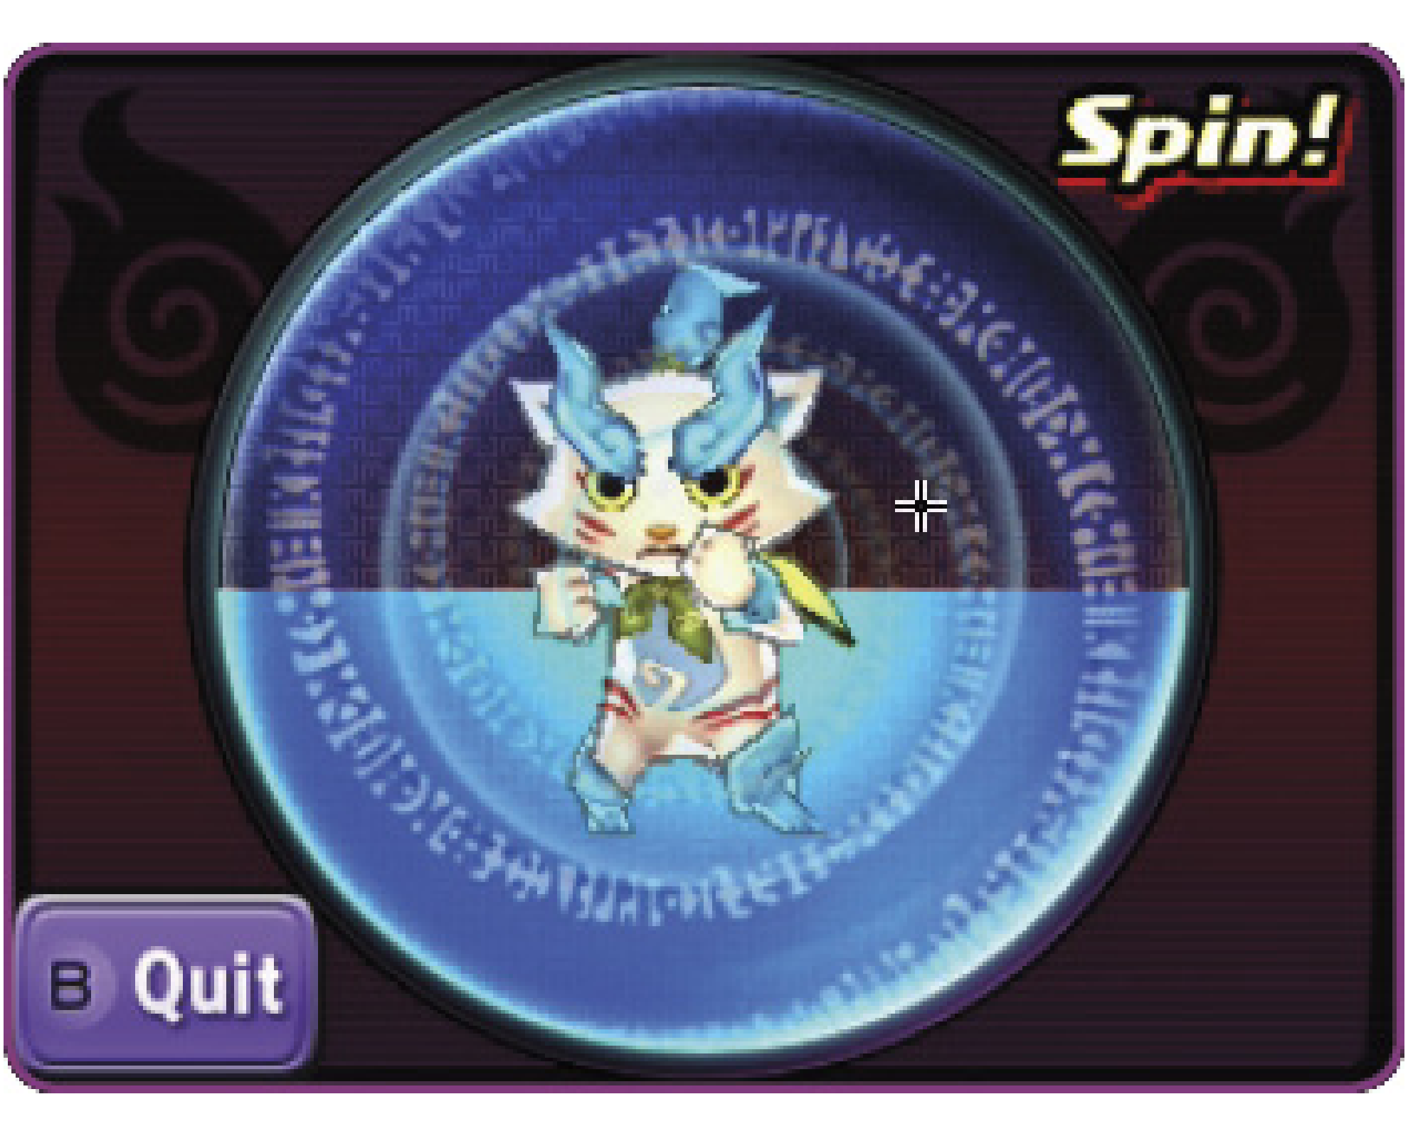
Your Yo-kai’s blue Soul Meter gets filled up to max when you visit an Eyepo or rest in bed before battle. The meter drops to zero when you unleash a Soultimate Move, but it gradually refills during battle. Your front and rear lines automatically get their Soul Meters refilled over the course of a fight, but the Yo-kai actually fighting at any given moment refill a lot faster. If the battle drags on long enough (especially during boss fights), your team members may have several chances to trigger Soultimate Moves.



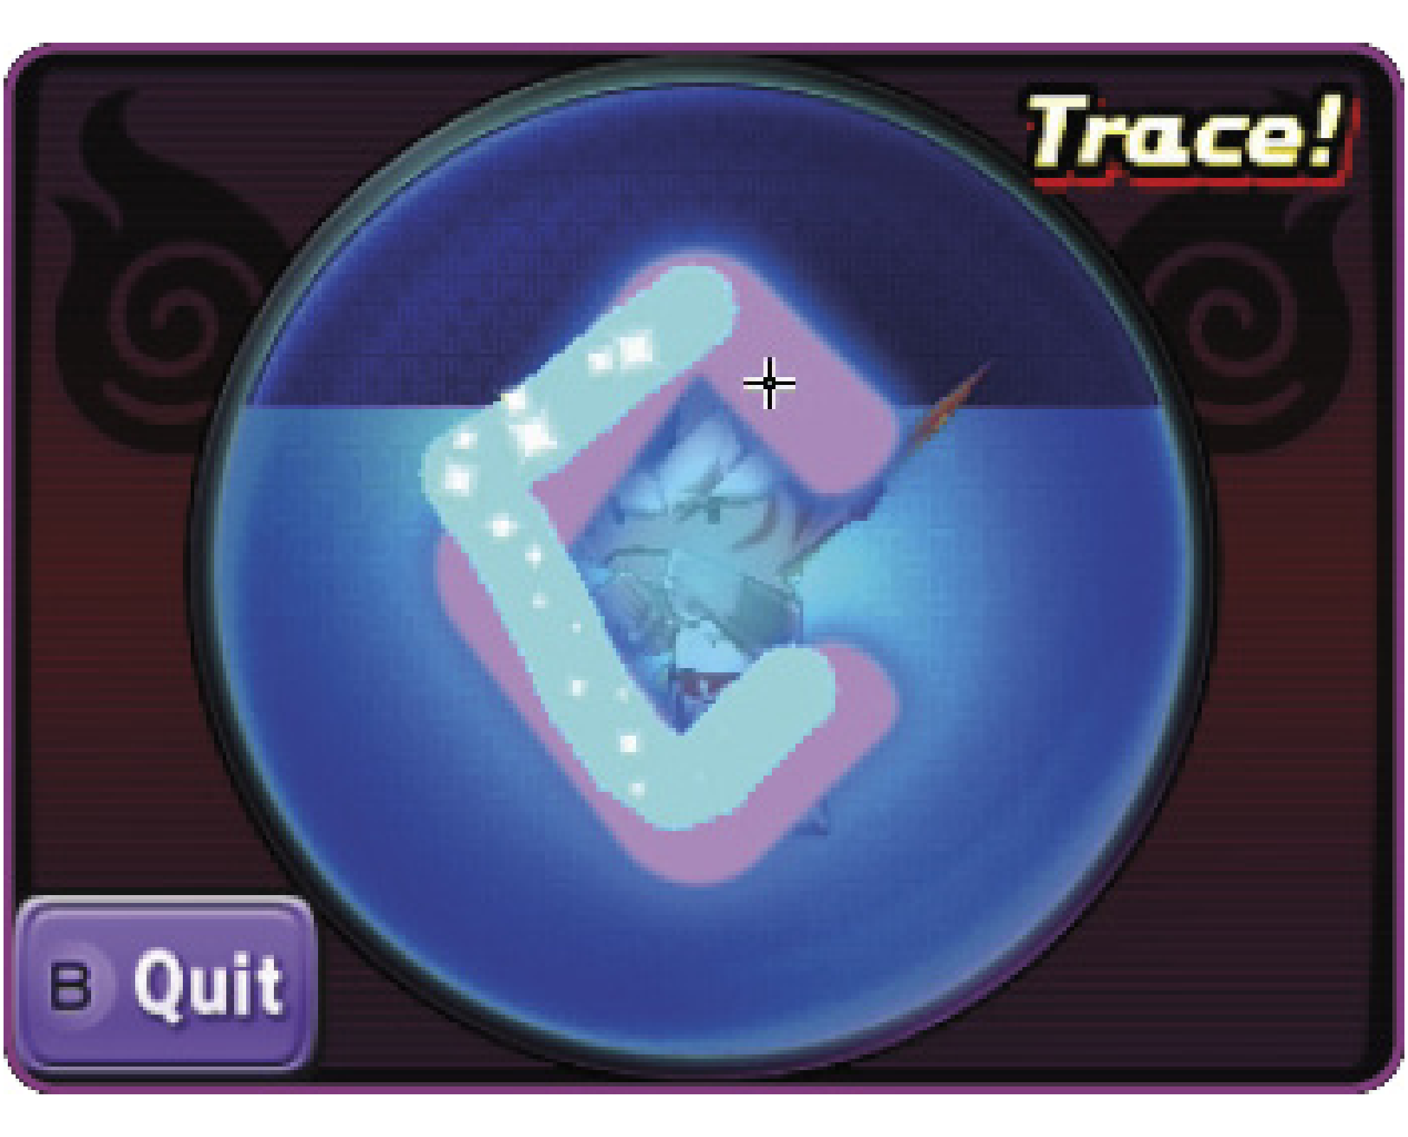
When a Yo-kai’s Soul Meter is filled up, you’ll see “Ready?” over its icon on the Yo-kai Wheel. Tap “Soultimate,” then select the ready Yo-kai you want to use.

Charge Up the Move

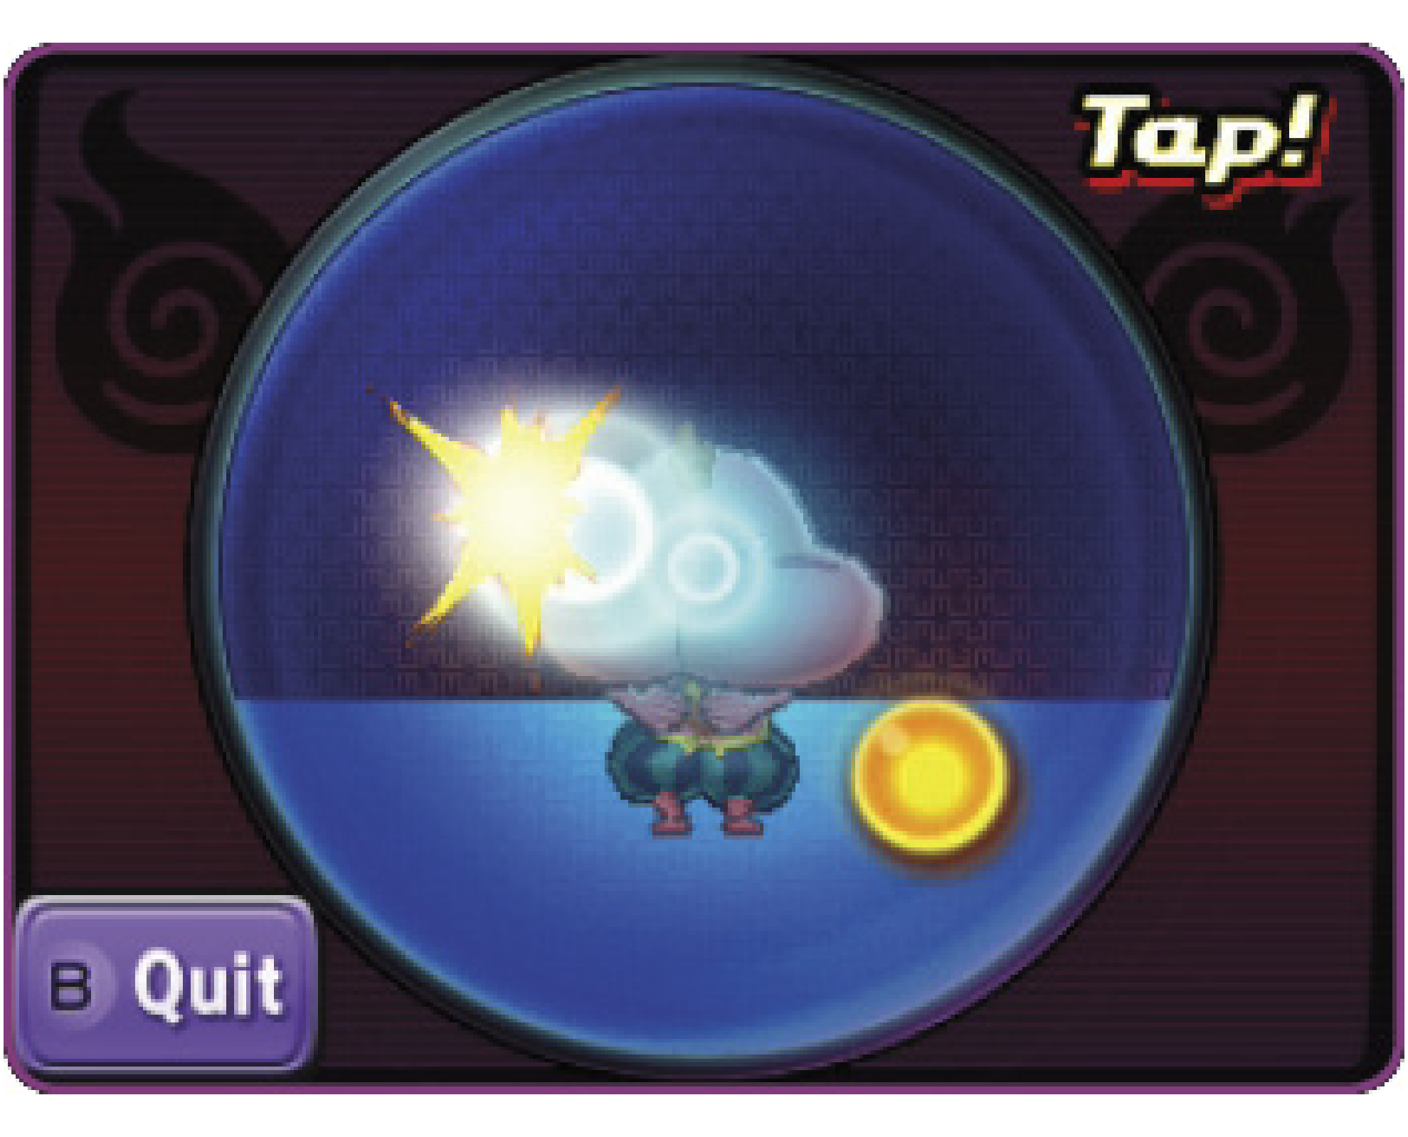
To charge up the power needed to unleash the Soultimate Move, you must perform one of three charging actions, selected randomly. Tip: Break out the stylus for these—it’s easier to mess it up if you just use your finger.



This one’s pretty easy. Just spin the stylus around and around on the screen.



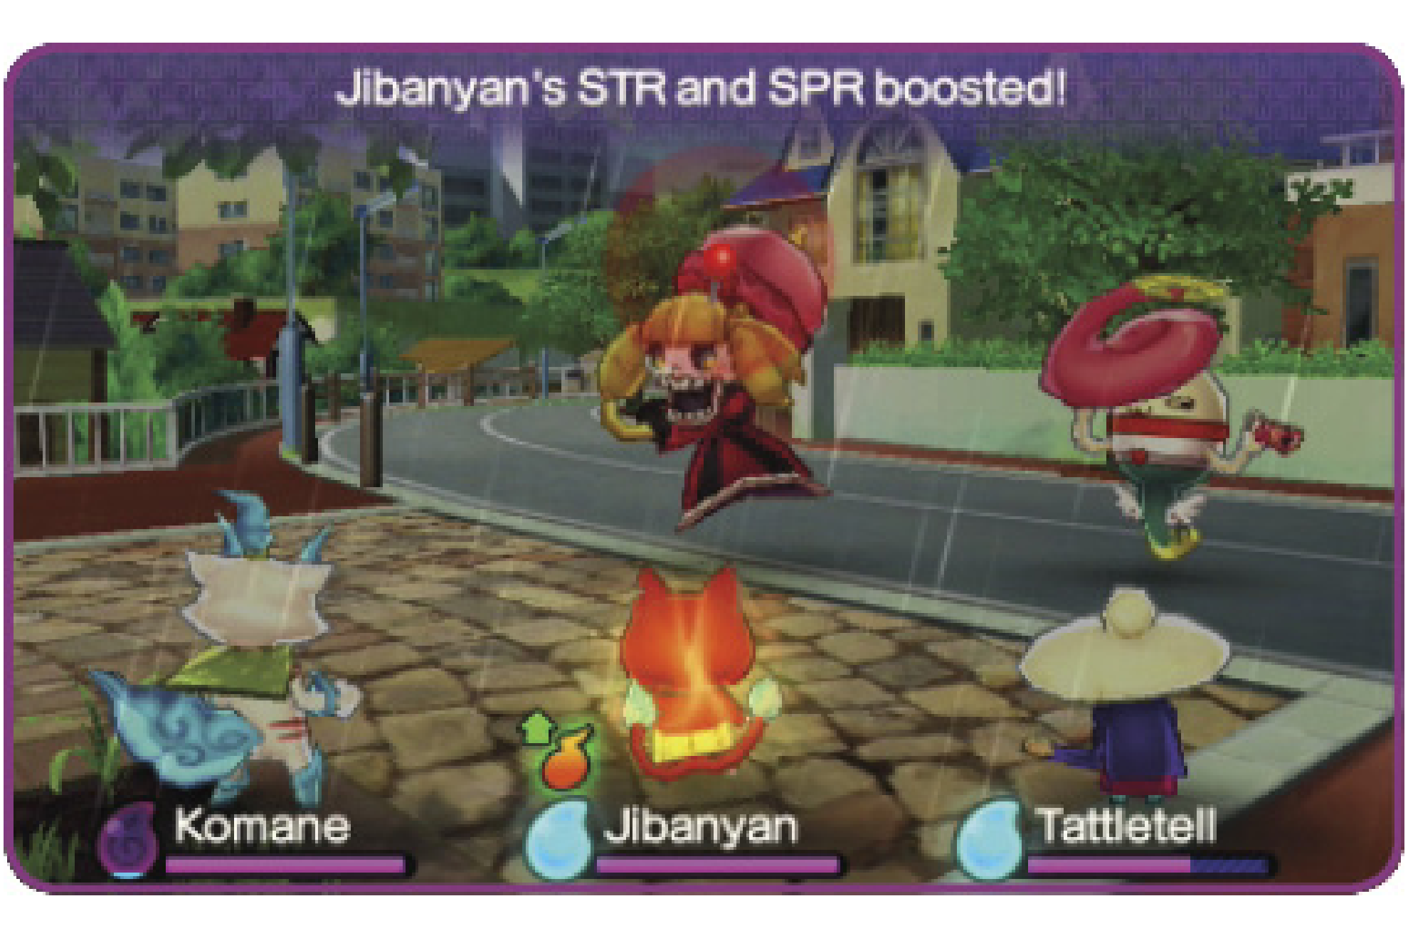
Trace the lines on-screen. Finish tracing three lines, and you’re charged up.



Tap on the flying yellow spirits. You charge up a little bit with each one.

Target

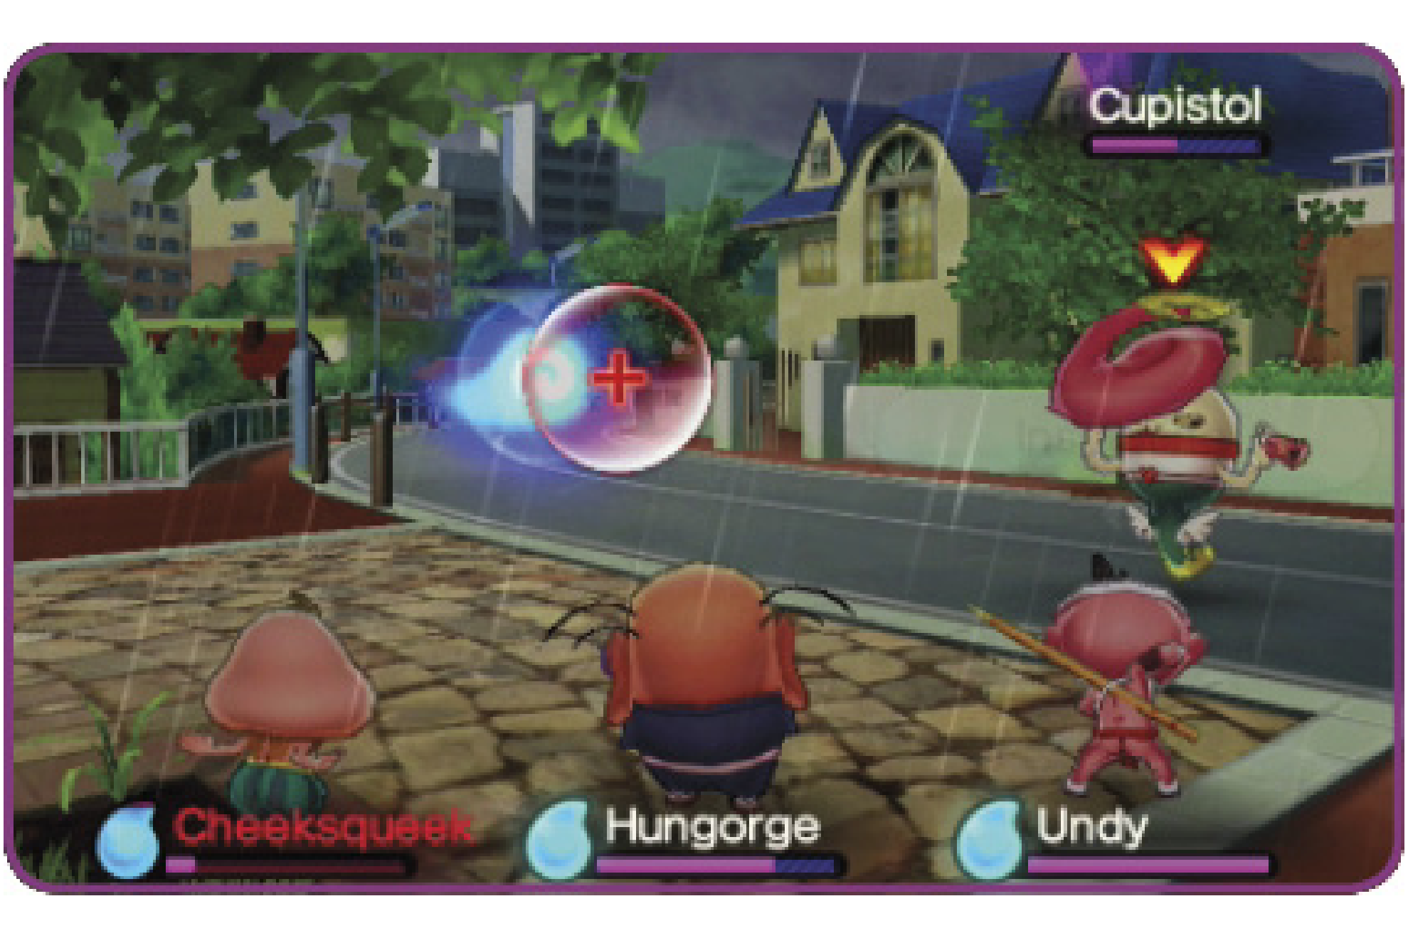
This action lets you target a specific enemy. Place a pin on the enemy Yo-kai (or section of a boss Yo-kai) you want to have your team focus their attack on. Once you place the pin, your Yo-kai team targets only the pinned enemy, ignoring everyone else. Tip: Don’t accidentally leave a pin in place during boss battles when you don’t mean to.



If there’s a foe you want out of the picture first, pin it right when battle begins!

Pin the Wisps!

Wandering spirits called Wisps occasionally flutter across your battlefield. Try to pin them! If you succeed, you can earn bonuses like items or Soul Meter and HP refills.



You may see blue or gold Wisps. The gold ones often grant you better bonuses.

Items

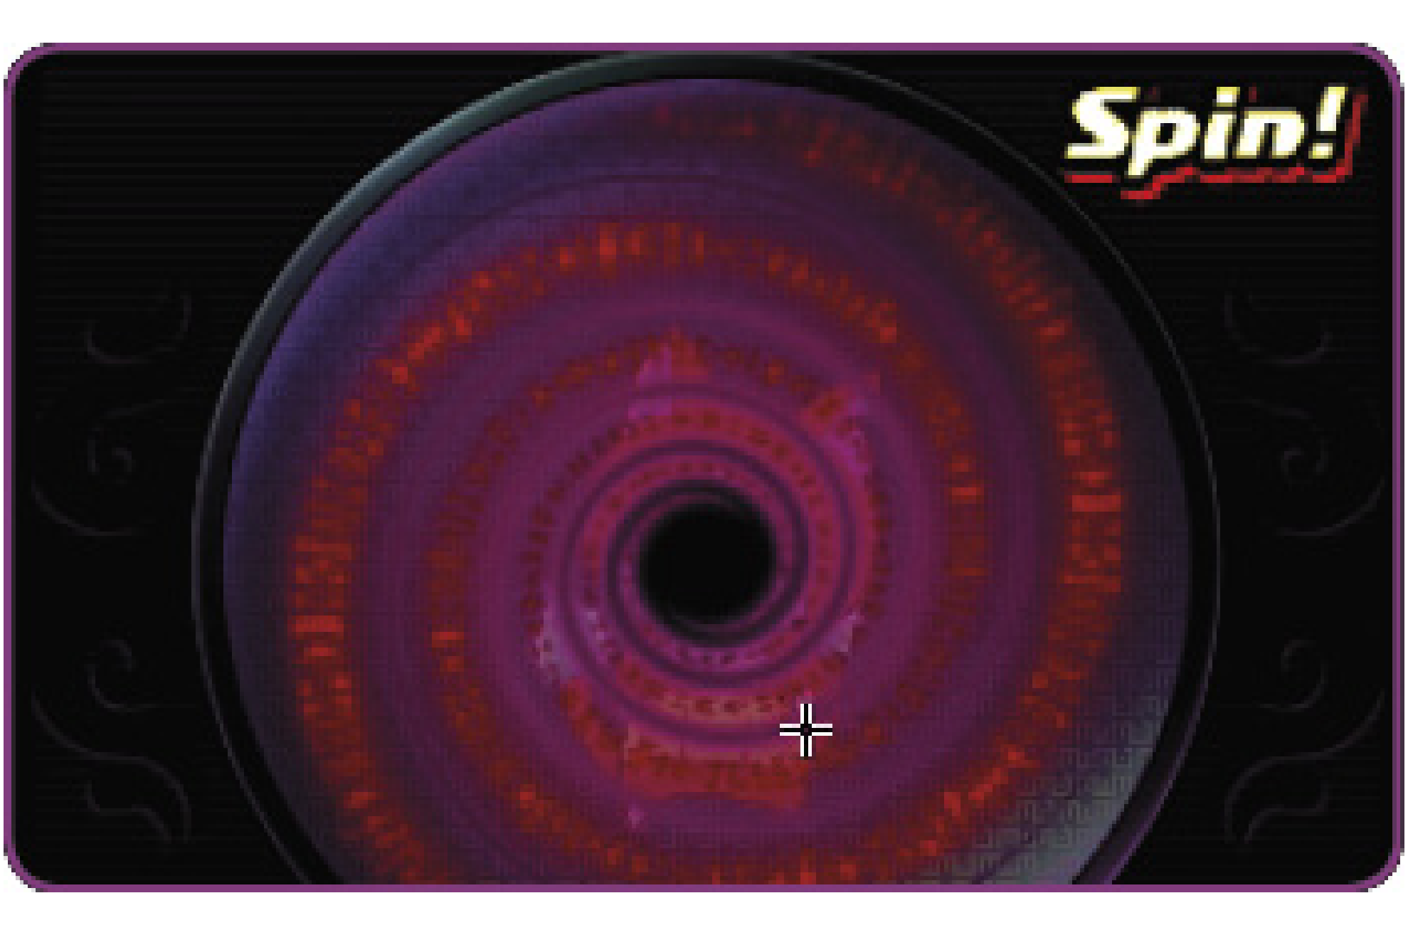
Cheeksqueek
Hungorge
Undy

Use food to replenish Yo-kai low on HP or Soul power, or administer medicine to revive unconscious Yo-kai. Some magical talismans boost a Yo-kai’s stats for a short time! Once you use an item, you’ll have to wait awhile before you can use another one. Timing can be key here.

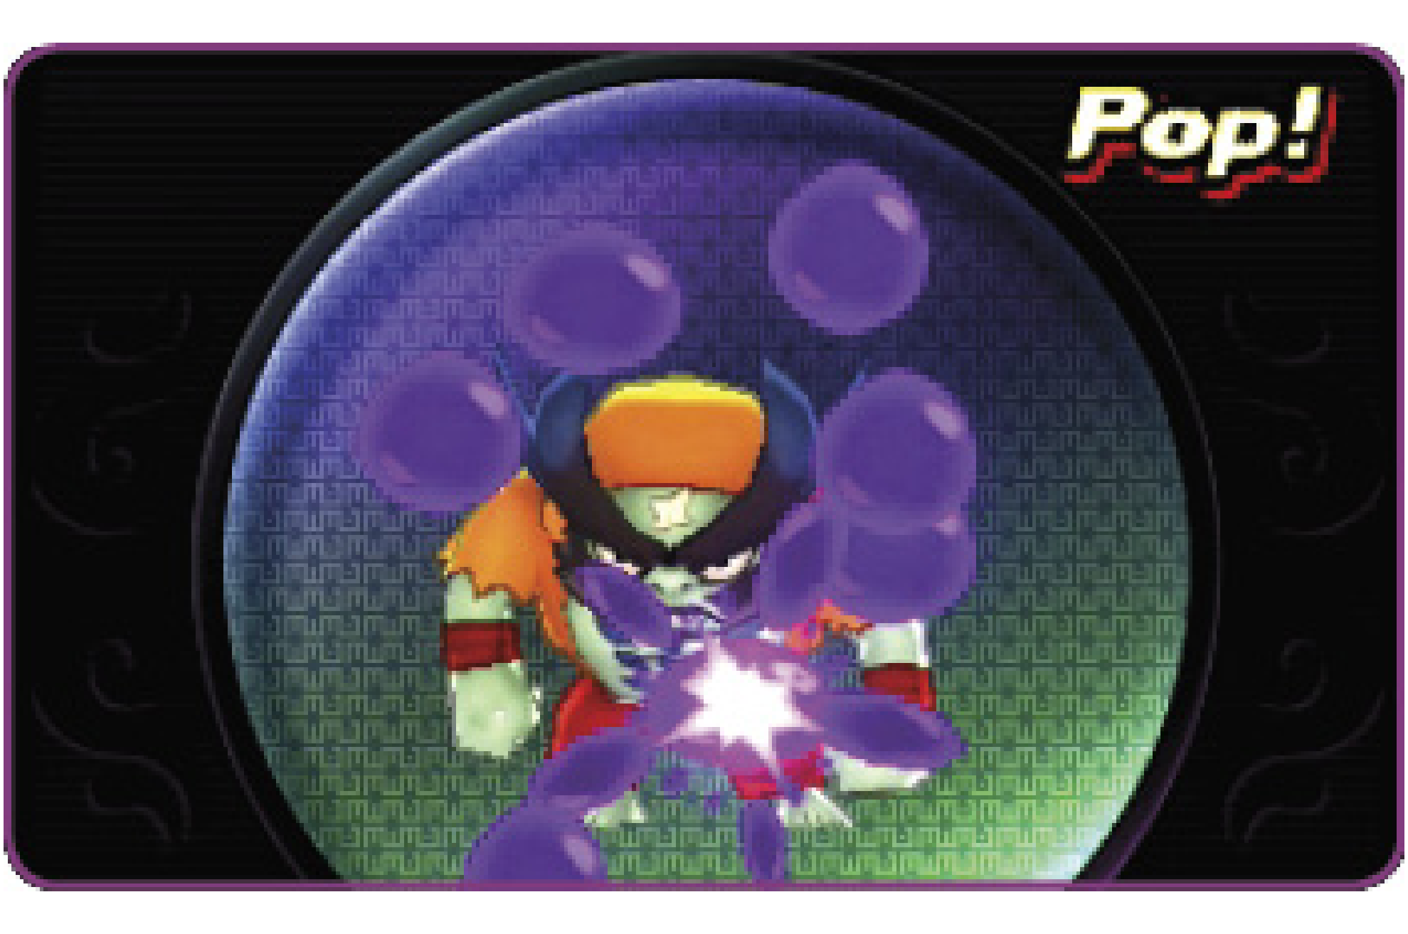
You can also give food to Yo-kai foes once per battle. Why feed an enemy? Well, if you give a Yo-kai its favorite food, you increase the chance it’ll befriend you after the fight!

Purify

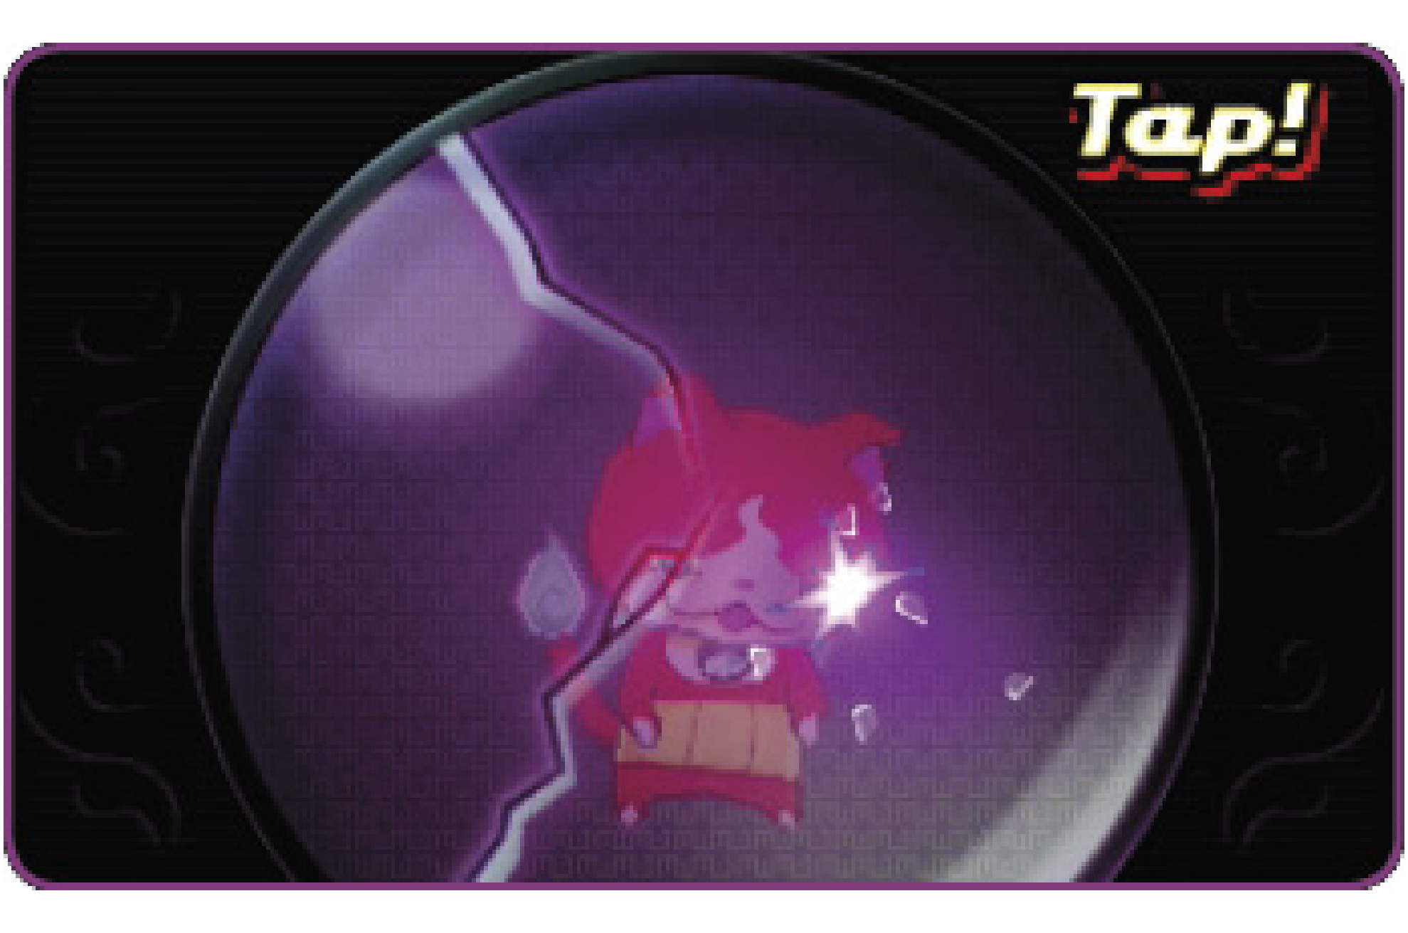
Use the bottom screen to “purify” Yo-kai that have been Inspirited with status ailments. There are four types of cleansing actions you may be asked to perform. Succeed, and you’ll earn extra EXP.



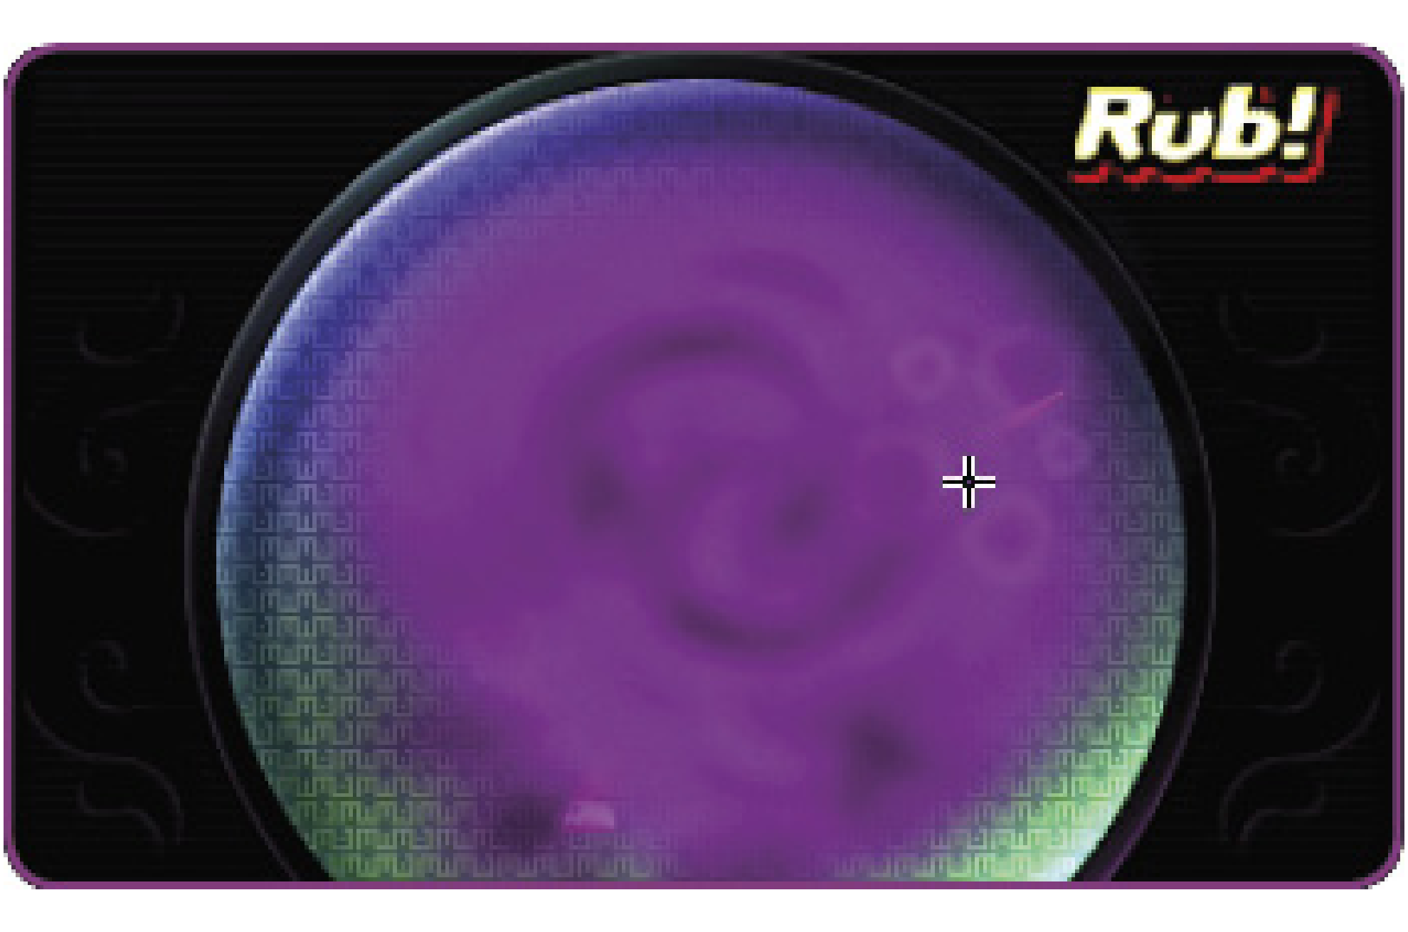
Spin the stylus around the screen to ward off the evil aura.



Tap away to pop all the purple spheres.



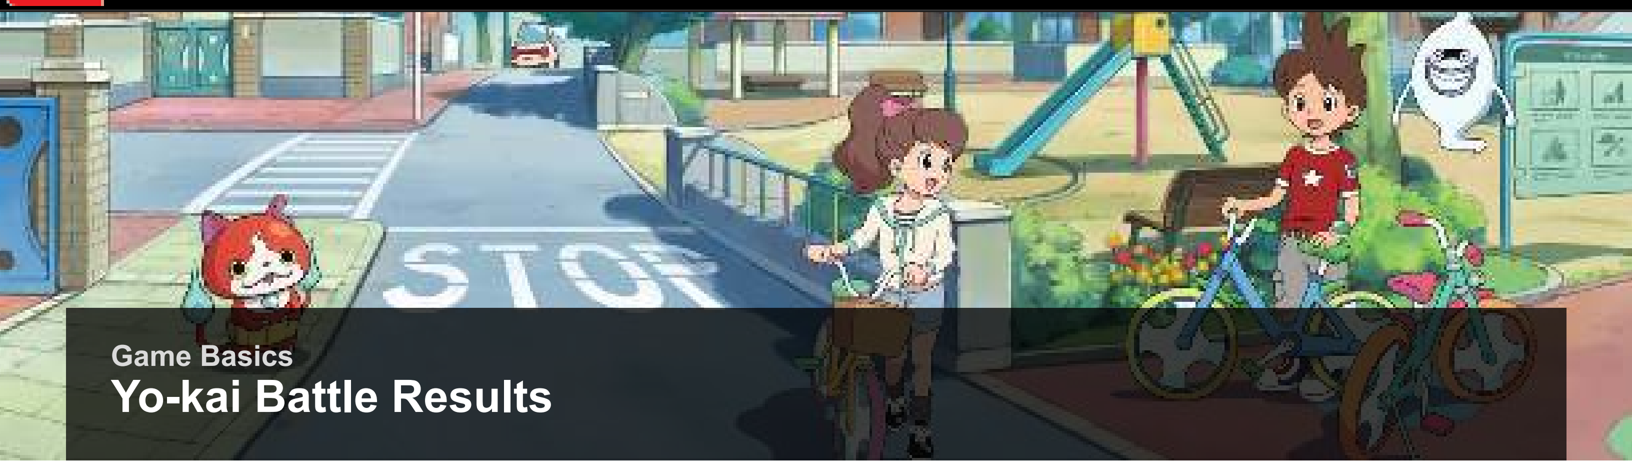
Tap at the screen to crack through the barrier.



Rub away at the screen to clear the haze.

Quick Heal!

Sometimes, you’ll see “LUCKY” onscreen, and the purification process will wrap up instantly. You’ll also earn a lot more experience than usual.

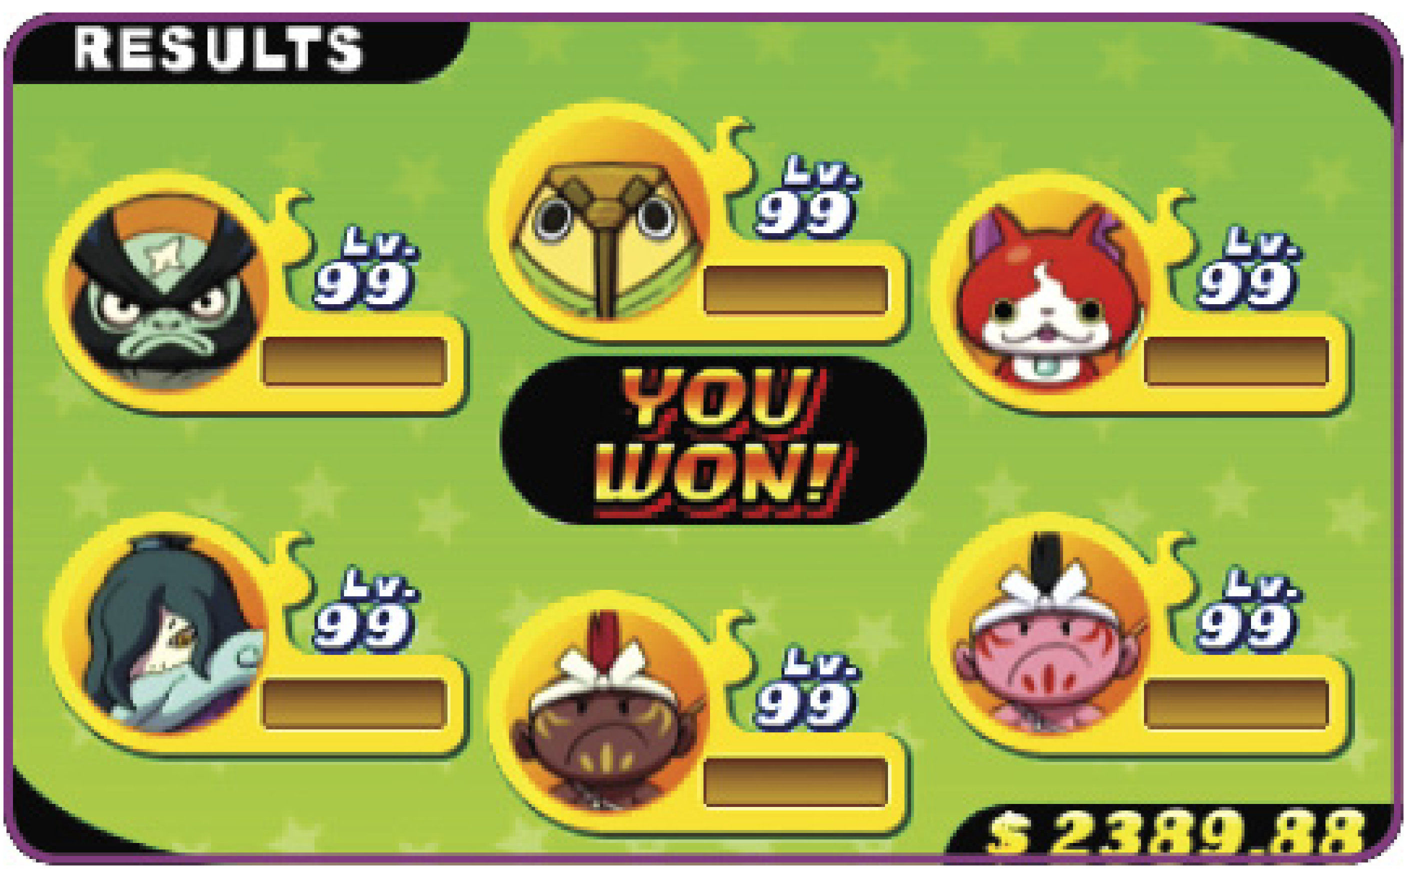


Game Basics

Yo-kai Battle Results

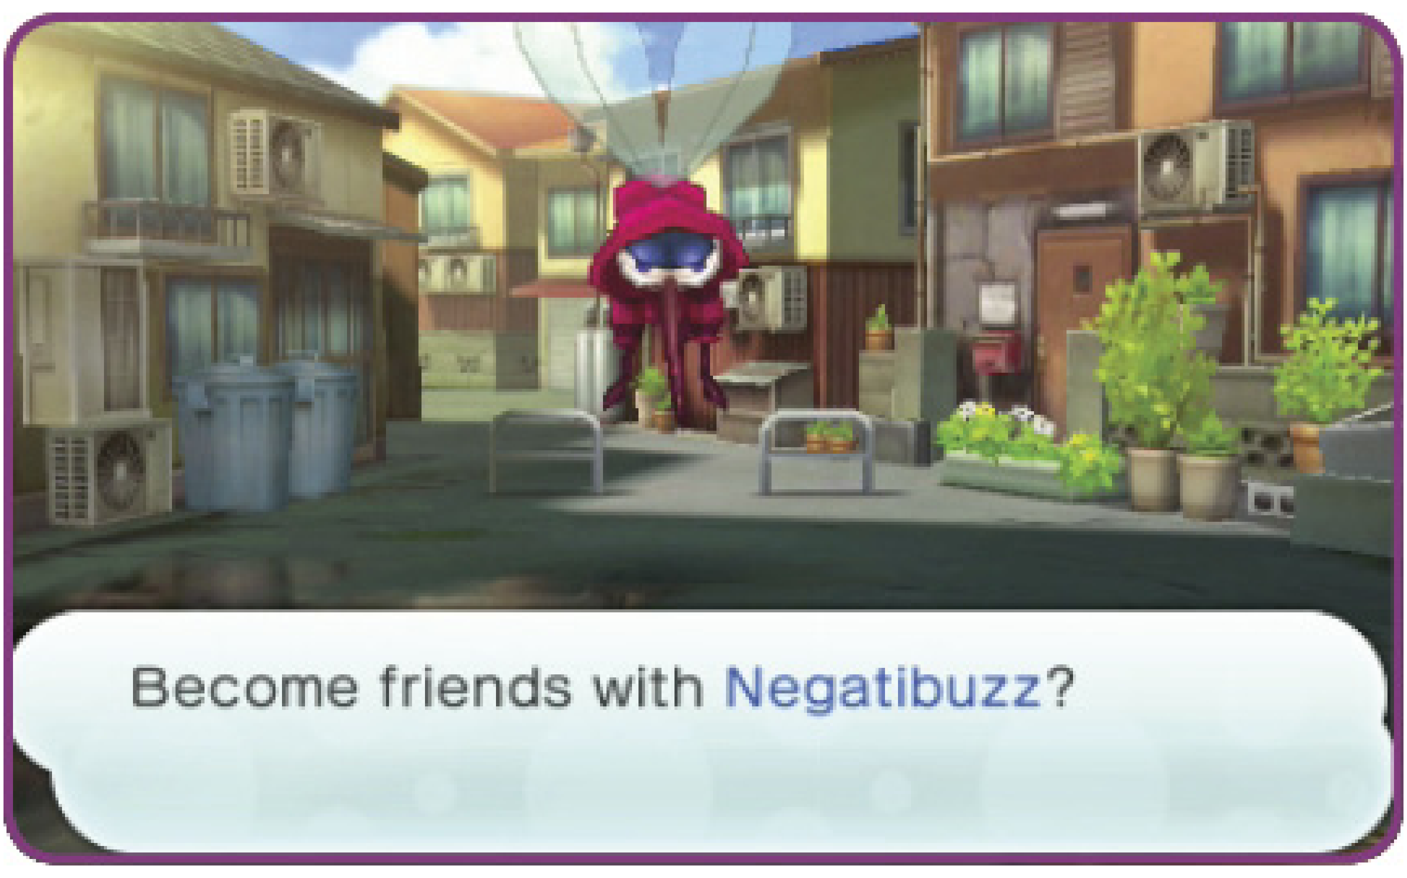
Once you defeat the enemy Yo-kai, the Results screen displays. All six of the Yo-kai in your active party are awarded the same amount of experience. Yo-kai in the rear line earn EXP even if they didn't join the battle at all! Any Yo-kai knocked out of battle after their HP hit zero are revived to 1 HP and rewarded with the same amount of EXP as everyone else.

In addition to EXP and money, you may also be rewarded with up to three items. If you're lucky, you might even earn a rare item!



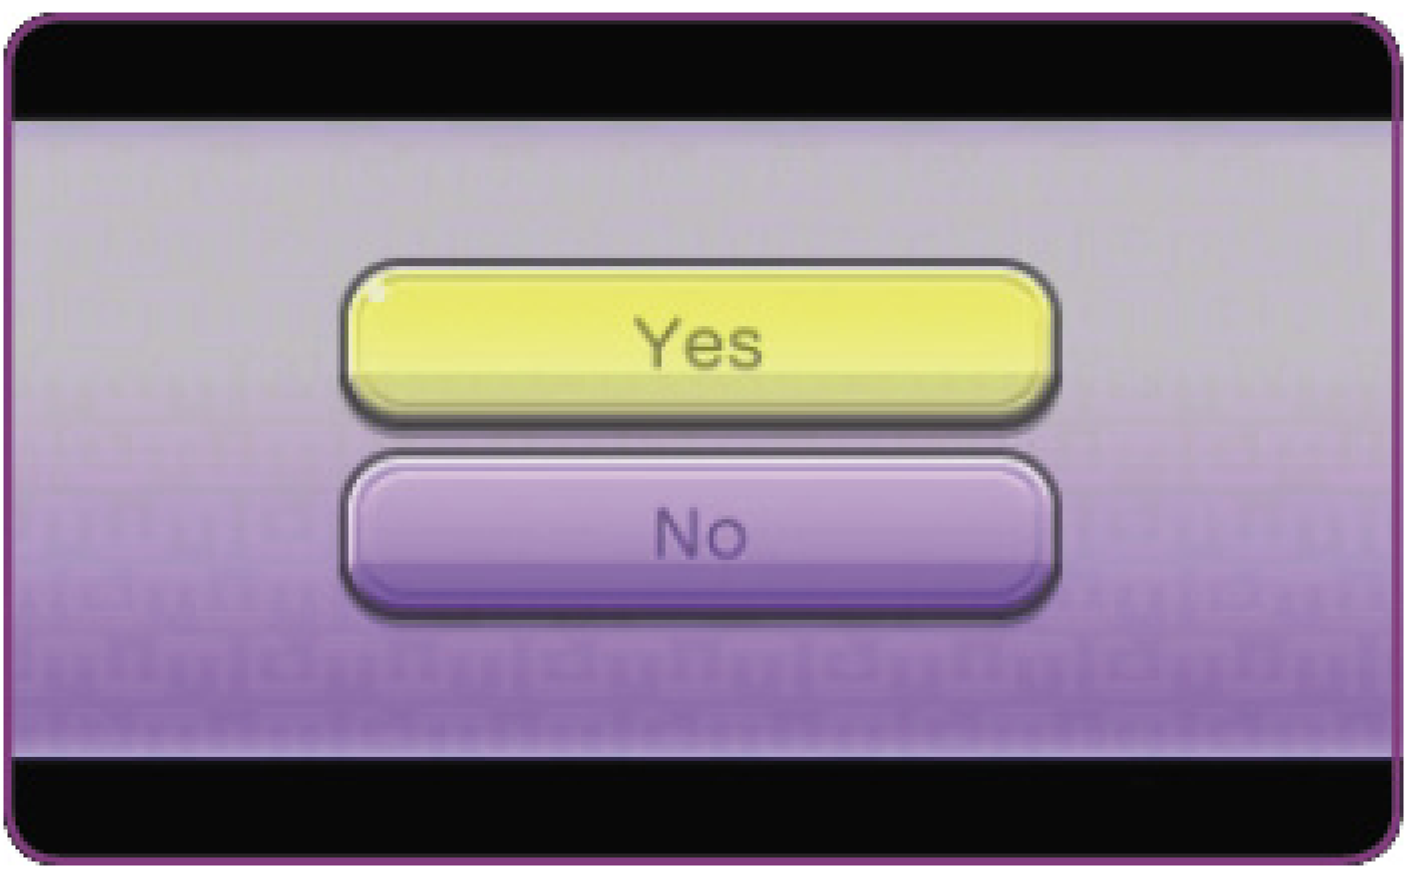
Making New Friends

After you're done in the Results screen, there's a chance that one of the defeated Yo-kai will get back up and ask to befriend you. If you fought a team of three Yo-kai, the one making the request will be selected at random, regardless of which one you defeated first. Only one Yo-kai can ask to join you per battle.



Become friends with Negatibuzz?

Remember: You'll have an easier time making friends if you give foes their favorite food during battle.



You're free to refuse the request, of course. Which will it be?

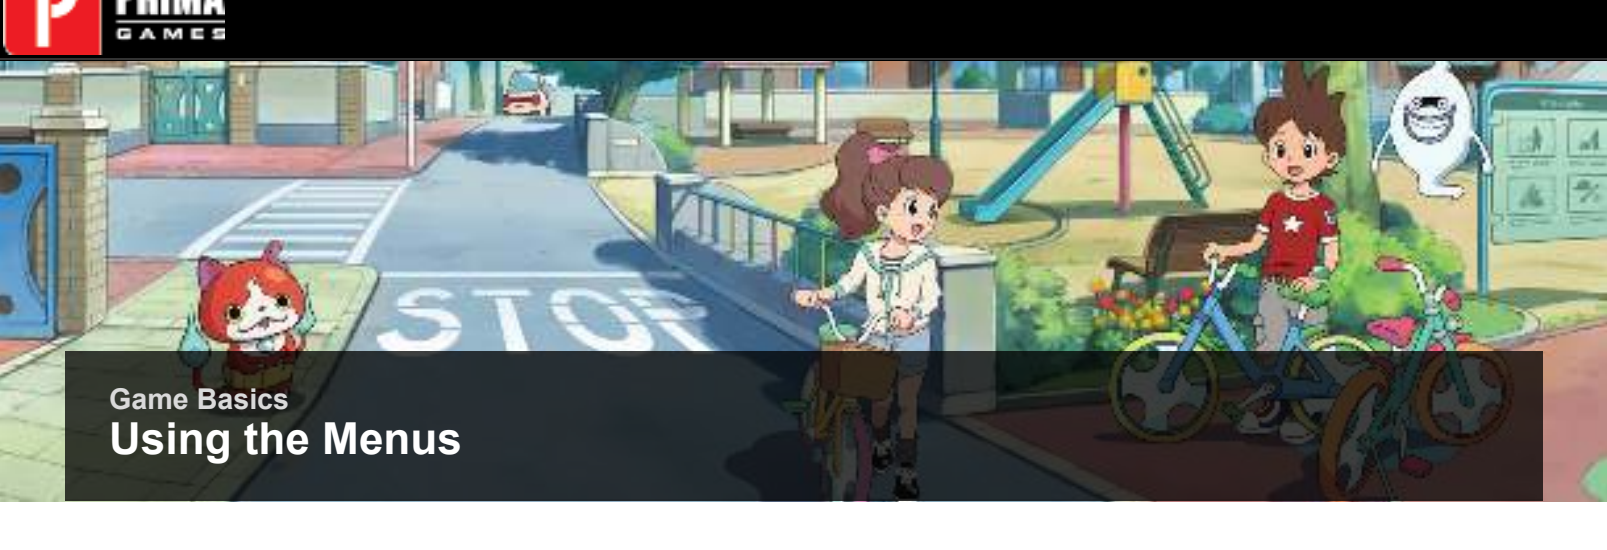
Leveling Up Skills

After deploying attacks, Techniques, and Soultimates in battle, your Yo-kai team may see their skill levels for these moves go up in the Results screen. When skill levels go up, damage inflicted on enemies increases! The highest skill level for each type of move is 10.

Unlike regular EXP-based character leveling, skill levels never go up unless a Yo-kai actually engages in the fight. If you want to boost a Yo-kai's skill level, don't leave it in the rear line. Bring it out front, and let it go crazy in battle!

What If You Lose?

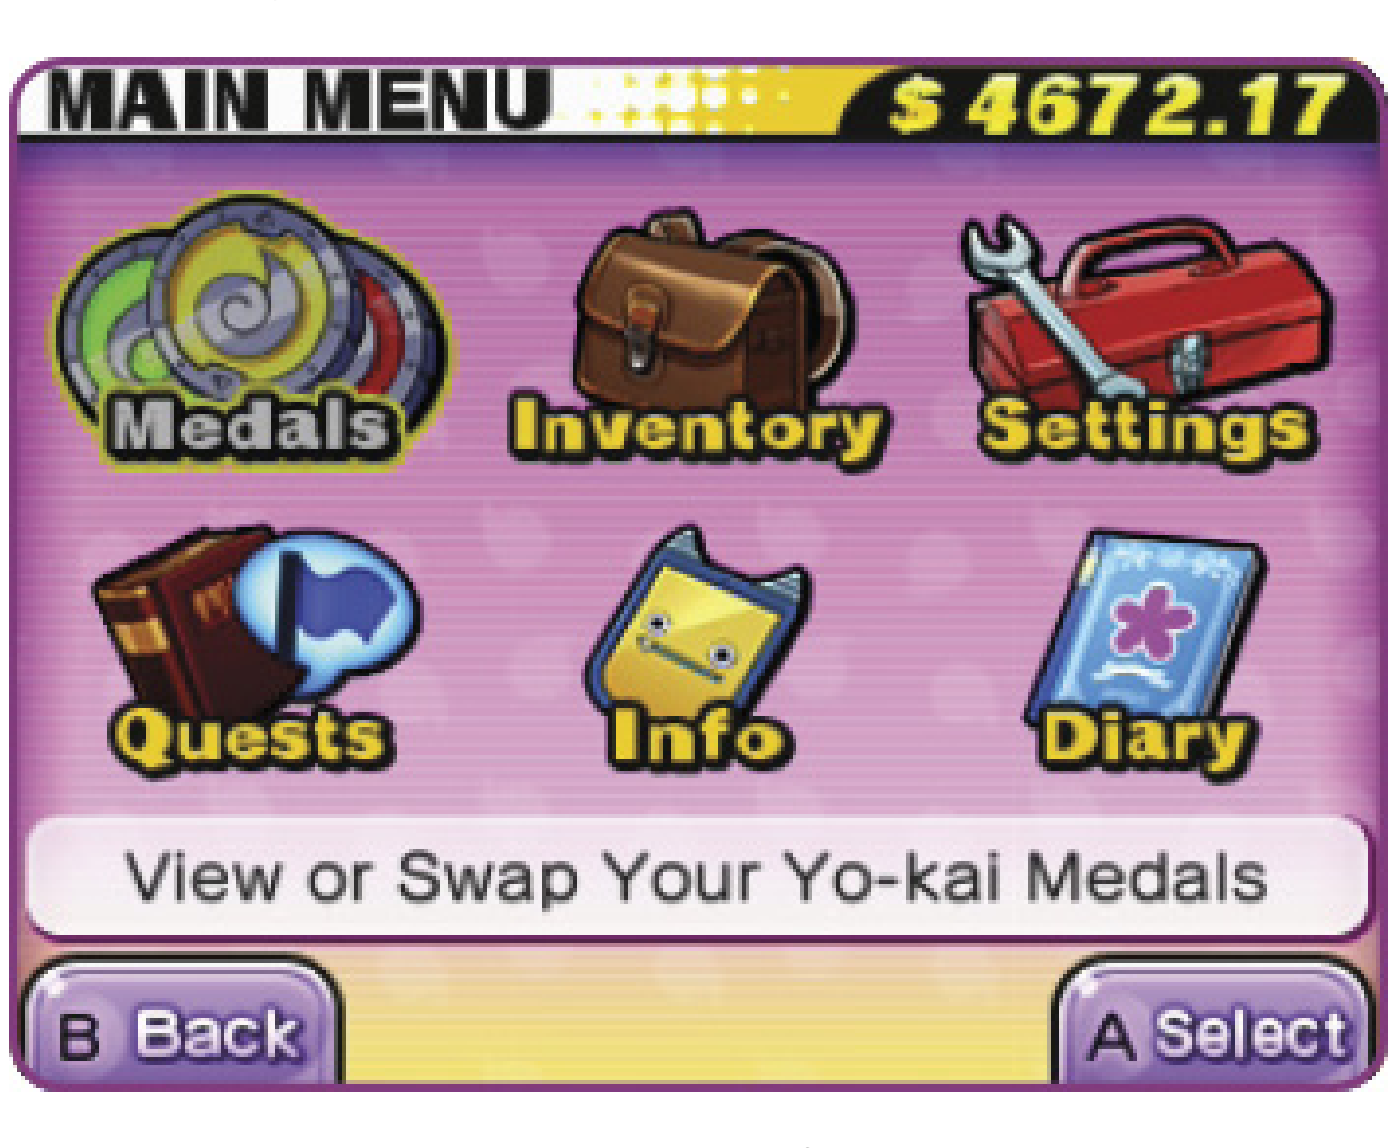
If all of your Yo-kai in possession are knocked out, guess what? You lose. You'll restart the game with all Yo-kai at the same HP and Soul Meter level as before the battle. Also, if you're in a building, you'll be taken back to the entrance. Otherwise, there's no particular penalty.



Game Basics

Using the Menus

Press X while moving around to bring up the Menu screen. You'll have six options to select from: Medals, Quests, Inventory, Info, Settings, and Diary. Each selection offers its own set of helpful data. Use the Control Pad or tap on the bottom screen to select menu options.



View or Swap Your Yo-kai Medals

You can see how much money you have in the upper-right corner of the Main Menu.

Main Menu: Medals

This option lets you check on the stats and abilities of the Yo-kai in your active party or on reserve in the Yo-kai Medallium. You can also change the positions of the Yo-kai on your Yo-kai Wheel. However, this screen doesn't let you swap Medals between your Yo-kai Wheel and Medallium. Again, that can be done only at an Eyepo or in your character's bedroom.

Equip

Equip your Yo-kai with useful items. Each Yo-kai can use only one piece of equipment. You can remove equipment on this screen, too.

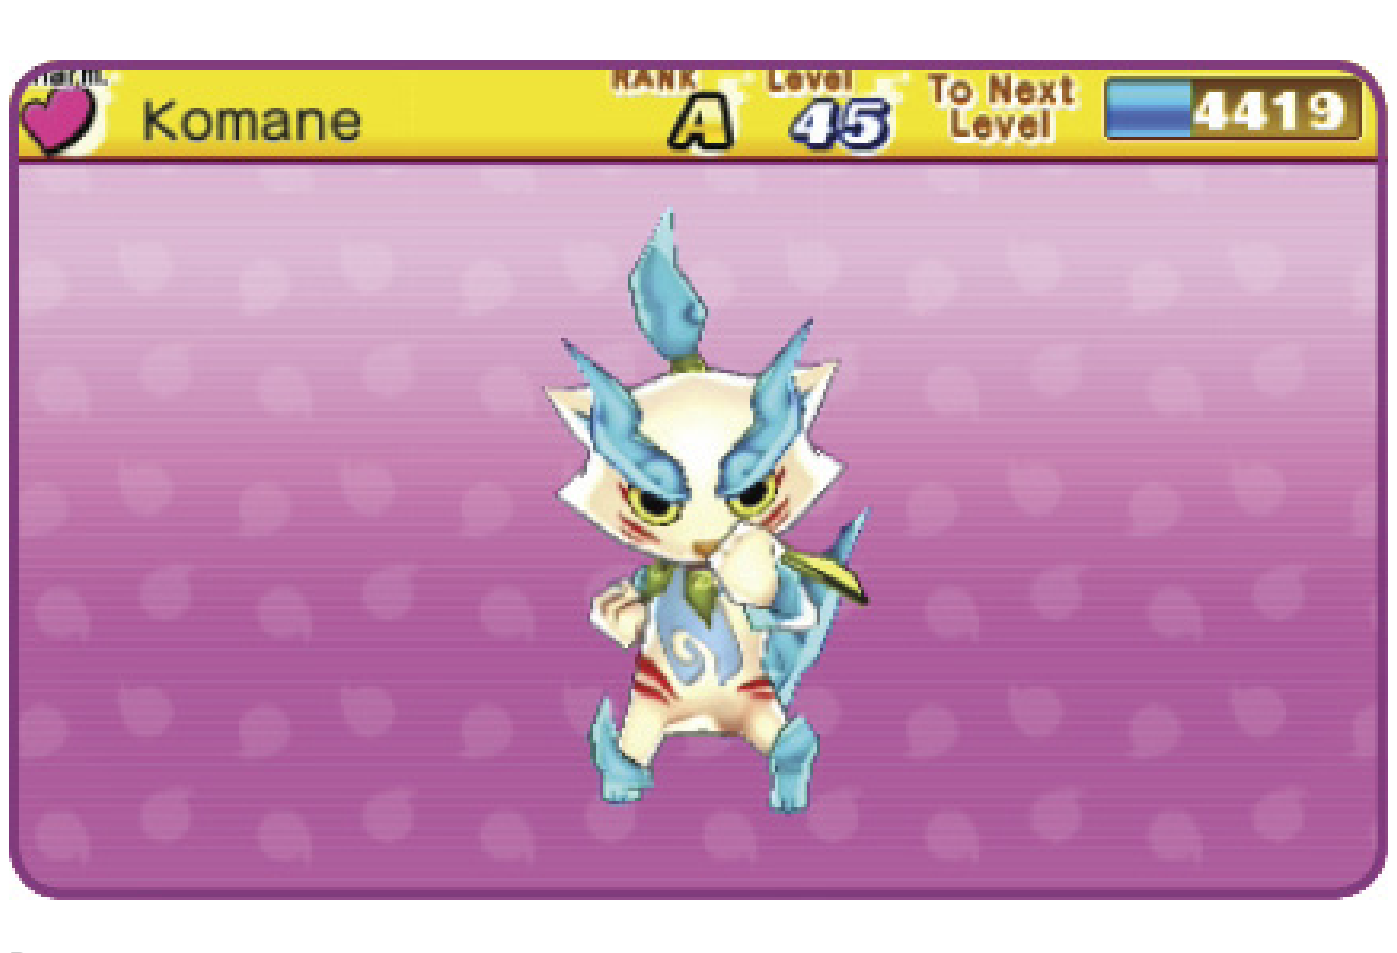
Lowers Lightning Defense.

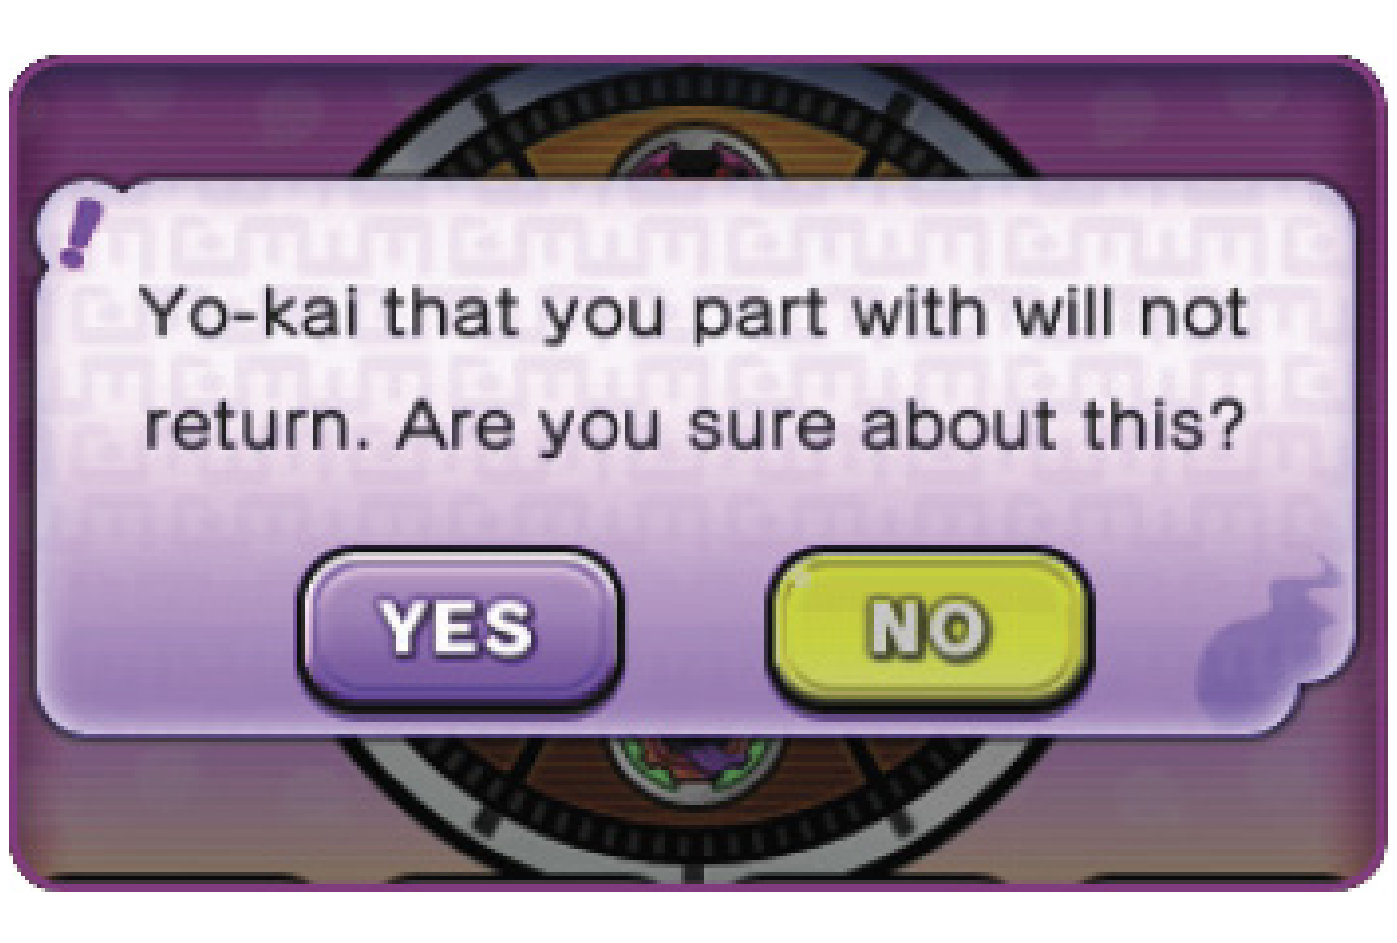
Pose

Select one of four possible poses the Yo-kai strikes after winning a battle. Select "Random" to have the Yo-kai randomly pick one each time.



Drop

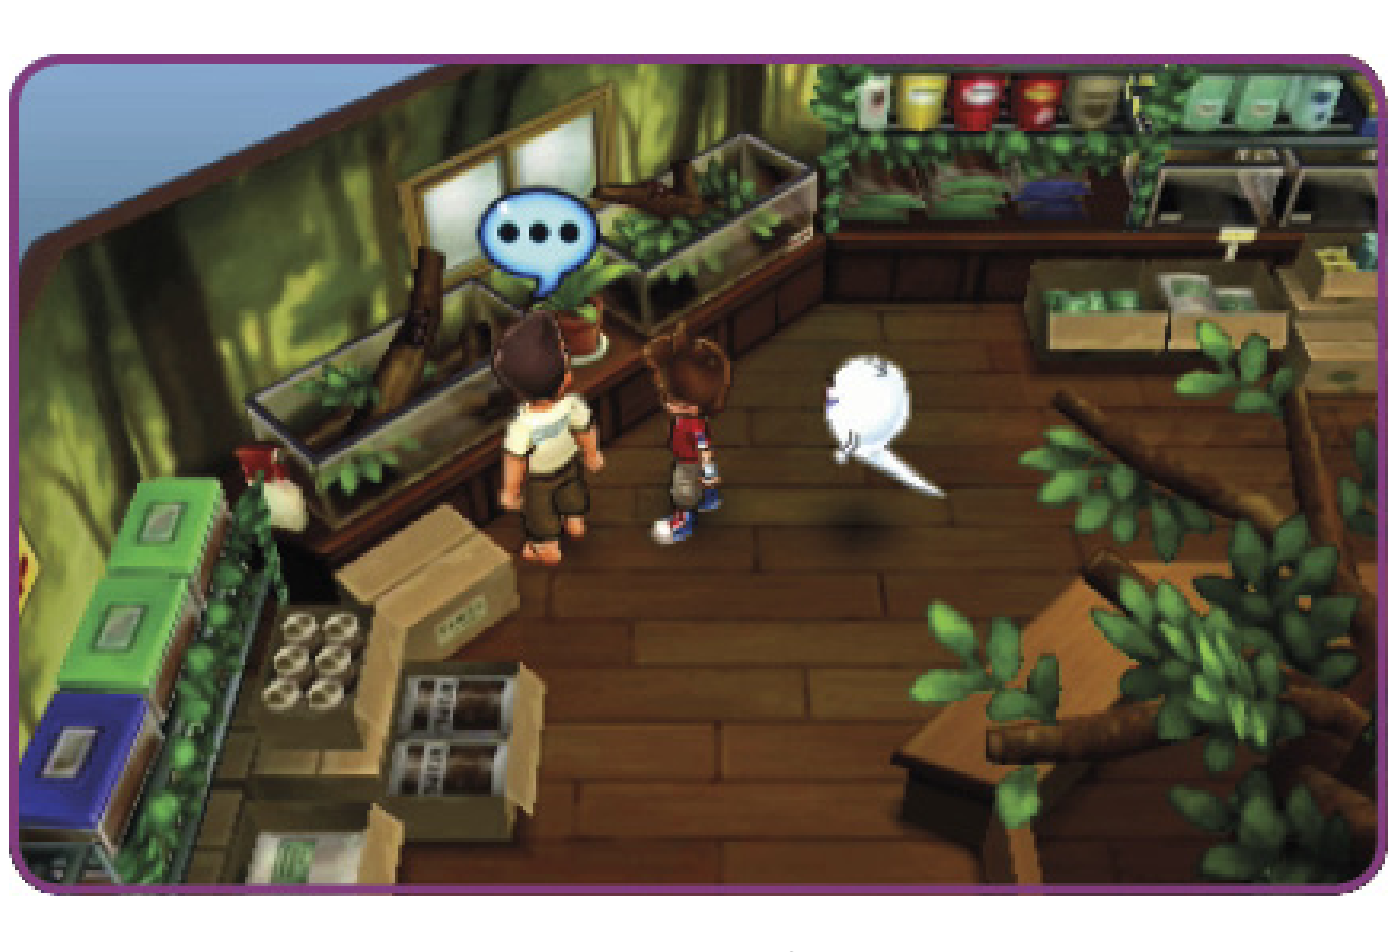
Dismiss a befriended Yo-kai from your Medal collection. You cannot drop Yo-kai that joined you as part of a story event.



Yo-kai that you part with will not return. Are you sure about this?

Main Menu: Quests

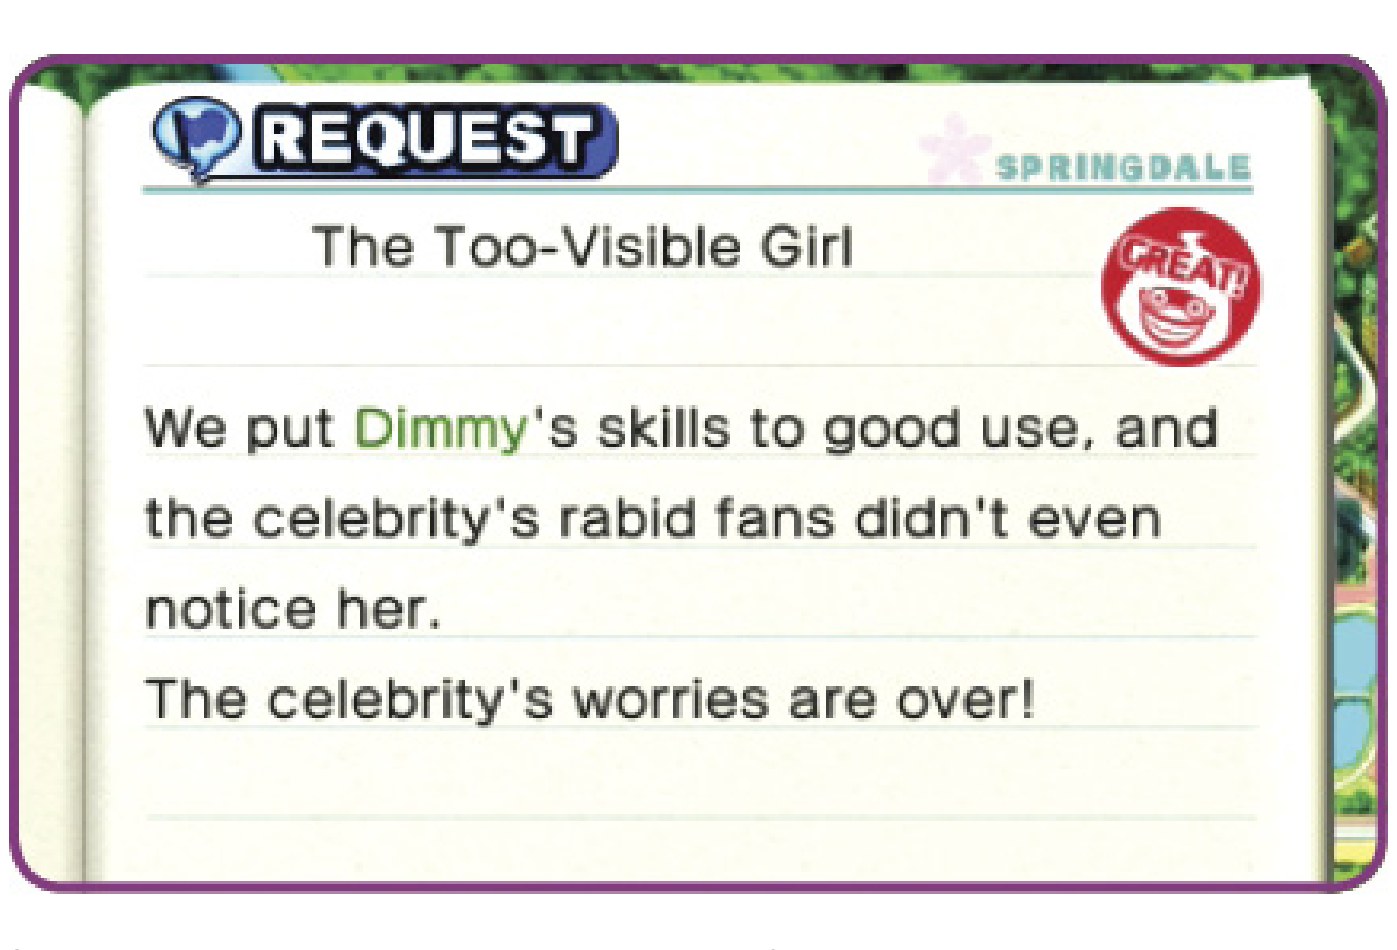
Yo-kai Watch features three types of quests. This menu option lets you check which ones you've completed, as well as the current status of any quests you've taken on. The main story of Yo-kai Watch is your primary quest, but you also receive a number of sub-quests from the townsfolk. These sub-quests are divided into two types: Requests and Favors. Most sub-quests aren't related to the main story, but completing them can earn you EXP and useful items.



Anyone with a blue or orange word balloon overhead has a quest for you. They appear on the map as a blue or orange flag.

Requests

Requests come from people marked by blue flags. Some are simple, while others require a bit of work. Once you complete a Request, it's finished for the rest of the game.



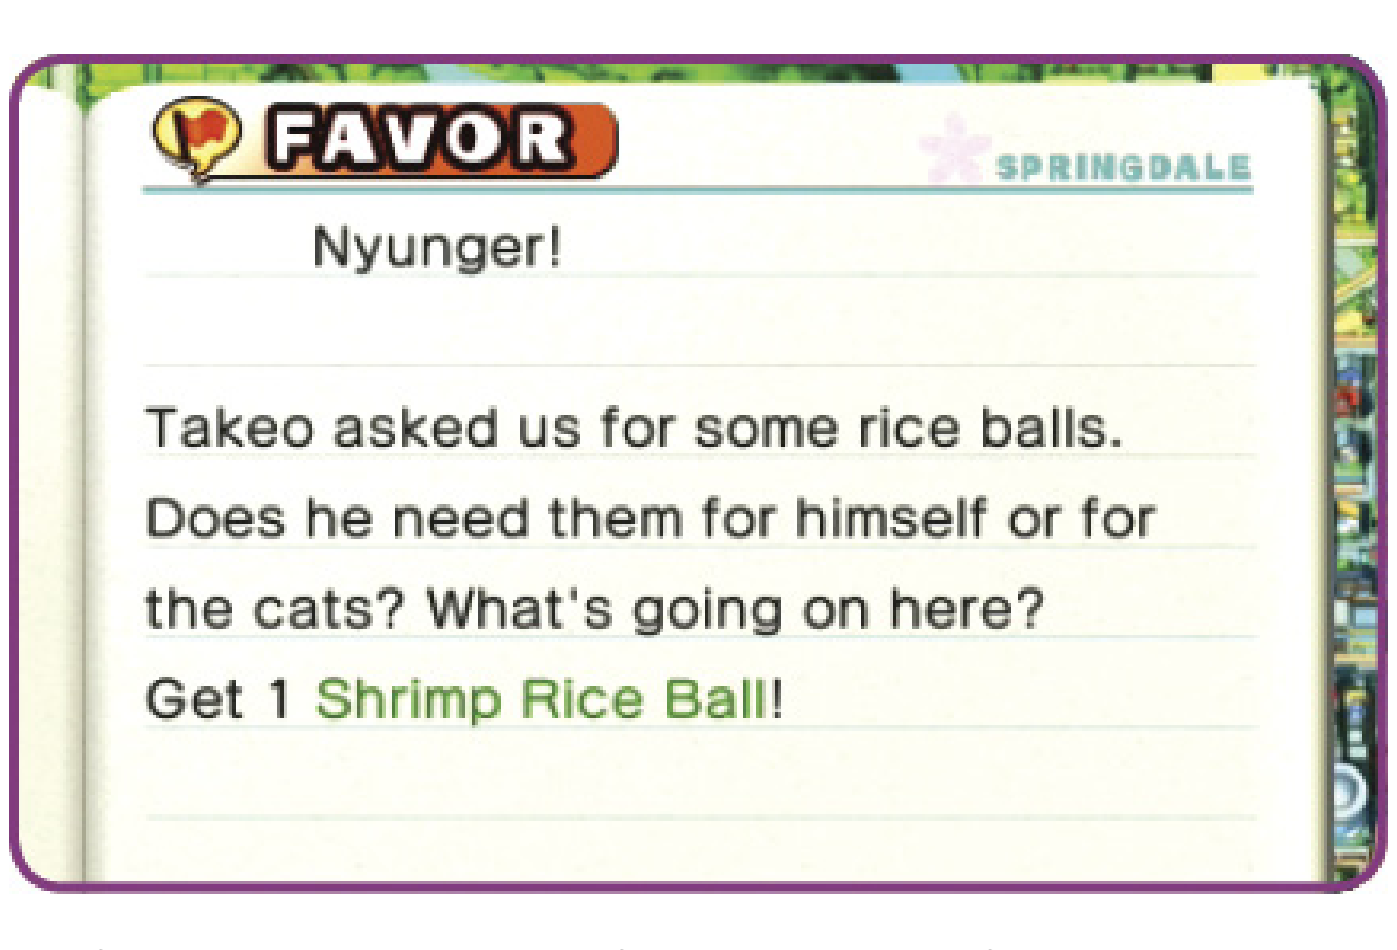
The Too-Visible Girl

We put Dimmy's skills to good use, and the celebrity's rabid fans didn't even notice her.
The celebrity's worries are over!

Some quests require you to have certain Yo-kai on your team to finish.

Favors

People marked by orange flags have Favors to ask of you. Complete them once, and they'll reappear after awhile, letting you complete them again and again.



Nyunger!

Takeo asked us for some rice balls. Does he need them for himself or for the cats? What's going on here?
Get 1 Shrimp Rice Ball!

Many of these quests involve collecting items or defeating a certain number/type of Yo-kai.

Main Story

Here, you can view the progress you've made through the game's central story. This includes a rundown of any objectives currently in progress, as well as a chance to review quests you've already completed. You'll also get to check on the names of important Yo-kai that have shown up in the story.

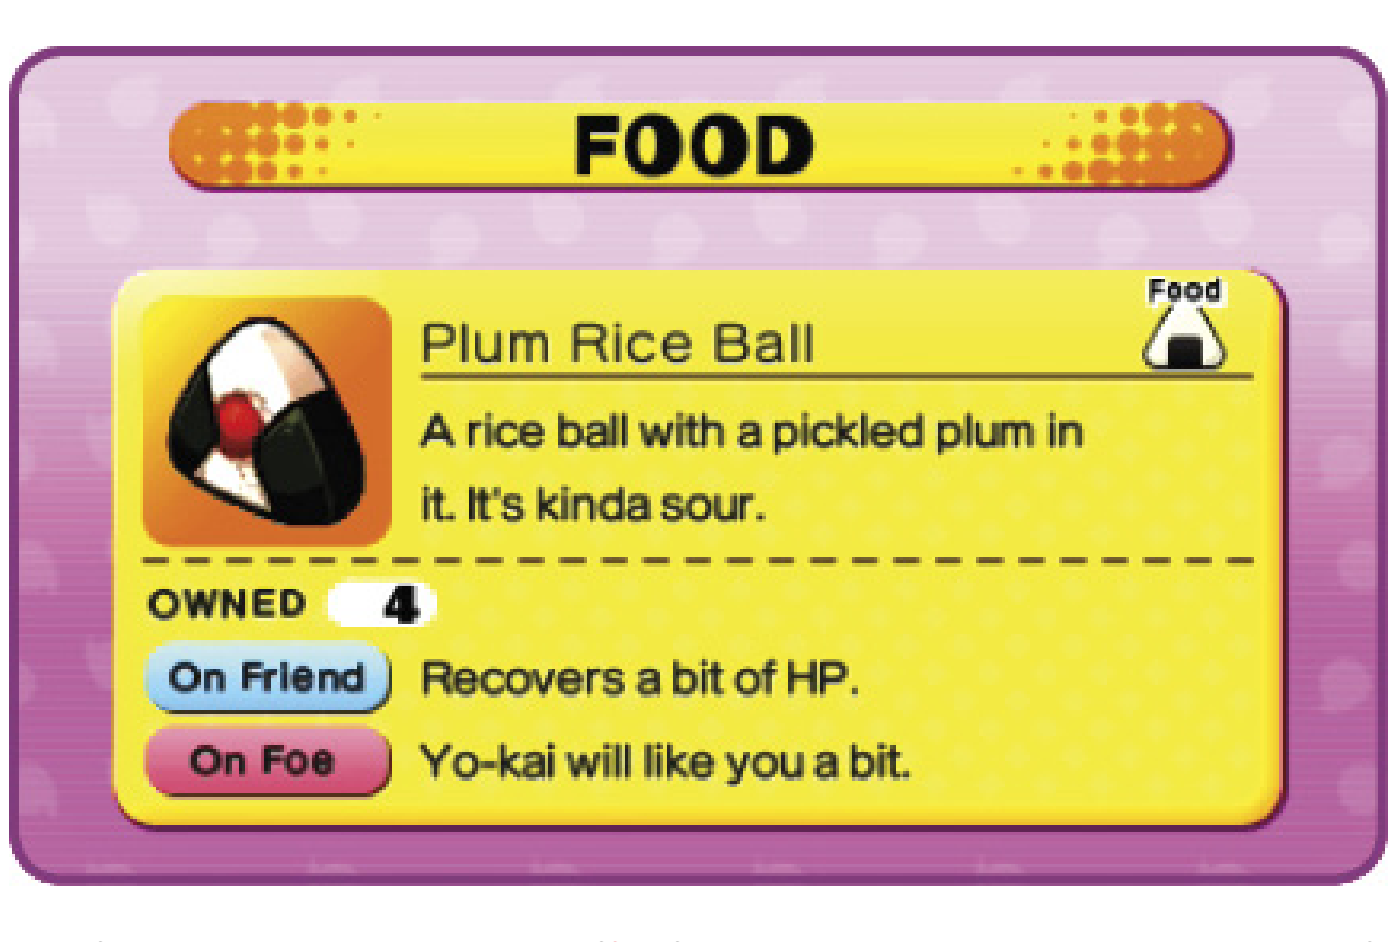
Main Menu: Inventory

This is where you view and use your items. Items are divided into five categories, making it easier to find what you want. Just press the L/R Buttons to switch item types.

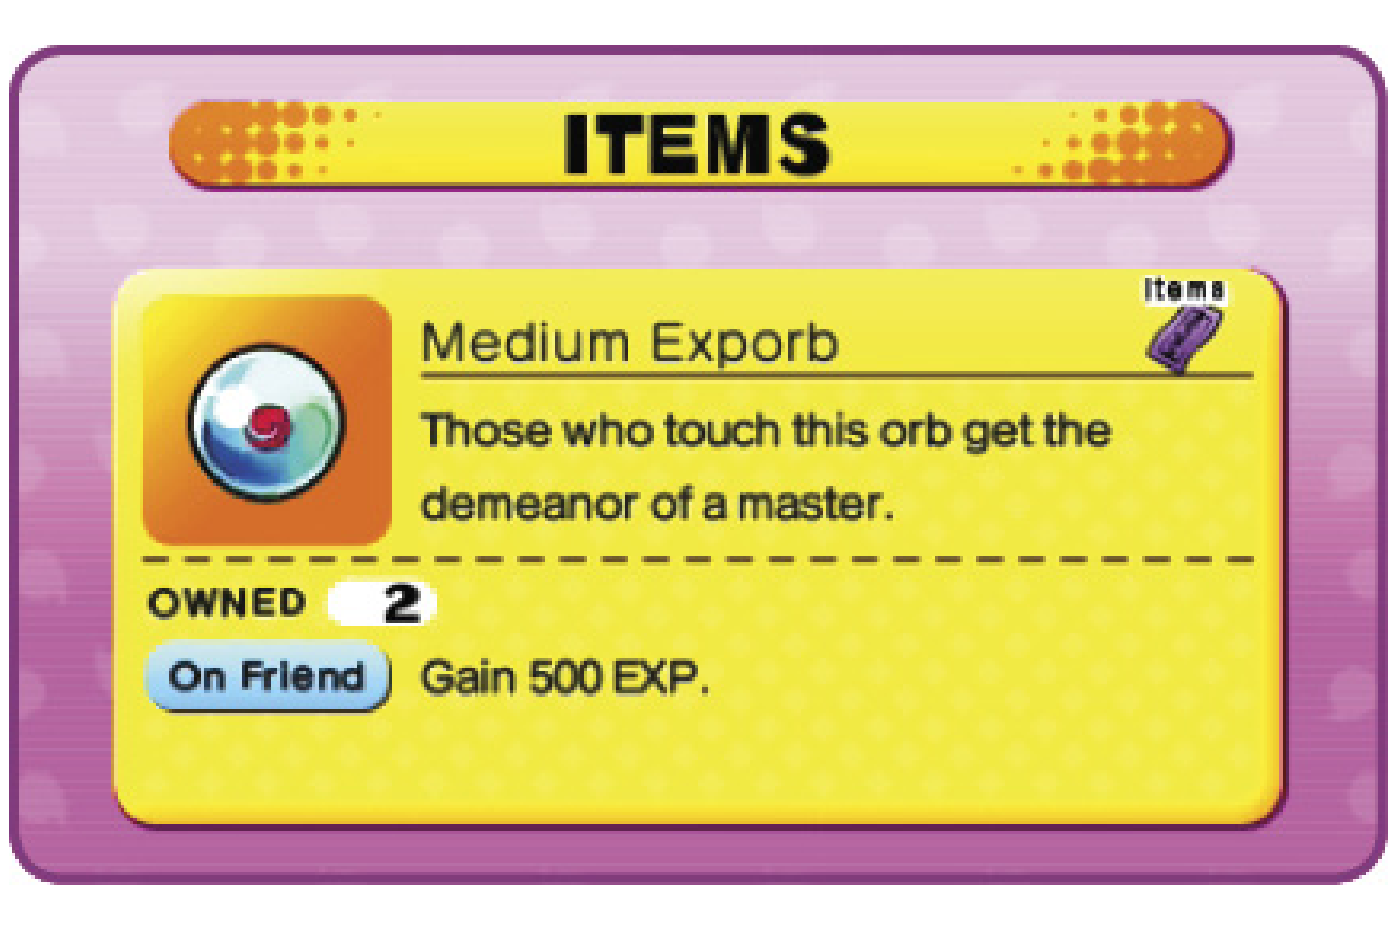
Food



Plum Rice Ball
A rice ball with a pickled plum in it. It's kinda sour.
On Friend: Recovers a bit of HP.
On Foe: Yo-kai will like you a bit.

Food refills your Yo-kai's HP. There's a large variety of food, from rice balls and bread to meat and vegetables, and they'll refill HP at differing levels depending on what your Yo-kai likes best. Drinks like Y-Cola are also classified as food on this screen. Those are used to refill your Yo-kai's Soul Meter.

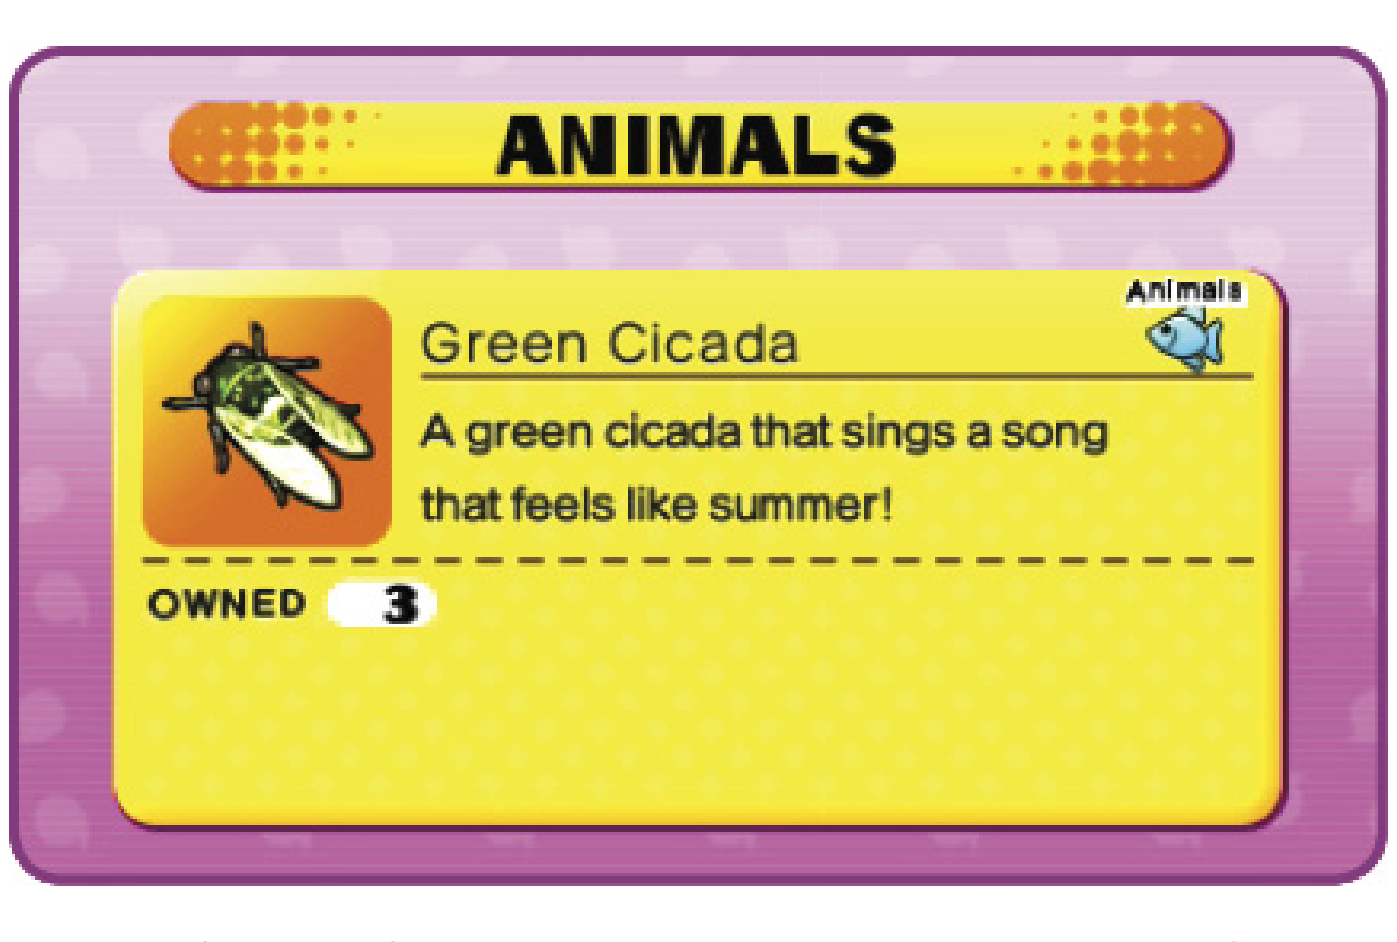
Items



Medium Exporb
Those who touch this orb get the demeanor of a master.
On Friend: Gain 500 EXP.

You can use items like books and Exporbs to boost Yo-kai stats while you're moving around town. Meanwhile, talismans and medicines can be used in battle. You can trade Bronze, Silver, or Golden Dolls for money. Coins are fed into the Crank-a-kai, and things like Black Syrup and Fish Bait make it easier to snag bugs or fish. This screen lets you view all of these consumable items at once.

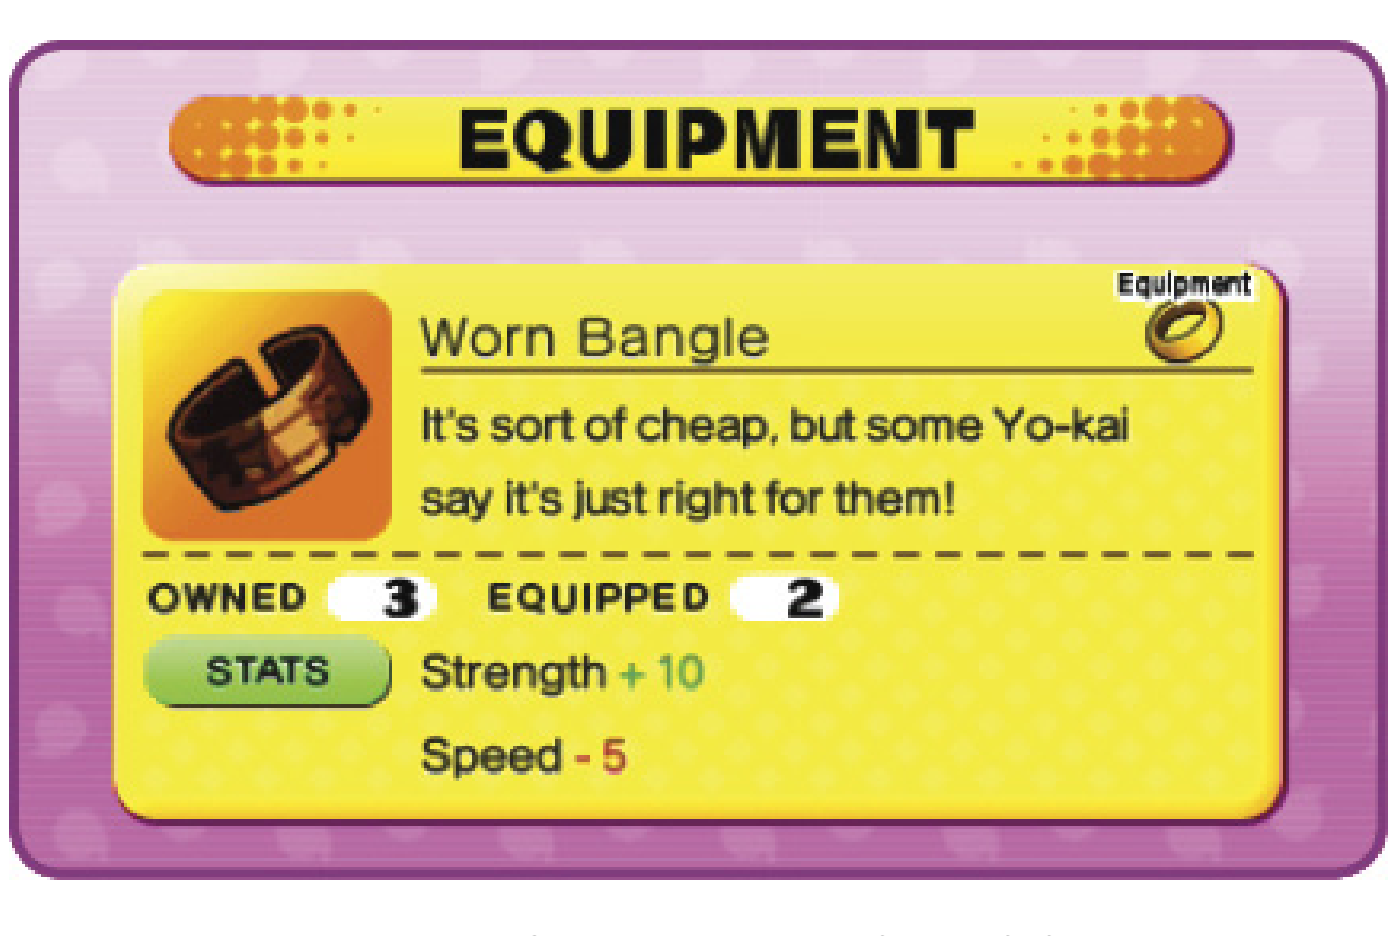
Animals



Green Cicada
A green cicada that sings a song that feels like summer!

This tab lists all of the insects and fish you've caught. Deliver the critters you catch to Jungle Hunter in Uptown Springdale to exchange them for items. Certain rare, valuable items can only be obtained this way. Note that some creatures are more rare than others. Will you be lucky enough to find the rarest of the rare?

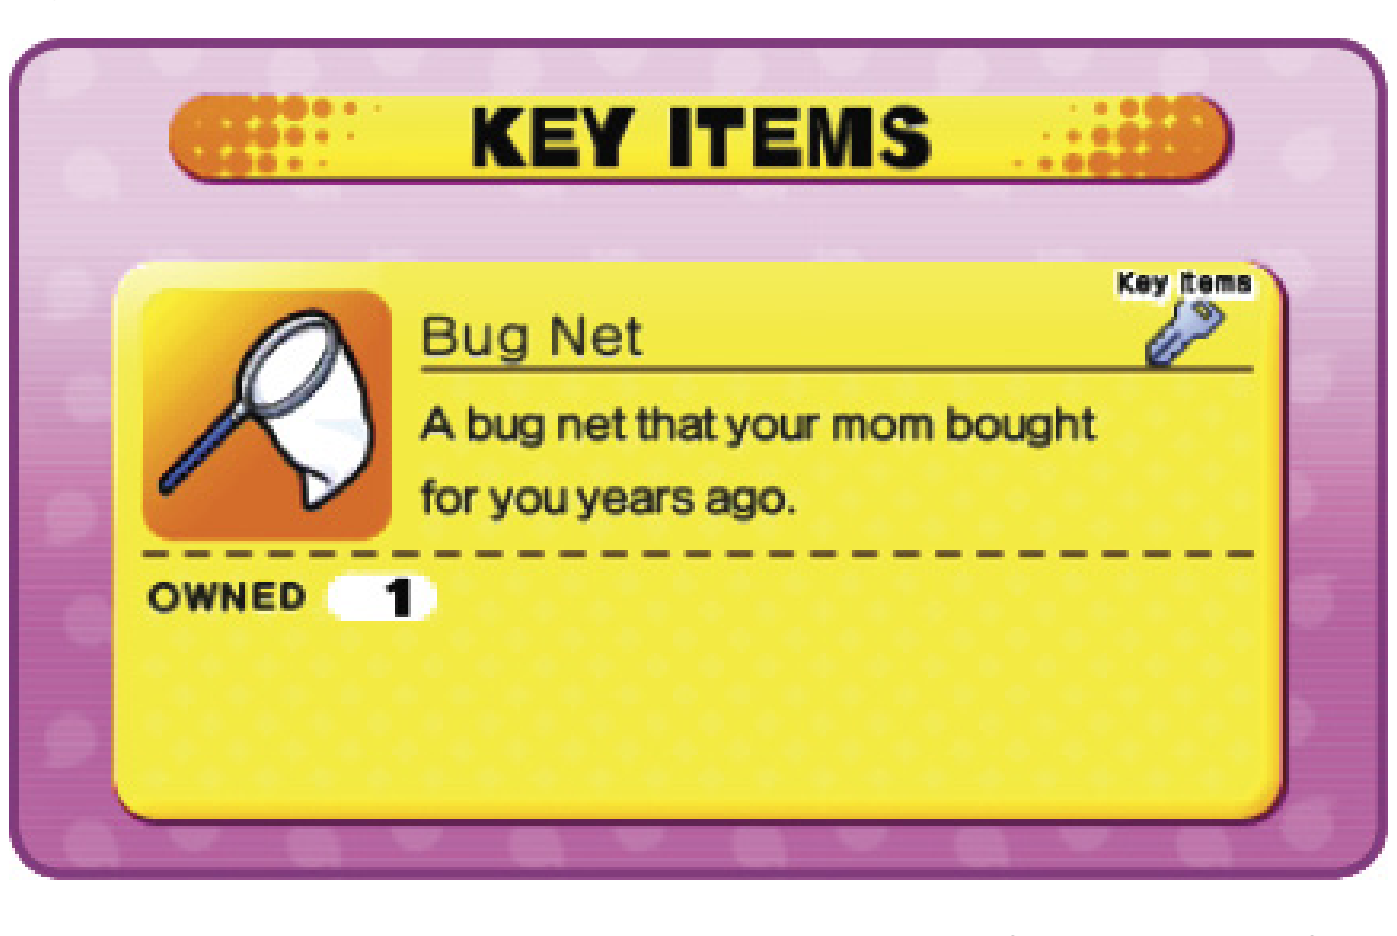
Equipment



Worn Bangle
It's sort of cheap, but some Yo-kai say it's just right for them!
Strength +10
Speed - 5

This lists all items you can equip on your crew. Select an item, and you'll see a full lineup of befriended Yo-kai. The six active in your Yo-kai Wheel are listed first, followed by the rest in the order you befriended them. Make sure you check what a piece of equipment does before you equip it!

Key Items

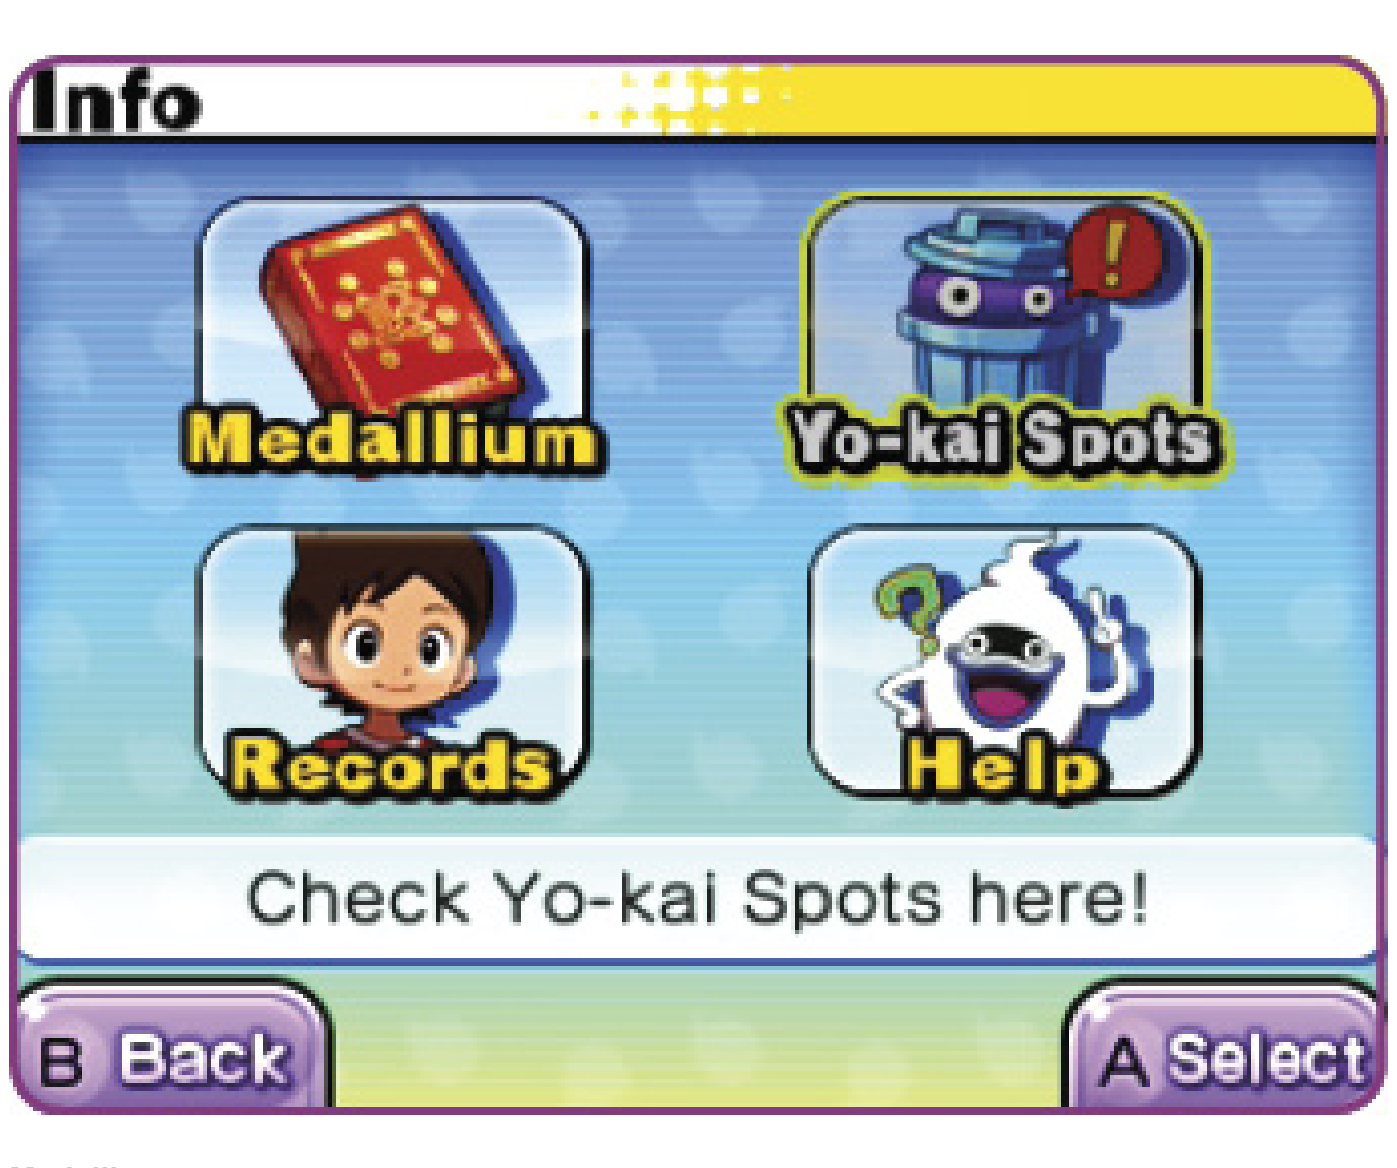


Bug Net
A bug net that your mom bought for you years ago.

Key items like your Yo-kai Watch, Bicycle, Bug Net, and Fishing Rod are obtained as part of the main story and most of them are used to fulfill quests. Some are automatically used when needed. Others may be assigned to a unique button. Check in now and then to see what kind of items you currently have.

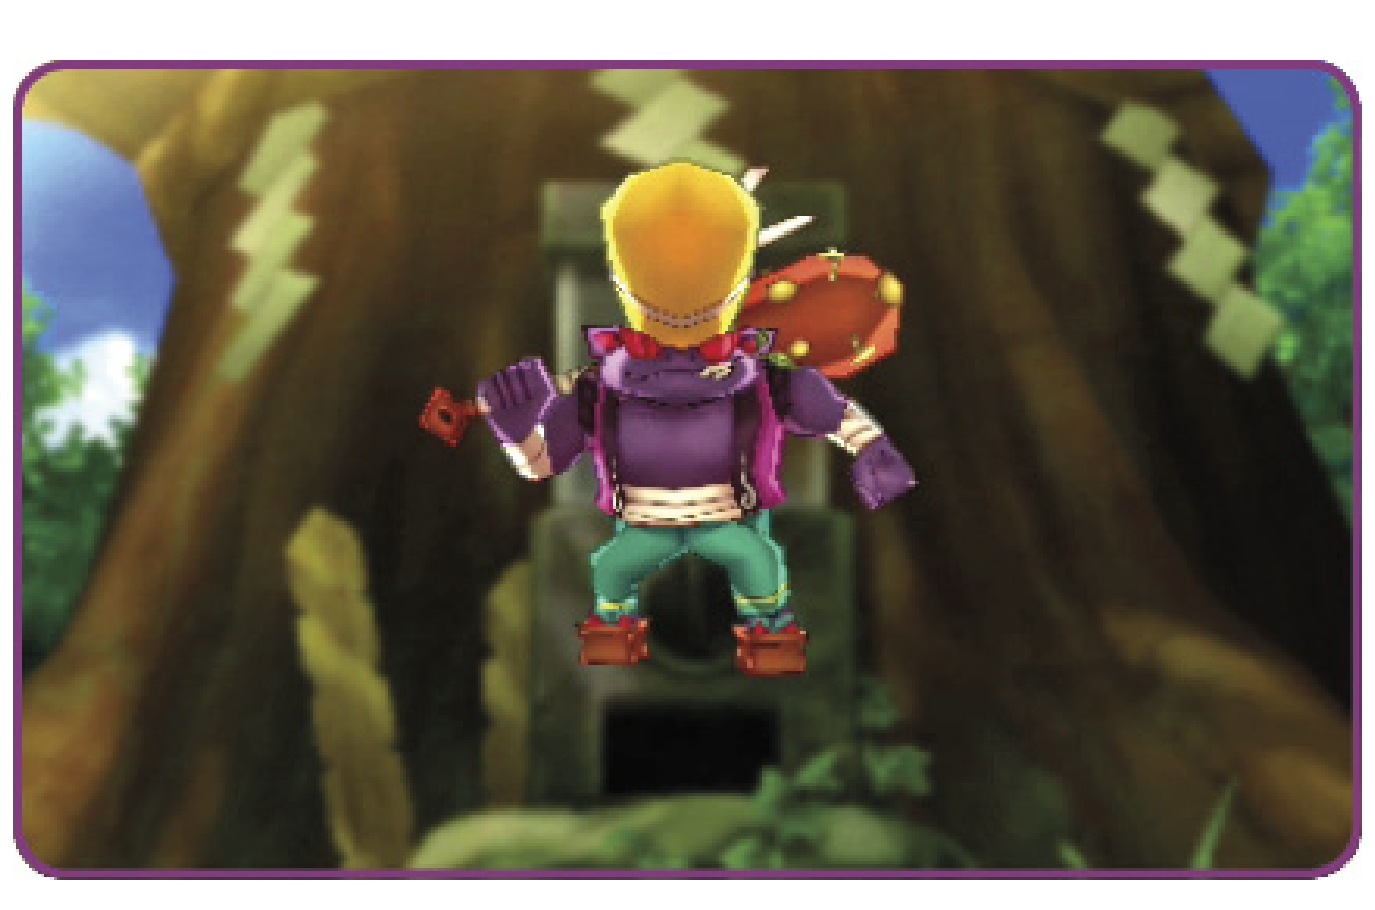
Main Menu: Info

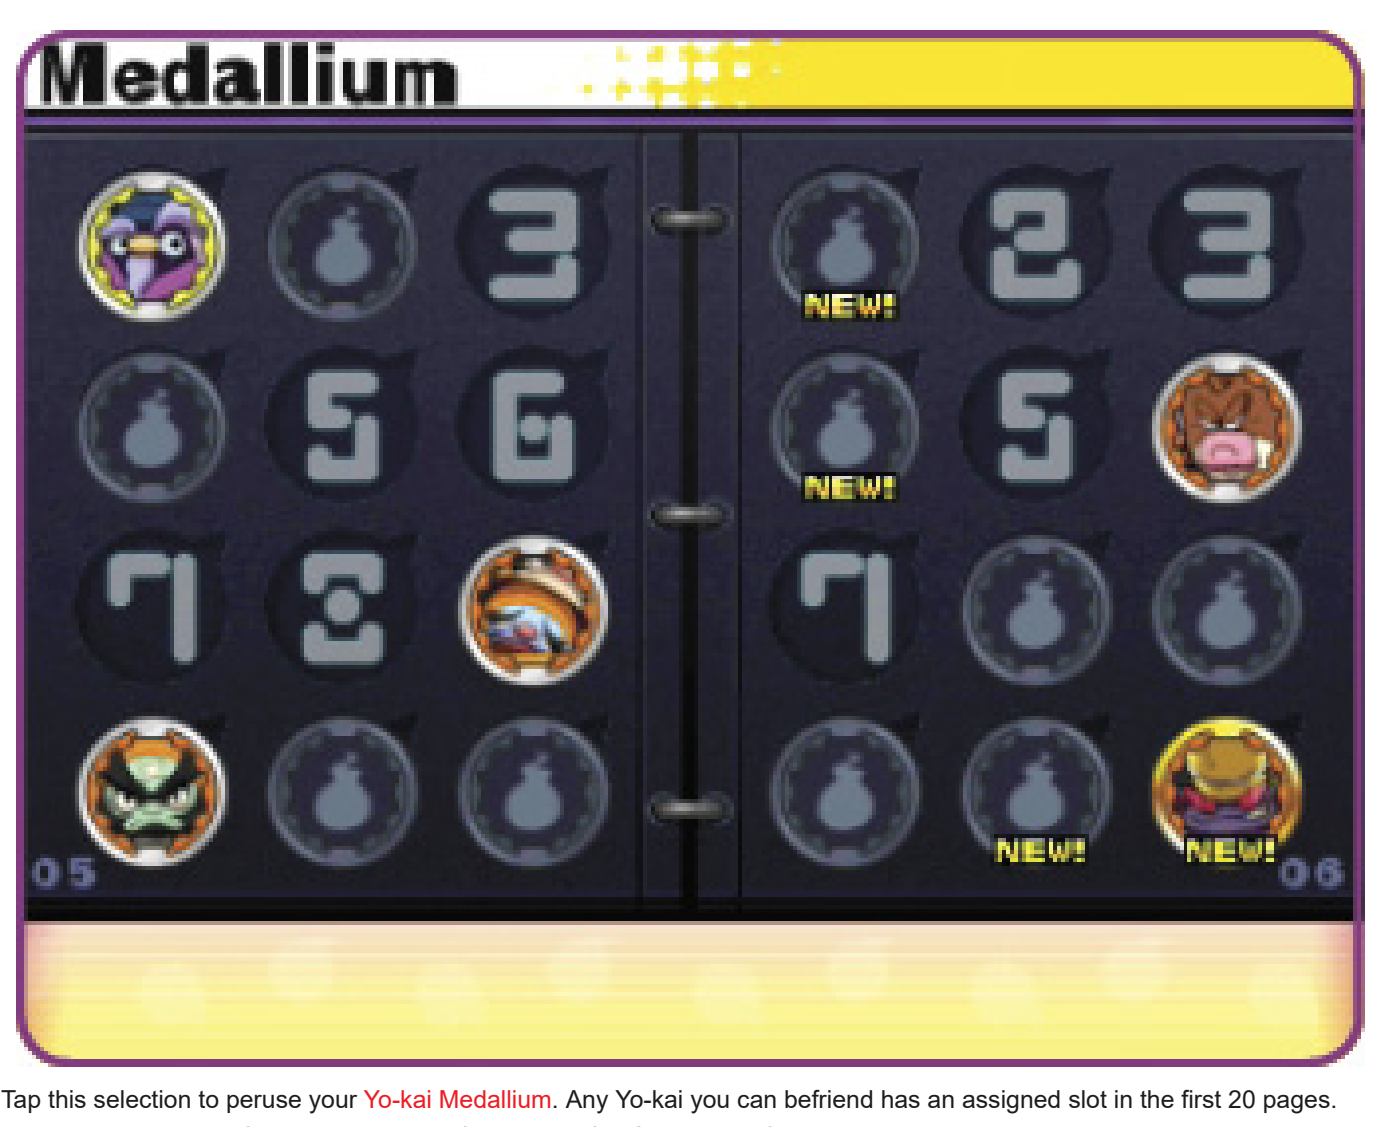
This menu option gives you access to four types of data: the Medallium, Yo-kai Spots, Records, and Help. All of this data is vital as you work your way through the game. You'll probably look through this menu frequently as you play, so make sure to read up on what you can do here.



Check Yo-kai Spots here!

Medallium





Tap this selection to peruse your Yo-kai Medallium. Any Yo-kai you can befriend has an assigned slot in the first 20 pages. Medals are displayed for Yo-kai you've befriended so far. Slots with a fireball icon indicate a Yo-kai you've encountered but haven't yet befriended; you see "???" in the Bio box. Numbered slot are for Medals of Yo-kai you haven't encountered yet.

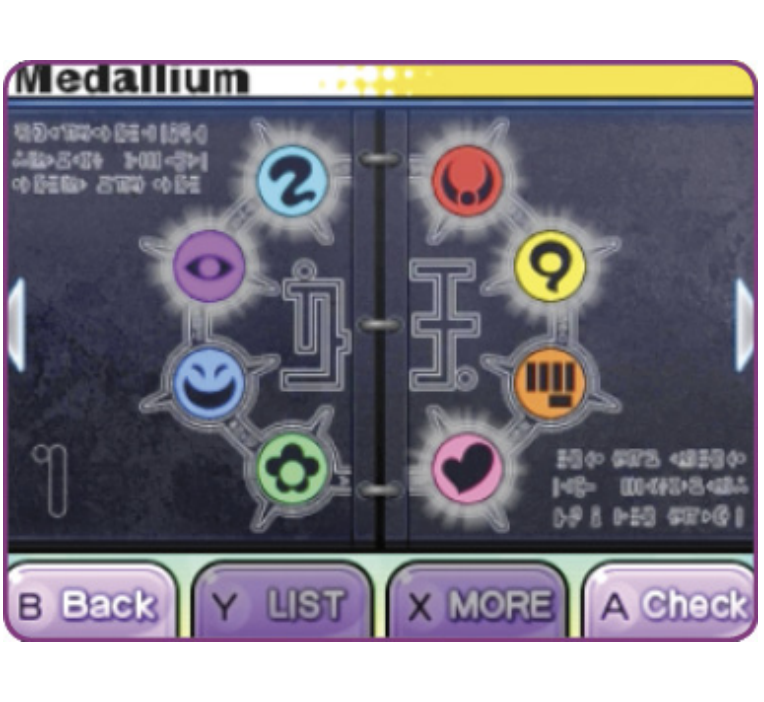
After page 20, you can see the boss Yo-kai you've defeated so far. Then, scroll further through five more spreads displaying the seals that unlock the five Legend Yo-kai.

"A Familiar Place"

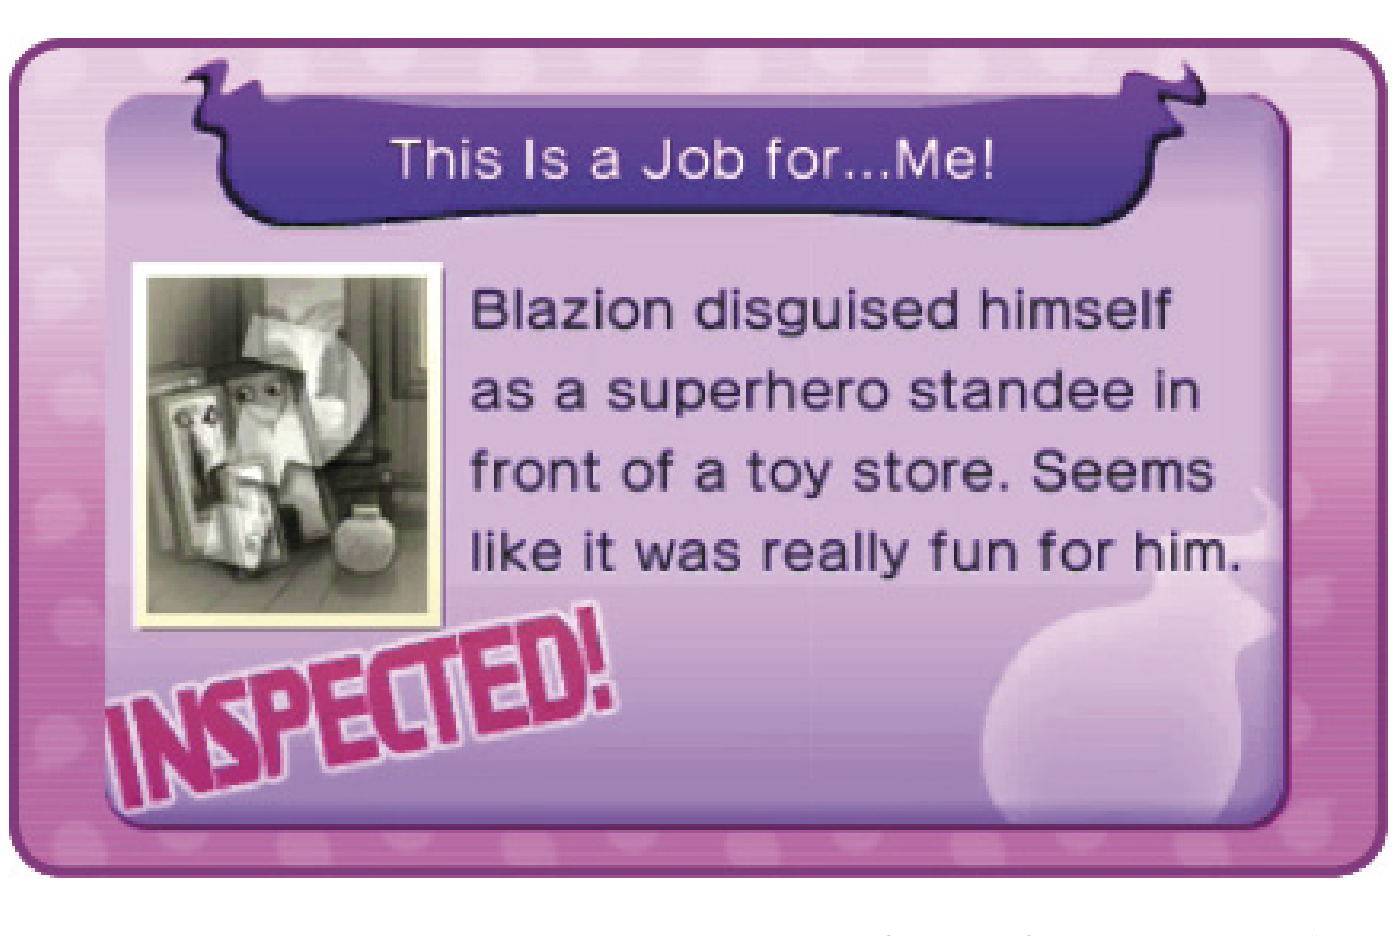
Each Medallium entry includes a map that lets you view the areas where the befriended or encountered Yo-kai usually appears. This may not be displayed for evolved or fused Yo-kai.

Legendary Seal

To unlock each of the five Legend Yo-kai pages, you must befriend all eight sealed Yo-kai linked to the page. Press A to examine the page and release the seal. The moment you do so, you befriend a Legend Yo-kai!



Yo-kai Spots



This Is a Job for...Me!

Blazion disguised himself as a superhero standee in front of a toy store. Seems like it was really fun for him.

You can discover certain Yo-kai lurking around town by using your Yo-kai Lens. Select this Info menu option to see the "Yo-kai Spots" where you can find them. There's a total of 30 spots, and more are added as you work through the main quest. Once you find a spot, you'll see "FOUND!" on this screen. You can also see how many you've discovered so far. Note that Yo-kai Spots will have new Yo-kai periodically. Use the hints in the spot descriptions to help find them around town.

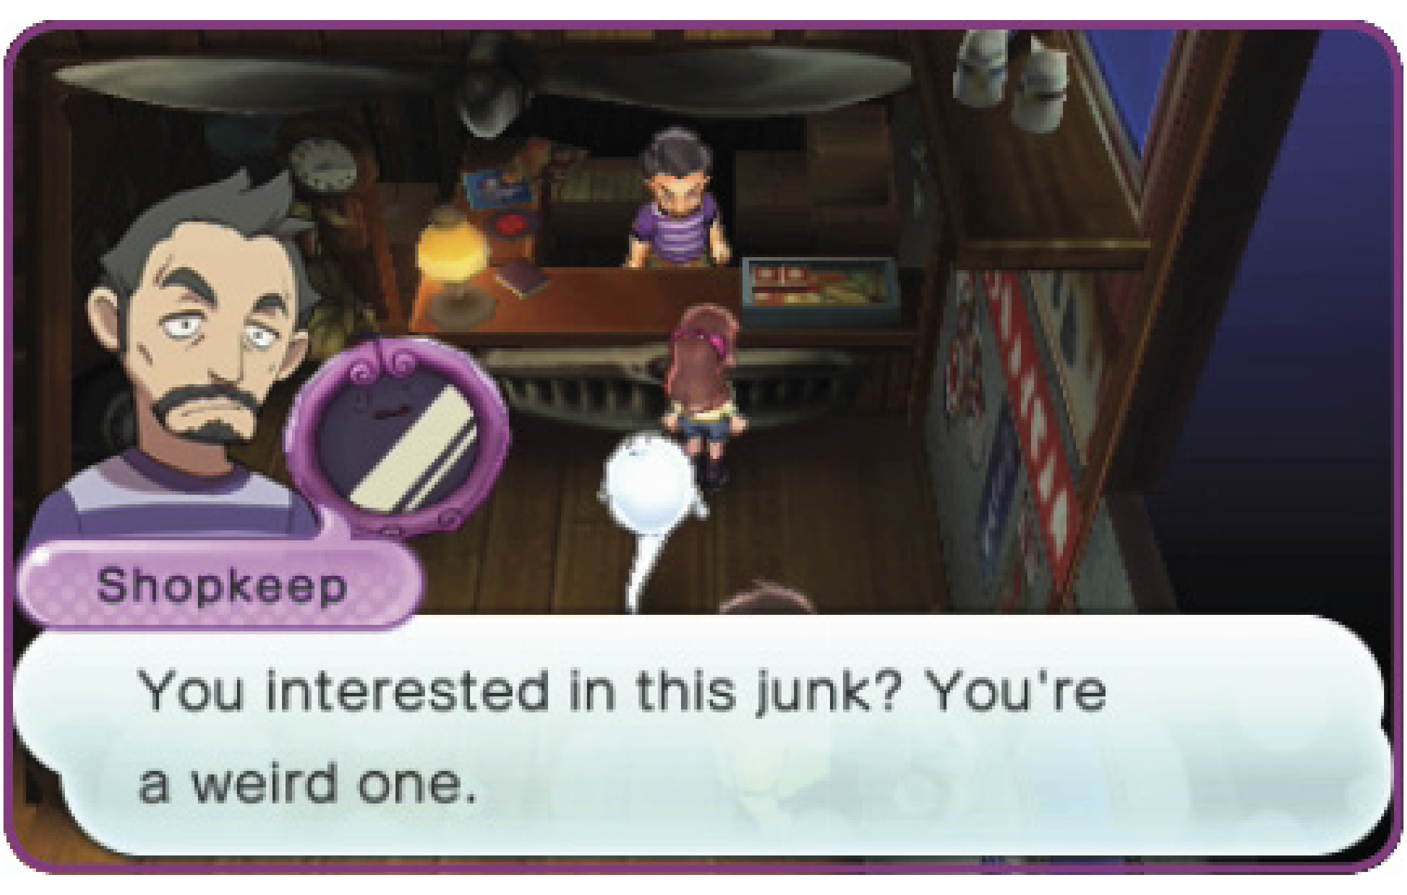
Facilities and Shops

Springdale is divided into five areas, and each area has its own selection of stores and facilities. Make sure to keep tabs on what you have access to. You'll have a much easier time getting through the game!



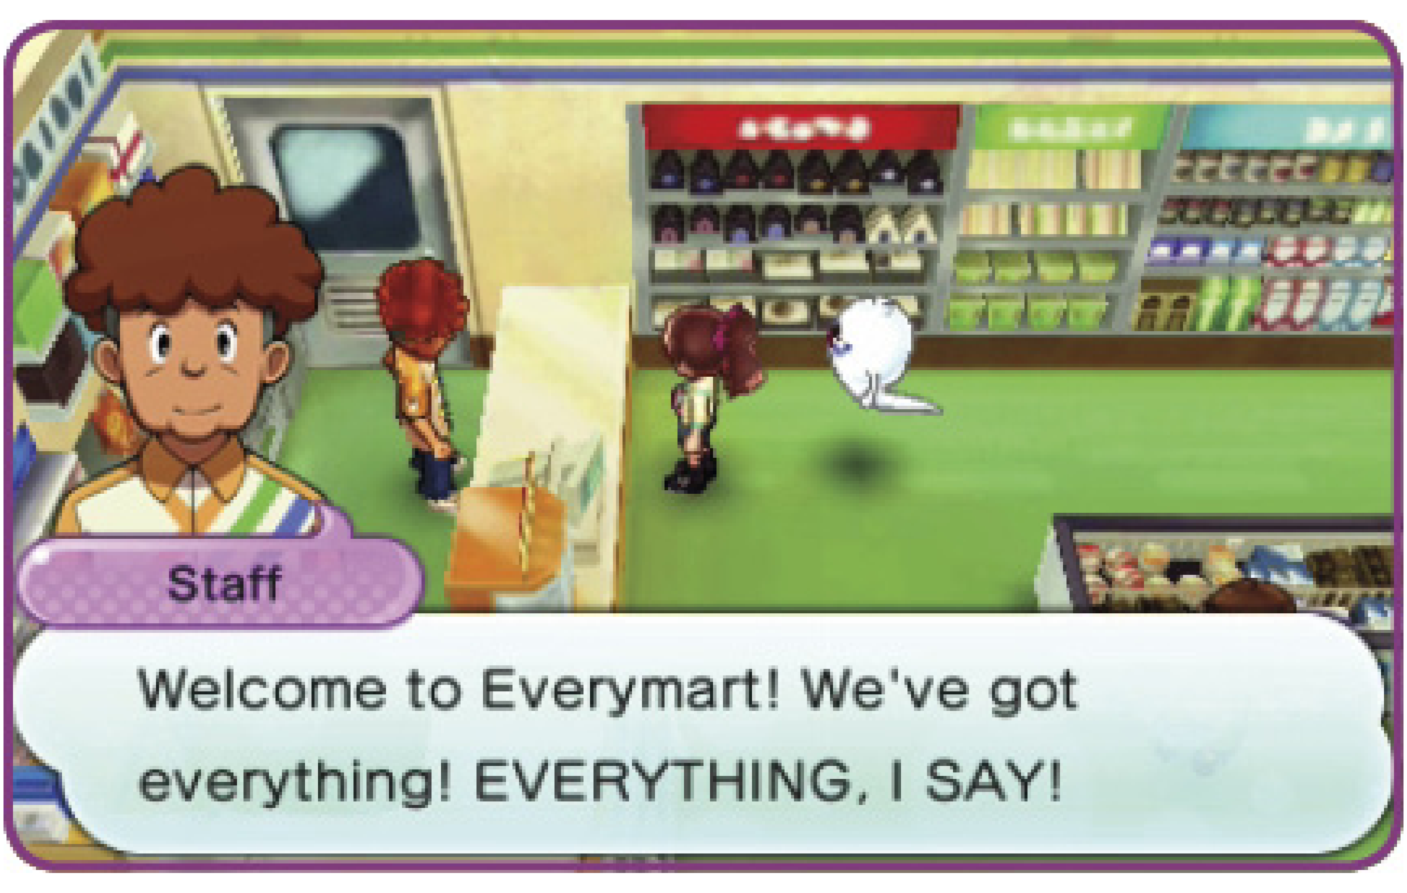
Shopkeep

You interested in this junk? You're a weird one.

The further you get through the game, the more facilities are available.

Stores

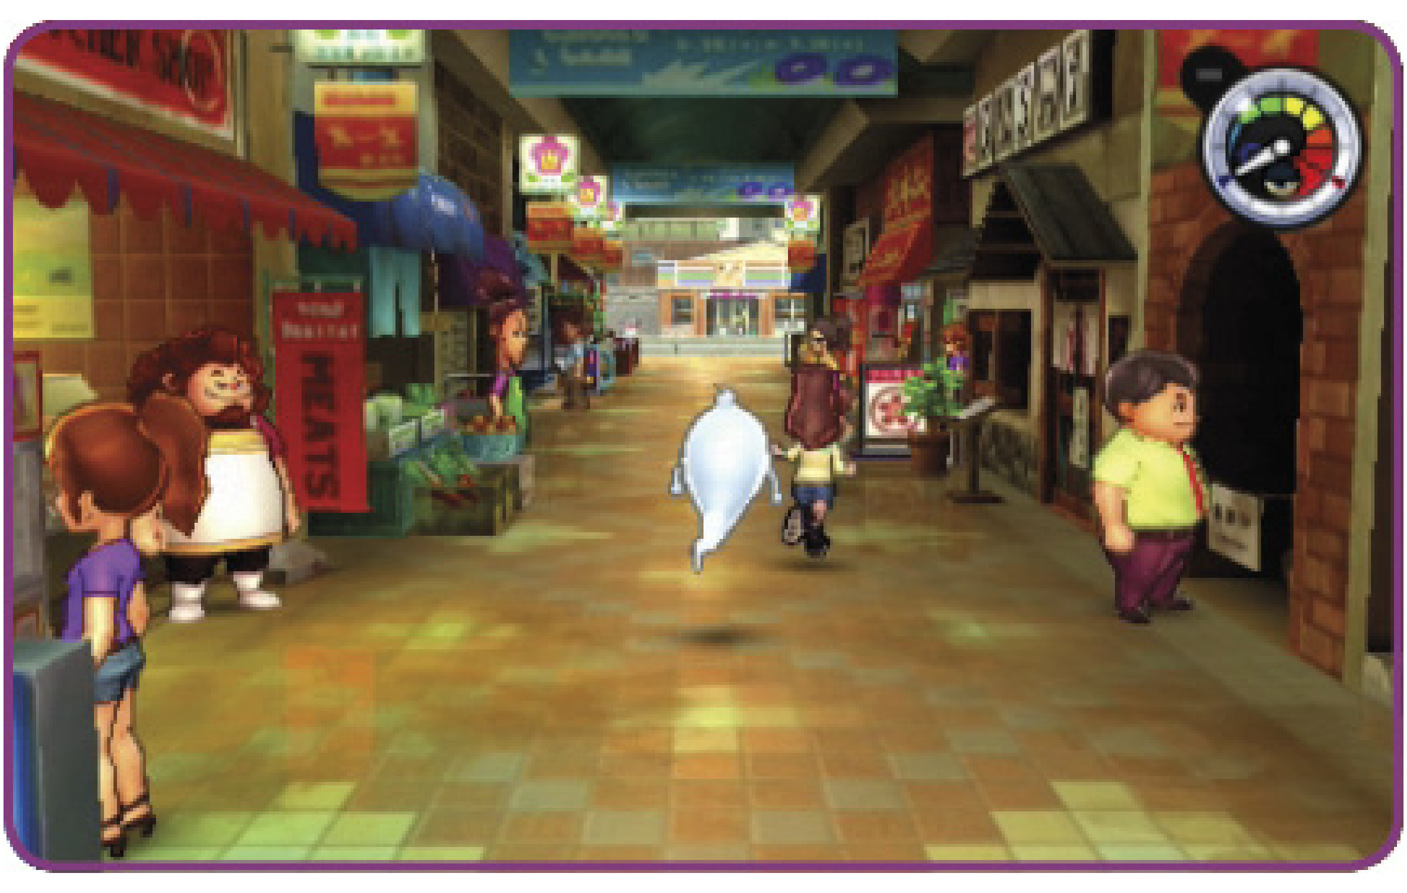
Springdale features three types of stores. The Everymart is a convenience store that you'll find in every district. Generally, each Everymart carries the same stuff, although you'll occasionally find limited-edition items. Regular stores sell a variety of things, from bread and candy to hamburgers and other food. Finally, you can buy drinks from vending machines.



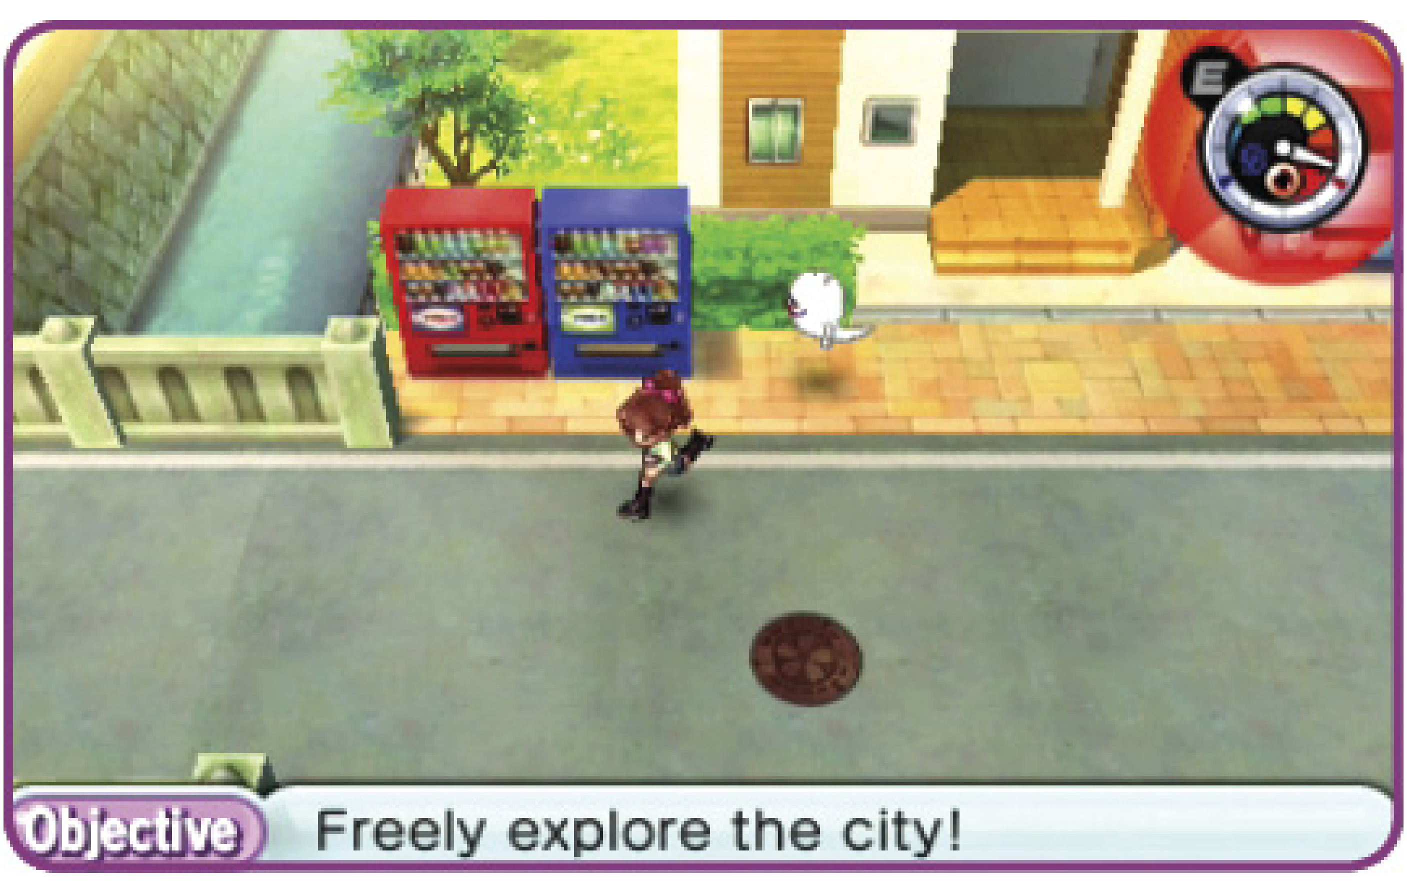
Staff

Welcome to Everymart! We've got everything! EVERYTHING, I SAY!

You can sell your accumulated items only at convenience stores.



Shopper's Row is lined with all kinds of different stores.

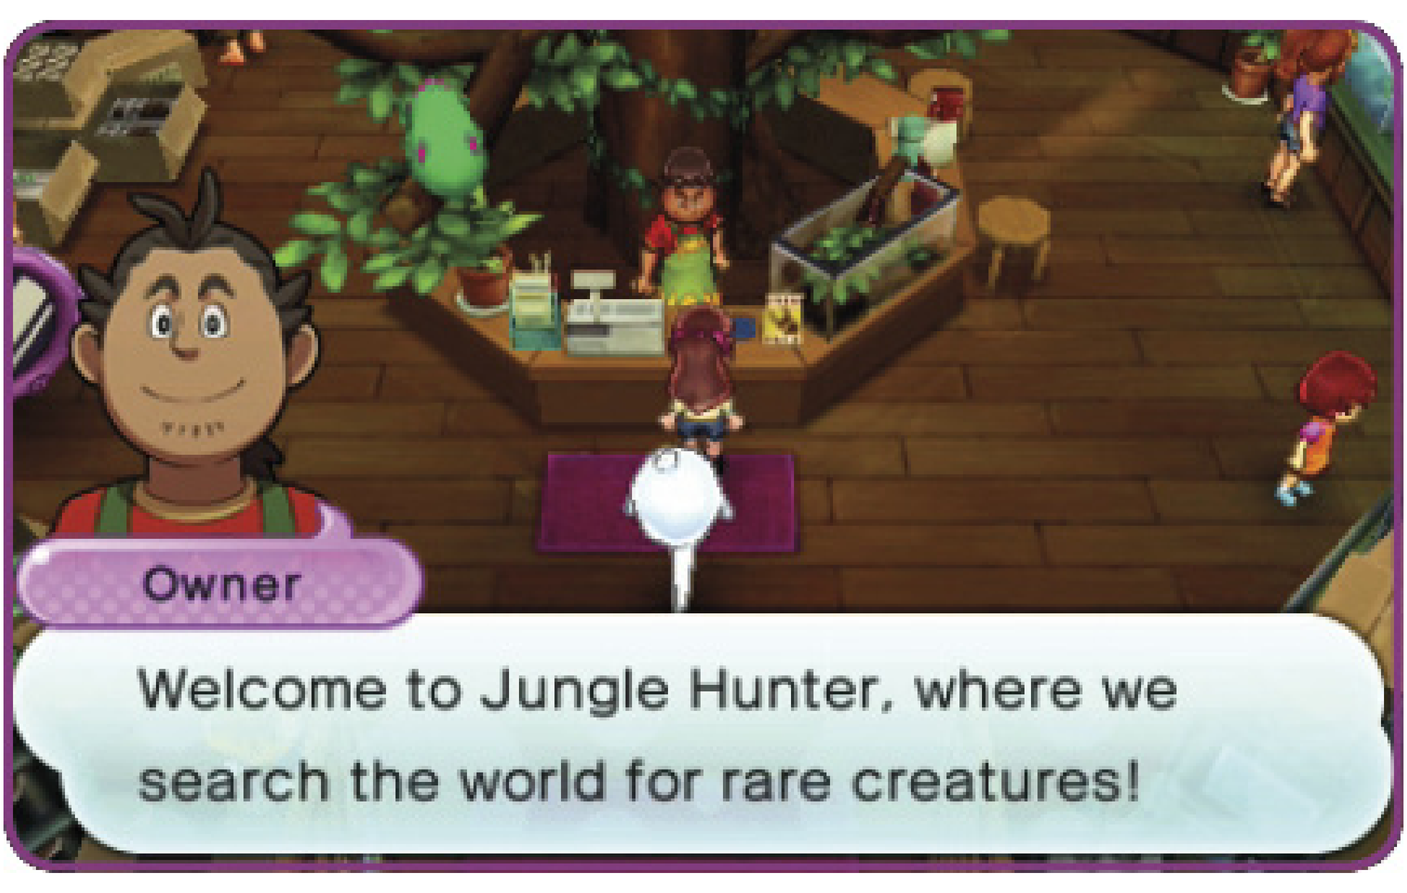


Objective

Freely explore the city!

Drinks can be purchased at red vending machines. They aren't available in the blue ones.

Jungle Hunter

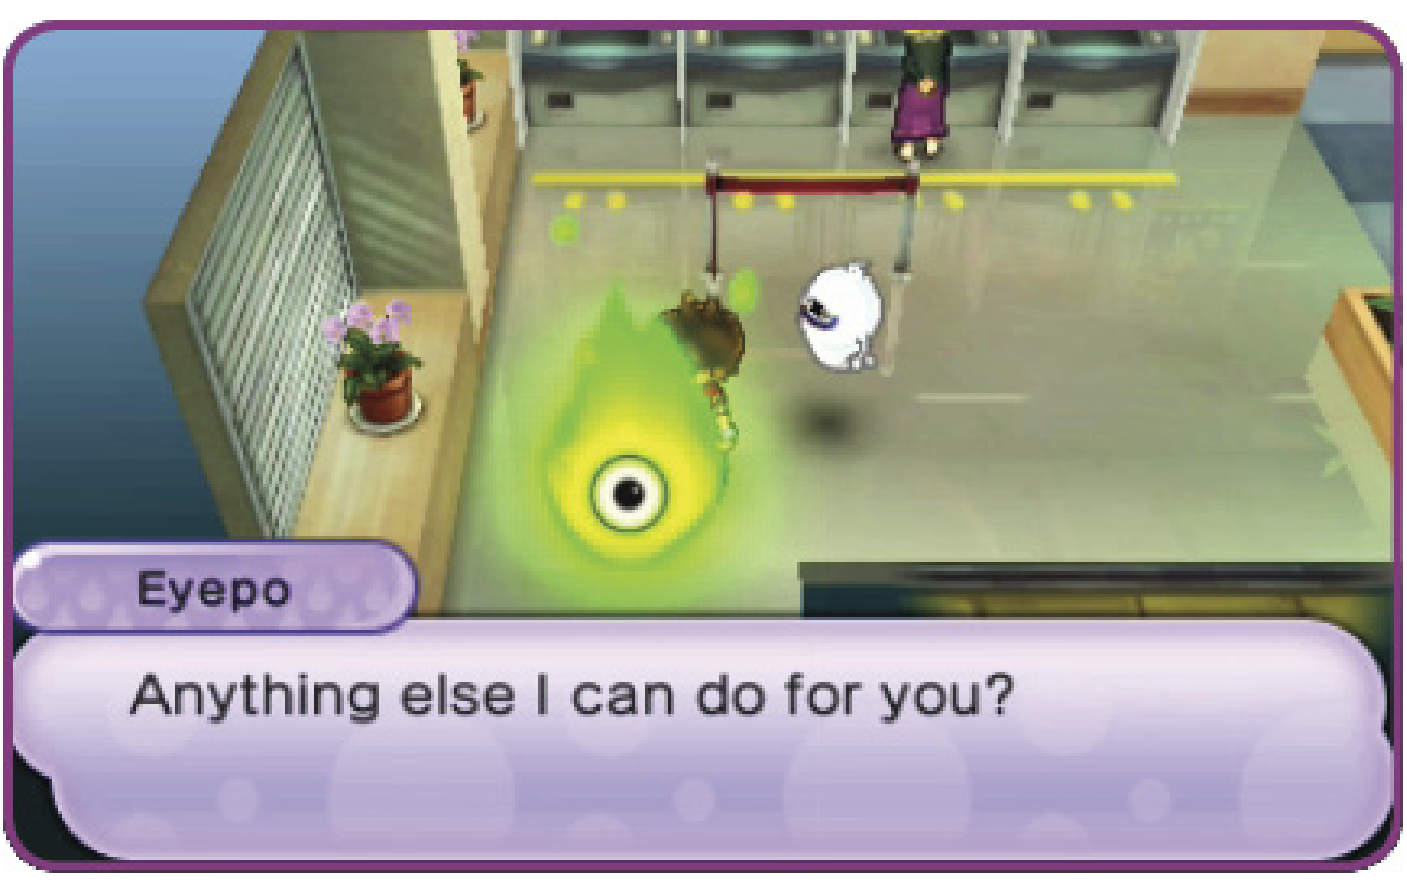


Owner

Welcome to Jungle Hunter, where we search the world for rare creatures!

Jungle Hunter is located in the southeast part of Uptown Springdale. Here, you can exchange the insects and fish you've caught for useful items. Some special items can only be acquired here.

Eyepo

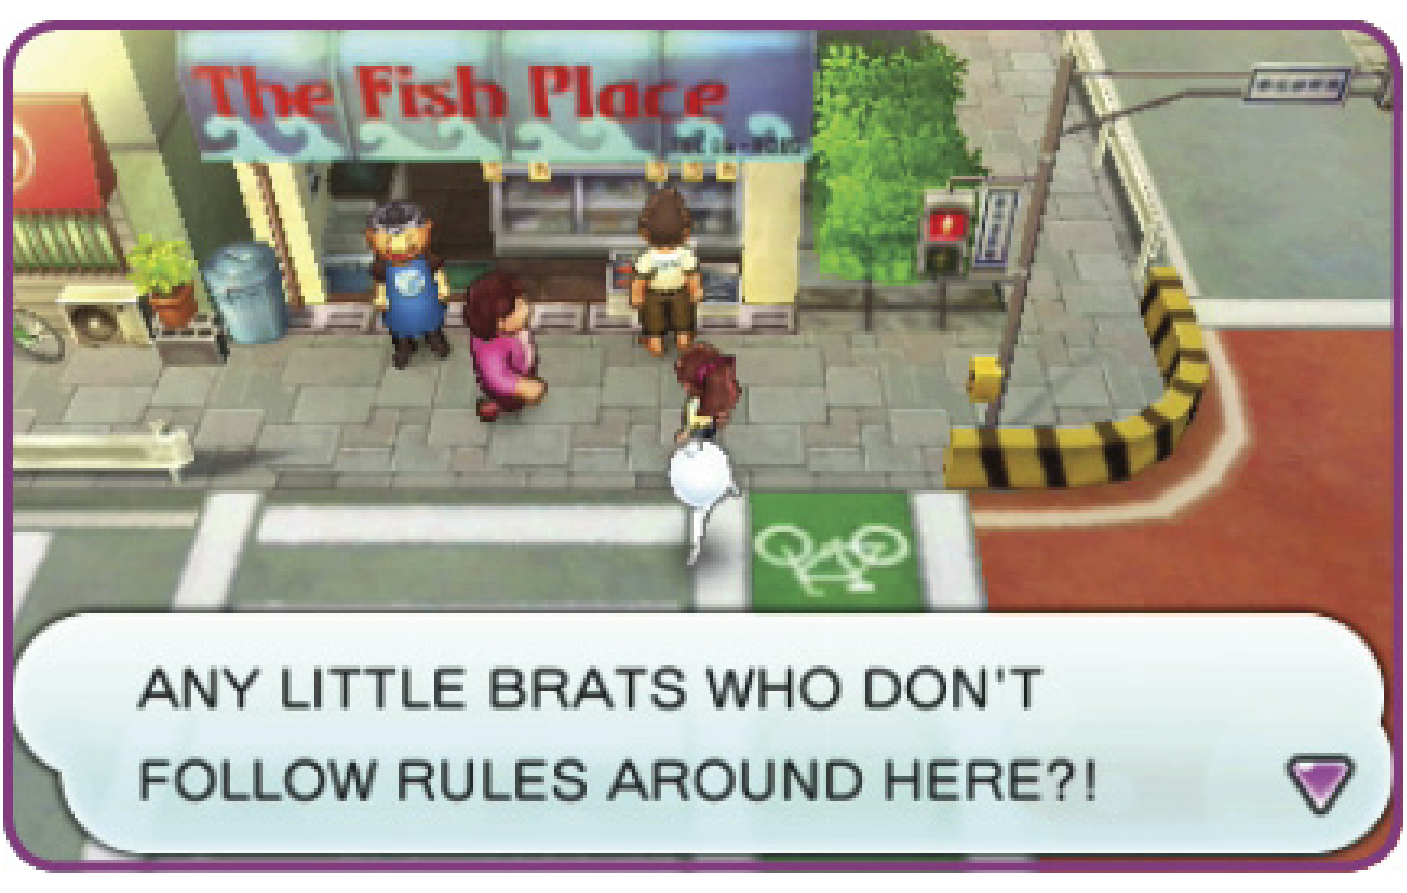


Eyepo

Anything else I can do for you?

You'll find these glowing creatures in convenience stores, post offices, and banks. They refill your HP and Soul Meter and let you save and rearrange your Yo-kai team. Eyepo locations are marked on your map.

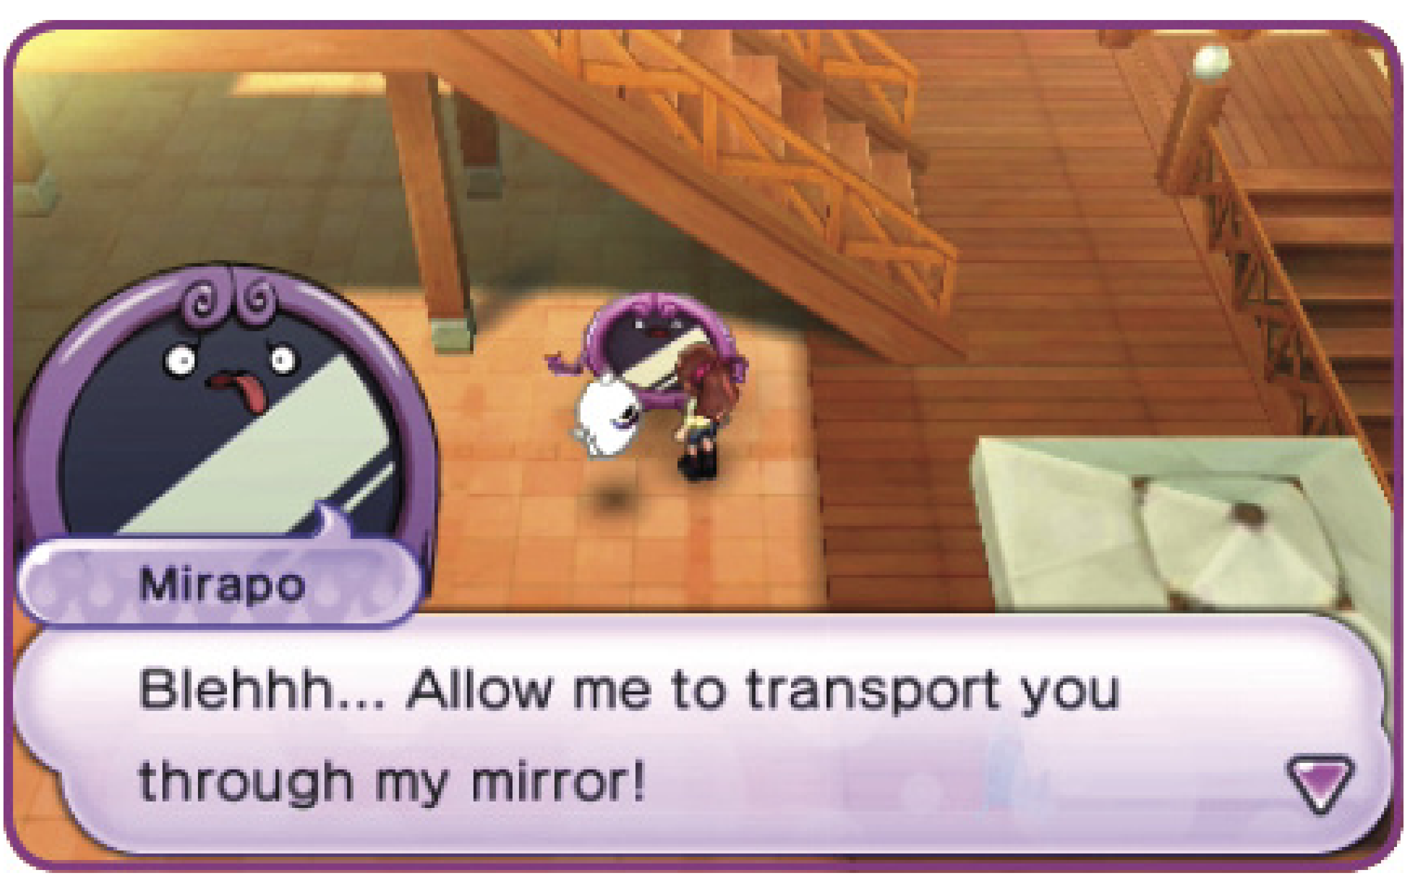
Stoplight Events



ANY LITTLE BRATS WHO DON'T FOLLOW RULES AROUND HERE?!

Some Springdale roads have crosswalk signals that can be activated with a button. Obey the signals, and you might unlock special rewards. Ignore the signals, and you might get punished for excessive jaywalking!

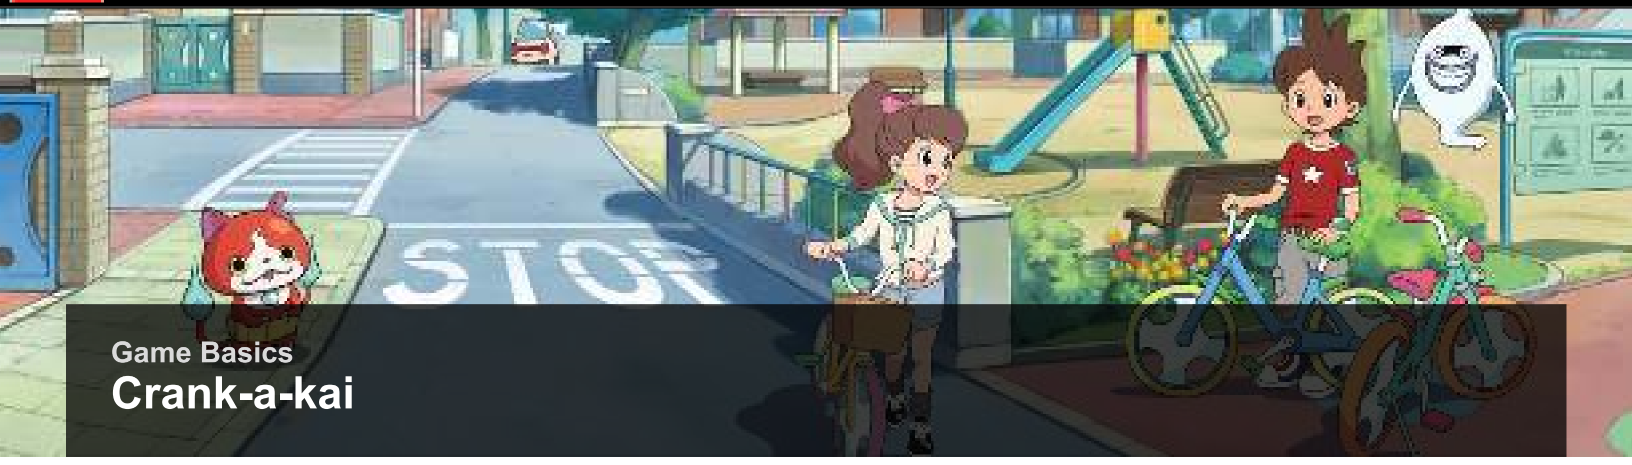
Mirapo



Mirapo

Blehhh... Allow me to transport you through my mirror!

This fellow becomes available starting in Chapter 9. Talk to a Mirapo to warp instantly to any place where another Mirapo is located. Once you unlock this, you'll be able to zoom around town a lot faster.



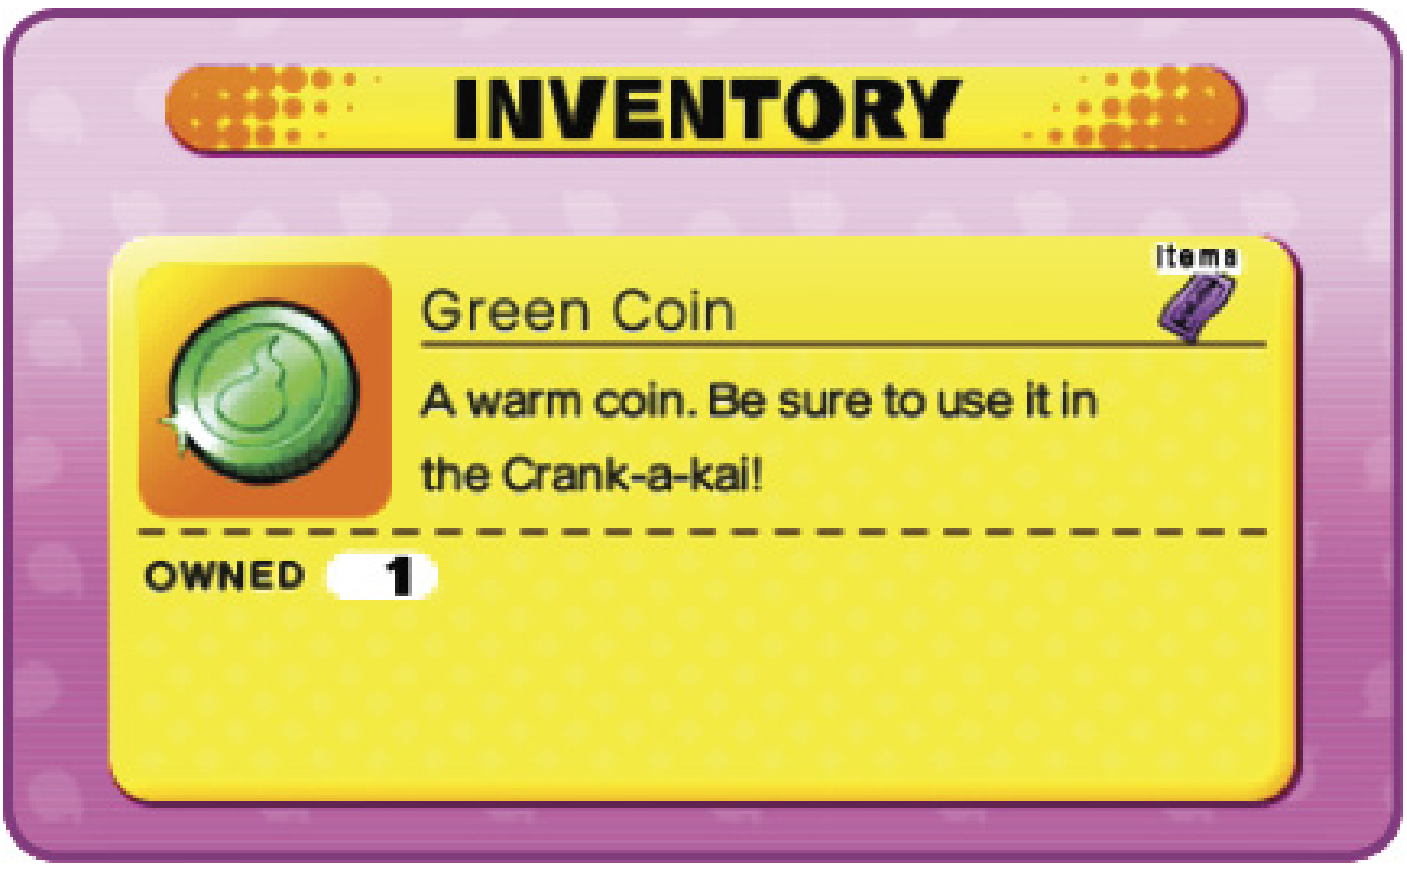
Game Basics

Crank-a-kai

At the root of the great tree past the Mt. Wildwood Shrine, you'll find the Crank-a-kai that produced your new buddy Whisper at the game's beginning. Put in a special coin (see below) and spin the crank to acquire rare Yo-kai friends or special items you'd have trouble finding anywhere else. You can access the Crank-a-kai up to three times per day (in game time) once you reach Chapter 2.

Crank-a-kai Coins

"Crank-a-kai coins" is the generic term for the eight types of colored coins you'll find in treasure chests and elsewhere, as well as the Special Coins and Excitement Coins you can obtain via passwords. These are the coins you'll generally use to crank the machine.



INVENTORY

Items

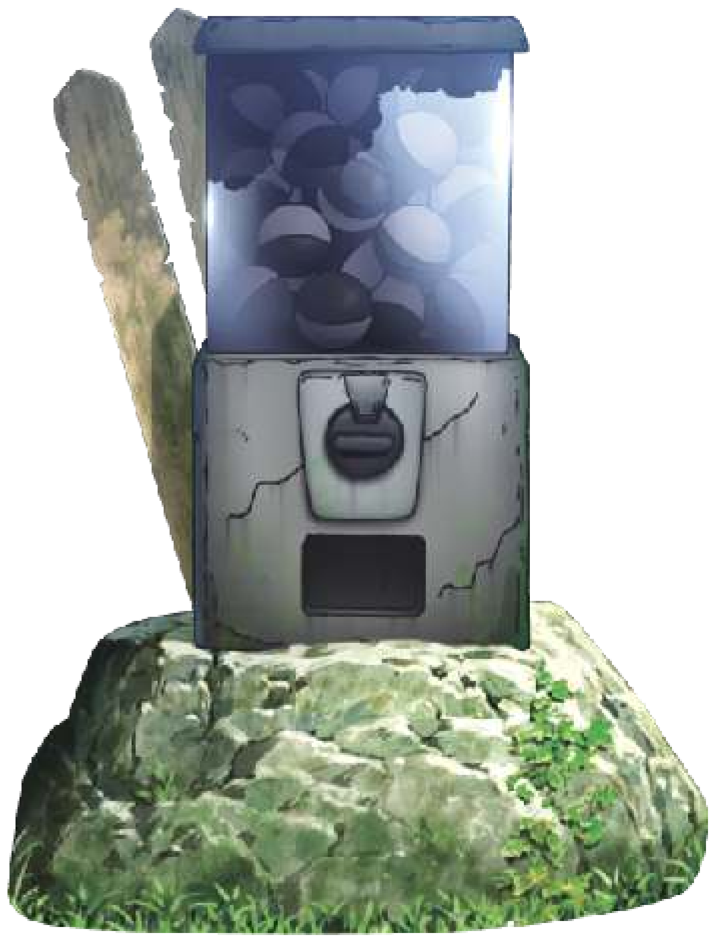
Green Coin

A warm coin. Be sure to use it in the Crank-a-kai!

OWNED 1

The Yo-kai you acquire from the Crank-a-kai depends on the type of coin you use.

Play Coins

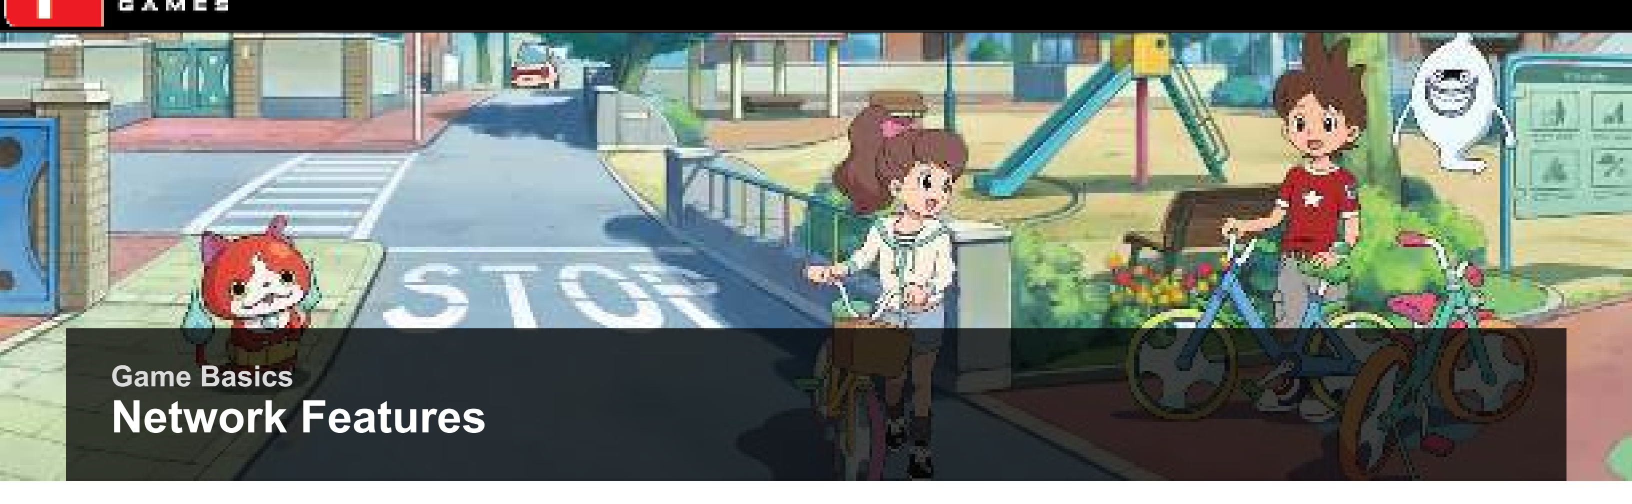


You can also use 10 Play Coins to spin the Crank-a-kai. However, the Yo-kai produced won't be as rare as usual. If you have any Crank-a-kai coins on hand, it's better to use those first.

You earn Play Coins by walking around while your 3DS is in standby mode.

Crank It Three Times per Day!

The Crank-a-kai disappears once you spin it three times in any given day. You'll need to wait until your 3DS's internal clock hits 6 a.m. the next day for the Crank-a-kai to return. Try to collect as many coins as possible until you have a chance to spin it again.



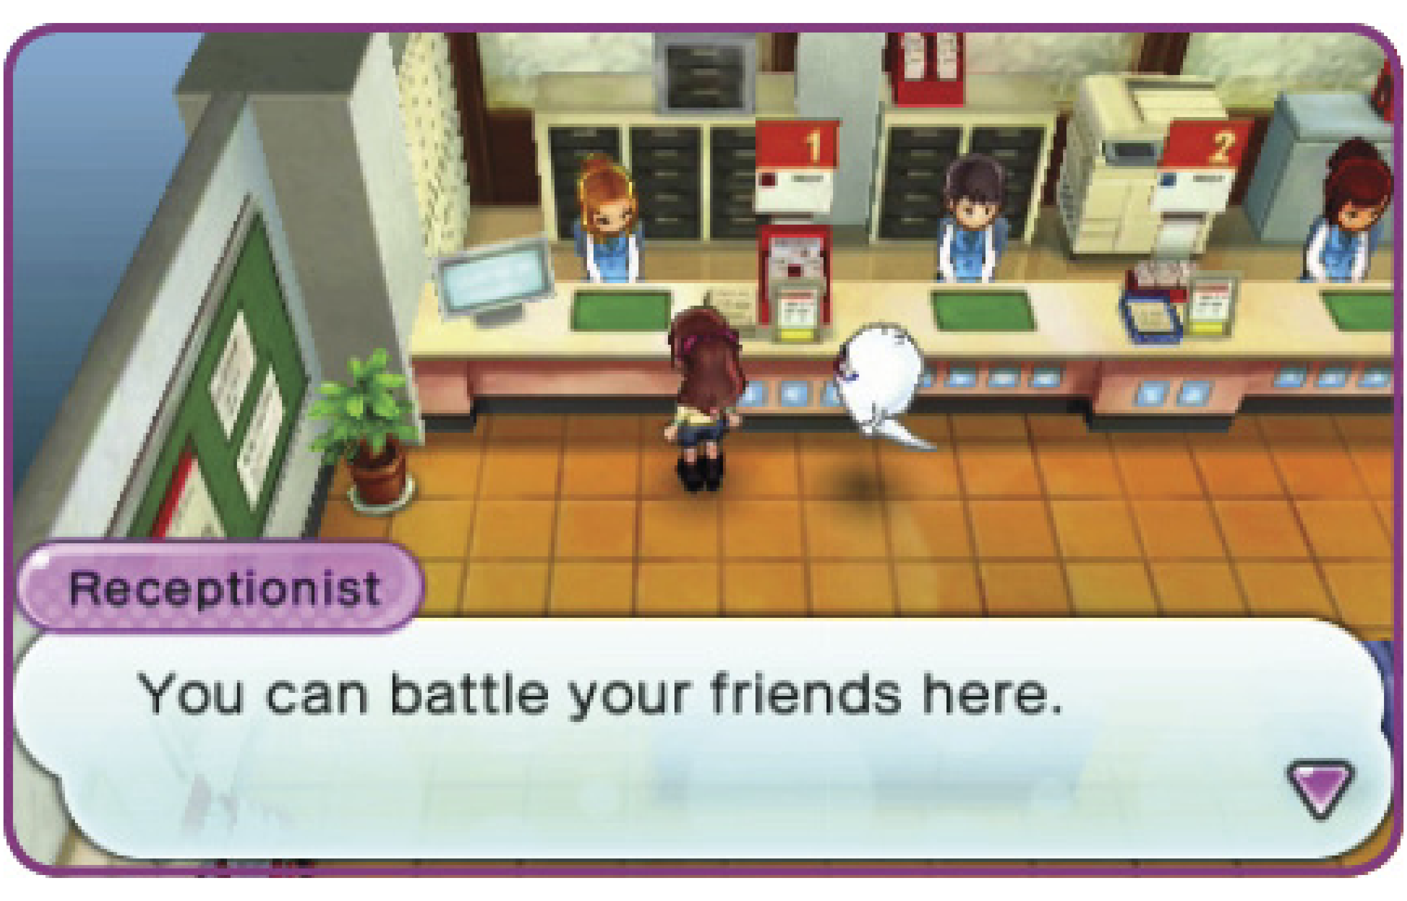
Game Basics

Network Features

Yo-kai Watch has all kinds of features that take advantage of your 3DS's connectivity. Access most of these at Lambert Post Office in Uptown Springdale. You can interact and fight with other players and access the game server to earn new Yo-kai and items.

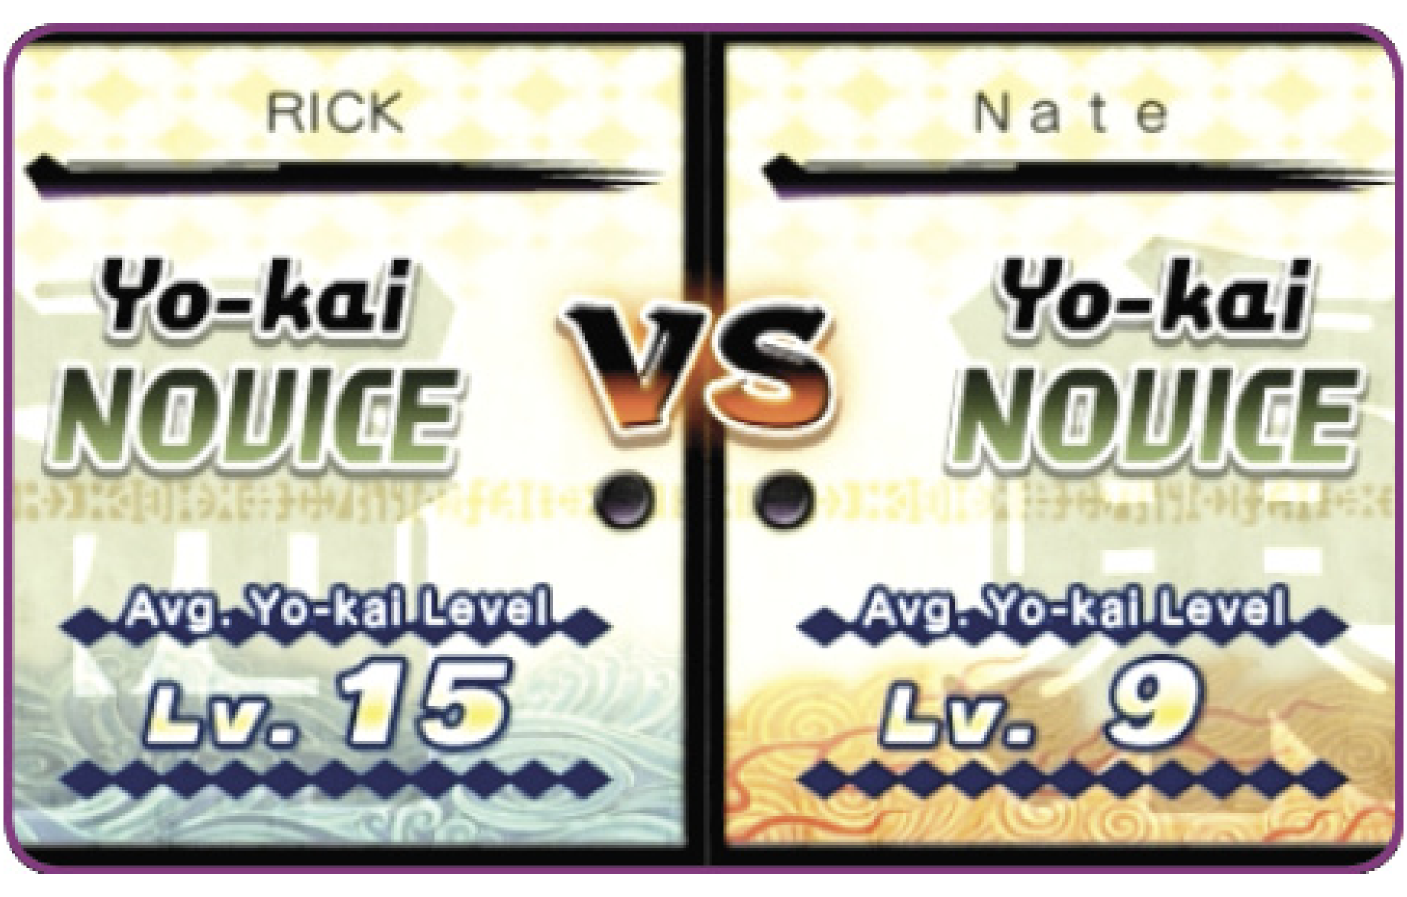
PvP: Battle with a Buddy!

You can engage in battles against enemy Yo-kai squads managed by other human players. Make sure Wireless is on, then visit Window 1 at Lambert Post Office and speak to the receptionist. If you're starting the battle, select "Start Battle." If not, select "Join Battle." Once the starting player selects a battle stage and the other player joins, the fight soon begins. There's no complex configuration required; it's super easy to jump right into a match.



You can battle your friends here.

Gather your best team, then speak to the woman here.



Once you start or join a battle, you see your rank and the average level of your six active Yo-kai.

Winning online battles earns you points. When you hit certain point milestones, you rank up, and the title attached to your name changes. However, if you have a long enough losing streak, your title progression can actually take backward steps.

Rank Up!

How PvP Battle Differs

In a PvP fight, every participant's Soul Meter on both teams starts at zero. Once you rotate the Yo-kai Wheel, you can't move it again for three seconds. You can't give items to any Yo-kai, and if you win, you can't befriend your foe's Yo-kai.

StreetPass

Speak to the landlord at Wayfarer Manor in the middle of Blossom Heights and agree to manage the property. This gives you access to the game's StreetPass features. If you pass by another 3DS system that also has StreetPass activated for this software, one of that player's Yo-kai friends will automatically move into Wayfarer Manor as a "wandering Yo-kai." The manor has 10 Yo-kai rooms, so you can keep a maximum of 10 Yo-kai earned via StreetPass.

Freely explore the city!

Talk to the Wayfarer Manor landlord to turn on StreetPass.

What Is StreetPass?

Every Nintendo 3DS system has StreetPass, a wireless feature that allows users to exchange "tags" that include Mii characters and game data. When StreetPass is enabled, it works even when your 3DS is in sleep mode, and it automatically connects when another 3DS carrier moves within your console's range.

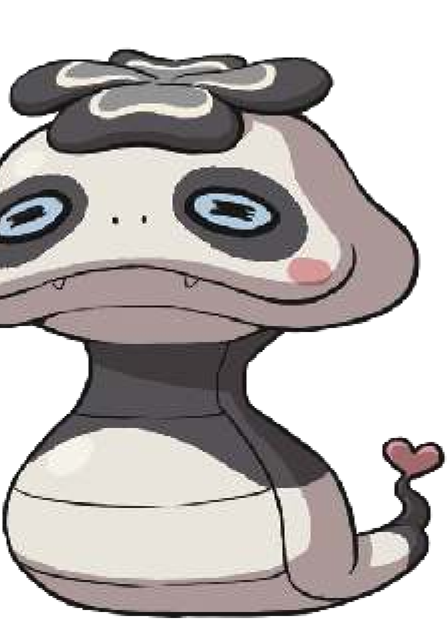
Battle the Wanderers!

Enter one of the Manor's occupied rooms and talk to the Yo-kai inside. The creature gives you an item gift. Then, if your character is ranked high enough, you can choose to fight the wandering spirit. Win, and you may have a chance to befriend it. (Note that you cannot befriend Rare, Legend, or S-rank Yo-kai.)

Freely explore the city!

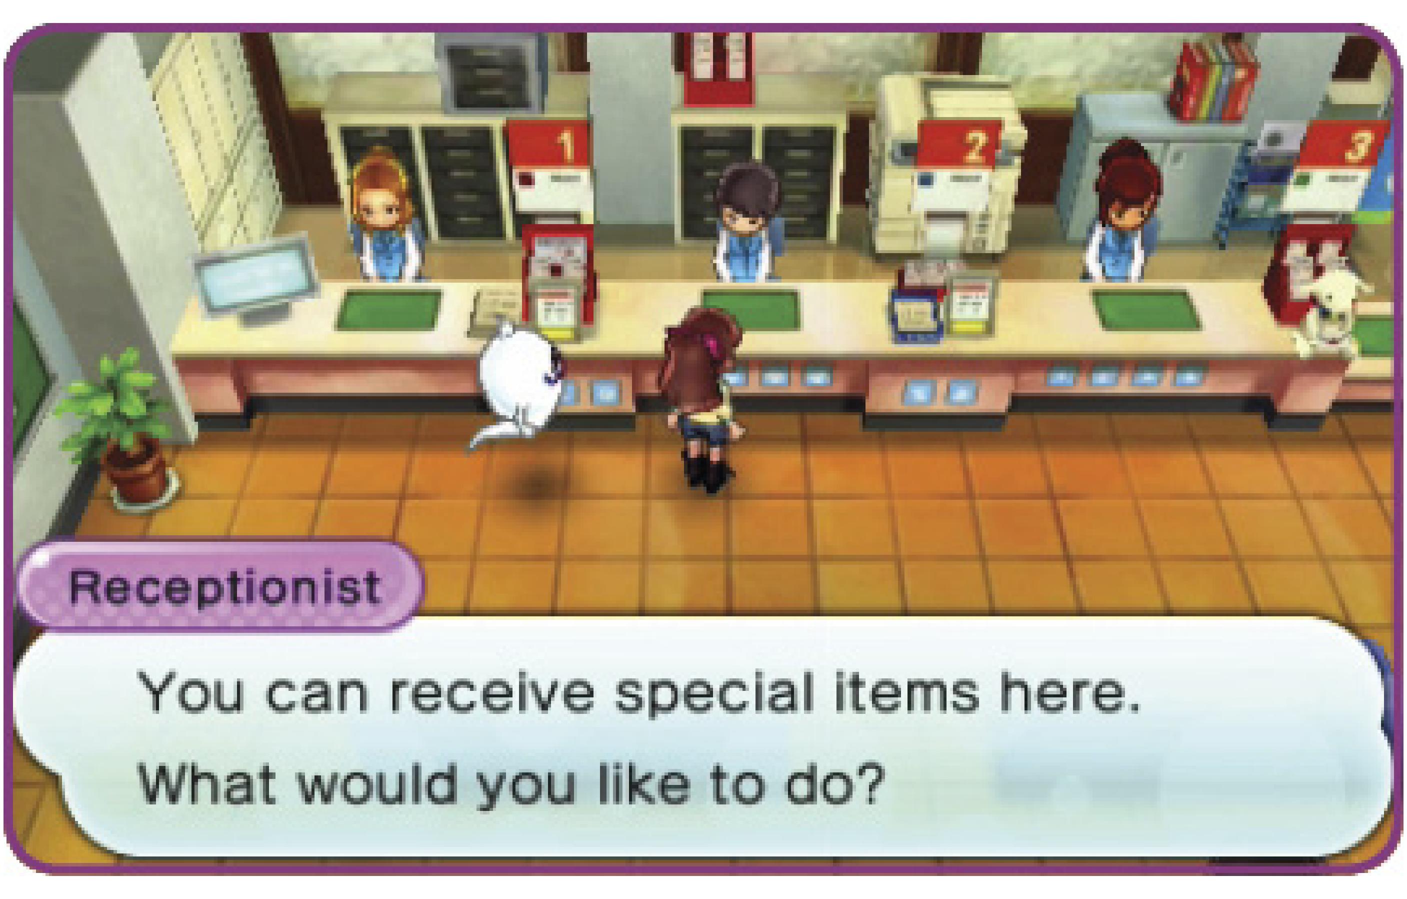
Watch for Rare Yo-kai!

A reclusive Yo-kai named Pandanoko occasionally visits Wayfarer Manor. If it has a room, the landlord will tell you. This is the only way to find and befriend this extremely rare Yo-kai!



Internet Download and Password

Connect to the Internet and use downloads and passwords to obtain special items like Crank-a-kai coins. Visit the Lambert Post Office, and talk to the woman at Window 2 to access the game server. Select Internet Download to receive distributed items, or select Password to enter passwords. You might earn rare coins you can't find anywhere else!

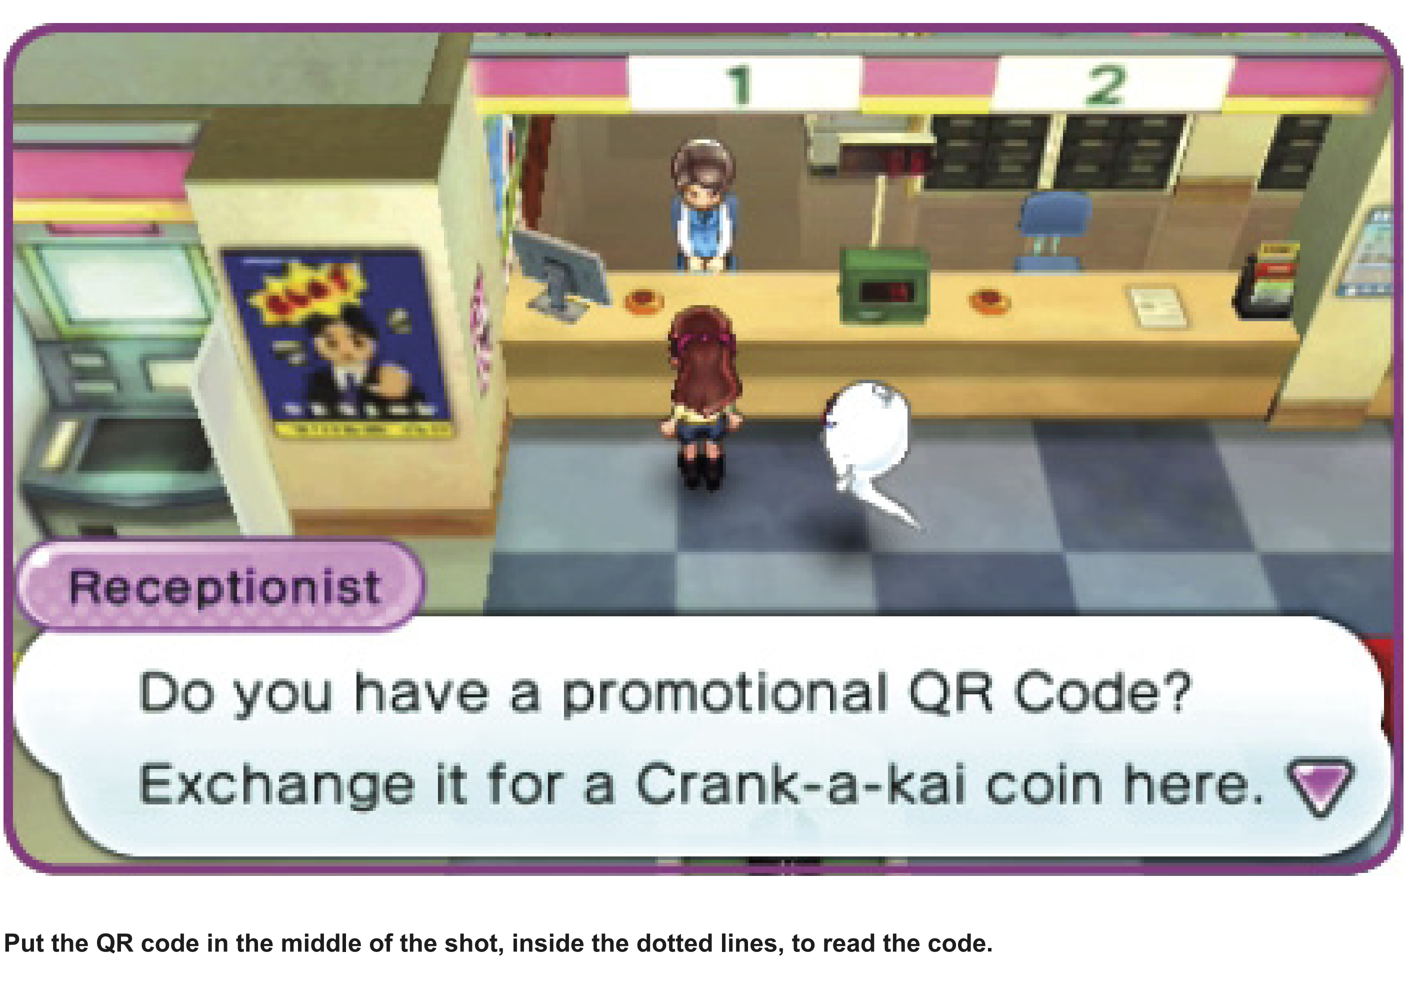


You can receive special items here.
What would you like to do?

A rotating set of items is available via Internet. Check in regularly at Window 2 in the post office!

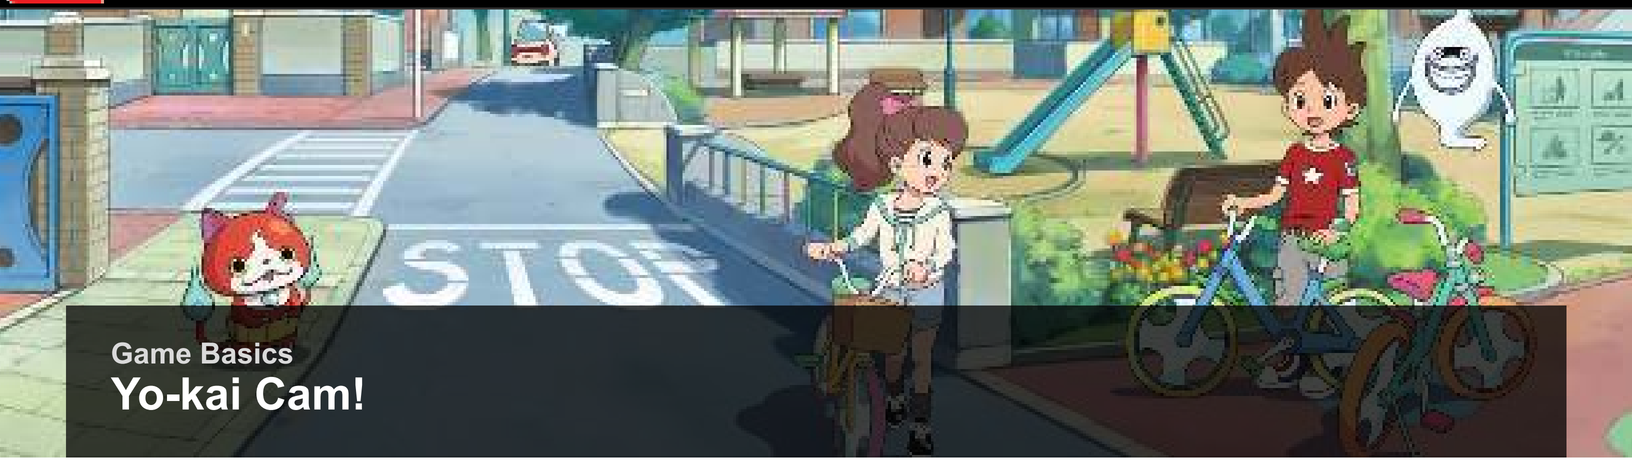
QR Codes

Use your 3DS camera to shoot the special Yo-kai Watch QR codes, and you can earn valuable special items. Go to Piggleston Bank in Uptown Springdale, and talk to the receptionist at Window 1. Use the camera to shoot the promotional code in order to exchange it for a Crank-a-kai coin! Important: Make sure you talk to the bank receptionist before you shoot the code. It won't work if you try taking the picture from the Home Screen.



Do you have a promotional QR Code?
Exchange it for a Crank-a-kai coin here.

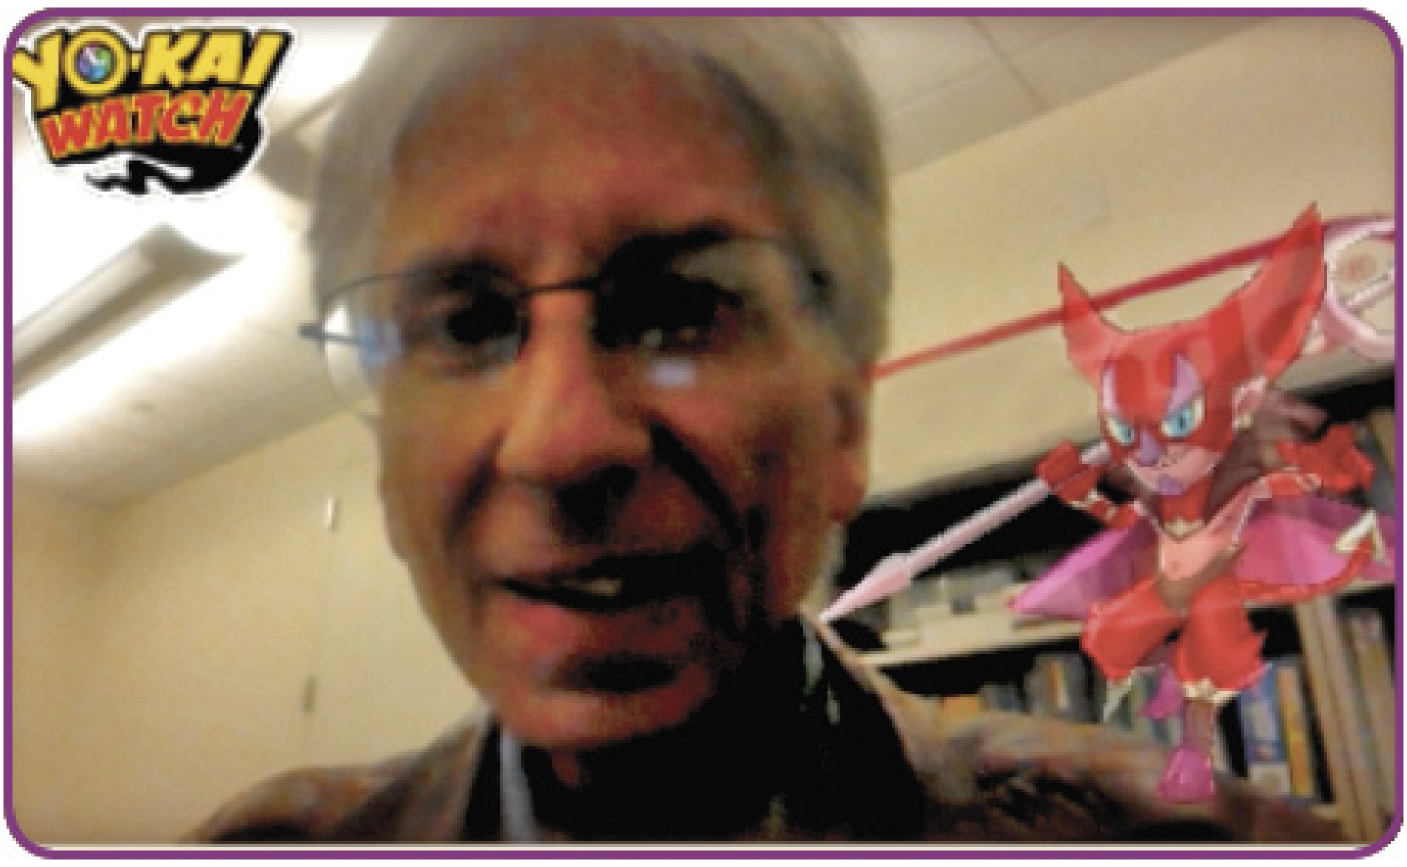
Put the QR code in the middle of the shot, inside the dotted lines, to read the code.



Game Basics

Yo-kai Cam!

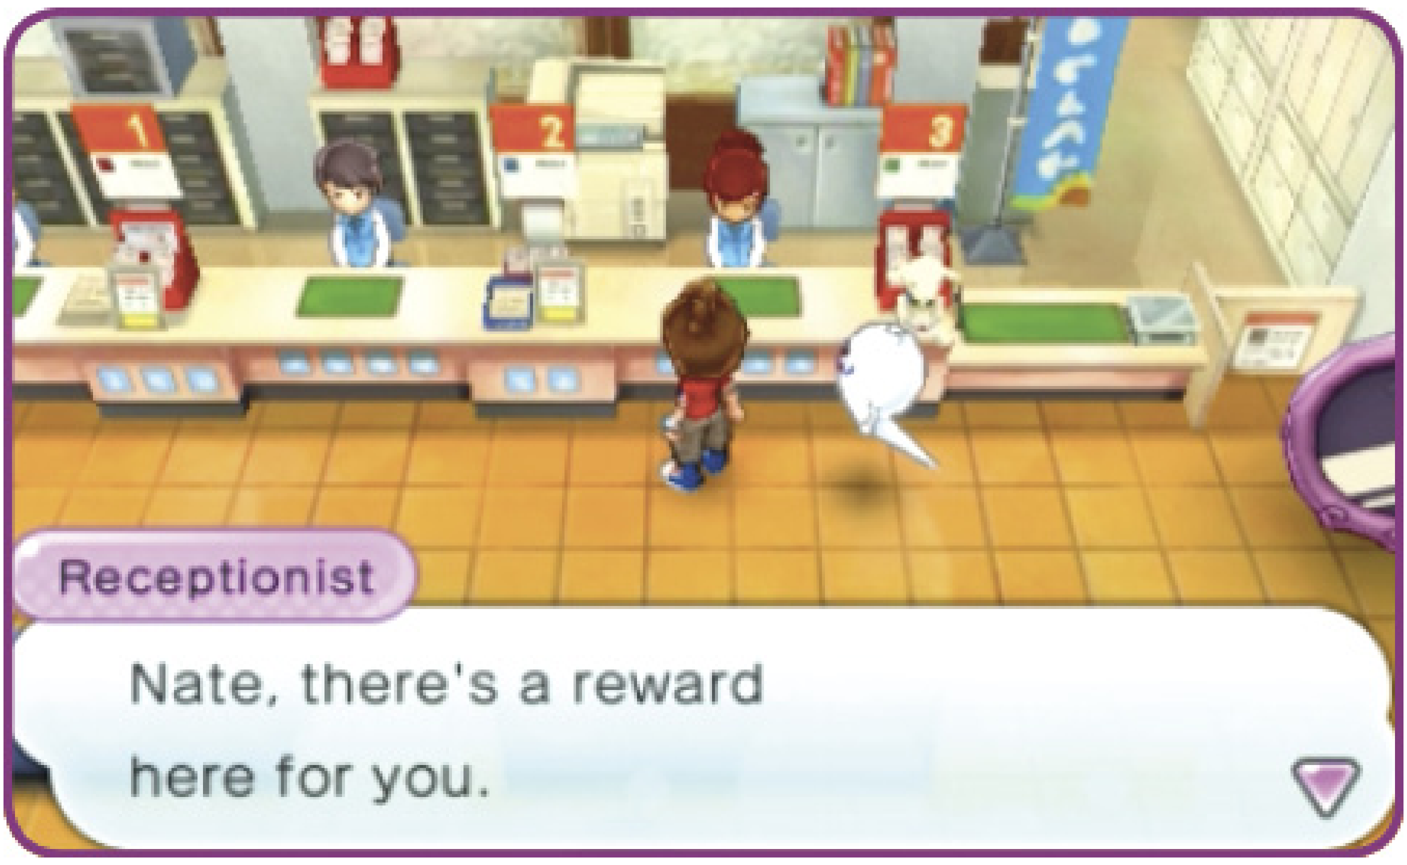
Once you make it to Chapter 2, you can access this fun feature. Select “Yo-kai Cam” from the bottom of the title screen, and then use your 3DS to take a face-only shot of someone nearby. (Make sure your subject’s face is centered in the onscreen circle and that “OK!” appears on the screen.) Once you take the picture, a Yo-kai will appear next to the person. It’ll also be added to the Yo-kai Medallium, if you don’t have it already.



Make sure your subject’s looking straight at the camera. Side photos won’t work.

Take the Challenge!

When you select Yo-kai Cam from the title screen, the mode issues a random challenge. It can run a range of topics, from tribes to how the Yo-kai looks. If you shoot a Yo-kai that matches the challenge, you’ll earn a bonus item. You can also earn bonus items regularly once you shoot enough Yo-kai. Keep snapping pictures, and earn as many bonuses as you can!



Receptionist

Nate, there's a reward here for you.

You’ll earn your first reward once you shoot your first photo. More rewards will come with every picture.

Reap Your Rewards!

Once you earn a Yo-kai Cam reward, march directly over to Lambert Post Office. Talk to the receptionist at Window 3, and you’ll receive the reward item. She’ll keep up to 32 items on hold for you, too.

You befriended Buhu.

After you beat Buhu, your first foe, he becomes your friend. Now you have two Yo-kai buddies!

Whisper wants to set up shop in Nate's room. Nate reluctantly agrees, and then finds his parents in a heated argument downstairs. According to Whisper, the real cause is a naughty Yo-kai. Find the evildoer responsible for this tiff!

I feel like I'm the only one doing anything around here!

Certain Yo-kai have the power to make even loving people squabble with each other. Better do something quickly!

Chapter 2 marks the debut of Jibanyan, sworn enemy of every car on Earth. If you help him, he'll befriend you, too.

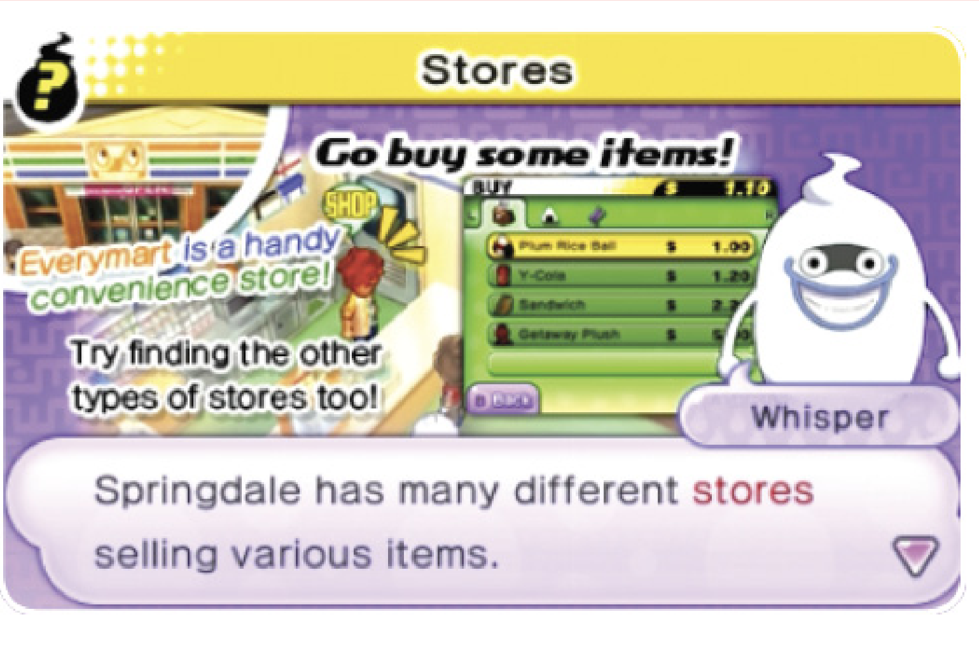
COMBAT TIPS



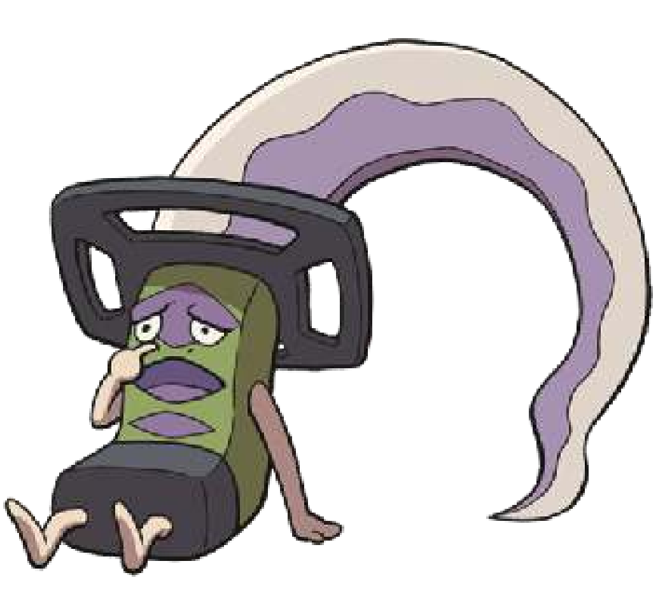
Springdale has many different stores selling various items.

You'll be fighting a series of Yo-kai battles, so don't forget to buy some recovery items.

Recommended Yo-kai

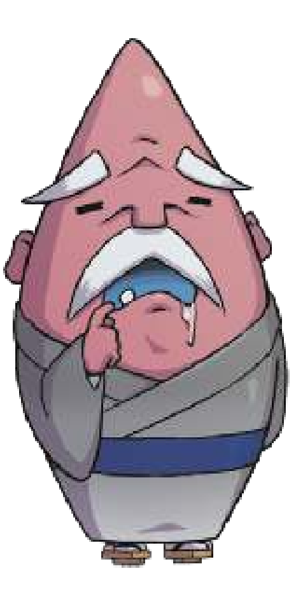
Cutta-nah

Cutta-nah may be E-rank, but his attacks pack a punch. He's only available in the Abandoned Tunnel on Mt. Wildwood.



Hungramps

Hungramps is your main healer early on. His skill is a great help, too.



Special Advice

Search Uptown Springdale for Yo-kai

Objective 2

You found Dismarelda, but you don't have enough Yo-kai friends to defeat her yet. Head outside, and try to recruit more allies. You'll want at least three more Yo-kai (in addition to Cadin and Buhu) to help fill out your team's front and rear lines. Follow your Yo-kai Watch and track them down.

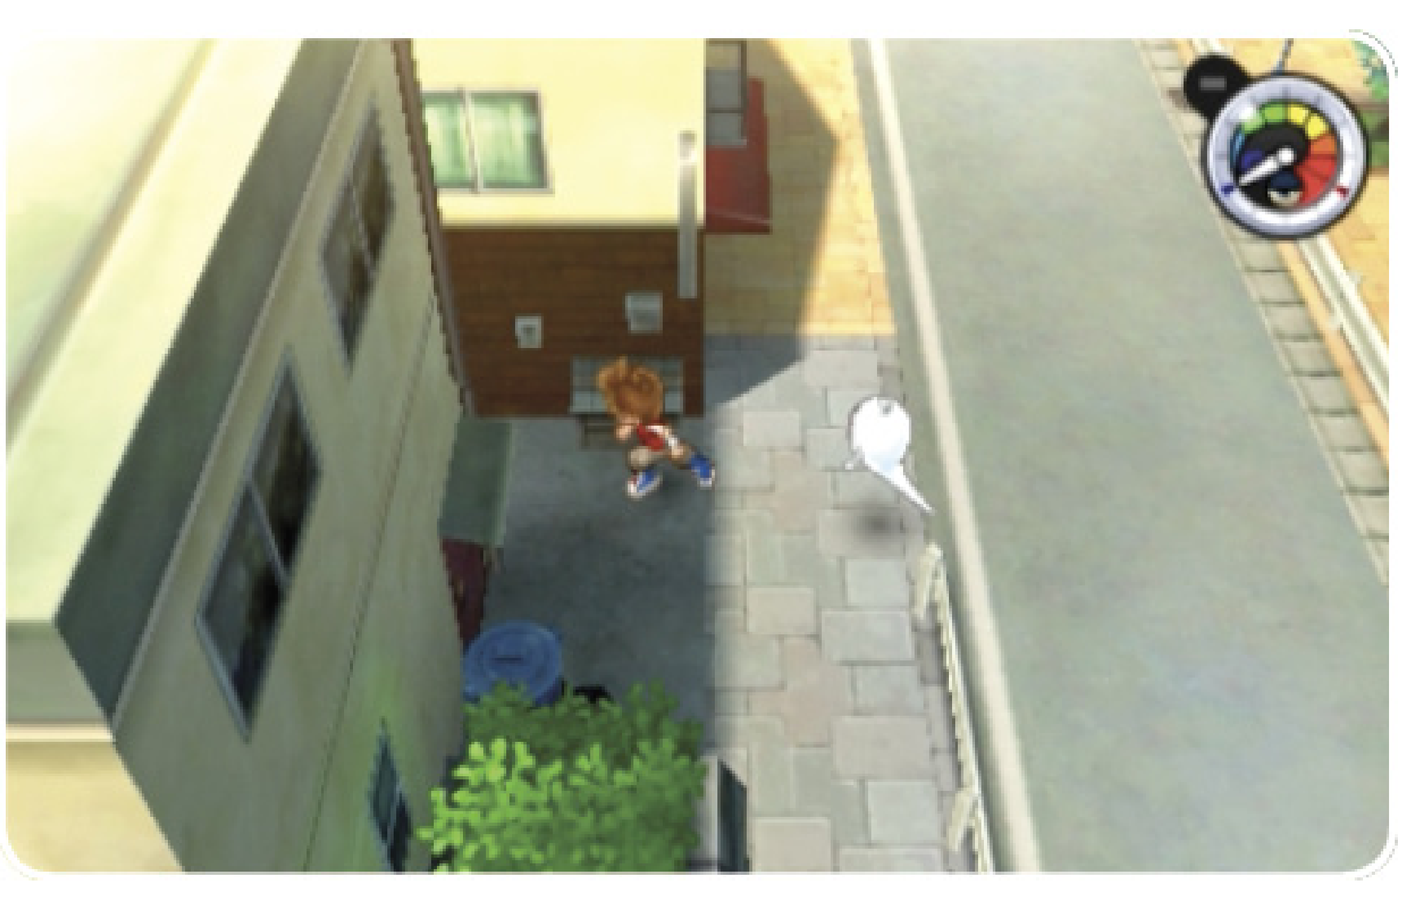
Yo-kai are lurking uptown. Once you get a radar alert, use your Yo-kai Lens.

Under cars, up in trees, in tall grass…your watch picks up readings in all kinds of places.

Objective 5

Head for Back Alleys Where Yo-kai Gather

Once three more Yo-kai friends join Cadin and Buhu in your active party (for a total of five Yo-kai medals in your Yo-kai Wheel), you trigger an event. You'll be asked to find a more powerful Yo-kai: Jibanyan, who's near the fish shop. Sadly, Jibanyan is moping over a photo that another Yo-kai stole from him. You must get that photo back before he can help you.



When tracking down Jibanyan's photo, look for this alley entrance in the building's shadow. It's difficult to spot, but just keep following the map arrow.

Heheh, I ain't givin' up dis pic! Y'hear me?! Not widdout no fight!

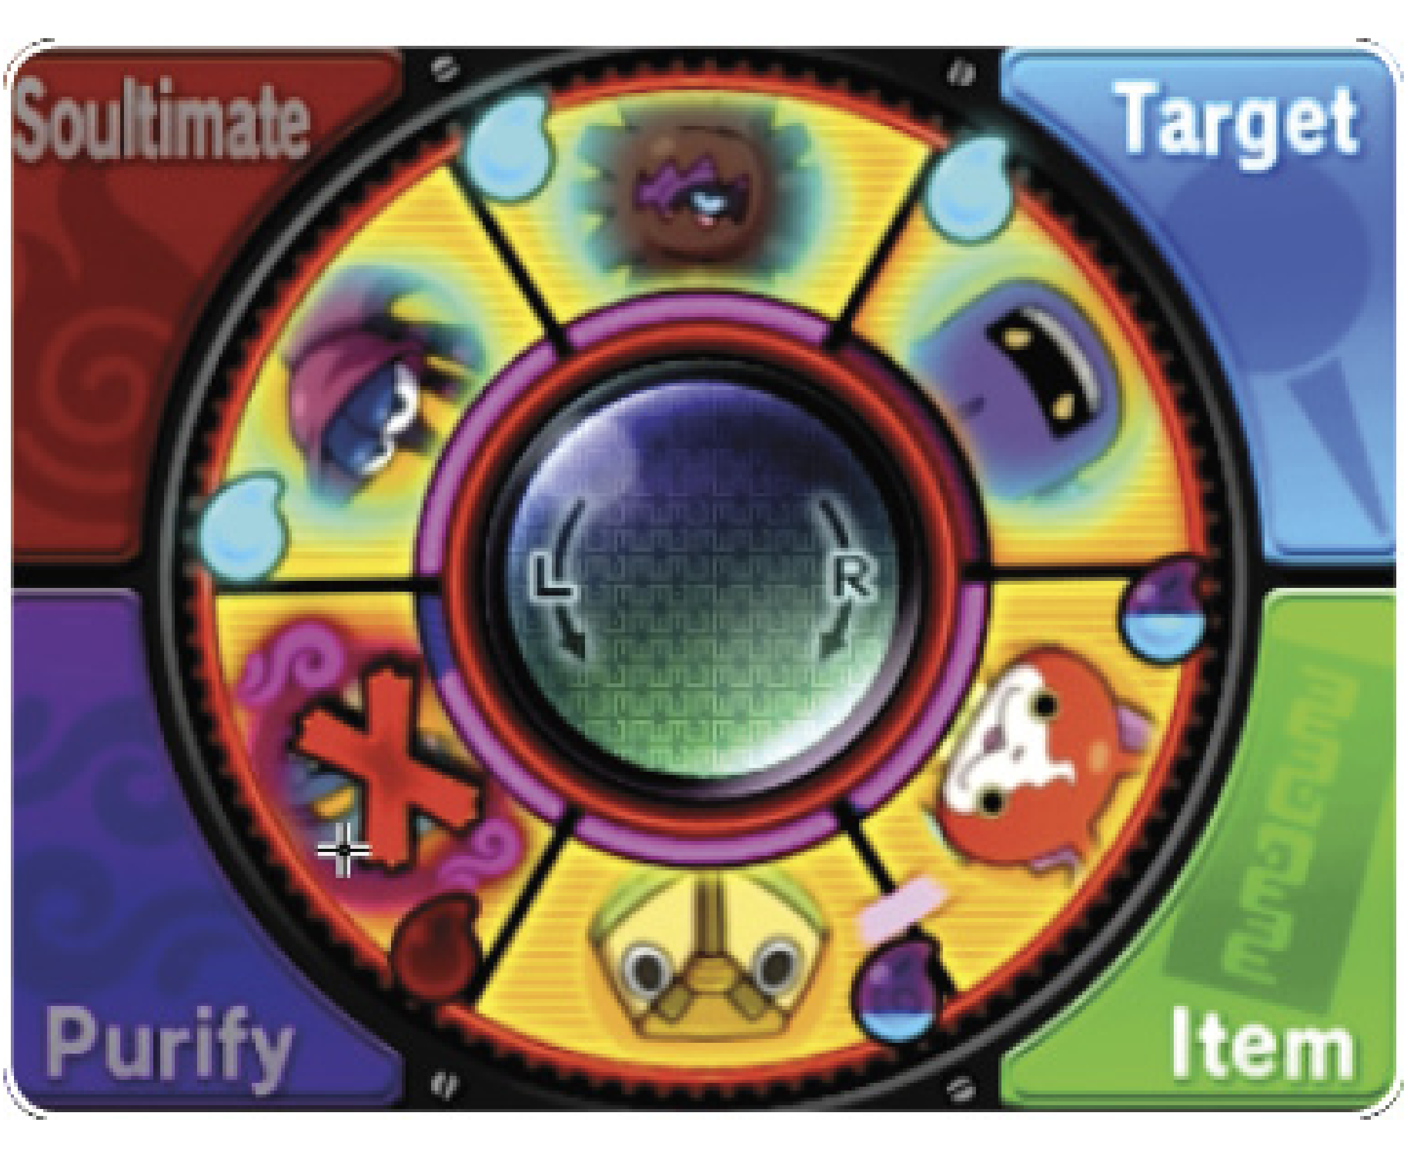
This Shady Back Alley is crawling with hostile Yo-kai. Defeat Roughraff to get the Photo of Amy.

Objective 7

Once You Have Enough Yo-kai, Fight Dismarelda

Jibanyan joins you once you hand over his photo. Now you have a total of six friends, enough to battle Dismarelda with Jibanyan in your party! Your team can sap her power by using damage-based Soultimate Moves.

Use Soultimate Moves to pummel your foe before the battle goes on too long.



Once you expend the Soultimate Moves of all three front-line fighters, spin the Yo-kai Wheel to push your back-line allies with full Soul Meters into the fray. Then, unleash their Soultimates, too!

Story Walkthrough

Chapter 3: Protect the Seals

Who Is This Shady Businessman?

Nate's friend Katie is troubled. Apparently, she got into a "stupid fight" with a good friend. However, it's really all a trick, triggered by a Yo-kai named Tattletell! She and the other Yo-kai are starting to get downright mean because of a certain suspicious incident. Time to start investigating!

Katie
No. I got into this stupid fight earlier...

Note: Remember the story changes slightly depending on whether you're controlling Nate or Katie. If you're Katie, it's Nate you need to help out!

A powerful boss awaits you at the end of the chapter! Make sure your Yo-kai are leveled up high enough.

COMBAT TIPS

How Do You Build Up Soul Power?

A Yo-kai's Soul Meter drops to zero when you unleash its Soultimate Move. The meter takes time to fill back up again. While waiting, place a target pin on any Yo-kai currently loafing in battle to focus your team's fire. Hitting a loafer increases the rate at which you gain Soul power. Attacking an inspirited Yo-kai also drastically improves the rate that Soul Meter replenishes.

McKraken absorbs Soul power with his right hand and HP with his left. Once he sucks in enough Soul, he starts charging up power and shields himself with huge tentacles. Then, after a countdown, he fires his Squangry Blast. Note that McKraken can't unleash his Soultimate Move unless both hands are intact, so make sure that at least one of them stays damaged. In the meantime, though, he has skills and Techniques that can knock you out, confuse you, or reduce your speed. Don't let all your Soul get sucked away while purifying your team!

Reward					
EXP	6000	Money	25000	Item	Mighty Medicine (or Holy Exporb on rare occasions)

You can't damage McKraken is his second form unless you strike the core inside his mouth. To make his mouth open, attack the two nose tentacles first, followed by the design on his chest. It'll open if you attack the design first, too, but it won't cause much damage unless the tentacles are destroyed.

The boss's attacks often hit the entire party, so make sure to focus on healing and purifying. When the boss is at half his HP, he powers up. He uses more Lightning, Fire, and Wind Techniques, as well. Watch out if you have any Yo-kai on your side susceptible to those elements.

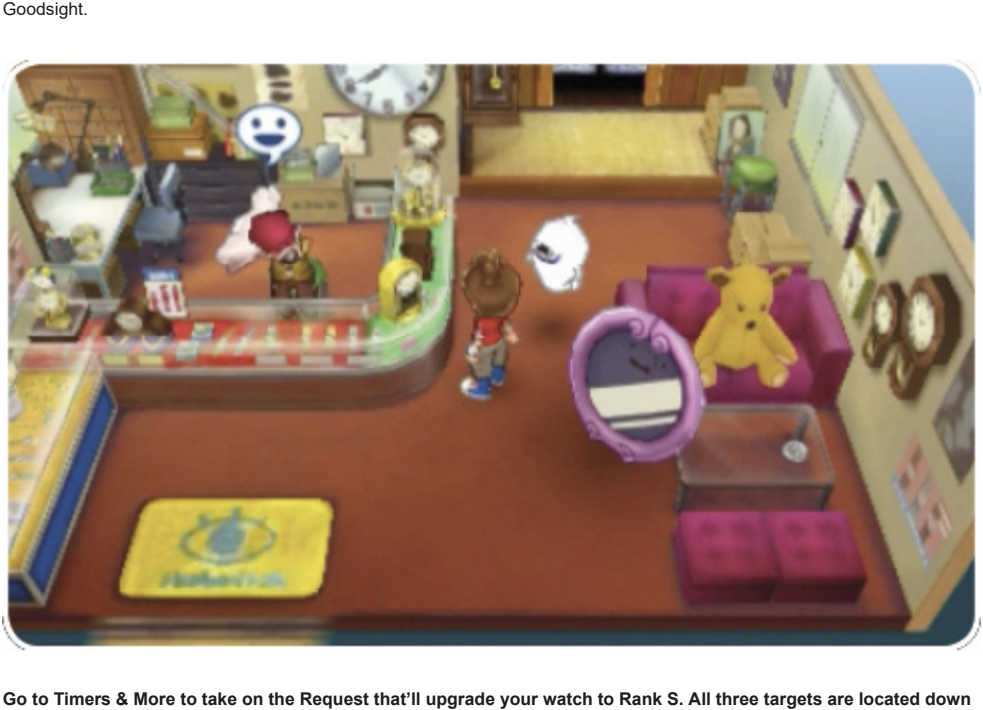
Special Advice

Before You Start the Epilogue…

You've beaten McKraken and watched the story ending, but the adventure's not over yet! There are bosses even more powerful than McKraken to beat. You'll also find high-level Yo-kai to challenge in the post-ending dungeons. In some sub-quests, you'll also run into S-rank Yo-kai, even stronger than A-rank foes. You'll need to buff up to even stand a chance.

Raise Your Watch Rank to S

Only Yo-kai masters who beat the game can achieve this rank. Reaching Rank S opens up exclusive Requests, and there are S-rank Watch Locks to open, too! To achieve this, you must find and defeat three more tough foes in the Yo-kai World for Mr. Goodsight.



Go to Timers & More to take on the Request that'll upgrade your watch to Rank S. All three targets are located down in Yo-kai World.

Liar Mountain: Impass awaits you here.

Hooligan Road: Look for Appak here.

Hungry Pass: Timidevil lurks here.

Stock Up on Items and Equipment

Gather equipment for your Yo-kai to compensate for their weaknesses and expand upon their strengths. Some Requests reward you with extremely helpful items, too, so check out what's available. Don't forget to stock up on healing items for the long string of battles ahead.

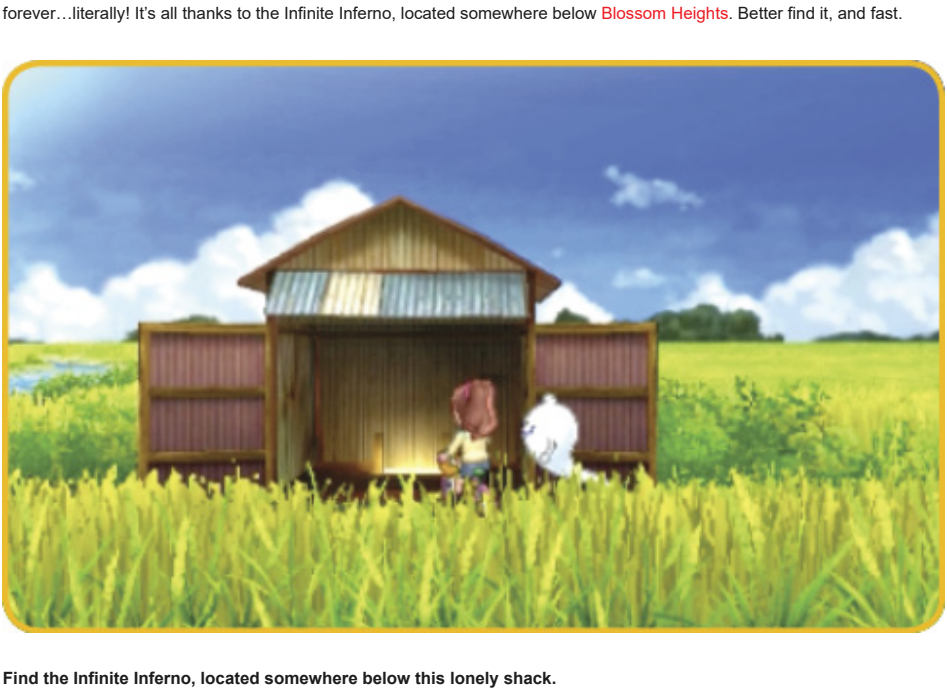
Story Walkthrough

Epilogue: Infinite Inferno

It turns out defeating McKraken didn't change things quite as much as it seemed initially. Now your Yo-kai interlude can last forever…literally! It's all thanks to the Infinite Inferno, located somewhere below Blossom Heights. Better find it, and fast.



Find the Infinite Inferno, located somewhere below this lonely shack.

Reaching Infinite Inferno

To find the Infinite Inferno, travel to Breezy Hills first and visit Mr. Stone's house. He and his wife will divulge the rumors they've heard…

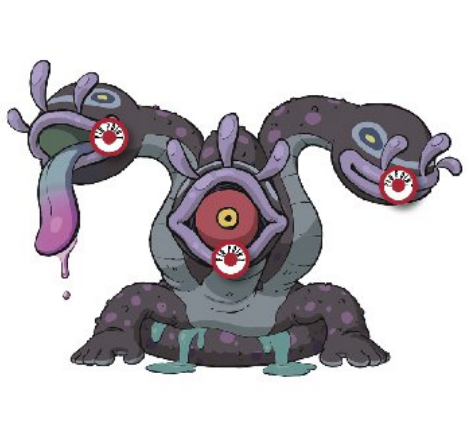
1st Circle Boss

Eyedra



HP	Weak Against	Target Level
4400	🌀	60

Reward					
EXP	5000	Money	27,000	Item	Sun Bracelet / Red Coin

Eyedra is on a whole higher level of power from its cousin Slimamander in Chapter 3. Defeat two heads to take his fire attacks out of the picture as much as possible. Careful! The fire he spits strikes your whole party. His long tongue damages a single ally per attack.

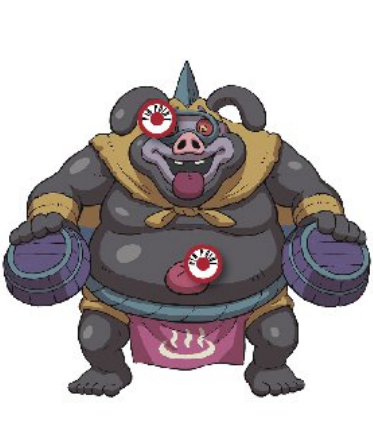
Boss Skill

Warty Wallop

A wild three-headed rush. Eyedra can't use this attack if at least one head is downed.

2nd Circle Boss

Hoggles



HP	Weak Against	Target Level
4700	💧	63

Reward					
EXP	5400	Money	30,000	Item	Top Techniques / Yellow Coin

This boss's physical attack strength makes extended fighting a bad idea. Focus your attack on the weak point in his navel, and try to keep him downed as much as possible. The buckets that Hoggles tosses can damage a single ally per attack. Also, he can strike your whole party at once with his rear end slam.

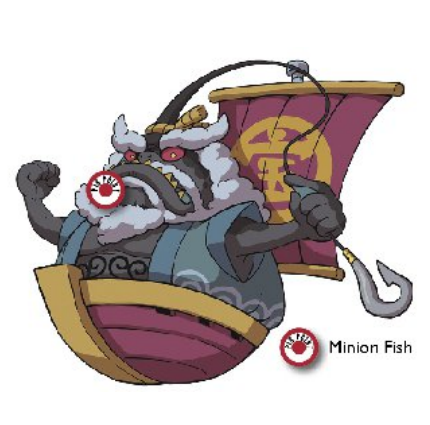
Boss Skill

Potbelly Boil

Attack his navel, and he'll turn bright red and eventually unleash a Soultimate. Strike his head to prevent that.

3rd Circle Boss

Styx Mk.VI



HP	Weak Against	Target Level
4500	⚡	65

Reward					
EXP	5900	Money	33,000	Item	Galaxy Charm / Orange Coin

Focus on stamping out the minions he summons—if you let them operate, the boss's Soultimate Move can wipe you out in a flash. His water-element attacks can be bad news for some team members. If you let this boss's minions heal him, the battle's never going to end.

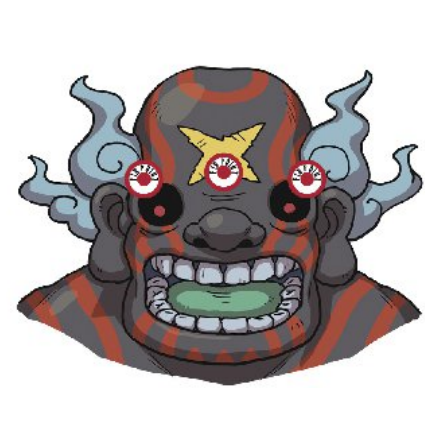
Boss Skill

Ferryman Shanty

Once he has two minions at hand, Styx fires off this brutal water-element Soultimate Move.

4th Circle Boss

Clipso



HP	Weak Against	Target Level
4900	🔥	67

Reward					
EXP	6500	Money	35,000	Item	Lunar Ring / Pink Coin

Focus on taking down one of Clipso's eyes on the side where a healer of weaker Yo-kai is, and let a more defensive Yo-kai take the brunt of Clipso's hits. His earth-element Techniques can hit you hard even when his eyes are shut. If his Forehead Flick strikes an ally, he might wind up confused.

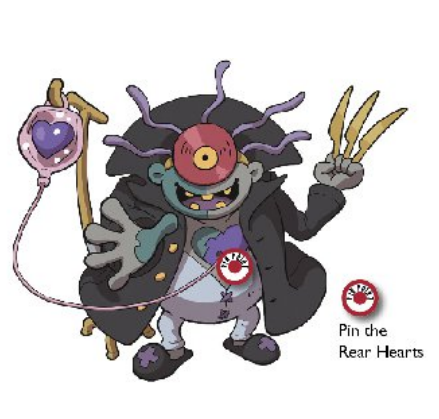
Boss Skill

Crescent Claws

This deadly blow damages the front row of your team. Cancel it by targeting and closing Clipso's eyes as he charges up.

5th Circle Boss

Dr. Nogut



HP	Weak Against	Target Level
4500	⚡	70

Reward					
EXP	7100	Money	37,000	Item	Meteor Badge / Blue Coin

Use your targeting pins to pop the hearts behind this boss, or else he can refill his HP quickly. That'll bog the battle down and eventually force you into a corner. One of Dr. Nogut's skills saps an ally's soul completely. The doctor's vicious scalpel slash damages your whole party.

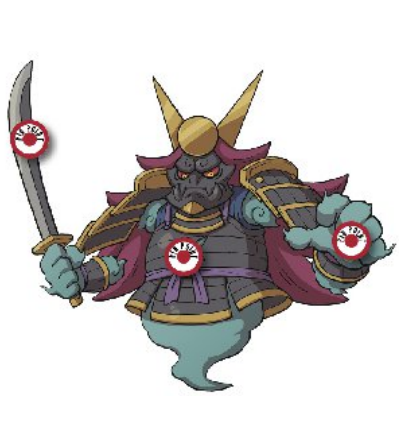
Boss Skill

Double Dare

This move not only damages and Inspirits your team's front row, but it poisons them, too. Watch out for that extra poison damage.

6th Circle Boss

Spooklunk



HP	Weak Against	Target Level
4000	🔷	72

Reward					
EXP	7800	Money	40,000	Item	Hidden Hits / Green Coin

Spooklunk is far more powerful than his relative from Chapter 8, Phantasmurai. Hurry to break his sword, or he'll slice your team up and send them packing. Once half his HP is gone, Spooklunk wields two swords for more attack power. He likes to eviscerate his enemies with a wind-element Aerial Slash.

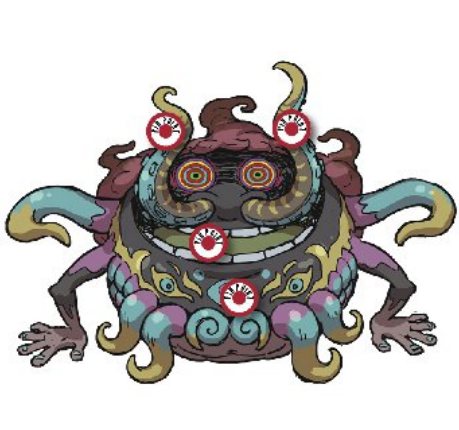
Boss Skill

Rejuvenation

Used only when he's dual-wielding. Break Spooklunk's swords, or else you'll take lethal damage.

7th Circle Boss

Squisker



HP	Weak Against	Target Level
4600	None	74

Reward					
EXP	9000	Money	45,000	Item	Soul Secrets / Purple Coin

You must attack the core inside Squisker's mouth to deal any damage. Attack the nose tentacles first, then target the design on his body to make his mouth open, revealing the core. Squisker uses a lightning-element Technique when his HP is at half. He's got a full-party wind-element attack, too.

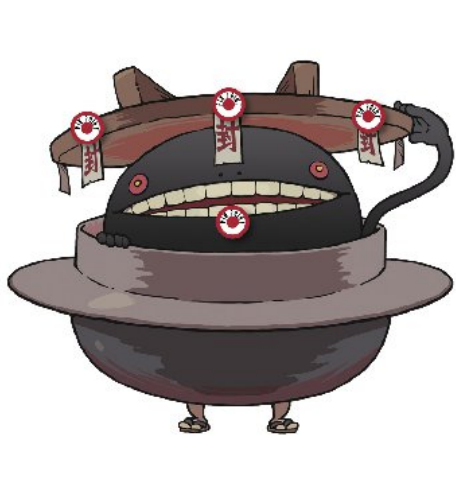
Boss Skill

Inkredible Regret

Used only when his mouth is open. Damage the core a certain amount to cancel.

8th Circle Boss

Wobblewok



HP	Weak Against	Target Level
5000	None	80

Reward					
EXP	12,000	Money	50,000	Item	Mega Exporb / Light Blue Coin

Wobblewok appears complete with his lid; you can't damage him unless you deal with it. Attack and peel off the three talismans, and then the real boss pops up. You can also cancel Wobblewok's Soultimate Move by peeling off his talismans while he's charging it up. That downs him, as well.

When Wobblewok's eyes are red, he uses nothing but physical attacks, and only spirit power works against him. When they're blue, he sticks to his SPR Techniques, and only physical attacks work. Take him on with a Yo-kai team that excels at both types of offense. And beware his Awful Breath—it deals your party random status ailments!

Boss Skill

Pitch Bomber

Wobblewok's lid opens, dealing serious damage to all allies. Target his three talismans to peel them off before he can finish charging it up.

Challenge the Infinite Inferno Again and Again

Once you beat Wobblewok, the game is well and truly conquered. However, all the bosses from the 1st Circle on down will be revived, letting you try your hand again, if you want. Taking on all the bosses again is the best way to push yourself to Level 80 and beyond.

Deeper Into the Game

Deeper Into the Game

Now let's take a more in-depth look at some of the game systems in Yo-kai Watch. Here, we'll review Yo-kai evolution and fusion, and discuss how to enhance the overall strength of your team. We'll also explore the game's special event battles and reveal hidden bosses that can really boost your stats.

Exclusive Passwords = Excitement Coins!

Excitement Coins are Crank-a-kai coins that aren't found in-game. Instead, you acquire special passwords from other sources and then input those codes at window 2 in the Lambert Post Office. When you insert an Excitement Coin in the Crank-a-kai, there's a very good chance that one of these four rare Yo-kai will appear!

Deeper Into the Game

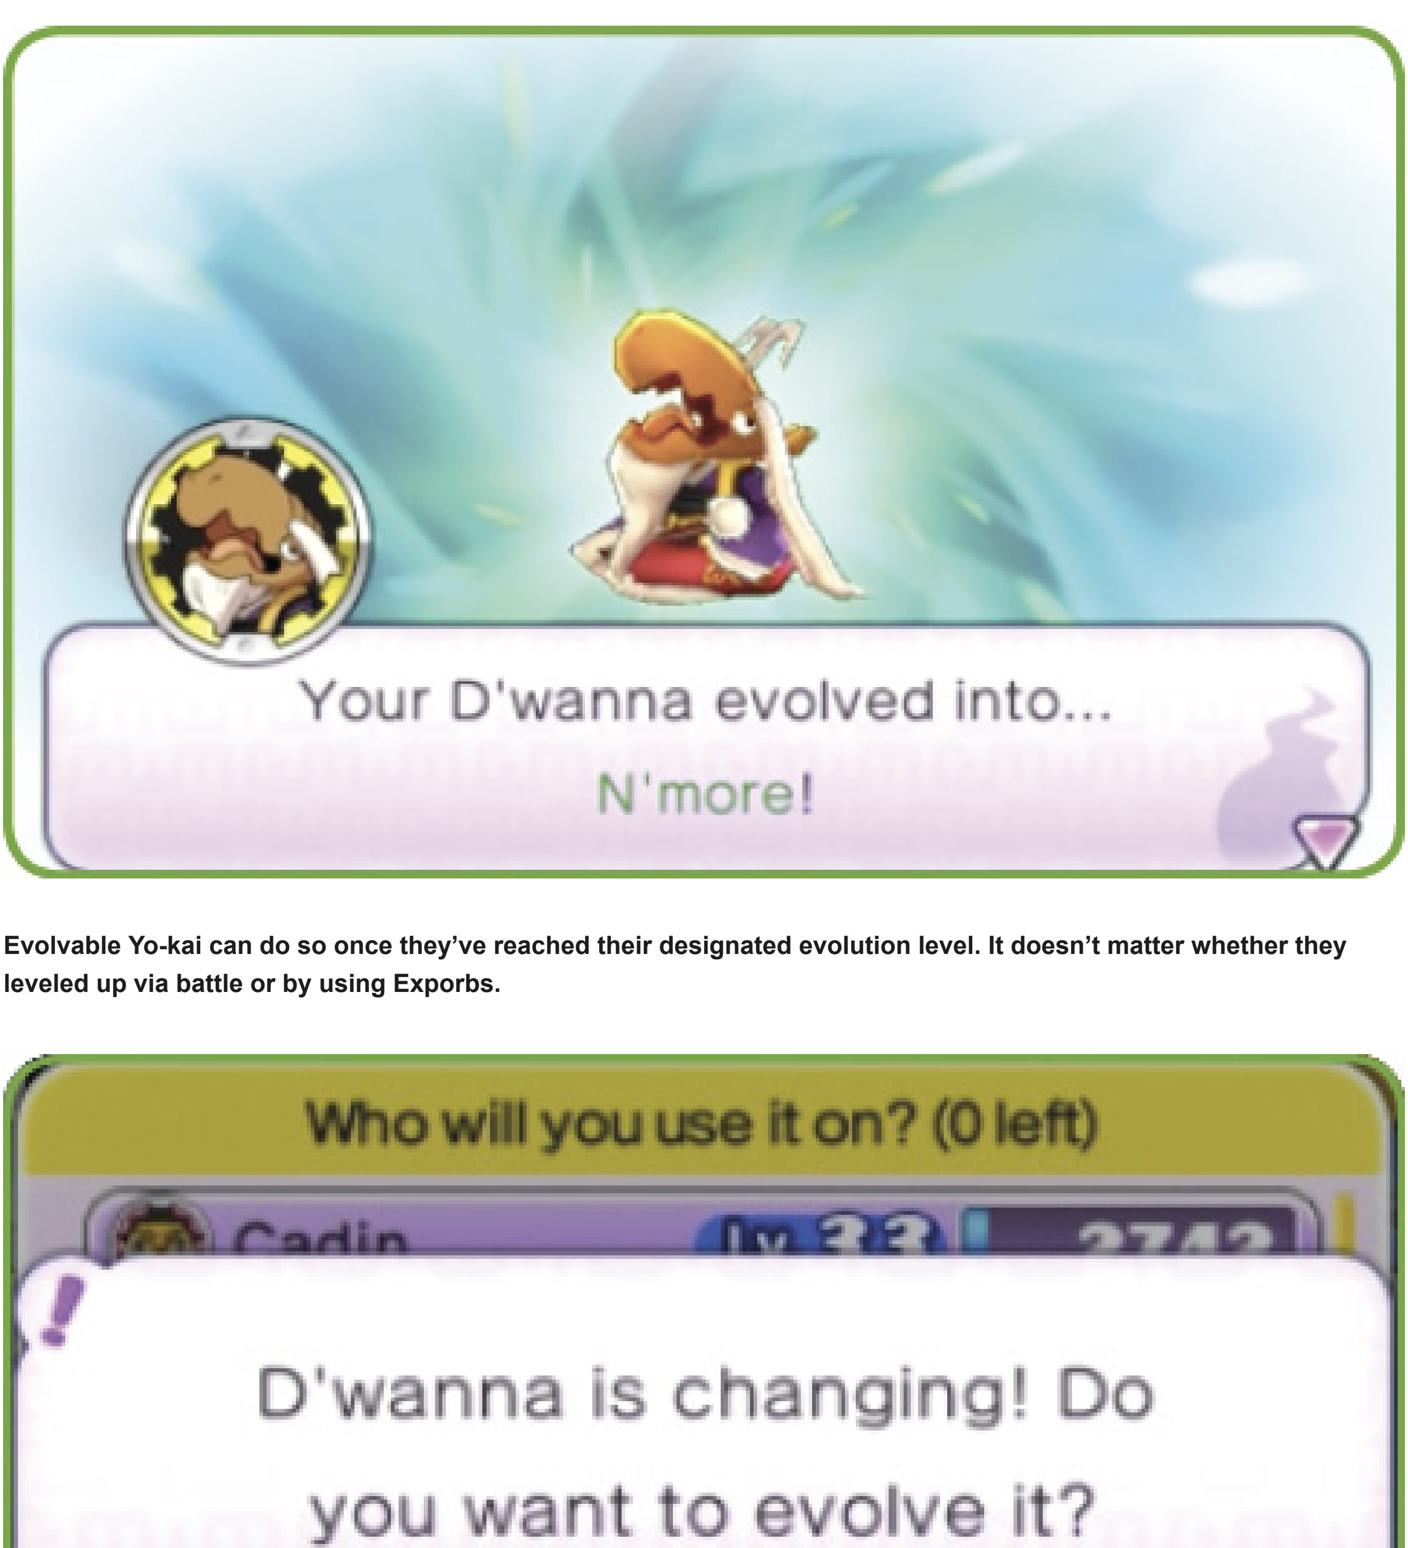
Evolving and Fusing New Yo-Kai!

Simply leveling up your Yo-kai allies won't always produce the strongest Yo-kai teams available. In some cases you can evolve or fuse Yo-kai to create new, more powerful beings (found Yo-kai will always be weaker than Fused Yo-kai). A total of 43 Yo-kai can be generated in this fashion. The following section introduces them all, so find the ones that best fit your needs.

Evolution

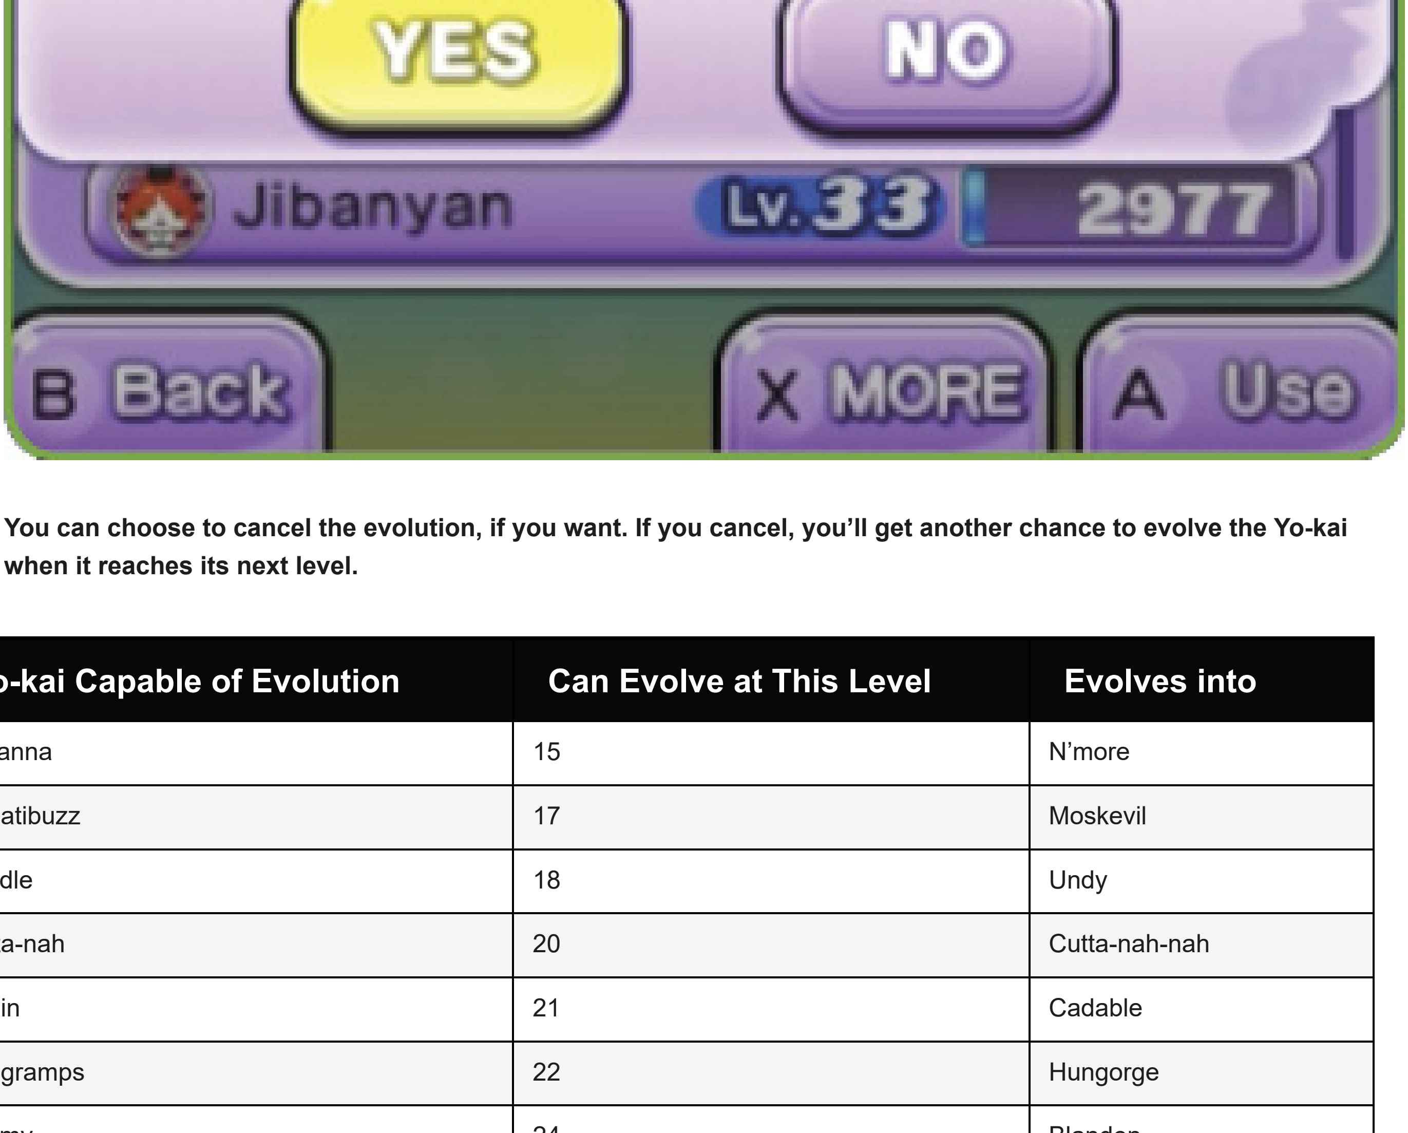
Fifteen special Yo-kai in the game can "evolve"—that is, they can transform themselves into more powerful versions with new names. Yo-kai capable of evolution can do so when they reach a required level. This level varies from Yo-kai to Yo-kai. The earliest is D'wanna, who can evolve at level 15; the latest are Komason and Komajiro, who can evolve at level 35. Typically, the later a Yo-kai is able to evolve, the more powerful its evolved form will be.

Note that evolution is not automatic. You make the choice.



Your D'wanna evolved into...
N'more!

Evolvable Yo-kai can do so once they've reached their designated evolution level. It doesn't matter whether they leveled up via battle or by using Exporbs.



Who will you use it on? (0 left)

D'wanna is changing! Do you want to evolve it?

You can choose to cancel the evolution, if you want. If you cancel, you'll get another chance to evolve the Yo-kai when it reaches its next level.

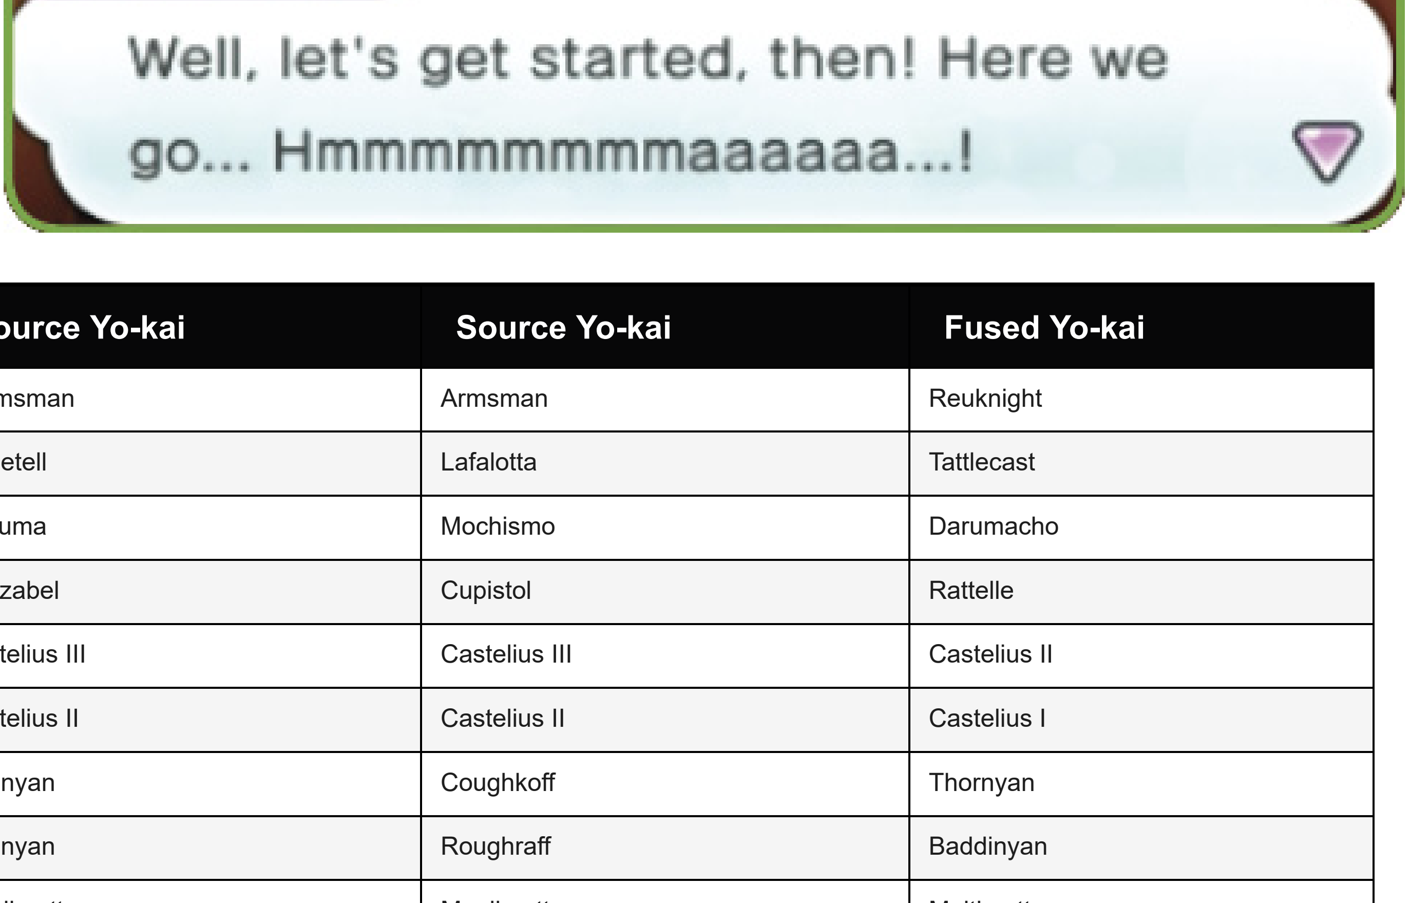
Yo-kai Capable of Evolution	Can Evolve at This Level	Evolves into
D'wanna	15	N'more
Negatibuzz	17	Moskevil
Pandle	18	Undy
Cutta-nah	20	Cutta-nah-nah
Cadin	21	Cadable
Hungramps	22	Hungorge
Dimmy	24	Blandon
Droplette	25	Drizzle
Slush	25	Alhail
Roughraff	26	Badude
Fishpicable	27	Rageon
Noway	29	Impass
Walkappa	32	Appak
Komasan	35	Komane
Komajiro	35	Komiger

Fusion

The other way to create new, more powerful Yo-kai is to visit Mr. Zen at the Shoten Temple. There, he can either fuse two Yo-kai or fuse a Yo-kai with an item. There is no level limit in either case. Once you've finished combining items or Yo-kai, the recipe is recorded.

Fusing Two Yo-kai

A total of 12 new Yo-kai can be created by fusing two "source" Yo-Kai. If you decide to fuse two source Yo-kai, the resulting entity combines the traits of its progenitors. Note that three Yo-kai created by this process—Castelius II, Castelius I, and Multimutt—are formed by combining two copies of the same source Yo-kai.



Mr. Zen

Well, let's get started, then! Here we go... Hmmmmmmmmaaaaaa...!

Source Yo-kai	Source Yo-kai	Fused Yo-kai
Helmsman	Armsman	Reuknight
Tattletell	Lafalotta	Tattlecast
Dulluma	Mochismo	Darumacho
Dazzabel	Cupistol	Rattelle
Castelius III	Castelius III	Castelius II
Castelius II	Castelius II	Castelius I

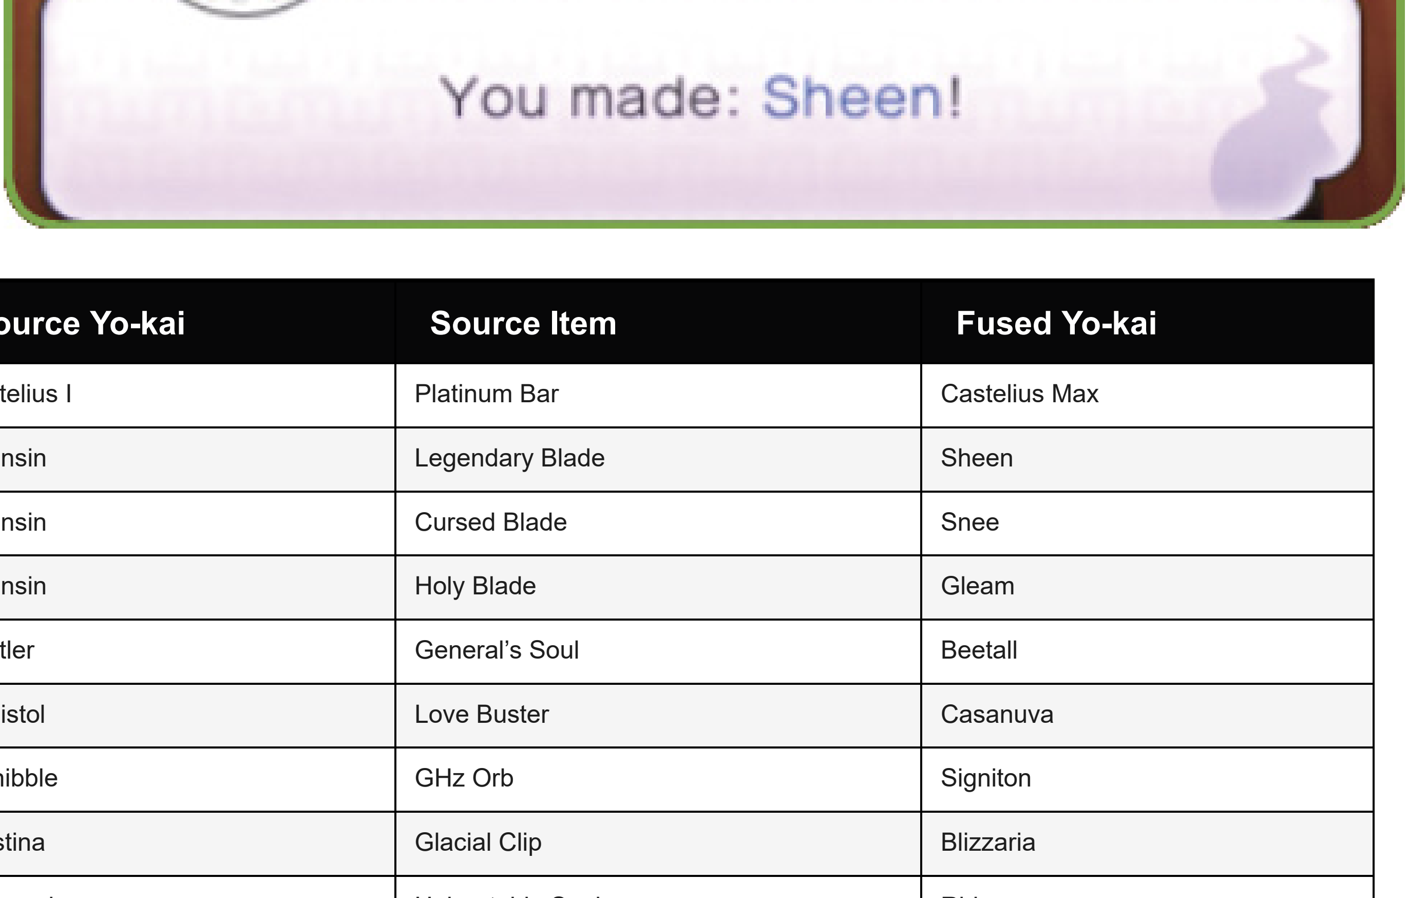
Jibanyan	Roughraff	Baddinyan
Manjimutt	Manjimutt	Multimutt
Enerfly	Enefly	Betterfly
Happierre	Dismarelda	Reversa
Hidabat	Tengloom	Abodabat

Fusing a Yo-kai with an Item

Sixteen rare Yo-kai can be created if you fuse a specific Yo-kai with a special item. For example: Combine the Yo-kai named Chansin with the Legendary Blade to create the powerful Sheen!



You made: Sheen!

Source Yo-kai	Source Item	Fused Yo-kai
Castelius I	Platinum Bar	Castelius Max
Chansin	Legendary Blade	Sheen
Chansin	Cursed Blade	Snee
Chansin	Holy Blade	Gleam
Beetler	General's Soul	Beetall
Cupistol	Love Buster	Casanuva
Signibble	GHz Orb	Signiton

Ake	Buff Weight	Payn
Grumples	Ageless Powder	Everfore
Timidevil	Shard of Evil	Beelzebold
Noko	Drop of Joy	Bloominoko
Draggie	Dragon Orb	Dragon Lord

Post-Fusion Yo-kai Levels

The level of any newly fused Yo-kai is based on the levels of its source Yo-kai. Here are the simple formulas:

When Fusing Two Yo-Kai

Level of Fused Yo-kai = Sum of the levels of the two source Yo-kai divided by 2

When Fusing Yo-Kai with Item

Level of Fused Yo-kai = Same as source Yo-kai

Fusing Two Items

Mr. Zen can also fuse two items to conjure up a new piece of equipment. The Venoct Gauntlet and Heavenly Sash are two rare and powerful pieces of equipment available only through this fusion process.

Yo-kai Special Event Battles

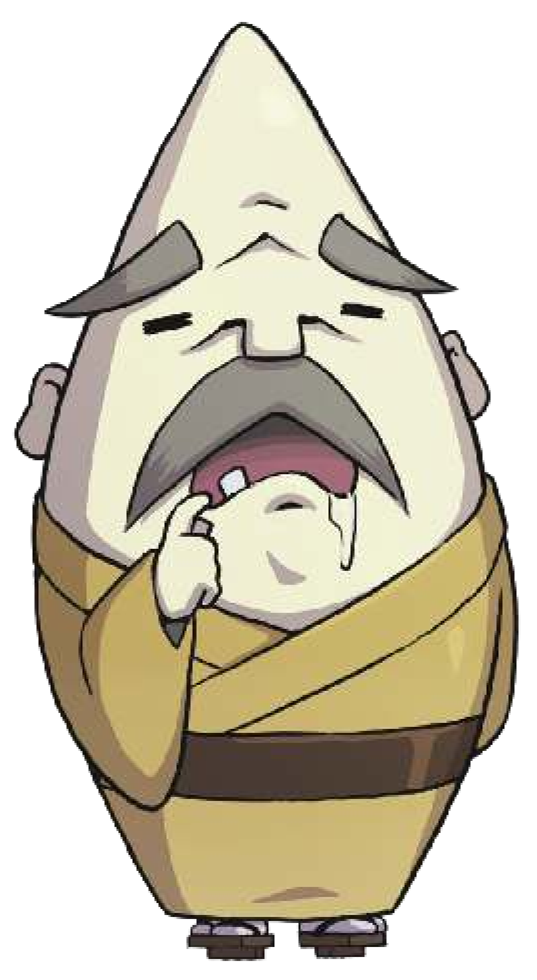
Four very strong Yo-kai emerge into the world once you complete the game's story. Their powers are substantial, rivaling the toughest bosses. When roaming Springdale and whereabouts after the story is finished, you can challenge each of the four as many times as you wish, making them perfect for testing your skills or leveling up. You can even earn their friendship if you defeat them, adding their medals to your Medallium!

Stat Note

The HP, EXP, and Money rewards for each Special Event Battle vary slightly from fight to fight. The values listed here are averages.

The only drawback is that, win or lose, you can fight only one of these enhanced Yo-kai per real day. This 24-hour period is reset every morning when the internal clock on your 3DS hits 6:00 am.

Grainpa



HP	Weak Against
1936	💧

Reward					
EXP	5490	**Money**	1069	**Item**	Candy Apple / Opal

Location:

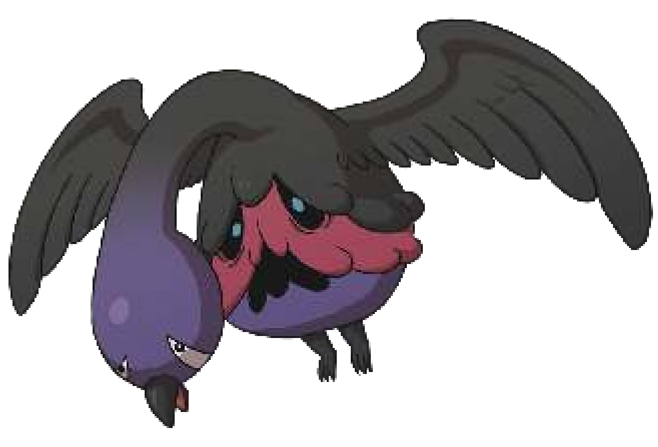
Hungry Pass

You will not be able to visit this area until you've reached Watch Rank S.

Grainpa's technique, Soultimate Move, and Inspirit are all restorative, so be prepared for a long and grueling fight. Rice's Kindness is particularly troublesome, allowing Grainpa to Inspirit himself and restore HP every turn. One effective way to combat this is to use Greesel in your party to steal the effect from the enemy.

On the offensive side, Grainpa's Headsmack attack is quite damaging. However, it can be rendered useless if you've got Baddinyan with a sticker of hate on your side; his Pompadour skill is able to dodge the attack!

Skreek



HP	Weak Against
1914	🔥

Reward					
EXP	8862	**Money**	1911	**Item**	Fruit Drops / Soul Secrets

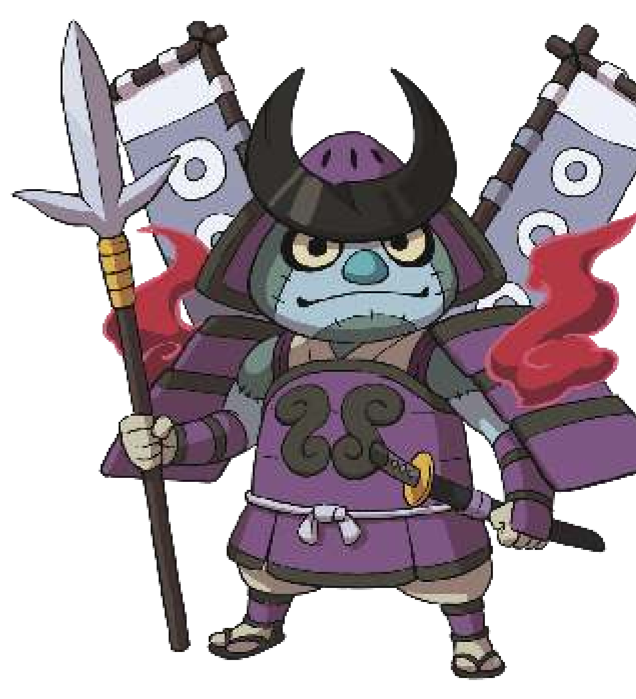
Location:

Byrd House—Hidden Room

This battle is available after you complete Request 100, "Bird Collection 2."

In quick, back-to-back strikes, this tough Yo-kai can fire off Despair, his immobilizing Inspirit, and then follow up with Meet the Reaper, a powerful Soultimate Move that reduces your full party's stats. You'll want Yo-kai on your team with skills like Matchless Shell (Almi and Spenp) and Miraculous Scales (Enerfly, Enefly, Betterfly, or Peppillon) that nullify Inspirit attacks.

Corptain



HP	Weak Against
2595	🌀 💧

Reward					
EXP	11,742	**Money**	2348	**Item**	Getaway Plush / Soul Secrets

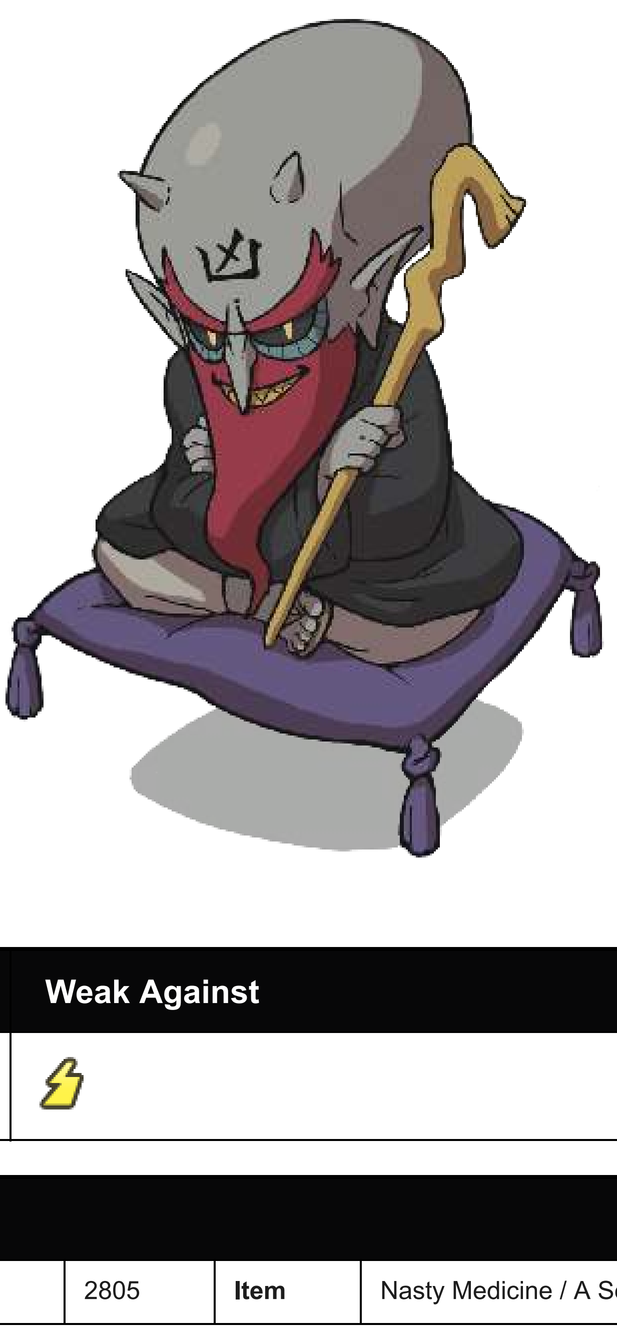
Location:

Old Mansion—Side House Attic

Once the gate to the Old Mansion's Side House is open, you can gain access to its attic by talking to a man on the second floor of Gourd Pond Museum.

This S-Rank warrior is an honorable fellow, and his Stab Storm hits with extremely high attack power. In addition to normal attacks hitting five times, the critical hit rate of this Ticket to Hades Soultimate Move is very high, making this battle one in which you're likely to suffer heavy damage. Make sure you have a lot of food on hand and are accompanied by Yo-kai that can restore HP.

Awevil



HP	Weak Against
2862	⚡

Reward					
EXP	13,008	**Money**	2805	**Item**	Nasty Medicine / A Serious Life

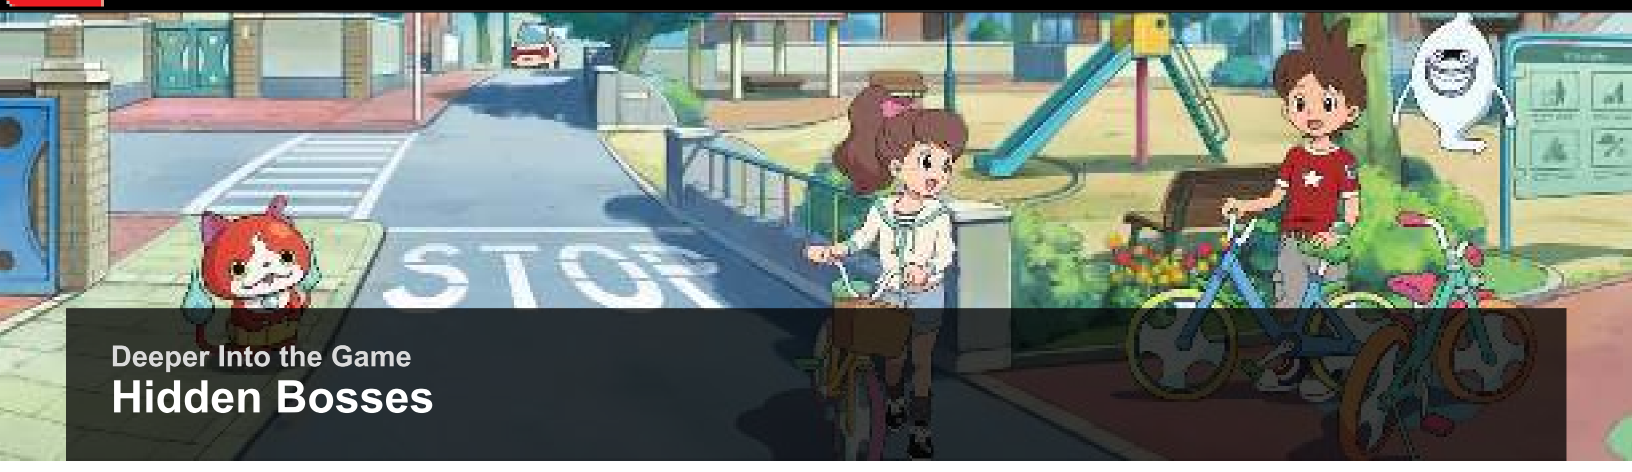
Location:

Springdale Underground Waterway

You won't be able to fight Awevil until you've opened all three floodgates!

Awevil is the strongest of the four special event Yo-kai. His Darkness Power is likely to give you the biggest trouble, as he uses this ability to continually steal HP from your team. And his Soultimate Move, called Pitch Black Curse, will immobilize and inflict damage on your entire party.

Finally, his Ultimate Dark skill is unavoidable—its Inspirit success rate is 100%—and it can completely nullify the likes of Matchless Shell or Miraculous Scales. Move any Inspirited Yo-kai to your back line and purify immediately to minimize the damage inflicted.

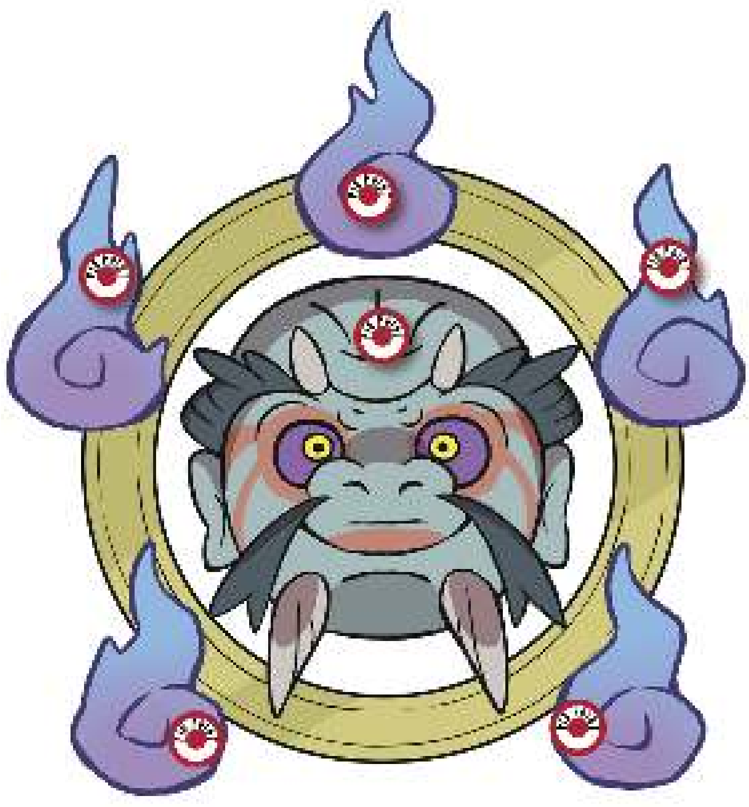


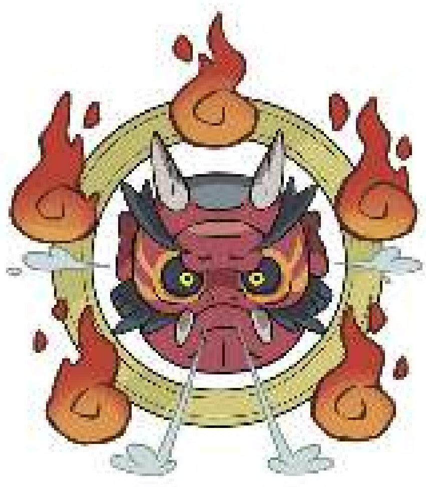
Deeper Into the Game

Hidden Bosses

Guess what? Hidden bosses lurk out there; bosses that have nothing to do with the story or sub-quests. These entities can be challenged any time after reaching Chapter 5 and Watch Rank A. Be warned, however, that they are quite strong and won't go down easily. Your best bet may be to wait until after you've completed the main story to fight them.

Duwheel





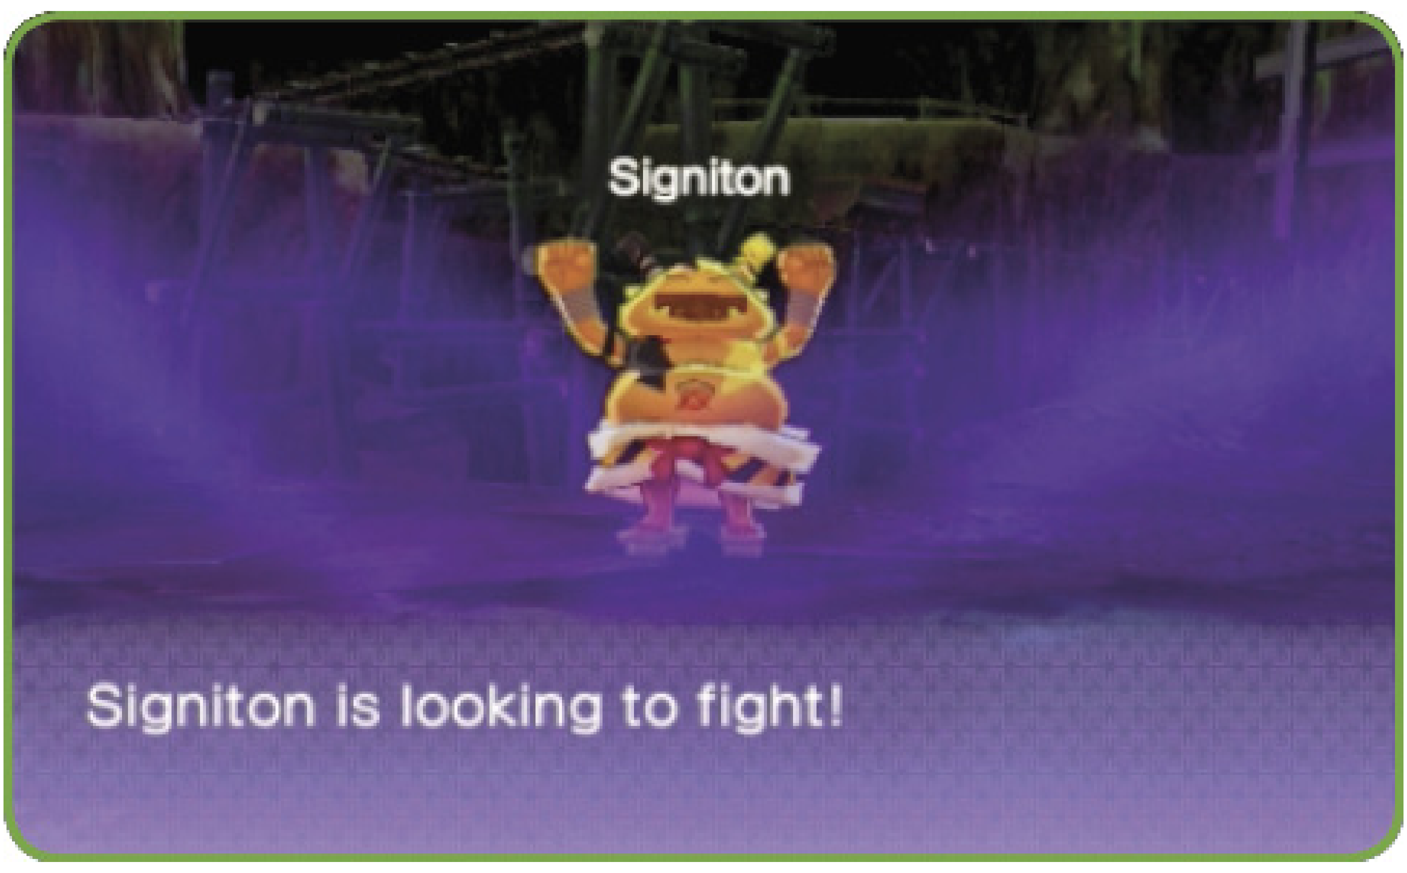
HP	Weak Against
4500	💧 🪨

Reward					
EXP	3800	**Money**	20,000	**Item**	Fire Ring

Find Duwheel in the Mine

It takes work to find this boss. First, go up Mt. Wildwood's mountain trail and find the old Abandoned Tunnel. Work across the West Cave to the Rank A Watch Lock and go through to reach the East Cave. Your first goal is to get your hands on Payn Oil and the Signiton Engine.

Payn Oil can be found in a chest on the upper part of the map. Then find and defeat Signiton to acquire his Signiton Engine. Now you can head back to the West Cave to repair the broken trolley. Ride it to find Duwheel.



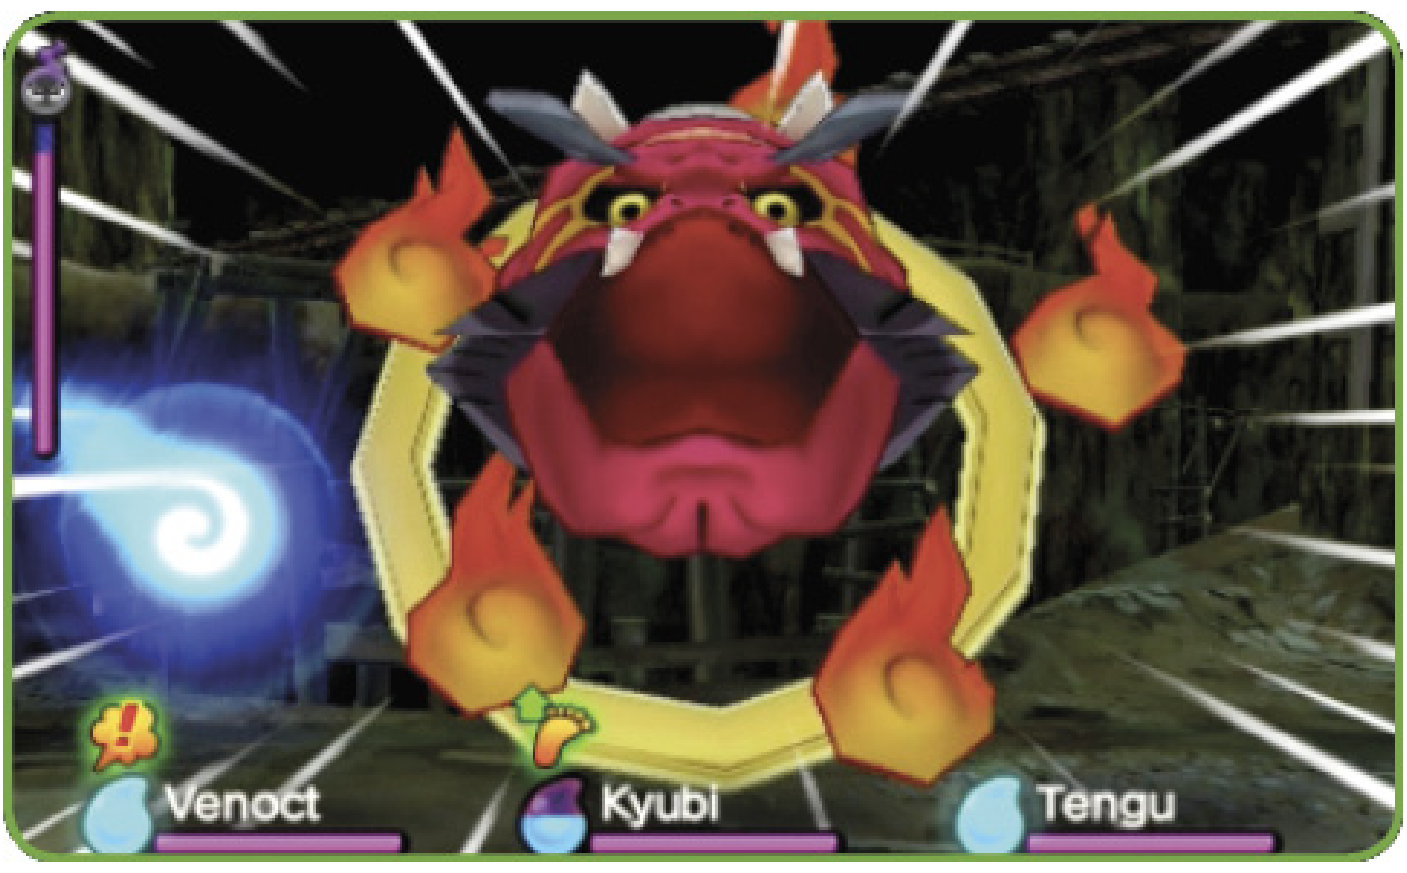
Signiton

Signiton is looking to fight!

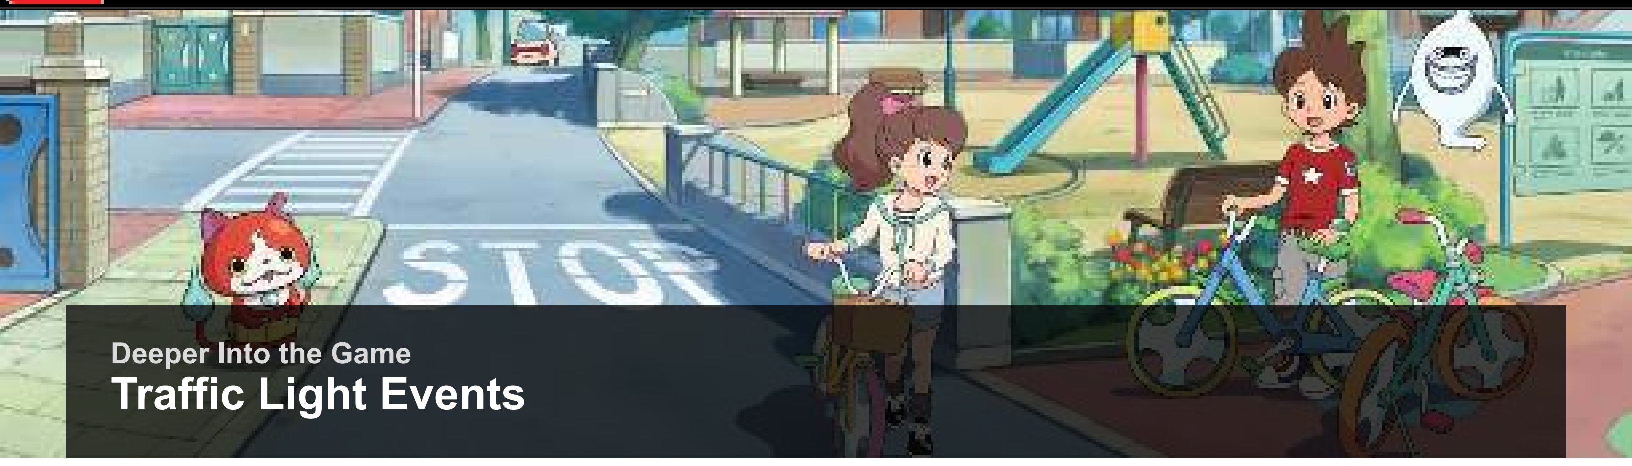
Signiton awaits you back where you reset the points. Defeat him to receive a Siginiton Engine.

Defeat Duwheel!

One of the five Wisps around Duwheel's face is its weak point. An attack on any of the other four Wisps will trigger a counterattack. Unfortunately, the weak Wisp will alternate over time; it's easy to lose track of its location. Five attacks on its face or weak point causes its body to turn red in anger. A good strategy is to not hit the Wisps and position a Daiz or Confuse to be hit by the Soultimate Move.



After Duwheel's face reddens in anger, watch out as he charges up his Soultimate Move, a fiery deployment of Wisps called Redsplosion!



Deeper Into the Game

Traffic Light Events

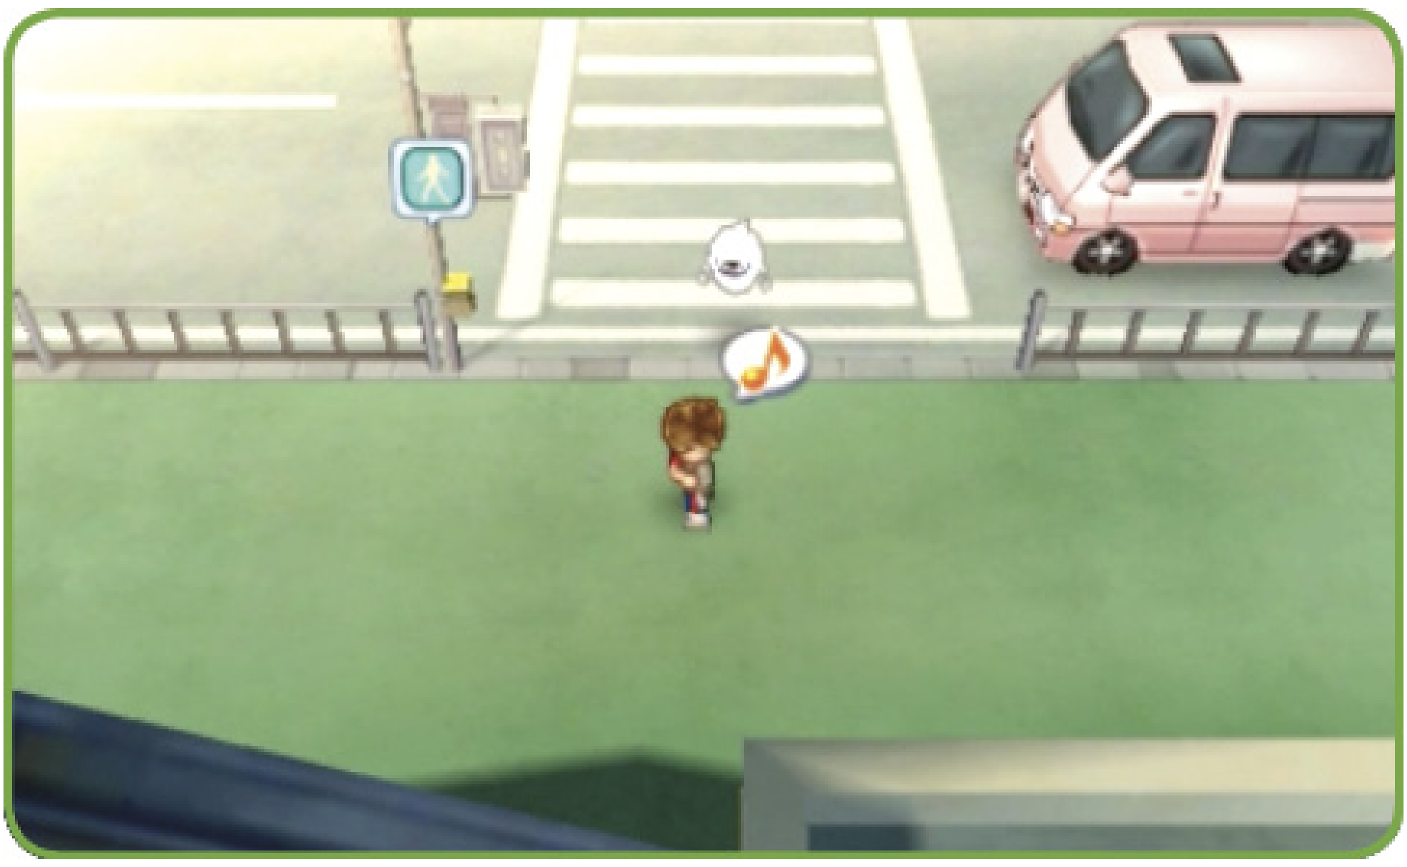
Pushbutton traffic signals are installed at crosswalks around town. Using them, or not using them, can trigger special events. You can earn a reward if you regularly cross the street when the light is green, as you're supposed to. But if you consistently ignore the signal (and Whisper's warnings) and cross when the light is red, you will be punished. The punishment is a battle with a very powerful Yo-kai. You can also avoid crosswalks altogether to avoid their effects.

The "Good Kid Count"

The crosswalk system has a hidden counter built into it. Your "good kid count" starts at zero and increases by one every time a crossing is done correctly—that is, you push the crosswalk button and wait until the light turns green. The count decreases by one if the "Wait" signal is ignored and you cross the street against the red light. A reward event is triggered if the count reaches plus five, while a punishment event is triggered if it reaches minus five.

Count Reaches Plus Five

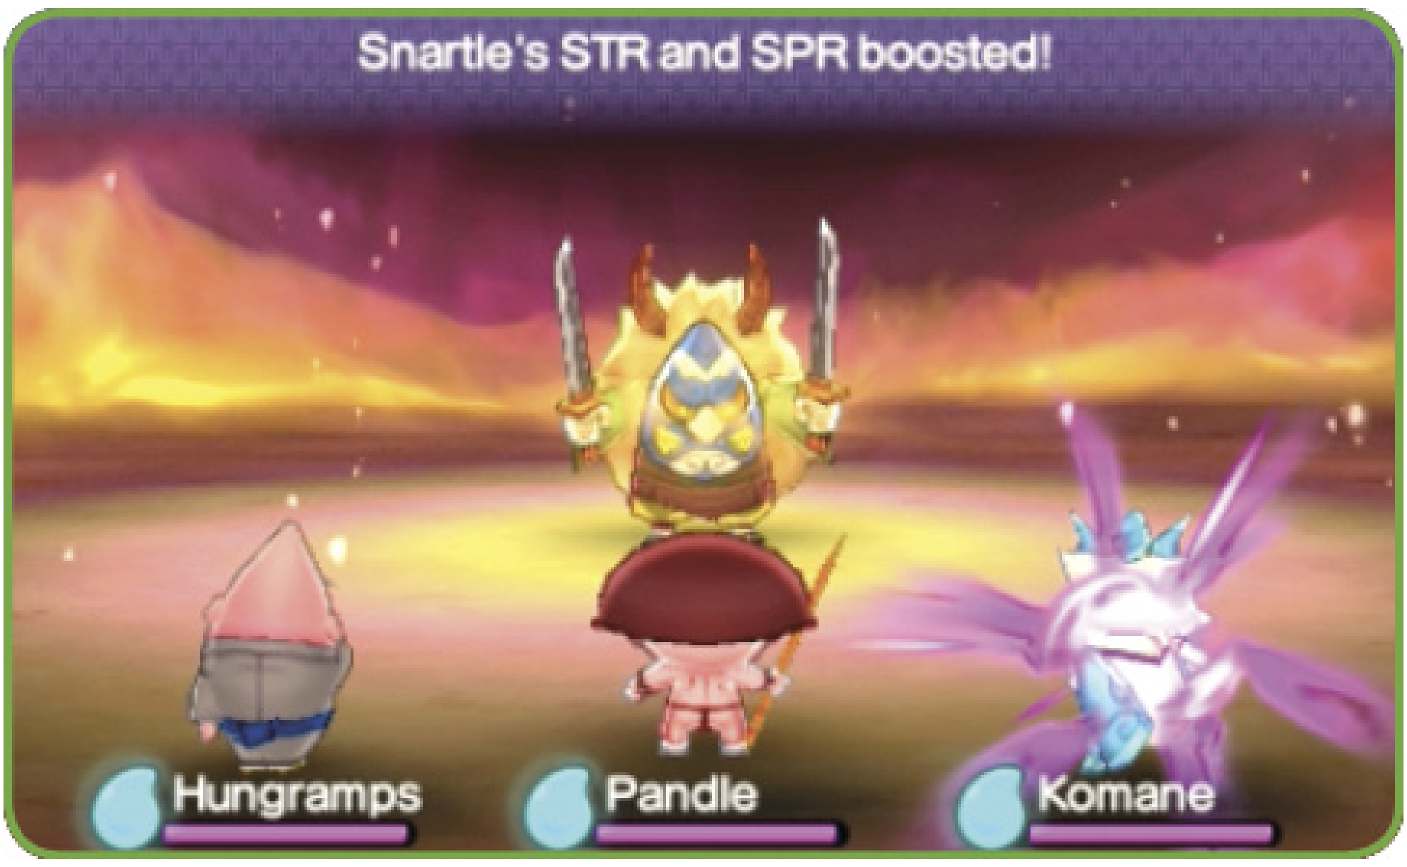
When you cross correctly, a bell sounds and a musical note appears overhead. Again, this increases your count by one. When the good kid counter hits five, a sparkle appears at your feet. Pick it up to get a random item reward.



A musical note appears overhead and you hear a "ding" when you use the crosswalk correctly.

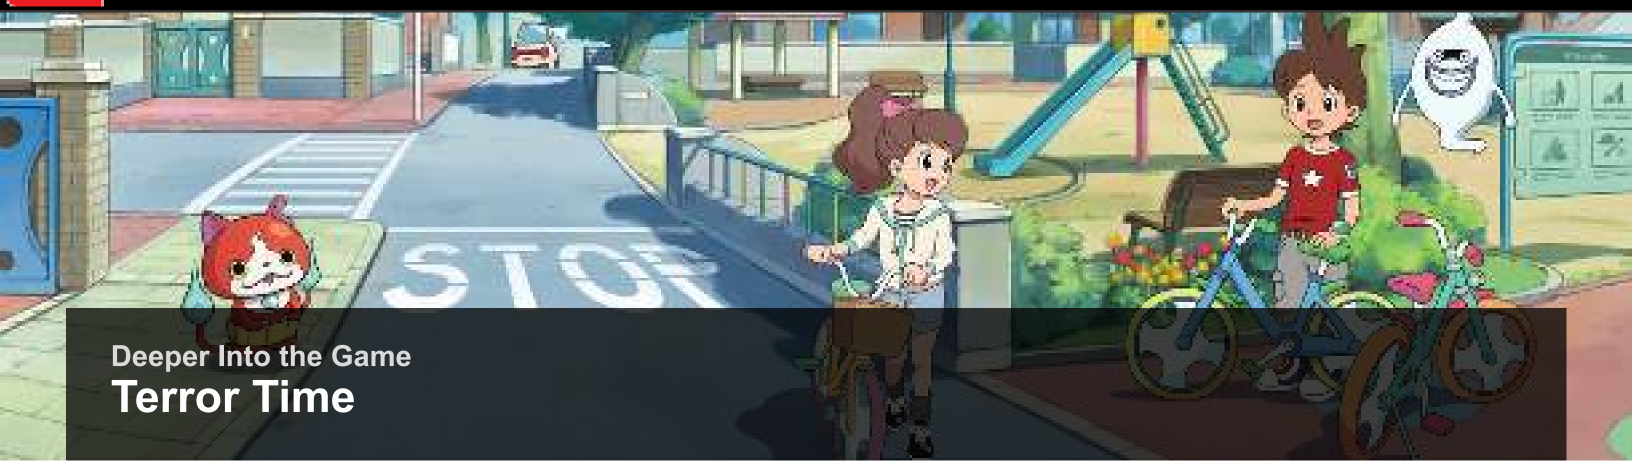
Count Reaches Minus Five

When you cross incorrectly, you hear a "buzz." This decreases your count by one. When the good kid counter reaches minus five, Snartle appears, ready to punish the little brat who refuses to follow the rules. Snartle has an A-level Strength rating and overwhelmingly high attack power, so early on you stand a small chance to win…and he gains strength as the story progresses! If you do manage to beat him, there's a chance that he'll join you.



Snartle's STR and SPR boosted!

Snartle strikes with a 3-hit normal attack called Lightning Slash. He also has a nasty 10-hit Soultimate Move called For Naughty Brats. Snartle's skill drastically raises his STR when he downs a Yo-kai.



Deeper Into the Game

Terror Time

At some point, you inevitably trigger a bout of Terror Time. This scary interlude lingers until you find your way to the exit door marked on your map. One upside of Terror Time is that you can pick up valuable items from chests as you evade the wrath of the Oni during your escape. But there's another: if you can manage to defeat an Oni, the rewards are significant.

Yes, the Oni are powerful, frightening creatures. But if you've trained a strong corps of Yo-kai allies and you're confident in your abilities, you might just have a chance.

How Strong Are the Oni?

The Oni come in three levels. Defeat a regular Gargaros, and you'll be faced with a beefed up Ogralus during the next Terror Time. Manage to beat that Ogralus, you'll face an Orcanos the time after that. The strength of the powerful Orcanos looks off the charts! And yet, it can be beaten. Doing so may yield ultra-luxurious rewards.

Oni	HP	EXP	Money	Item
Gargaros	6000	6700	30000	Hidden Hits, Fiend Badge
Ogralus	8000	10000	40000	Top Techniques, Fiend Ring
Orcanos	9900	15000	50000	Soul Secrets, Holy Blade

Chest Placement

The chest distribution during Terror Time is random, but the number of chests that appears is fixed per area. If you're not interested in getting each and every chest, you might find that you have an easier time in areas with a lot of them.

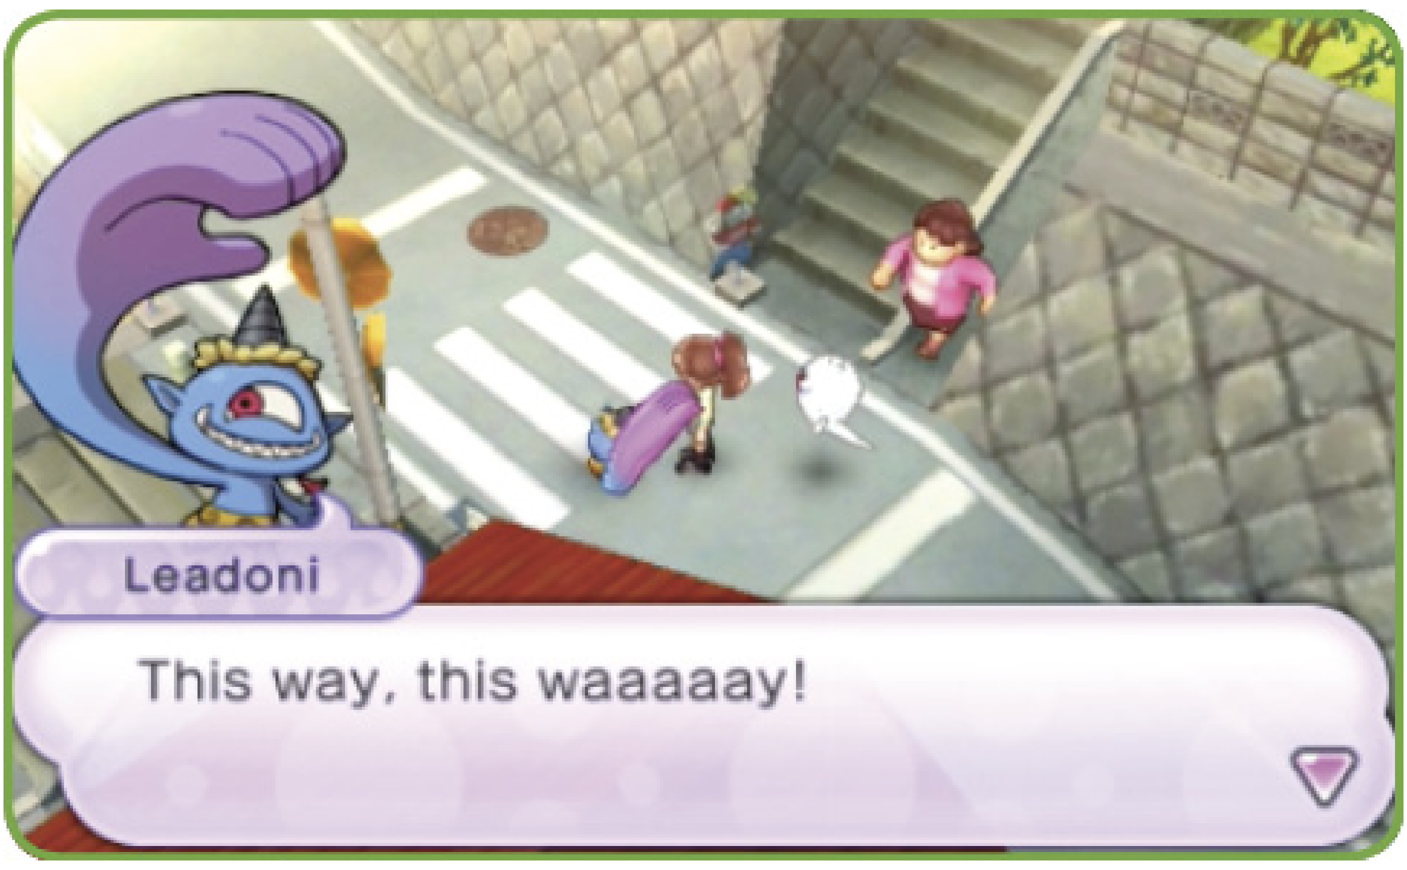
Follow Leadoni!

Occasionally, Leadoni pops up in town. Strike up a conversation with him and he leads you on a wild chase. If you can keep up, you'll discover a chest at the end of the romp. This event can be repeated any number of times, so there's no pressure to chase Leadoni if you're busy with other events. Give it a shot when you've got free time on your hands.

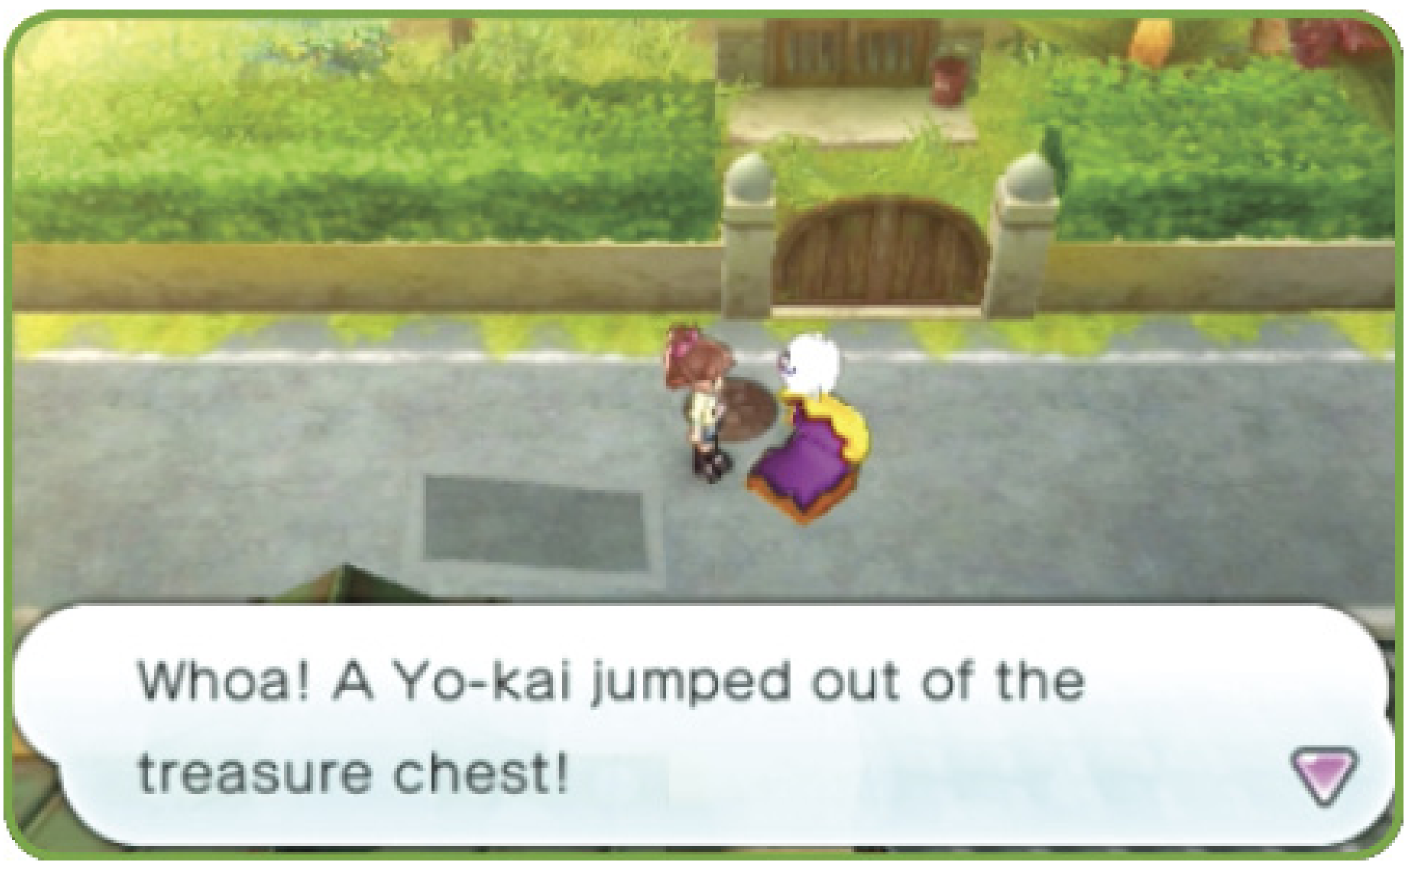


Leadoni

This way, this waaaaay!

Leadoni may be fast, but you shouldn't have too much trouble keeping up if you use a bicycle or dash as often as you can. But Leadoni appears in each area only once per game day.

Leadoni Chest Contents: Items or Yo-kai?



Whoa! A Yo-kai jumped out of the treasure chest!

Leadoni's chests can contain good stuff. For example: Strong Rank-B Yo-kai may appear in Breezy Hills and Shopper's Row!

Leadoni's chests can contain items or Yo-kai. The Yo-kai that emerge differ depending on the area. The further into the story an area first appears, the more likely Leadoni's chests offer better contents like Exporbs or higher-level Yo-kai! The Yo-kai want a battle, but you have a chance to befriend them after the fight.

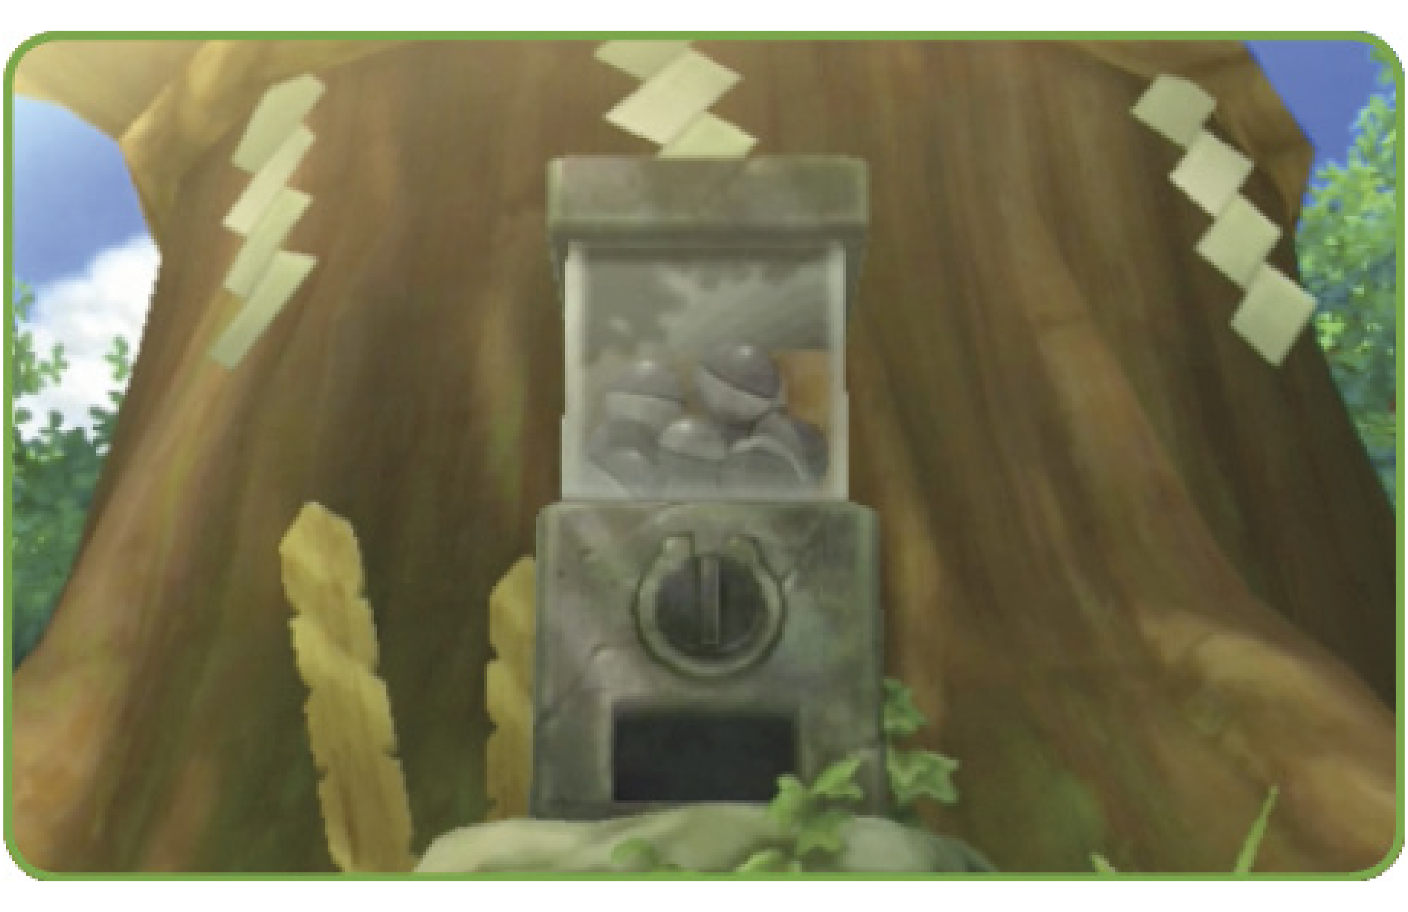
Crank-a-kai

The Crank-a-kai device can be found in front of the Mt. Wildwood Sacred Tree Path. We'll show you every single Yo-kai that you can possibly get here! The Yo-kai available differ greatly depending on the coin used. The eight colors of coin that can be found throughout the game each represent a different Tribe, so you'll want to prioritize use of the coins of the particular Tribe you desire most.



In addition to Yo-kai, rare items like Holy Exporbs, all types of XP orbs, books and dolls, and coin-specific food will also appear.

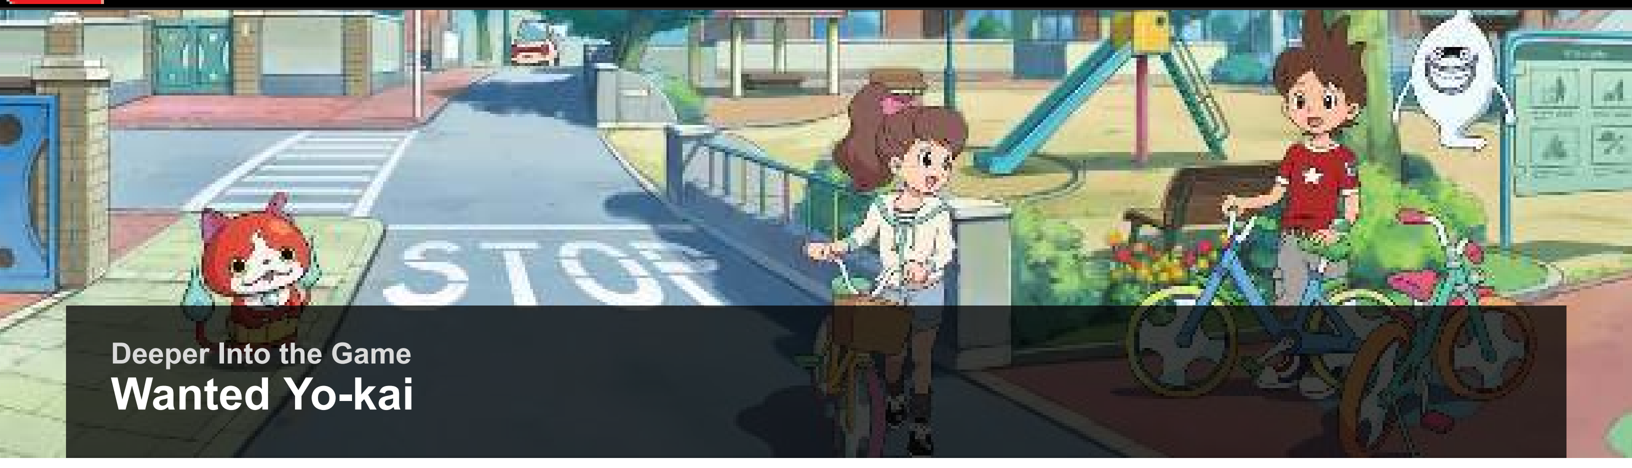
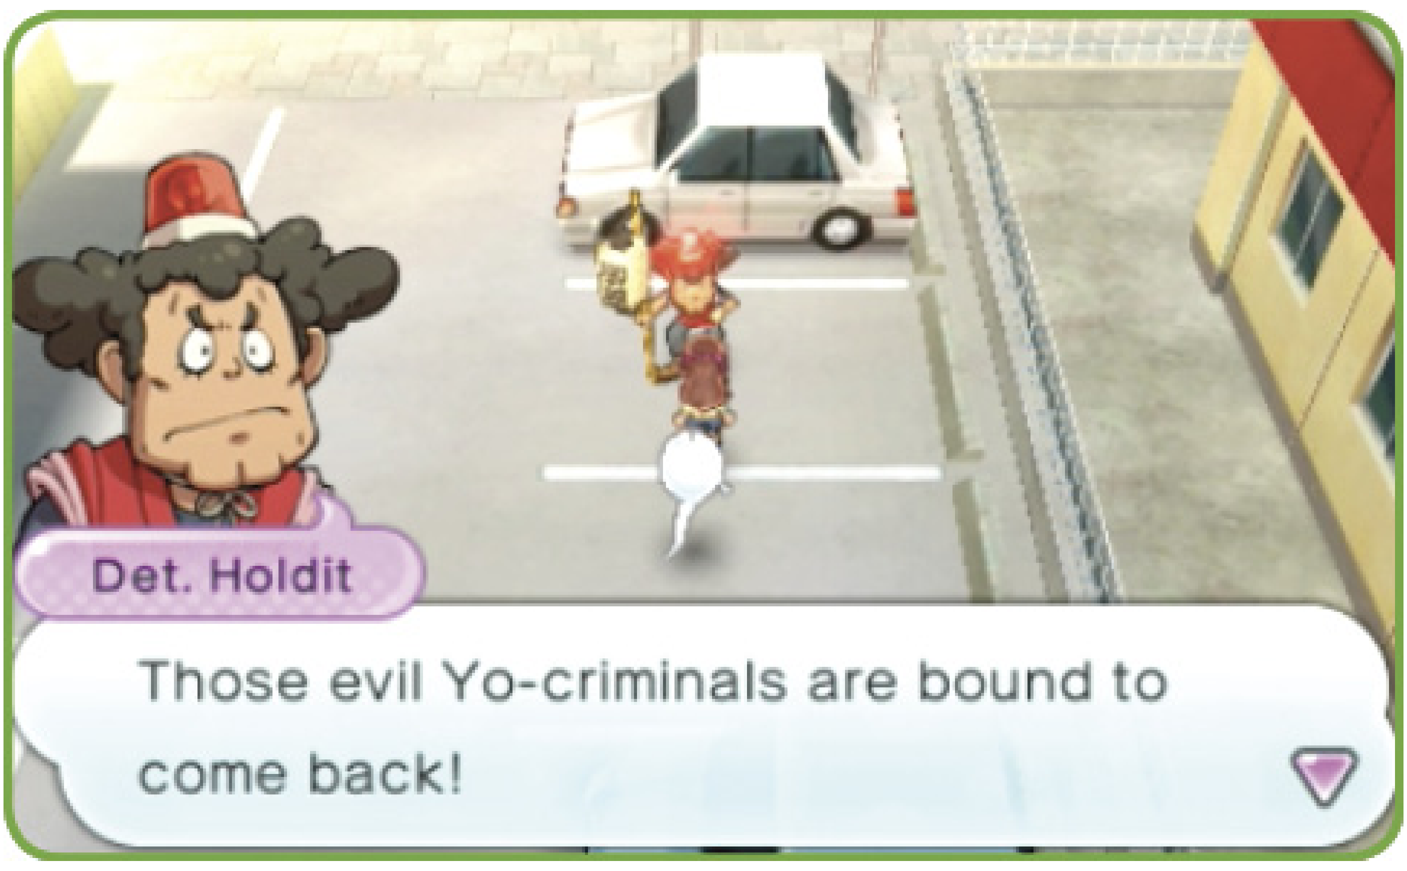
Naturally, their abilities are second to none. What else would you expect from Rank S?



Wanted Yo-kai

Find Yo-kai Detective Holdit in the parking lot next to Lambert Post Office. He tells you about a criminal Yo-kai and asks you to catch him. The culprit can be found somewhere in town, and appears once a day. (The day changes at 6:00 AM, real time.) These creatures are fast, however, and evade you if chased normally. You'll have to sneak up to catch them.



Det. Holdit

Those evil Yo-criminals are bound to come back!

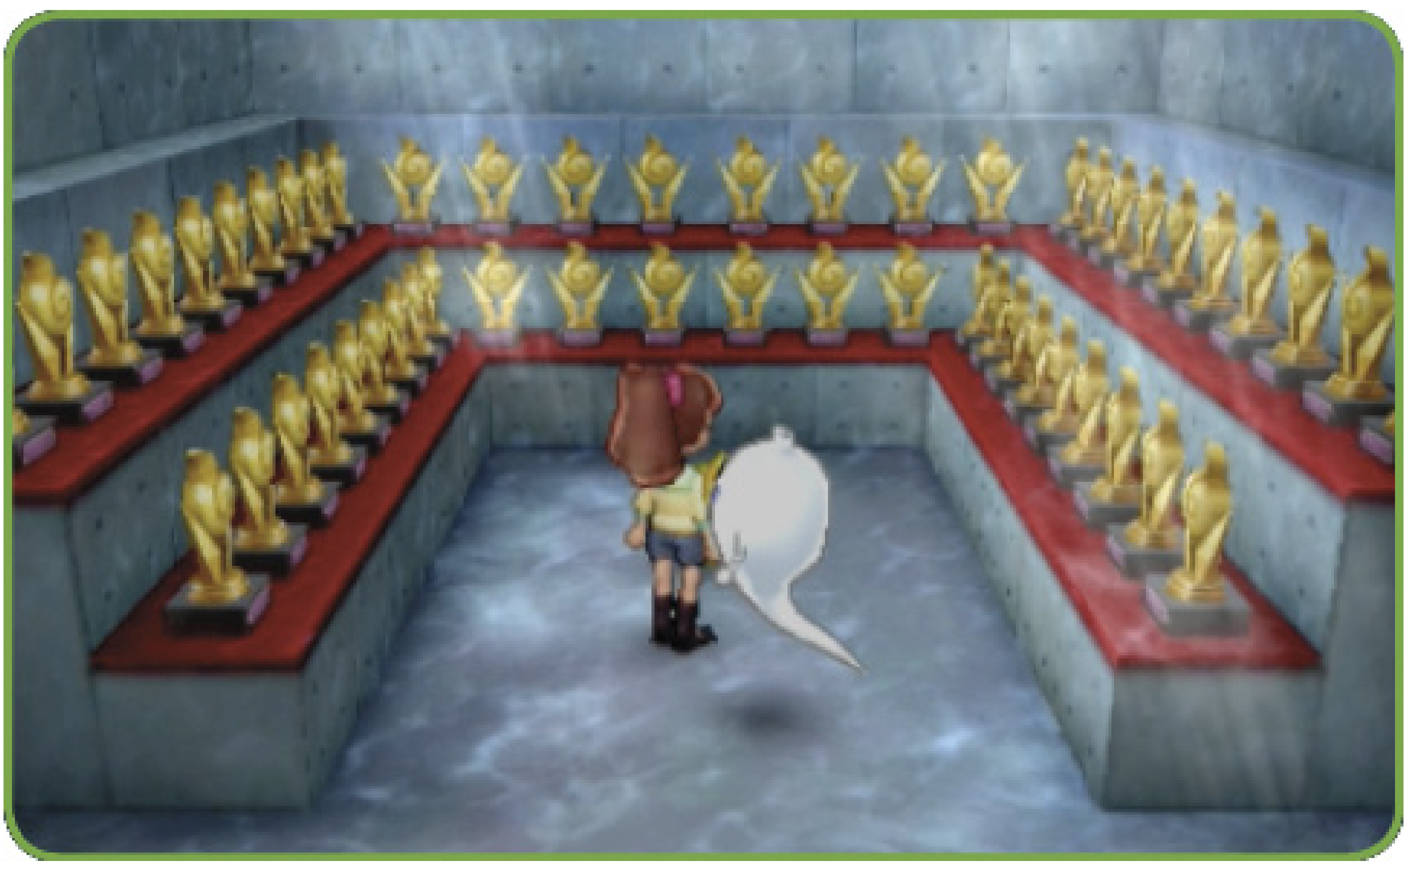
Catching a Wanted Yo-kai won't result in a battle. Nor can you befriend them, so they can't end up in your Medallium.

Get a Wanted Yo-Kai Password!

Wanted Yo-kai remain at large for one week of real time. If you manage to catch the target three times during this period, you're rewarded with one character of a longer password. If you don't, they get away and Detective Holdit issues a warrant for a new Yo-kai criminal. The single character the Yo-criminal provides varies game to game, and there's 3 to 8 characters in every password, so you'll need to work with other players to complete each one.

Earning a Trophy

Once you assemble a complete password, enter it at Window No. 2 of Lambert Post Office. You'll receive a reward item and a trophy. Be sure to input the password as soon as you receive it! The password is no longer valid the moment the new Wanted Yo-kai appears.



Here's how you want your Trophy Room to look eventually…

Once you own a trophy, you'll be allowed entry into the Trophy Room in the middle of Gourd Pond Park in Breezy Hills. The trophies you've received will be displayed here. Be sure to chat with Goldenyan while you're there! He just might have a surprise for you.

Obtained Green Coin: 10!

Goldenyan may give you some coins if you talk to him after earning a trophy.

Yo-kai Cam

If you select "Yo-kai Cam" from the Title screen and use the 3DS camera to take a photo of someone, you learn that a Yo-kai has Inspirited your subject! You can earn a number of different rewards based on the number of photos you've taken and Yo-kai uncovered. Here, we'll tell you more about what's available. Taking photos of everyone around you can earn you many of the items mentioned here.

You can pick up rewards at Lambert Post Office for taking certain numbers of Yo-kai Cam photos. However, a photo doesn't count if it results in a previously generated Yo-kai.

PvP Play

PvP (player versus player) play lets you to pit a team of six of your Yo-kai allies against another player's Yo-kai squad. These encounters are basically the same as ordinary Yo-kai combat but with a few exceptions. Commit these to memory to avoid getting confused in the heat of battle!

Differences from Normal Play

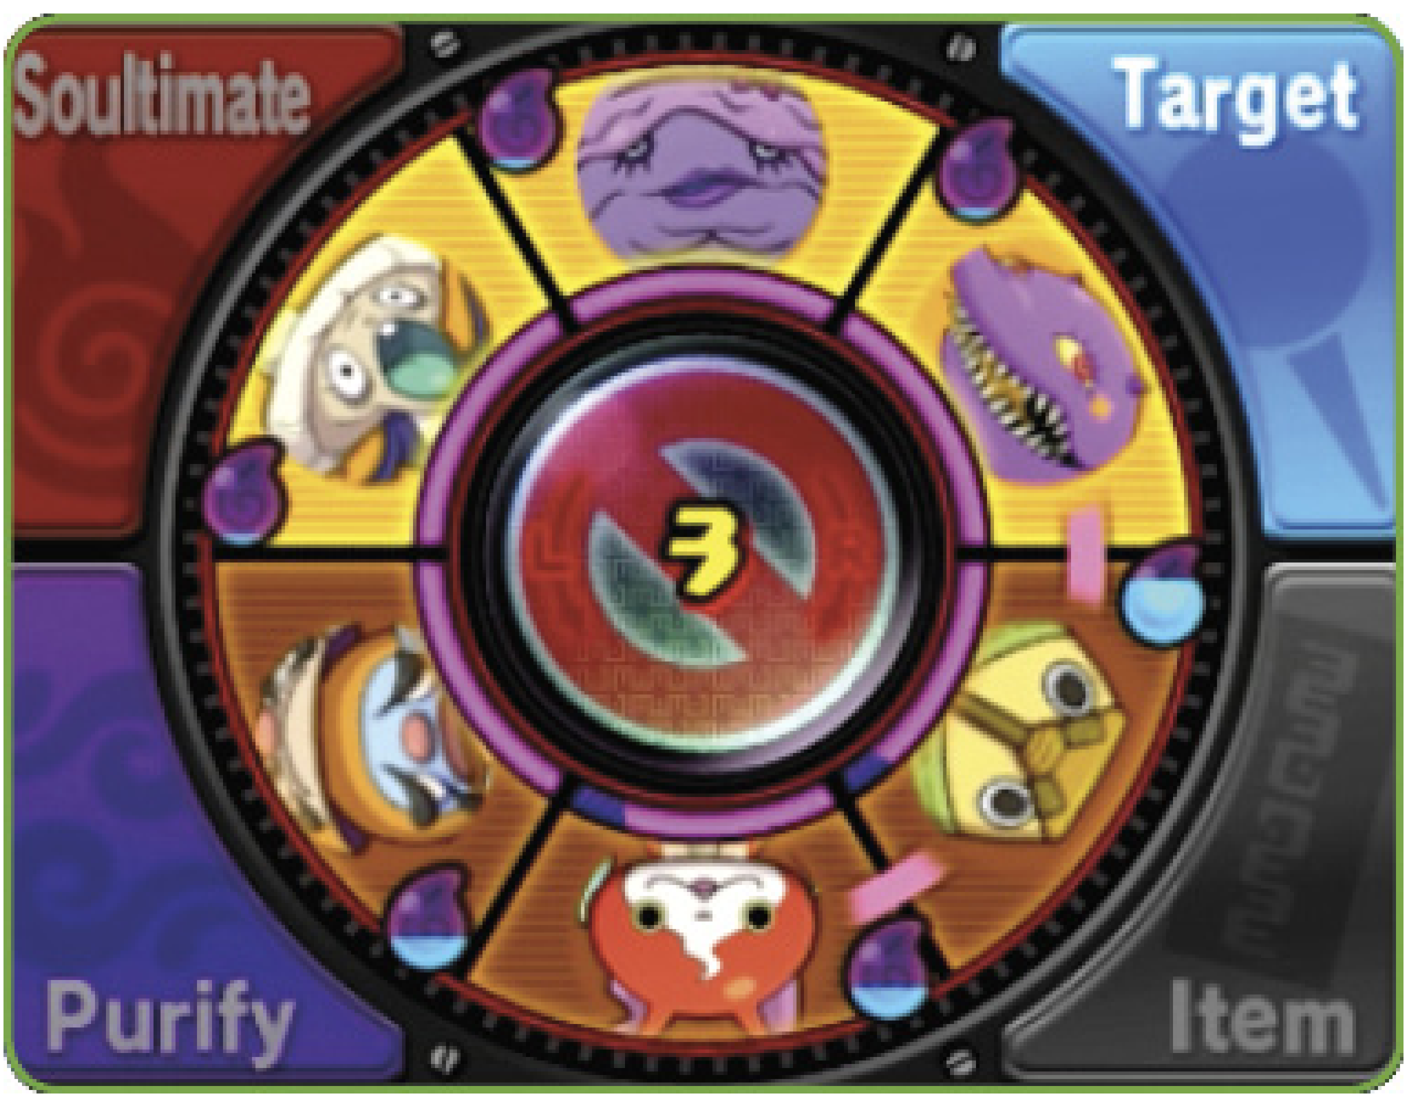
No Items! Zero Soul! Full HP!

The biggest change from a normal match is that PvP players cannot use food and talisman to buff up or restore their Yo-kai allies. Also, no matter the condition of your Yo-kai prior to battle, they always start a PvP match with full HP and their Soul Meter at zero. These restrictions affect your choice of Yo-kai for a PvP fighting team.

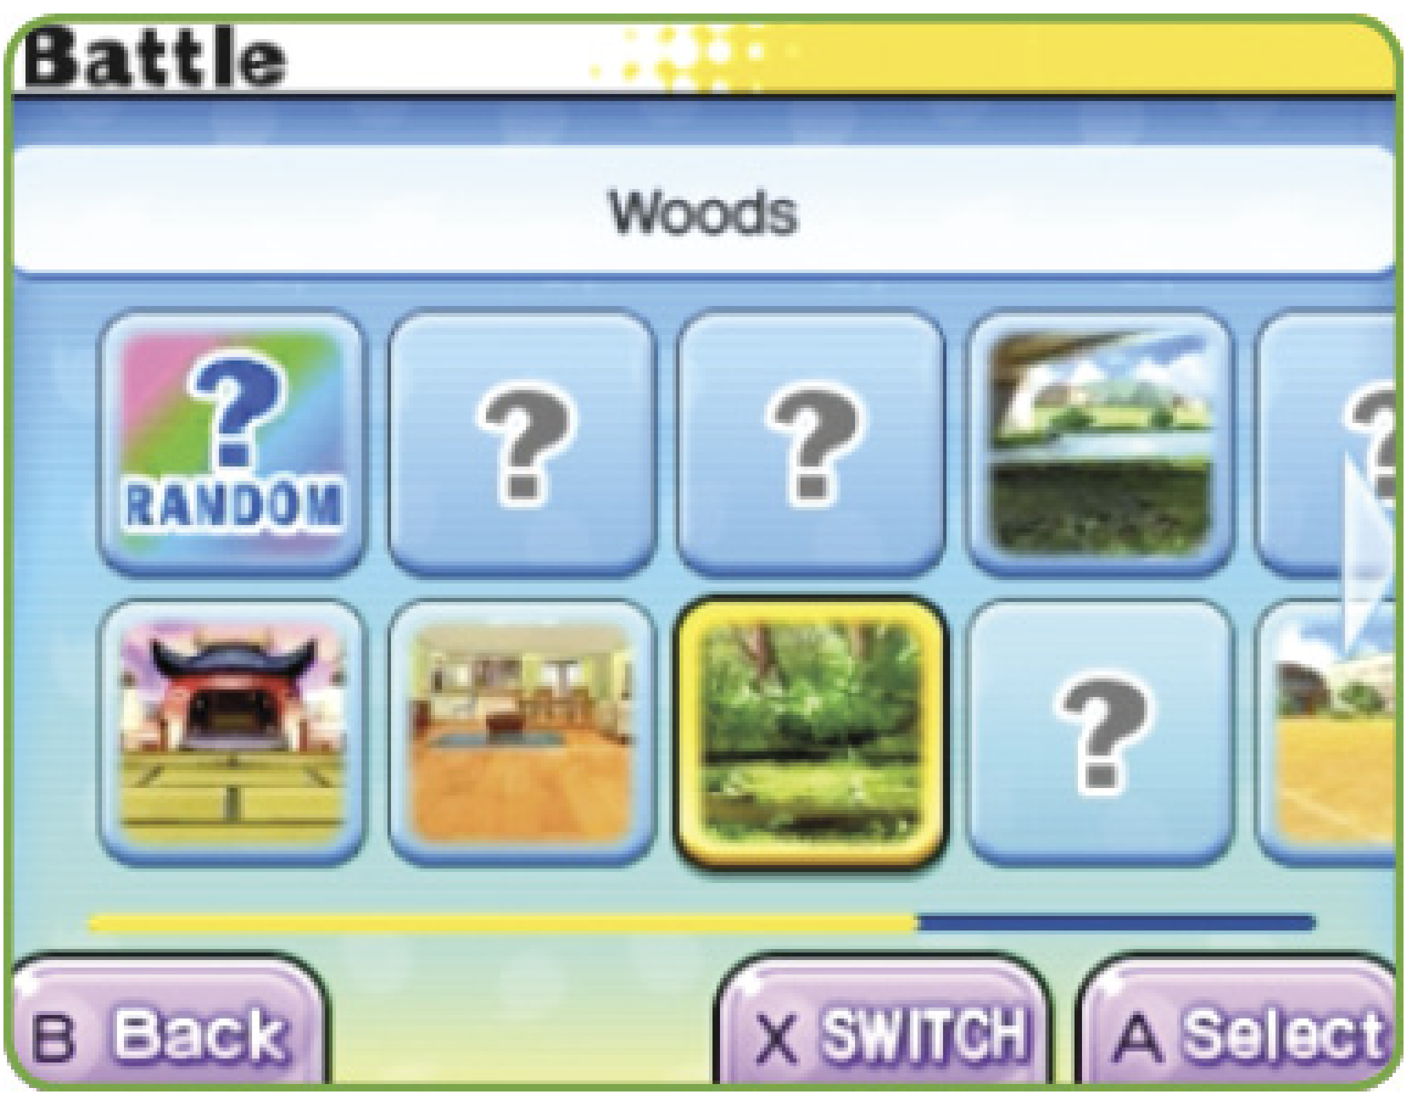
Since you can't use food to replenish HP, you want to include at least one Yo-kai with healing abilities in your team. And because you can't use items to restore soul power, Soultimate Moves aren't available until the battle has progressed a bit. This makes a character like Venoct very valuable—his Venocharge skill charges his Soul Meter faster! The first player with enough soul for Soultimate Moves can gain a distinct advantage.

No Wheel Spin for Three Seconds!

Once you spin the Yo-kai Wheel to change your front line during PvP combat, the wheel cannot be moved again for at least three seconds after it stops. (You see a three-second timer counting down in the middle of the wheel.) This makes the arrangement of your team more important. Avoid getting stuck with a front line with low HP and no healer!



The three-second countdown appears in the middle of your Yo-kai Wheel. You can't spin again until it hits zero.



Choose from up to 29 battle maps. The number of maps available increases as you make your way through the game.

PvP Rank Titles

You can increase your rank more rapidly if you beat opponents ranked higher than you.

How to Make Yo-kai More Powerful

Leveling up isn't the only way to improve your Yo-kai. Special items can enhance Yo-kai abilities, sometimes significantly.

Use Books to Match Abilities and Attitude

No matter how many amazing abilities your Yo-kai possesses, it will never reach its true potential until those abilities and its personality (shown in its stats display as ATTD, or Attitude) are in line with one another. Each Yo-kai type and its recommended personality are shown in the table on the right. Use books to change the attitude readout of your Yo-kai as soon as you can.

Forming Yo-kai Teams

No matter the kind of team you decide to make, pay close attention to how effectively it is able to progress through the increasingly difficult challenges. Choose Yo-kai that fit into the team type.

To create an effective team, you must first figure out how they fight together and their tactics. Once you have this tactical make-up, select the six Yo-kai that fit this scheme. If you simply choose the six strongest Yo-kai, you'll often find that they don't fight well together. One trick to make this process easier is to imagine making two teams of three.

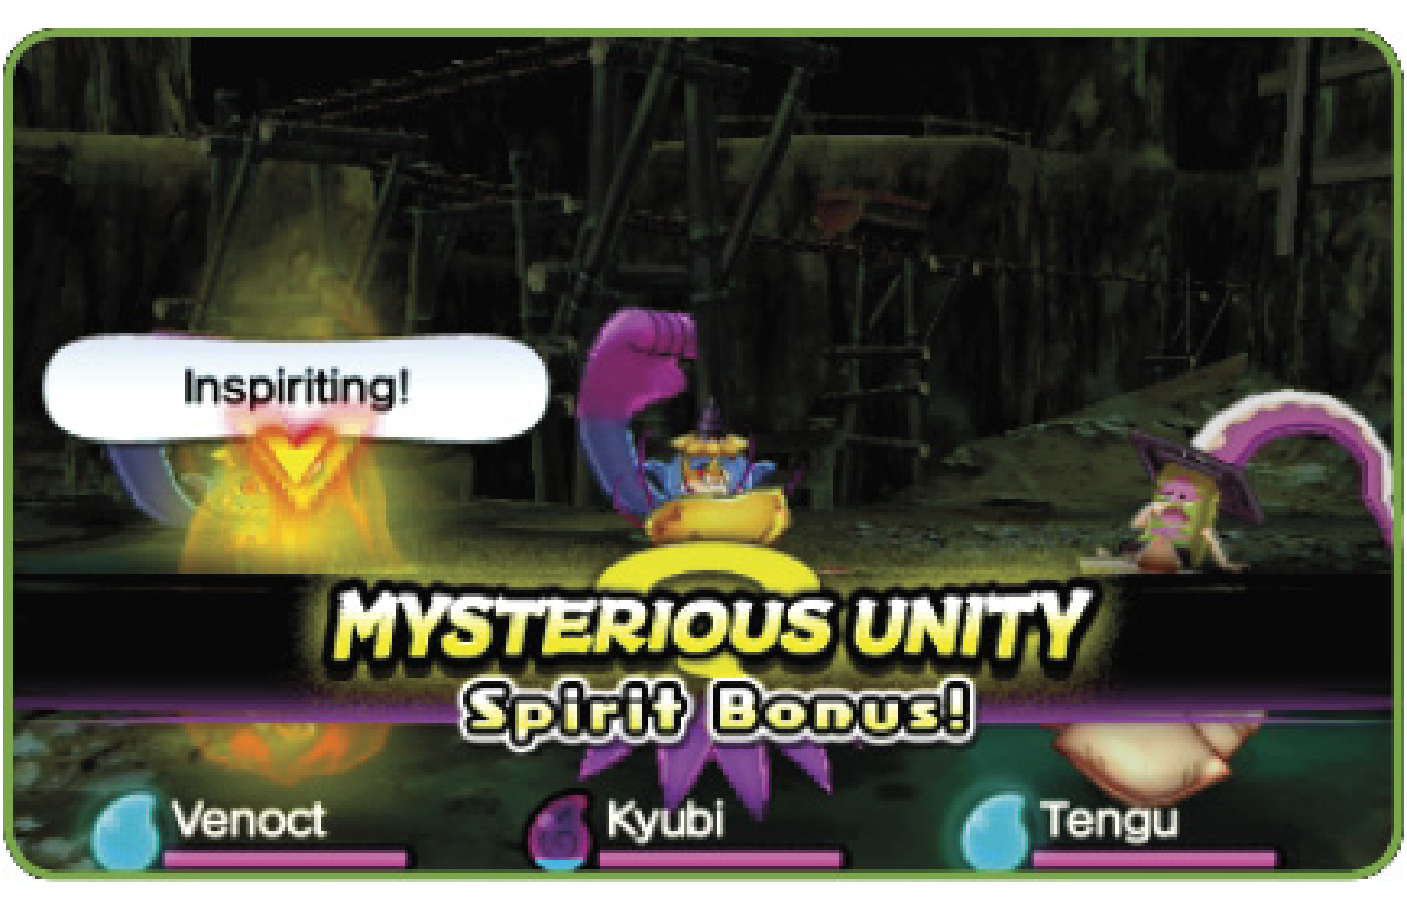
Use formations to boost your team's power

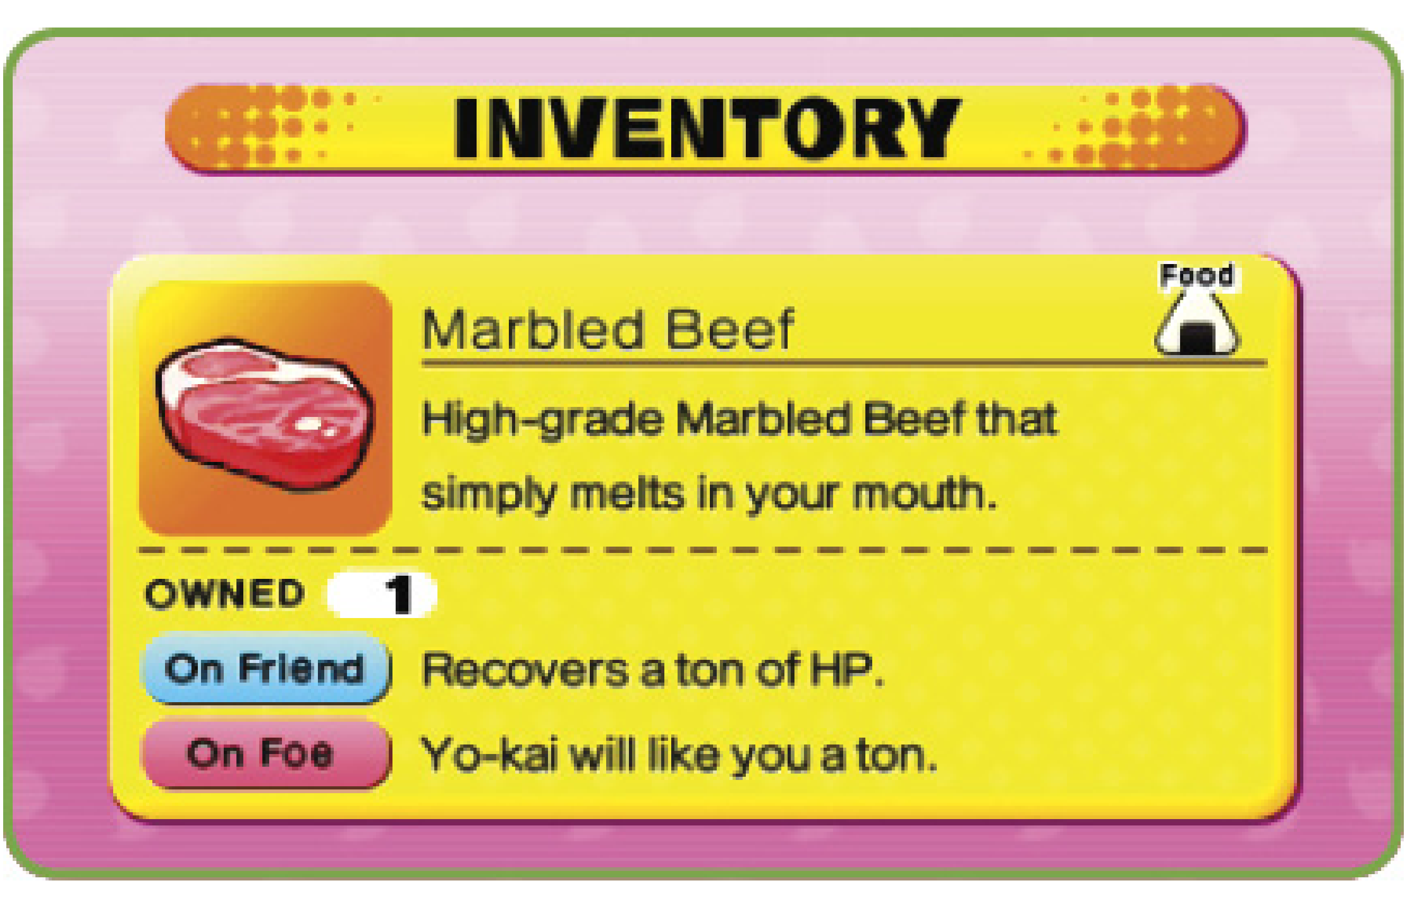
Placing Yo-kai of the same Tribe next to each other boosts the abilities of the Yo-kai. Attempt to utilize this game element when building a formidable team. For example, use Brave Yo-kai for an attack-oriented team, or Tough Yo-kai for defense.



Formations with lines of three are more effective than those with lines of two. Try to get three Yo-kai on the same line.

Restoring HP is very important

It is also important to figure out a way to recover from the damage your enemies inflict on you. Always try to include a restorative Yo-kai. In times like these, you'll want to have a generous supply of expensive food for your restorative needs.



INVENTORY

Food

Marbled Beef

High-grade Marbled Beef that simply melts in your mouth.

OWNED 1

On Foe Yo-kai will like you a ton.

If you have a lot of Marbled Beef or high quality Tuna, you'll have little problem restoring HP.

Use your skills effectively

Skills are paramount to the creation of a strong team. A lot of skills boost only the user's stats, but there are also skills that boost those of the entire team. Just having one Yo-kai capable of such skills is enough to push your team's strength to never before seen heights! Master them, and you'll be happy you did!

Here are the skills we recommend for team enhancement!

These three skills can be used effectively even if the Yo-kai using them is on the rear line. It definitely doesn't hurt to include them!

Skill	Effect	Yo-kai with Skill
Starver	Doubles restorative effects of items	Hungramps, Hungorge

You'll be happy you had this skill at your disposable when you find yourself without a restorative Yo-kai Technique.

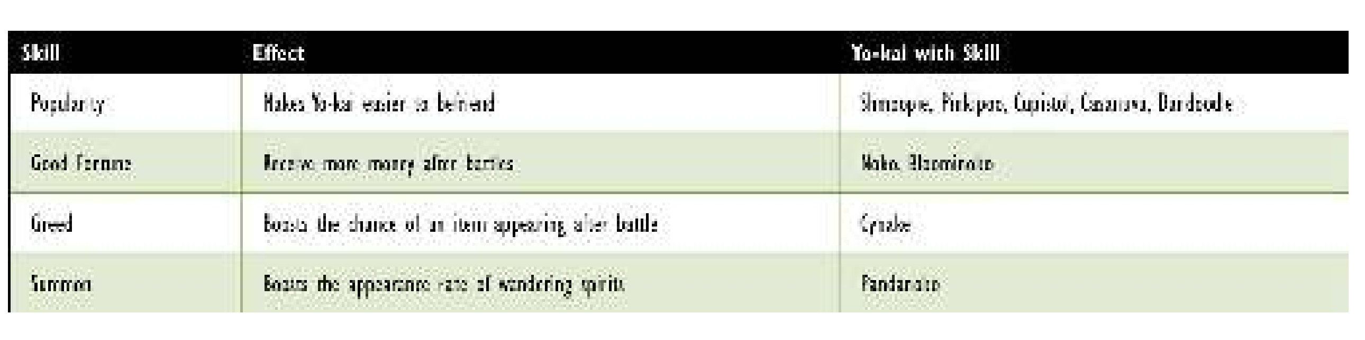
Eliminates waste in battle, while only effecting allies.

Skill	Effect	Yo-kai with Skill
Gassy Sphere	Makes it harder for enemy attacks to hit	Cheeksqueek

This skill is valuable to pretty much any team but is especially recommended for defense-o riented teams.

Skills that have Nothing to Do with Battle are just as Valuable!

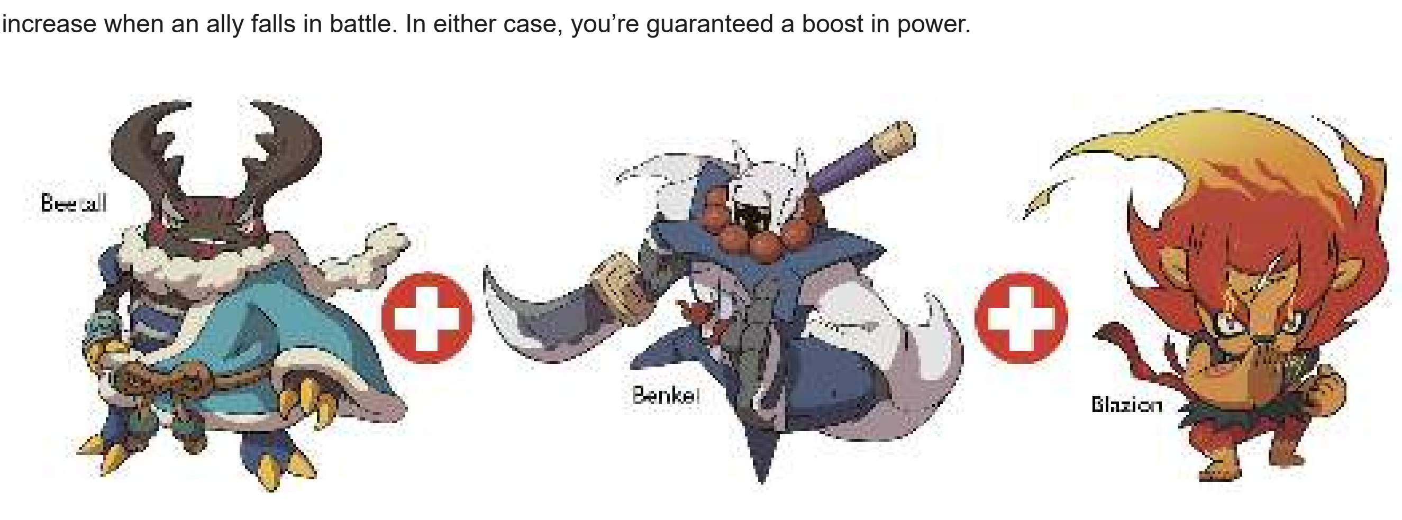
The following skills are extremely valuable when you need a specific item to drop or find a rare Yo-kai.



Skill	Effect	Yo-kai with Skill
Popularity	Makes Yo-kai easier to befriend	Shmoopie, Pinkipoo, Cupistol, Casanuva, Dandoodle
Good Fortune	Receive more money after battles	Noko, Bloominoko
Greed	Boosts the chance of an item appearing after battle	Cynake
Summon	Boosts the appearance rate of wandering spirits	Pandanoko

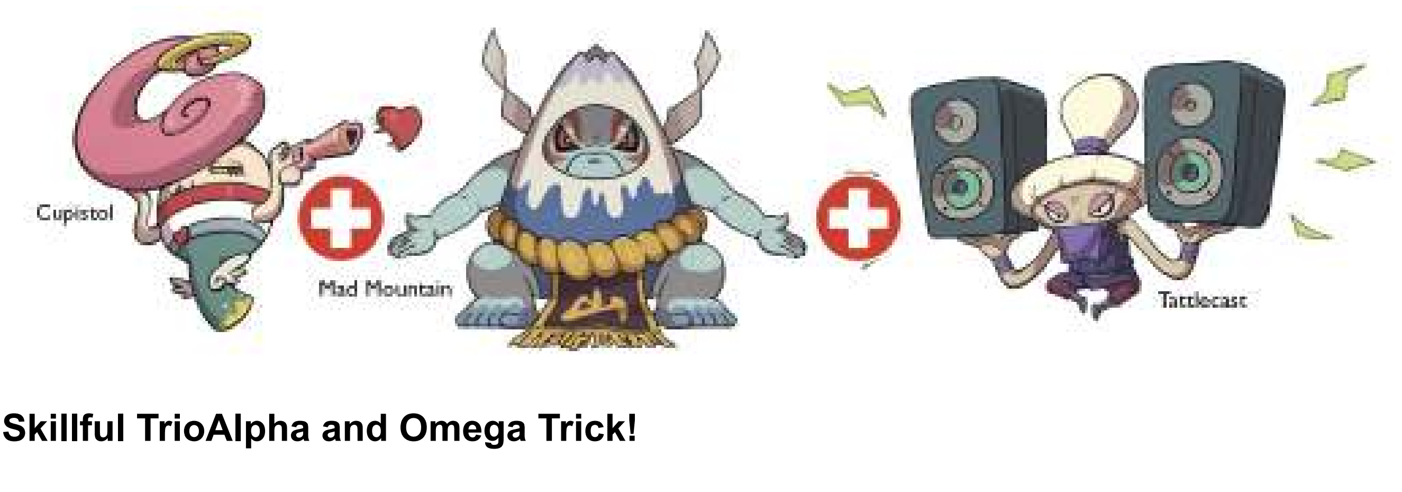
Trio of Attack-Oriented Brave Yo-kaiBoost Your Attack Power!

Brave Yo-kai are typically not slouches when it comes to attacking. First of all, a three Yo-kai formation of Brave Yo-kai will provide boosts to all of their power! Benkei's attack power will increase when it defeats an enemy, while Blazion's will increase when an ally falls in battle. In either case, you're guaranteed a boost in power.



Defense & Inspirit TrioMad Mountain will Protect You!

Use Cupistol's Popularize on a Yo-kai with a lot of defense like Mad Mountain to nullify enemy attacks! Tattlecast and Cupistol can also use restorative Yo-kai Techniques. That means that they can quickly restore any of the HP Mad Mountain loses to enemy attacks! Use the Ultra Sumo Stomp Soultimate move to boost defenses even further.



Skillful TrioAlpha and Omega Trick!

Combining Komasan and its Alpha skill with Komajiro and its Omega skill will greatly boost both of their abilities! On top of that, you can invoke the speed-boosting Charming formation to attack at a furious pace!

Yo-kai Medallium
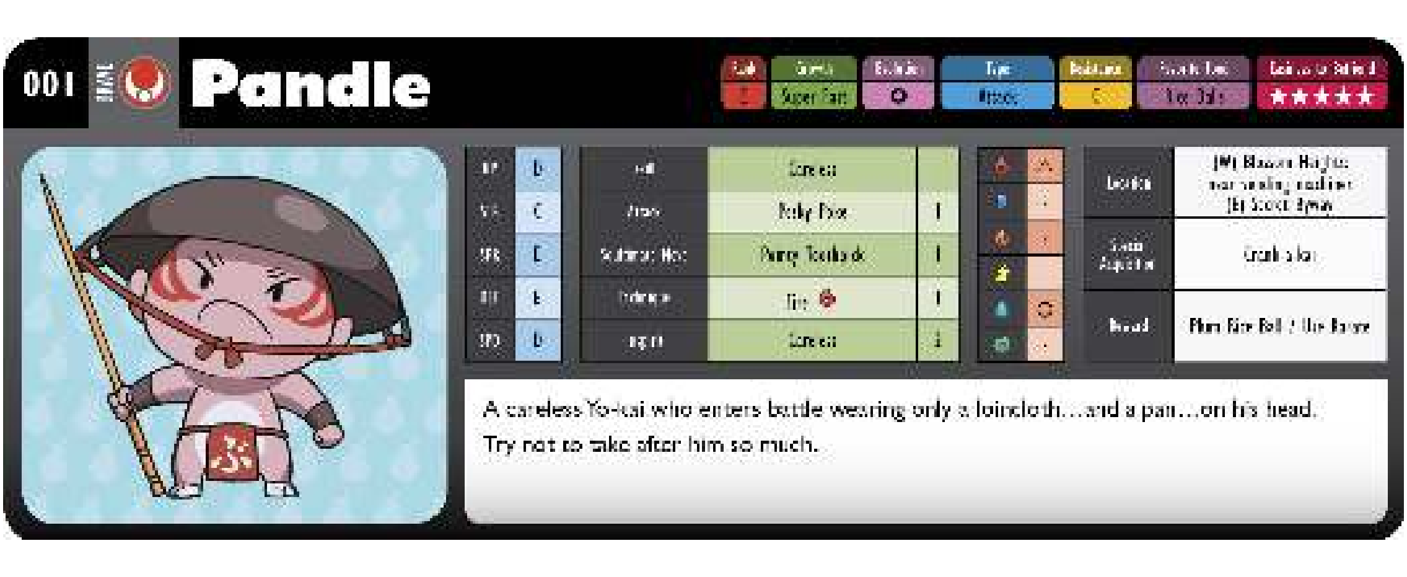
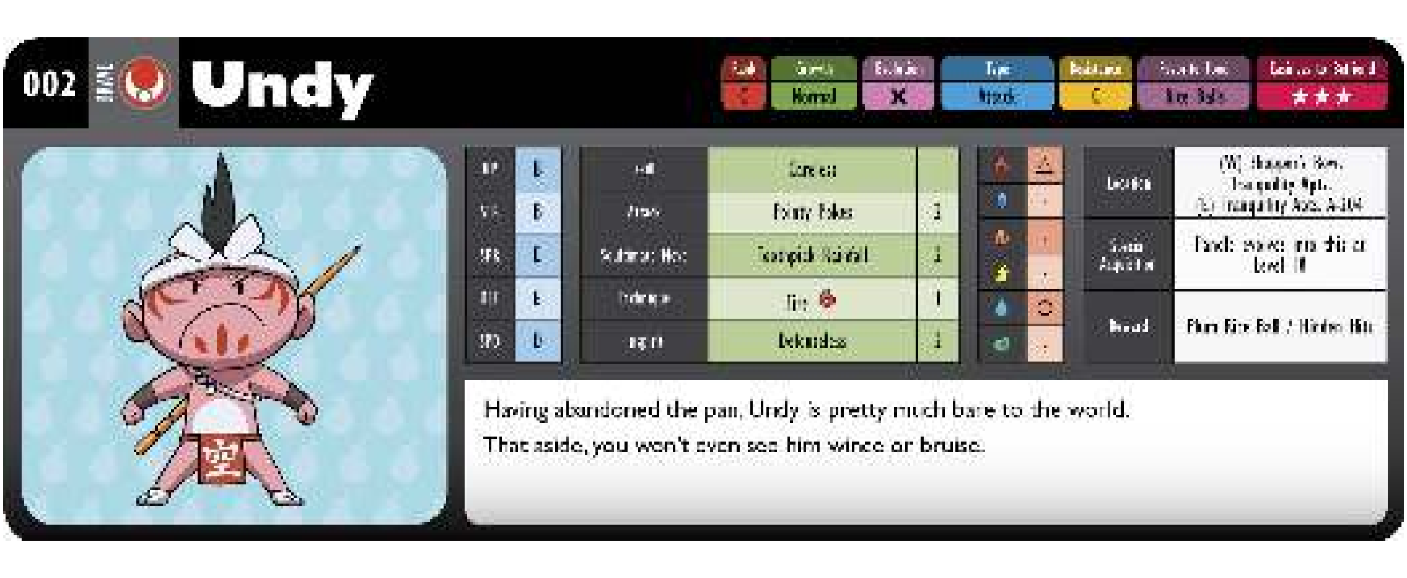
Brave Tribe

001: Pandle



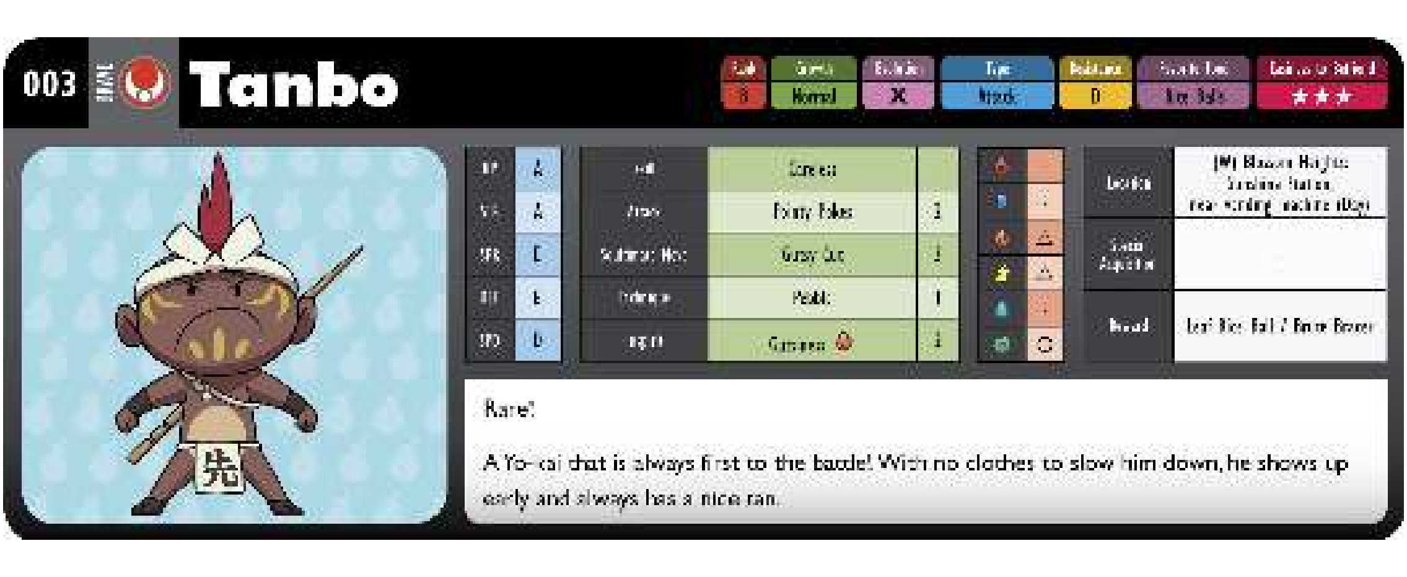
A careless Yo-kai who enters battle wearing only a loincloth…and a pan…on his head. Try not to take after him so much.

002: Undy



Having abandoned the pan, Undy is pretty much bare to the world. That aside, you won't even see him wince or bruise.

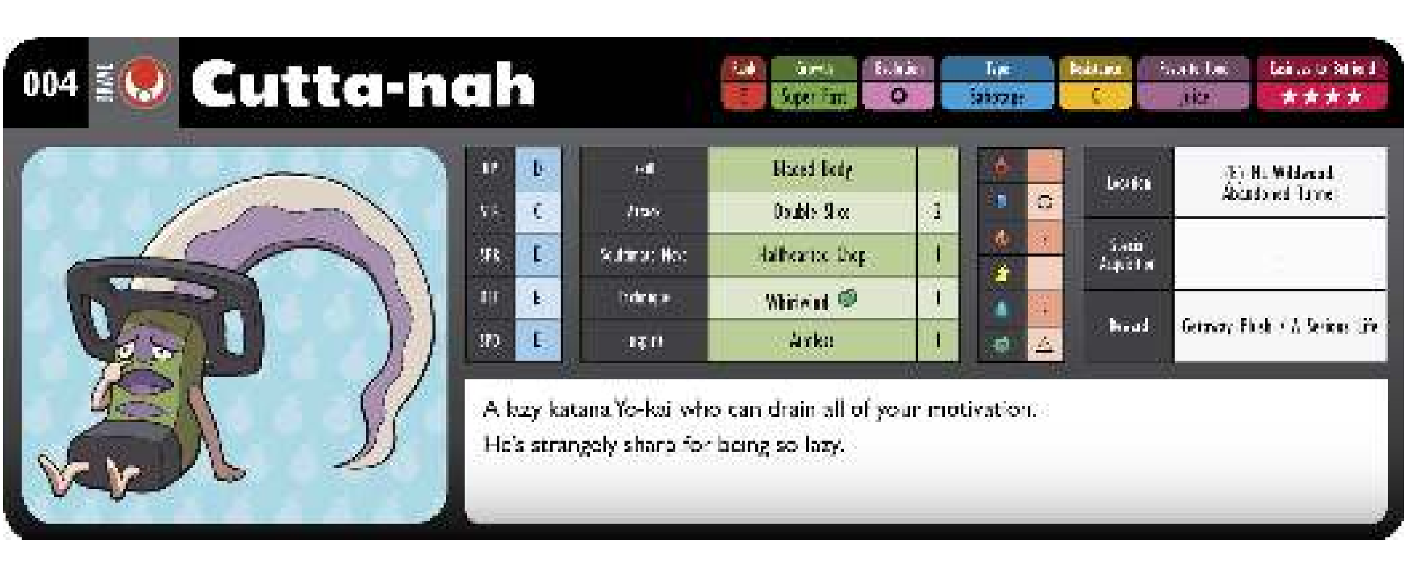
003: Tanbo



Rare!

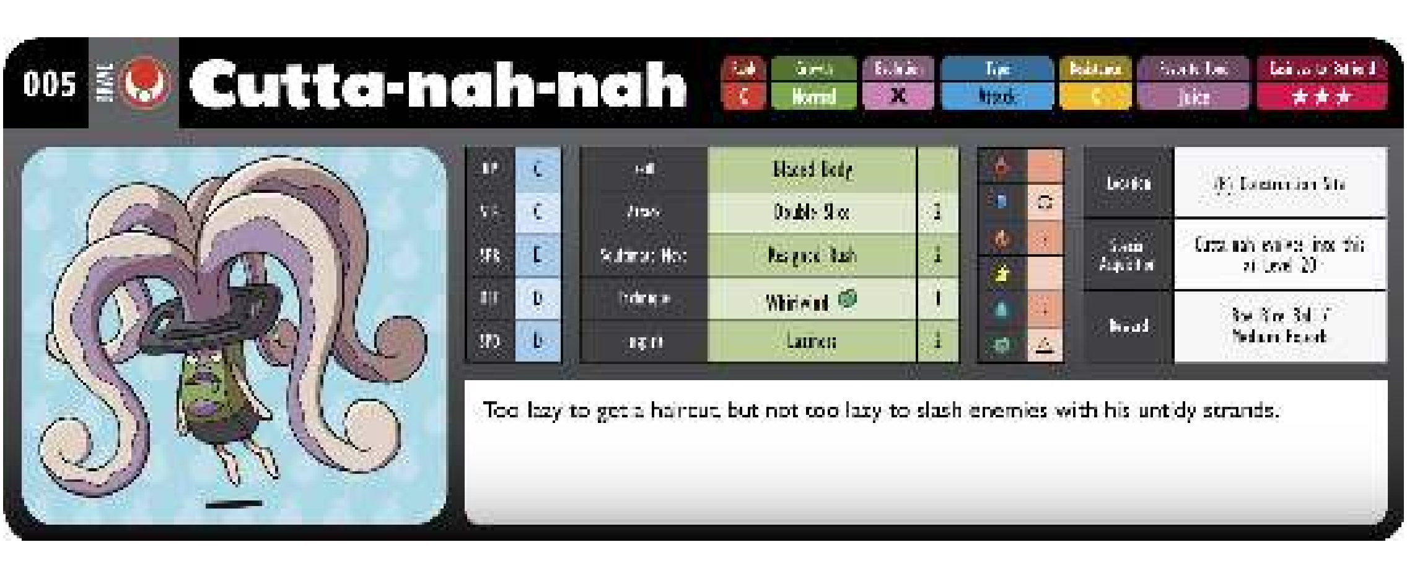
A Yo-kai that is always first to the battle! With no clothes to slow him down, he shows up early and always has a nice tan.

004: Cutta-nah



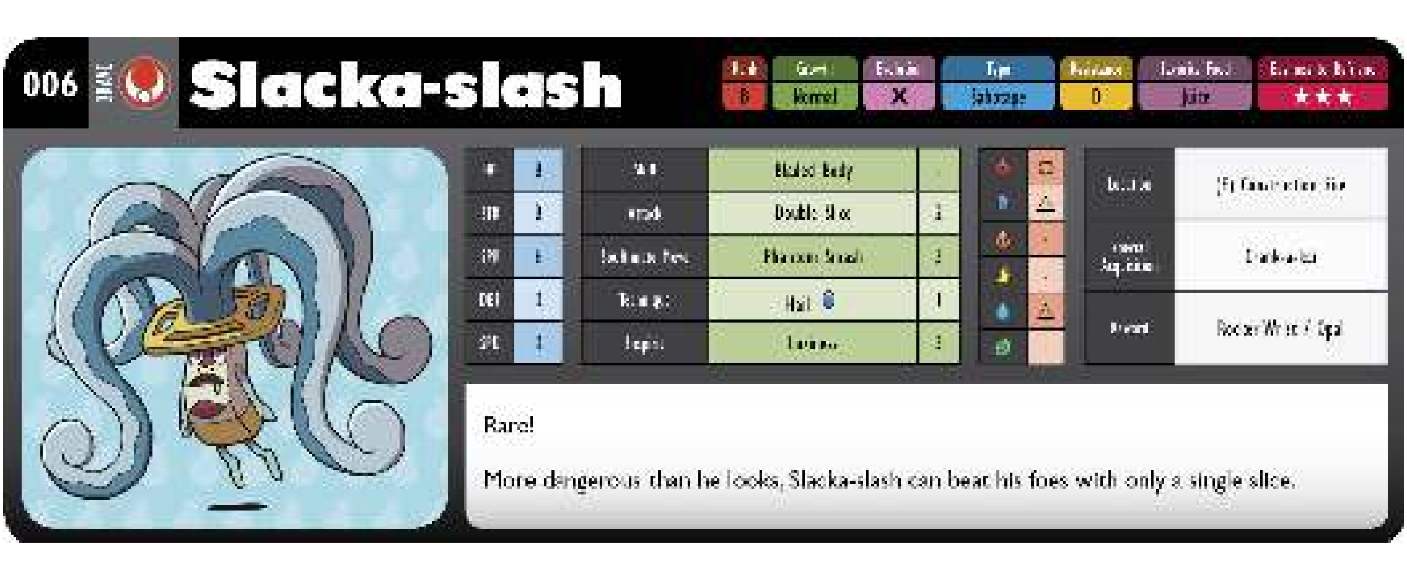
A lazy katana Yo-kai who can drain all of your motivation. He's strangely sharp for being so lazy.

005: Cutta-nah-nah



Too lazy to get a haircut but not too lazy to slash enemies with his untidy strands.

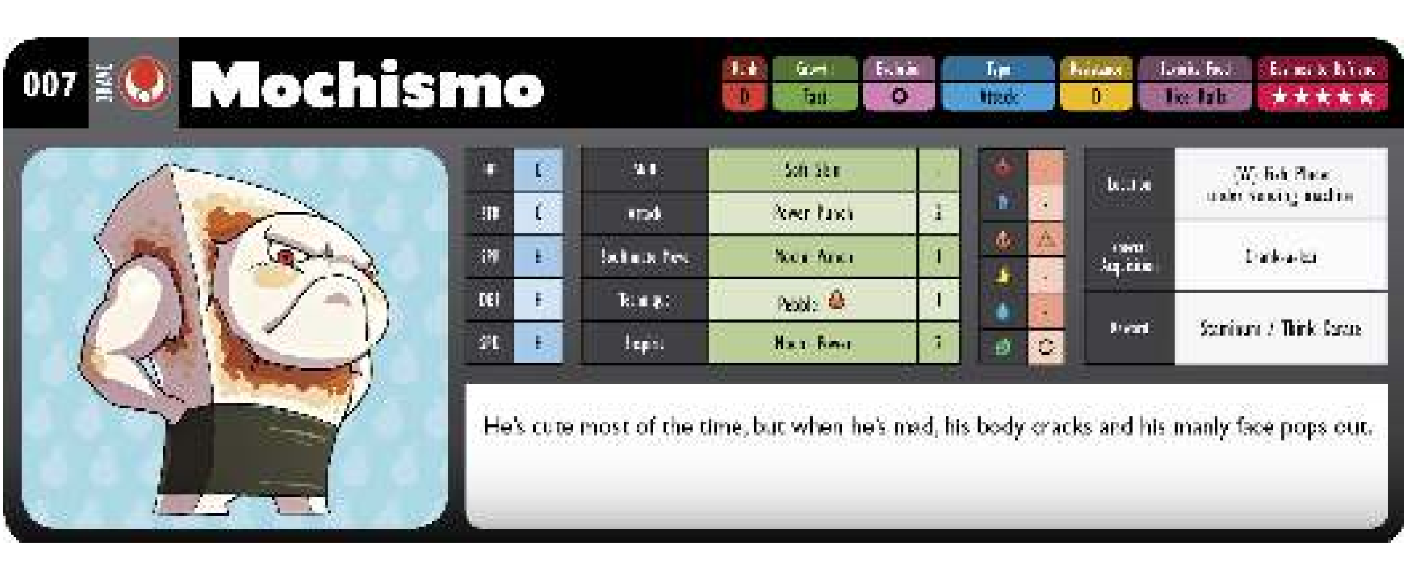
006: Slacka-slash



Rare!

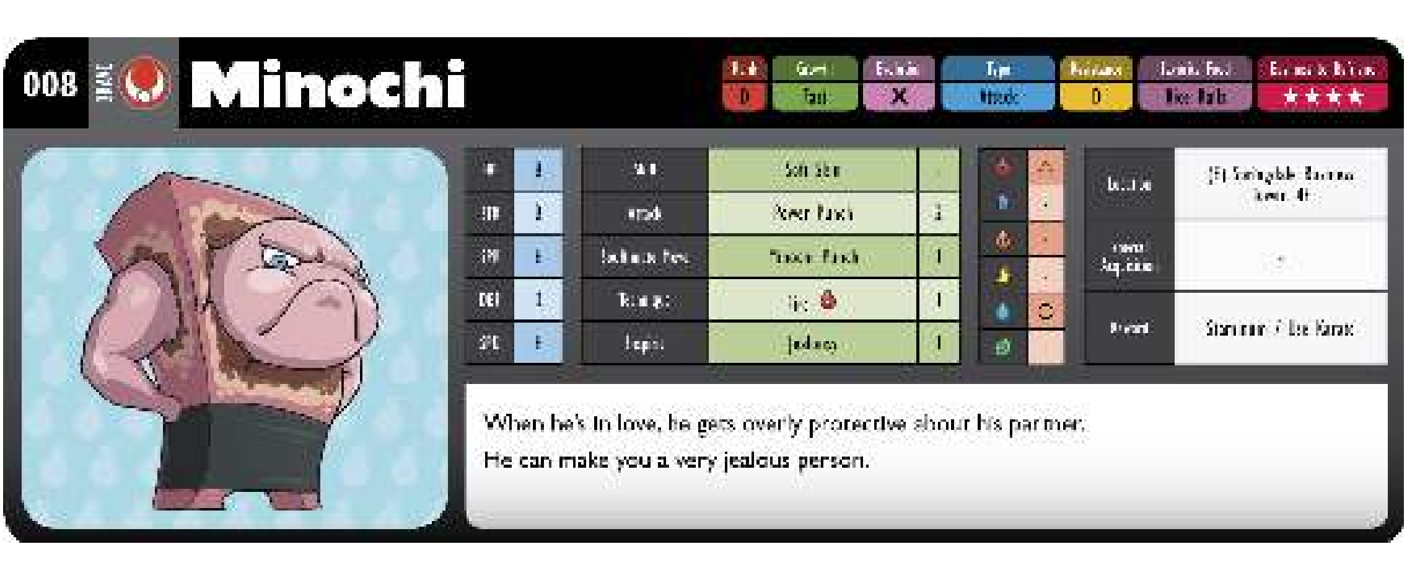
More dangerous than he looks, Slacka-slash can beat his foes with only a single slice.

007: Mochismo



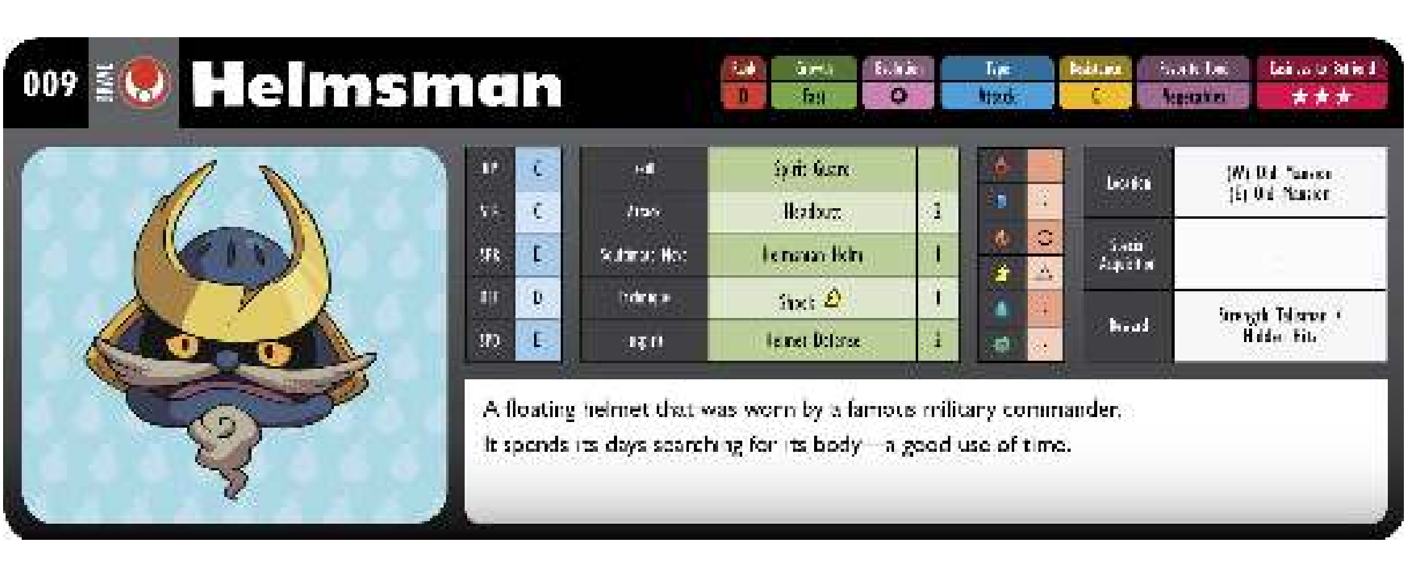
He's cute most of the time, but when he's mad, his body cracks and his manly face pops out.

008: Minochi



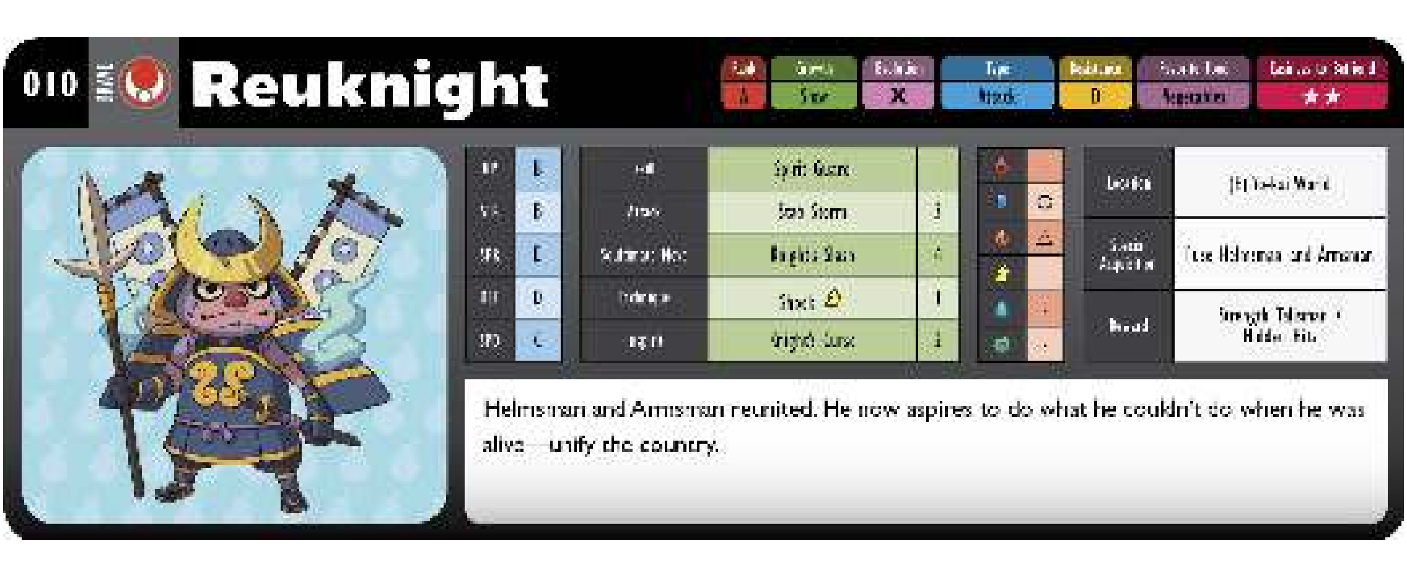
When he's in love, he gets overly protective about his partner. He can make you a very jealous person.

009: Helmsman



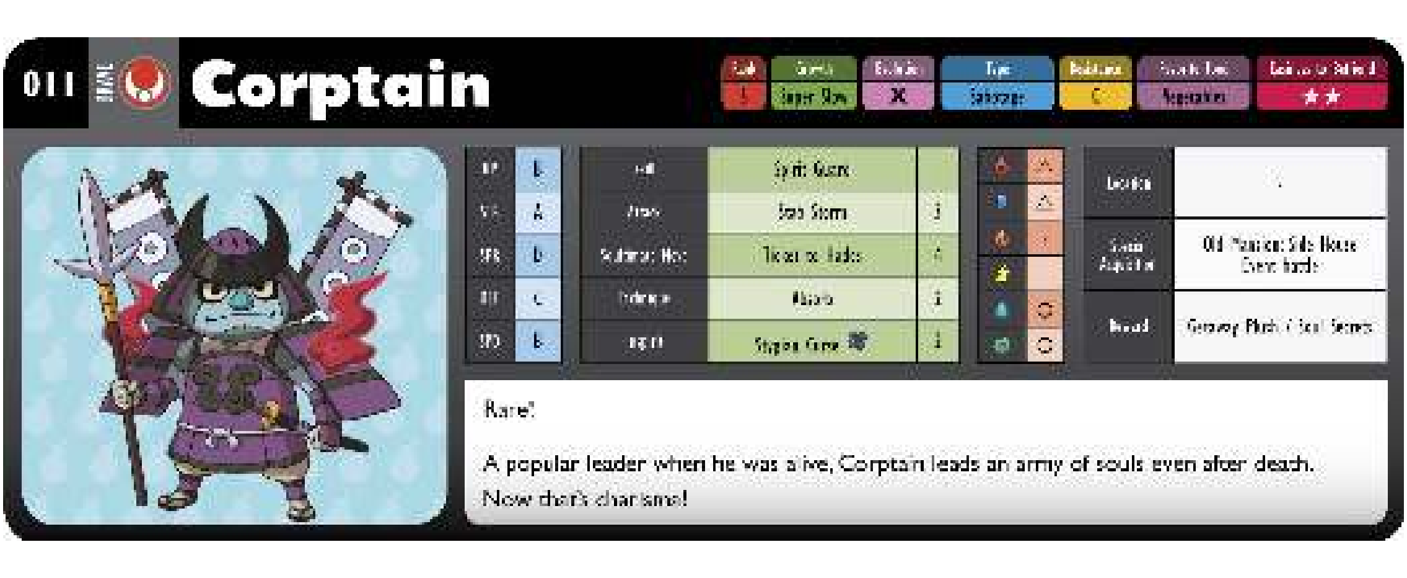
A floating helmet that was worn by a famous military commander. It spends its days searching for its body—a good use of time.

010: Reuknight



Helmsman and Armsman reunited. He now aspires to do what he couldn't do when he was alive—unify the country.

011: Corptain



Rare!

A popular leader when he was alive, Corptain leads an army of souls even after death. Now that's charisma!

Food

Food recovers HP and Soul Gauge, while also making it easier for you to befriend the Yo-kai you fight. Generally, items that restore a lot of HP or Soul Gauge also have large Affection Boosts. When you feed a Yo-kai its favorite type of food, the effects will be boosted. But even giving it a food it dislikes will still help you more than giving it nothing. Refer to the Yo-kai Medallium chapter to find out which foods certain Yo-kai like best.

Items

There are numerous items that assist in your adventures. Many items power up Yo-kai, some can be sold for a lot of money, while coins can be used in the Crank-a-kai machine three times a day to receive prizes. Many of these items can be found in treasure chests.

Wisps, which become available in chapter 3, have a chance of dropping most items in the game. Once a player acquires an item, Wisps may drop that item. They may also be found in chests and Terror Time.

Shops

There are various shops in town. Here, you'll find lists that show you their business hours and outline what each shop sells.

Sell Items at Everymart

When you want to sell leftover items, go to Everymart. They'll buy anything, aside from animals. If you want to get rid of living things, you can take them to the Jungle Hunter and sell them or exchange them for items that you can sell instead. Everymart even buys items that are sold at other shops—usually buying them for 1/5th their sale price.
